Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

pkts_connect_passthru

Description Connect Passthru Packets

Type: number

Format: counter

pkts_ofo

Description Out-Of-Order Packets

Type: number

Format: counter

pkts_retrans

Description TCP Retransmit

Type: number

Format: counter

pkts_retrans_fin

Description TCP Retransmit FIN

Type: number

Format: counter

pkts_retrans_push

Description TCP Retransmit PSH

Type: number

Format: counter

pkts_retrans_rst

Description TCP Retransmit RST

Type: number

Format: counter

policy_drop

Description Policy Dropped

Type: number

Format: counter

policy_violation

Description Policy Violation

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_syn_rate_exceed

Description TCP SYN Rate Exceeded

Type: number

Format: counter

port_synack_rate_exceed

Description TCP SYNACK Rate Exceeded

Type: number

Format: counter

processed

Description Packets Processed

Type: number

Format: counter

prog_conn_exceed_bl

Description Connection: Violation Exceed Blacklisted

Type: number

Format: counter

prog_conn_exceed_drop

Description Connection: Violation Exceed Dropped

Type: number

Format: counter

prog_conn_exceed_reset

Description Connection: Violation Exceed Reset

Type: number

Format: counter

prog_conn_rcvd_exceed

Description Connection: Received Exceed

Type: number

Format: counter

prog_conn_rcvd_sent_ratio_exceed

Description Connection: Reveived to Sent Ratio Exceed

Type: number

Format: counter

prog_conn_samples

Description Sample Collected: Connection

Type: number

Format: counter

prog_conn_samples_processed

Description Sample Processed: Connnection

Type: number

Format: counter

prog_conn_sent_exceed

Description Connection: Sent Exceed

Type: number

Format: counter

prog_conn_time_exceed

Description Connection: Time Exceed

Type: number

Format: counter

prog_exceed_bl

Description Req-Resp: Violation Exceed Blacklisted

Type: number

Format: counter

prog_exceed_drop

Description Req-Resp: Violation Exceed Dropped

Type: number

Format: counter

prog_exceed_reset

Description Req-Resp: Violation Exceed Reset

Type: number

Format: counter

prog_first_req_time_exceed

Description Req-Resp: First Request Time Exceed

Type: number

Format: counter

prog_query_exceed

Description Req-Resp: Client Query Time Exceed

Type: number

Format: counter

prog_req_resp_time_exceed

Description Req-Resp: Request to Response Time Exceed

Type: number

Format: counter

prog_req_samples

Description Sample Collected: Res-Resp

Type: number

Format: counter

prog_req_samples_processed

Description Sample Processed: Req-Resp

Type: number

Format: counter

prog_request_len_exceed

Description Req-Resp: Request Length Exceed

Type: number

Format: counter

prog_resp_pkt_rate_exceed

Description Req-Resp: Response Packet Rate Exceed

Type: number

Format: counter

prog_resp_req_time_exceed

Description Req-Resp: Response to Request Time Exceed

Type: number

Format: counter

prog_response_len_exceed

Description Req-Resp: Response Length Exceed

Type: number

Format: counter

prog_think_exceed

Description Req-Resp: Server Think Time Exceed

Type: number

Format: counter

prog_win_exceed_bl

Description Time Window: Violation Exceed Blacklisted

Type: number

Format: counter

prog_win_exceed_drop

Description Time Window: Violation Exceed Dropped

Type: number

Format: counter

prog_win_exceed_reset

Description Time Window: Violation Exceed Reset

Type: number

Format: counter

prog_win_rcvd_exceed

Description Time Window: Received Exceed

Type: number

Format: counter

prog_win_rcvd_sent_ratio_exceed

Description Time Window: Received to Sent Exceed

Type: number

Format: counter

prog_win_samples

Description Sample Collected: Time Window

Type: number

Format: counter

prog_win_samples_processed

Description Sample Processed: Time Window

Type: number

Format: counter

prog_win_sent_exceed

Description Time Window: Sent Exceed

Type: number

Format: counter

referer_filter_blacklist

Description Referer Filter Blacklisted

Type: number

Format: counter

referer_filter_match

Description Referer Filter Match

Type: number

Format: counter

req

Description Request Total

Type: number

Format: counter

req_connect

Description Request Method CONNECT

Type: number

Format: counter

req_content_len

Description Request Content Length Received

Type: number

Format: counter

req_delete

Description Request Method DELETE

Type: number

Format: counter

req_get

Description Request Method GET

Type: number

Format: counter

req_head

Description Request Method HEAD

Type: number

Format: counter

req_http10

Description Request HTTP 1.0

Type: number

Format: counter

req_http11

Description Request HTTP 1.1

Type: number

Format: counter

req_ofo

Description Out-Of-Order Request

Type: number

Format: counter

req_options

Description Request Method OPTIONS

Type: number

Format: counter

req_post

Description Request Method POST

Type: number

Format: counter

req_put

Description Request Method PUT

Type: number

Format: counter

req_retran

Description Request Retransmit

Type: number

Format: counter

req_sz_16k

Description Request Payload Size Less Than or Equal to 16K

Type: number

Format: counter

req_sz_1k

Description Request Payload Size Less Than or Equal to 1K

Type: number

Format: counter

req_sz_256k

Description Request Payload Size Less Than or Equal to 256K

Type: number

Format: counter

req_sz_2k

Description Request Payload Size Less Than or Equal to 2K

Type: number

Format: counter

req_sz_32k

Description Request Payload Size Less Than or Equal to 32K

Type: number

Format: counter

req_sz_4k

Description Request Payload Size Less Than or Equal to 4K

Type: number

Format: counter

req_sz_64k

Description Request Payload Size Less Than or Equal to 64K

Type: number

Format: counter

req_sz_8k

Description Request Payload Size Less Than or Equal to 8K

Type: number

Format: counter

req_sz_gt_256k

Description Request Payload Size Larger Than 256K

Type: number

Format: counter

req_trace

Description Request Method TRACE

Type: number

Format: counter

req_unknown

Description Request Method UNKNOWN

Type: number

Format: counter

resp_code_1xx

Description HTTP Status Code 1XX

Type: number

Format: counter

resp_code_2xx

Description HTTP Status Code 2XX

Type: number

Format: counter

resp_code_3xx

Description HTTP Status Code 3XX

Type: number

Format: counter

resp_code_4xx

Description HTTP Status Code 4XX

Type: number

Format: counter

resp_code_5xx

Description HTTP Status Code 5XX

Type: number

Format: counter

resp_code_other

Description HTTP Status Code OTHER

Type: number

Format: counter

resp_mib_chunk_bad

Description Bad HTTP Response Chunk

Type: number

Format: counter

retransmit_excd

Description Retransmit Exceeded

Type: number

Format: counter

rsp_chunk

Description Response Chunk

Type: number

Format: counter

rst_cookie_fail

Description RST Cookie Failed

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Format: counter

slow_post

Description Slow Post

Type: number

Format: counter

small_window_excd

Description Small-Window Exceeded

Type: number

Format: counter

small_window_rcv

Description Small-Window Receive

Type: number

Format: counter

snat_fail

Description Source NAT Failure

Type: number

Format: counter

src_ack_auth_fail

Description Src ACK Retry Dropped

Type: number

Format: counter

src_ack_retry_blacklist

Description Src ACK Retry Timeout Blacklisted

Type: number

Format: counter

src_ack_retry_gap_drop

Description Src ACK Retry Retry-Gap Dropped

Type: number

Format: counter

src_ack_retry_init

Description Src ACK Retry Init

Type: number

Format: counter

src_ack_retry_reset

Description Src ACK Retry Timeout Reset

Type: number

Format: counter

src_ack_retry_rto_fail

Description Src ACK Retry RTO Dropped

Type: number

Format: counter

src_ack_retry_rto_pass

Description Src ACK Retry RTO Passed

Type: number

Format: counter

src_ack_retry_rto_progress

Description Src ACK Retry RTO Progress

Type: number

Format: counter

src_ack_retry_timeout

Description Src ACK Retry Timeout

Type: number

Format: counter

src_auth_drop

Description Src TCP Auth Dropped

Type: number

Format: counter

src_auth_drop_ack

Description Src TCP Auth Dropped: ACK

Type: number

Format: counter

src_auth_drop_ack_fail_auth

Description Src TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

src_auth_drop_ack_pass_auth

Description Src TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

src_auth_drop_ack_xmit

Description Src TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

src_auth_drop_rst

Description Src TCP Auth Dropped: RST

Type: number

Format: counter

src_auth_drop_rst_fail_auth

Description Src TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

src_auth_drop_rst_pass_auth

Description Src TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

src_auth_drop_rst_xmit

Description Src TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

src_auth_drop_syn

Description Src TCP Auth Dropped: SYN

Type: number

Format: counter

src_challenge_js_fail

Description Src Challenge Javascript Failed

Type: number

Format: counter

src_challenge_ud_fail

Description Src Challenge URL Redirect Failed

Type: number

Format: counter

src_conn_ofo_rate_excd

Description Src TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

src_conn_pkt_rate_excd

Description Src TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

src_conn_rexmit_rate_excd

Description Src TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

src_conn_zwindow_rate_excd

Description Src TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

src_create_conn_non_syn_dropped

Description Src Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

src_dos_policy_violation

Description Src Policy Violation

Type: number

Format: counter

src_drop

Description Src Packets Dropped

Type: number

Format: counter

src_filter1_match

Description Src Filter1 Match

Type: number

Format: counter

src_filter2_match

Description Src Filter2 Match

Type: number

Format: counter

src_filter3_match

Description Src Filter3 Match

Type: number

Format: counter

src_filter4_match

Description Src Filter4 Match

Type: number

Format: counter

src_filter5_match

Description Src Filter5 Match

Type: number

Format: counter

src_filter_action_blacklist

Description Src Filter Action Blacklist

Type: number

Format: counter

src_filter_action_default_pass

Description Src Filter Action Default Pass

Type: number

Format: counter

src_filter_action_drop

Description Src Filter Action Drop

Type: number

Format: counter

src_filter_action_whitelist

Description Src Filter Action WL

Type: number

Format: counter

src_filter_auth_fail

Description Src Filter Auth Failed

Type: number

Format: counter

src_filter_none_match

Description Src Filter No Match

Type: number

Format: counter

src_filter_total_not_match

Description Src Filter Not Matched on Pkt

Type: number

Format: counter

src_frag_drop

Description Src Fragmented Packets Dropped

Type: number

Format: counter

src_header_filter10_drop

Description Src Filter10 Match Dropped

Type: number

Format: counter

src_header_filter10_match

Description Src Filter10 Match

Type: number

Format: counter

src_header_filter1_drop

Description Src Filter1 Match Dropped

Type: number

Format: counter

src_header_filter1_match

Description Src Filter1 Match

Type: number

Format: counter

src_header_filter2_drop

Description Src Filter2 Match Dropped

Type: number

Format: counter

src_header_filter2_match

Description Src Filter2 Match

Type: number

Format: counter

src_header_filter3_drop

Description Src Filter3 Match Dropped

Type: number

Format: counter

src_header_filter3_match

Description Src Filter3 Match

Type: number

Format: counter

src_header_filter4_drop

Description Src Filter4 Match Dropped

Type: number

Format: counter

src_header_filter4_match

Description Src Filter4 Match

Type: number

Format: counter

src_header_filter5_drop

Description Src Filter5 Match Dropped

Type: number

Format: counter

src_header_filter5_match

Description Src Filter5 Match

Type: number

Format: counter

src_header_filter6_drop

Description Src Filter6 Match Dropped

Type: number

Format: counter

src_header_filter6_match

Description Src Filter6 Match

Type: number

Format: counter

src_header_filter7_drop

Description Src Filter7 Match Dropped

Type: number

Format: counter

src_header_filter7_match

Description Src Filter7 Match

Type: number

Format: counter

src_header_filter8_drop

Description Src Filter8 Match Dropped

Type: number

Format: counter

src_header_filter8_match

Description Src Filter8 Match

Type: number

Format: counter

src_header_filter9_drop

Description Src Filter9 Match Dropped

Type: number

Format: counter

src_header_filter9_match

Description Src Filter9 Match

Type: number

Format: counter

src_header_filter_action_blacklist

Description Src Filter Action Blacklist

Type: number

Format: counter

src_header_filter_action_default_pass

Description Src Filter Action Default Pass

Type: number

Format: counter

src_header_filter_action_drop

Description Src Filter Action Drop

Type: number

Format: counter

src_header_filter_action_whitelist

Description Src Filter Action Whitelist

Type: number

Format: counter

src_header_filter_match

Description Src Filter Total Match

Type: number

Format: counter

src_header_filter_none_match

Description Src Filter No Match

Type: number

Format: counter

src_header_filter_not_match

Description Src Filter Not Matched on Pkt

Type: number

Format: counter

src_http_auth_drop

Description Src HTTP Auth Dropped

Type: number

Format: counter

src_js_challenge_sent

Description Src Challenge Javascript Sent

Type: number

Format: counter

src_out_of_seq_excd

Description Src Out-Of-Seq Exceeded

Type: number

Format: counter

src_policy_drop

Description Src Policy Dropped

Type: number

Format: counter

src_post_rate_exceed

Description Src Post Rate Exceeded

Type: number

Format: counter

src_req_rate_exceed

Description Src Request Rate Exceeded

Type: number

Format: counter

src_retransmit_excd

Description Src Retransmit Exceeded

Type: number

Format: counter

src_rst_cookie_fail

Description Src RST Cookie Failed

Type: number

Format: counter

src_small_window_excd

Description Src Small-Window Exceeded

Type: number

Format: counter

src_syn_auth_fail

Description Src SYN Auth Failed

Type: number

Format: counter

src_syn_cookie_fail

Description Src SYN Cookie Failed

Type: number

Format: counter

src_syn_cookie_sent

Description Src SYN Cookie Sent

Type: number

Format: counter

src_syn_rate_exceed

Description Src TCP SYN Rate Exceeded

Type: number

Format: counter

src_syn_retry_blacklist

Description Src SYN Retry Timeout Blacklisted

Type: number

Format: counter

src_syn_retry_failed

Description Src SYN Retry Dropped

Type: number

Format: counter

src_syn_retry_gap_drop

Description Src SYN Retry-Gap Dropped

Type: number

Format: counter

src_syn_retry_init

Description Src SYN Retry Init

Type: number

Format: counter

src_syn_retry_reset

Description Src SYN Retry Timeout Reset

Type: number

Format: counter

src_syn_retry_rto_fail

Description Src SYN Retry RTO Dropped

Type: number

Format: counter

src_syn_retry_rto_pass

Description Src SYN Retry RTO Passed

Type: number

Format: counter

src_syn_retry_rto_progress

Description Src SYN Retry RTO Progress

Type: number

Format: counter

src_syn_retry_timeout

Description Src SYN Retry Timeout

Type: number

Format: counter

src_tcp_auth_rst

Description Src TCP Auth Reset

Type: number

Format: counter

src_ud_challenge_sent

Description Src Challenge URL Redirect Sent

Type: number

Format: counter

src_unauth_drop

Description Src TCP Unauth Dropped

Type: number

Format: counter

src_well_known_port

Description Src TCP SrcPort Wellknown

Type: number

Format: counter

src_zero_window_excd

Description Src Zero-Window Exceeded

Type: number

Format: counter

syn_auth_fail

Description SYN Auth Failed

Type: number

Format: counter

syn_auth_pass

Description SYN Auth Passed

Type: number

Format: counter

syn_auth_rst_ack_drop

Description SYN Auth RST-ACK Dropped

Type: number

Format: counter

syn_cookie_fail

Description SYN Cookie Failed

Type: number

Format: counter

syn_cookie_sent

Description SYN Cookie Sent

Type: number

Format: counter

syn_drop

Description SYN Dropped

Type: number

Format: counter

syn_retry_blacklist

Description SYN Retry Timeout Blacklisted

Type: number

Format: counter

syn_retry_failed

Description SYN Retry Dropped

Type: number

Format: counter

syn_retry_gap_drop

Description SYN Retry-Gap Dropped

Type: number

Format: counter

syn_retry_init

Description SYN Retry Init

Type: number

Format: counter

syn_retry_pass

Description SYN Retry Passed

Type: number

Format: counter

syn_retry_reset

Description SYN Retry Timeout Reset

Type: number

Format: counter

syn_retry_rto_fail

Description SYN Retry RTO Dropped

Type: number

Format: counter

syn_retry_rto_pass

Description SYN Retry RTO Passed

Type: number

Format: counter

syn_retry_rto_progress

Description SYN Retry RTO Progress

Type: number

Format: counter

syn_retry_timeout

Description SYN Retry Timeout

Type: number

Format: counter

syn_tfo_rcv

Description SYN TFO Received

Type: number

Format: counter

synack_multiple_attempts_per_ip_detected

Description SYNACK Multiple Attempts Per IP Detected

Type: number

Format: counter

synack_reset_sent

Description SYNACK Reset Sent

Type: number

Format: counter

tcp_ack_data_drop

Description TCP ACK with Data Dropped

Type: number

Format: counter

tcp_ack_data_fwd

Description TCP ACK with Data Forward

Type: number

Format: counter

tcp_ack_data_rcvd

Description TCP ACK with Data Received

Type: number

Format: counter

tcp_ack_drop

Description TCP ACK Dropped

Type: number

Format: counter

tcp_ack_fwd

Description TCP ACK Forward

Type: number

Format: counter

Format: counter

tcp_filter4_match

Description Filter4 Match

Type: number

Format: counter

tcp_filter5_match

Description Filter5 Match

Type: number

Format: counter

tcp_filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

tcp_filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

tcp_filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

tcp_filter_action_whitelist

Description Filter Action WL

Type: number

Format: counter

tcp_filter_none_match

Description Filter No Match

Type: number

Format: counter

tcp_filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

tcp_fin_ack_drop

Description TCP FIN ACK Dropped

Type: number

Format: counter

tcp_fin_ack_fwd

Description TCP FIN ACK Forward

Type: number

Format: counter

tcp_fin_ack_rcvd

Description TCP FIN ACK Received

Type: number

Format: counter

tcp_fin_drop

Description TCP FIN Dropped

Type: number

Format: counter

tcp_fin_fwd

Description TCP FIN Forward

Type: number

Format: counter

tcp_fin_psh_ack_drop

Description TCP FIN PSH ACK Drop

Type: number

Format: counter

tcp_fin_psh_ack_fwd

Description TCP FIN PSH ACK Forward

Type: number

Format: counter

tcp_fin_psh_ack_rcvd

Description TCP FIN PSH ACK Received

Type: number

Format: counter

tcp_fin_rcvd

Description TCP FIN Received

Type: number

Format: counter

tcp_psh_ack_drop

Description TCP PSH ACK Dropped

Type: number

Format: counter

tcp_psh_ack_fwd

Description TCP PSH ACK Forward

Type: number

Format: counter

tcp_psh_ack_rcvd

Description TCP PSH ACK Received

Type: number

Format: counter

tcp_psh_drop

Description TCP PSH Dropped

Type: number

Format: counter

tcp_psh_fwd

Description TCP PSH Forward

Type: number

Format: counter

tcp_psh_rcvd

Description TCP PSH Received

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP SYN Retransmit Exceeded Blacklist

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP SYN Retransmit Exceeded Drop

Type: number

Format: counter

tcp_rst_ack_drop

Description TCP RST ACK Dropped

Type: number

Format: counter

tcp_rst_ack_fwd

Description TCP RST ACK Forward

Type: number

Format: counter

tcp_rst_ack_rcvd

Description TCP RST ACK Received

Type: number

Format: counter

tcp_rst_drop

Description TCP RST Dropped

Type: number

Format: counter

tcp_rst_fwd

Description TCP RST Forward

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Format: counter

tcp_syn_ack_drop

Description TCP SYN ACK Dropped

Type: number

Format: counter

tcp_syn_ack_fwd

Description TCP SYN ACK Forward

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_fwd

Description SYN Forward

Type: number

Format: counter

tcp_syn_rcvd

Description TCP Inbound SYN Received

Type: number

Format: counter

tcp_urg_drop

Description TCP URG Dropped

Type: number

Format: counter

tcp_urg_fwd

Description TCP URG Forward

Type: number

Format: counter

tcp_urg_rcvd

Description TCP URG Received

Type: number

Format: counter

too_many_headers

Description HTTP Header Too Many

Type: number

Format: counter

ud_challenge_failed

Description Challenge URL Redirect Failed

Type: number

Format: counter

ud_challenge_sent

Description Challenge URL Redirect Sent

Type: number

Format: counter

unauth_drop

Description TCP Unauth Dropped

Type: number

Format: counter

uri_filter_match

Description URI Filter Match

Type: number

Format: counter

use_hdr_src_ip

Description Use IP In Header As Src

Type: number

Format: counter

user_agent_filter_blacklist

Description Agent Filter Blacklisted

Type: number

Format: counter

user_agent_filter_match

Description Agent Filter Match

Type: number

Format: counter

wellknown_sport_drop

Description TCP SrcPort Wellknown

Type: number

Format: counter

window_small

Description Window Size Small

Type: number

Format: counter

window_small_drop

Description Window Size Small Dropped

Type: number

Format: counter

zero_window_excd

Description Zero-Window Exceeded

Type: number

Format: counter

2.33.346 ddos http-zone-port stats

Statistics for the object http-zone-port

http-zone-port Specification

Parameter	Value
Type	*Collection*
Collection Name	*http-zone-port-list*
Collection URI	/axapi/v3/ddos/http-zone-port
Element Name	http-zone-port
Element URI	/axapi/v3/ddos/http-zone-port/stats
Element Attributes	http-zone-port_attributes
Partition Visibility	None
Schema	`http-zone-port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/http-zone-port

http-zone-port attributes

Create List

POST

/axapi/v3/ddos/http-zone-port

http-zone-port attributes

Get Object

GET

/axapi/v3/ddos/http-zone-port/stats

http-zone-port attributes

Get List

GET

/axapi/v3/ddos/http-zone-port

http-zone-port-list

Modify Object

POST

/axapi/v3/ddos/http-zone-port/stats

http-zone-port attributes

Replace Object

PUT

/axapi/v3/ddos/http-zone-port/stats

http-zone-port attributes

Replace List

PUT

/axapi/v3/ddos/http-zone-port

http-zone-port-list

Delete Object

DELETE

/axapi/v3/ddos/http-zone-port/stats

http-zone-port attributes

http-zone-port-list

http-zone-port-list is **JSON List** of *http-zone-port attributes*

```
http-zone-port-list : [
        { http-zone-port attributes },
        { http-zone-port attributes },
        ...
    ]
```

http-zone-port attributes

stats

Description: stats is a **JSON Block**. Please see below for *stats*

Type: Object

stats

Specification	Value
Type	*object*

ack_auth_fail

Description ACK Retry Dropped

Type: number

Format: counter

ack_retry_blacklist

Description ACK Retry Timeout Blacklisted

Type: number

Format: counter

ack_retry_gap_drop

Description ACK Retry Retry-Gap Dropped

Type: number

Format: counter

ack_retry_init

Description ACK Retry Init

Type: number

Format: counter

ack_retry_pass

Description ACK Retry Passed

Type: number

Format: counter

ack_retry_reset

Description ACK Retry Timeout Reset

Type: number

Format: counter

ack_retry_rto_fail

Description ACK Retry RTO Dropped

Type: number

Format: counter

ack_retry_rto_pass

Description ACK Retry RTO Passed

Type: number

Format: counter

ack_retry_rto_progress

Description ACK Retry RTO Progress

Type: number

Format: counter

ack_retry_timeout

Description ACK Retry Timeout

Type: number

Format: counter

all_src_session_reset

Description Session Reset for All Src Upon Level Escalation

Type: number

Format: counter

bl

Description Dst Blacklisted

Type: number

Format: counter

challenge_failed

Description Challenge Failed

Type: number

Format: counter

chunk_bad

Description Bad Payload Chunk

Type: number

Format: counter

chunk_sz_1k

Description Payload Chunk Size Less Than or Equal to 1K

Type: number

Format: counter

chunk_sz_2k

Description Payload Chunk Size Less Than or Equal to 2K

Type: number

Format: counter

chunk_sz_4k

Description Payload Chunk Size Less Than or Equal to 4K

Type: number

Format: counter

chunk_sz_512

Description Payload Chunk Size Less Than or Equal to 512

Type: number

Format: counter

chunk_sz_gt_4k

Description Payload Chunk Size Larger Than 4K

Type: number

Format: counter

clear_session_upon_deescalation

Description Clear Session Upon De-escalation to Level 0

Type: number

Format: counter

client_rst

Description Client TCP RST Received

Type: number

Format: counter

conn_close

Description Connections Closed

Type: number

Format: counter

conn_close_half_open

Description Half Open Connections Closed

Type: number

Format: counter

conn_close_w_fin

Description FIN Connections Closed

Type: number

Format: counter

conn_close_w_idle

Description Idle Connections Closed

Type: number

Format: counter

conn_close_w_rst

Description RST Connections Closed

Type: number

Format: counter

conn_create_from_ack

Description Connections Created From ACK

Type: number

Format: counter

conn_create_from_syn

Description Connections Created From SYN

Type: number

Format: counter

conn_create_from_synack

Description Connections Created From SYNACK

Type: number

Format: counter

conn_ofo_rate_excd

Description TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

conn_prate_excd

Description TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

conn_rexmit_rate_excd

Description TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

conn_zwindow_rate_excd

Description TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

content_length_too_long

Description Malform Content Length Too Long

Type: number

Format: counter

create_conn_non_syn_dropped

Description Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

current_es_level

Description Current Escalation Level

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

dst_hw_drop_inserted

Description Dst Hardware Drop Rules Inserted

Type: number

Format: counter

dst_hw_drop_removed

Description Dst Hardware Drop Rules Removed

Type: number

Format: counter

dst_post_rate_exceed

Description Dst Post Rate Exceeded

Type: number

Format: counter

dst_req_rate_exceed

Description Dst Request Rate Exceeded

Type: number

Format: counter

dst_resp_rate_exceed

Description Dst Response Rate Exceeded

Type: number

Format: counter

dst_tcp_conn_half_open_timeout

Description Half Open Connections Timeout

Type: number

Format: counter

dst_tcp_conn_half_open_timeout_rst_sent

Description Half Open Connections Timeout RST Sent

Type: number

Format: counter

dst_tcp_sess_aged_rst_sent

Description Sessions Aged Out RST Sent

Type: number

Format: counter

dynamic_count_warn

Description dynamic-entry-count warning send

Type: number

Format: counter

er_condition

Description Error Condition

Type: number

Format: counter

ew_inbound_port_byte_drop

Description East-West Inbound Bytes Dropped

Type: number

Format: counter

ew_inbound_port_byte_rcv

Description East-West Inbound Bytes Recevied

Type: number

Format: counter

ew_inbound_port_byte_sent

Description East-West Inbound Bytes Forwarded

Type: number

Format: counter

ew_inbound_port_drop

Description East-West Inbound Packets Dropped

Type: number

Format: counter

ew_inbound_port_rcv

Description East-West Inbound Packets Received

Type: number

Format: counter

ew_inbound_port_sent

Description East-West Inbound Packets Forwarded

Type: number

Format: counter

ew_outbound_port_byte_drop

Description East-West Outbound Bytes Forwarded

Type: number

Format: counter

ew_outbound_port_byte_rcv

Description East-West Outbound Bytes Recevied

Type: number

Format: counter

ew_outbound_port_byte_sent

Description East-West Outbound Bytes Dropped

Type: number

Format: counter

ew_outbound_port_drop

Description East-West Outbound Packets Dropped

Type: number

Format: counter

ew_outbound_port_rcv

Description East-West Outbound Packets Received

Type: number

Format: counter

ew_outbound_port_sent

Description East-West Outbound Packets Forwarded

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

fail_alloc

Description Alloc Failed

Type: number

Format: counter

fail_alloc_hdr

Description Alloc Header Failed

Type: number

Format: counter

fail_get_line

Description Get Line Failed

Type: number

Format: counter

filter10_drop

Description Filter10 Match Dropped

Type: number

Format: counter

filter10_match

Description Filter10 Match

Type: number

Format: counter

filter1_drop

Description Filter1 Match Dropped

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_drop

Description Filter2 Match Dropped

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_drop

Description Filter3 Match Dropped

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_drop

Description Filter4 Match Dropped

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_drop

Description Filter5 Match Dropped

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter6_drop

Description Filter6 Match Dropped

Type: number

Format: counter

filter6_match

Description Filter6 Match

Type: number

Format: counter

filter7_drop

Description Filter7 Match Dropped

Type: number

Format: counter

filter7_match

Description Filter7 Match

Type: number

Format: counter

filter8_drop

Description Filter8 Match Dropped

Type: number

Format: counter

filter8_match

Description Filter8 Match

Type: number

Format: counter

filter9_drop

Description Filter9 Match Dropped

Type: number

Format: counter

filter9_match

Description Filter9 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action Whitelist

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_match

Description Filter Total Match

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

header_name_too_long

Description Header Name Too Long

Type: number

Format: counter

header_processing_incomplete

Description Header Process Incomplete

Type: number

Format: counter

header_processing_time_0

Description Header Process Time Less Than 1s

Type: number

Format: counter

header_processing_time_1

Description Header Process Time Less Than 10s

Type: number

Format: counter

header_processing_time_2

Description Header Process Time Less Than 30S

Type: number

Format: counter

header_processing_time_3

Description Header Process Time Larger or Equal to 30s

Type: number

Format: counter

http_auth_drop

Description HTTP Auth Dropped

Type: number

Format: counter

http_auth_resp

Description HTTP Auth Responded

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

Format: counter

hybrid_auth_auth_no_match_rst_rcv

Description SYN Auth Hybrid Auth No Match Drop: RST Received

Type: number

Format: counter

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

idle_timeout

Description Idle Timeout

Type: number

Format: counter

invalid_hdr_name

Description HTTP Header Name Invalid

Type: number

Format: counter

invalid_hdr_val

Description HTTP Header Value Invalid

Type: number

Format: counter

invalid_header

Description HTTP Header Invalid

Type: number

Format: counter

ip_filtering_bl

Description IP Filtering Policy: Blacklisted

Type: number

Format: counter

ip_filtering_drop

Description IP Filtering Policy: Dropped

Type: number

Format: counter

js_challenge_failed

Description Challenge Javascript Failed

Type: number

Format: counter

js_challenge_sent

Description Challenge Javascript Sent

Type: number

Format: counter

less_than_mss_exceed

Description Min Payload Size Fail Exceeded

Type: number

Format: counter

line_too_long

Description Line Too Long

Type: number

Format: counter

negative_req_remain

Description Negative Request Remain

Type: number

Format: counter

negative_resp_remain

Description Negative Response Remain

Type: number

Format: counter

new_syn

Description TCP SYN

Type: number

Format: counter

no_policy_class_list_match

Description No Policy Class-list Match

Type: number

Format: counter

no_route_drop

Description No Route Dropped

Type: number

Format: counter

ofo_queue_sz_exceed

Description Out-Of-Order Queue Exceeded

Type: number

Format: counter

ofo_timer_expired

Description Out-Of-Order Timeout

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

parse_bad_chunk

Description Malform Bad Chunk

Type: number

Format: counter

parse_header_name_too_long

Description Malform Header Name Too Long

Type: number

Format: counter

parse_line_too_long

Description Malform Line Too Long

Type: number

Format: counter

parse_req_line_invalid_method

Description Malform Request Line Invalid Method

Type: number

Format: counter

parse_req_line_too_long

Description Malform Request Line Too Long

Type: number

Format: counter

parse_req_line_too_small

Description Malform Request Line Too Small

Type: number

Format: counter

parse_too_many_headers

Description Malform Too Many Headers

Type: number

Format: counter

parsereq_fail

Description Parse Request Failed

Type: number

Format: counter

partial_header

Description Partial Header

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

pkts_connect_passthru

Description Connect Passthru Packets

Type: number

Format: counter

pkts_ofo

Description Out-Of-Order Packets

Type: number

Format: counter

pkts_retrans

Description TCP Retransmit

Type: number

Format: counter

pkts_retrans_fin

Description TCP Retransmit FIN

Type: number

Format: counter

pkts_retrans_push

Description TCP Retransmit PSH

Type: number

Format: counter

pkts_retrans_rst

Description TCP Retransmit RST

Type: number

Format: counter

policy_drop

Description Policy Dropped

Type: number

Format: counter

policy_violation

Description Policy Violation

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_src_escalation

Description Src Escalation

Type: number

Format: counter

port_syn_rate_exceed

Description TCP SYN Rate Exceeded

Type: number

Format: counter

port_synack_rate_exceed

Description TCP SYNACK Rate Exceeded

Type: number

Format: counter

processed

Description Packets Processed

Type: number

Format: counter

prog_conn_exceed_bl

Description Connection: Violation Exceed Blacklisted

Type: number

Format: counter

prog_conn_exceed_drop

Description Connection: Violation Exceed Dropped

Type: number

Format: counter

prog_conn_exceed_reset

Description Connection: Violation Exceed Reset

Type: number

Format: counter

prog_conn_rcvd_exceed

Description Connection: Received Exceed

Type: number

Format: counter

prog_conn_rcvd_sent_ratio_exceed

Description Connection: Reveived to Sent Ratio Exceed

Type: number

Format: counter

prog_conn_samples

Description Sample Collected: Connection

Type: number

Format: counter

prog_conn_samples_processed

Description Sample Processed: Connnection

Type: number

Format: counter

prog_conn_sent_exceed

Description Connection: Sent Exceed

Type: number

Format: counter

prog_conn_time_exceed

Description Connection: Time Exceed

Type: number

Format: counter

prog_exceed_bl

Description Req-Resp: Violation Exceed Blacklisted

Type: number

Format: counter

prog_exceed_drop

Description Req-Resp: Violation Exceed Dropped

Type: number

Format: counter

prog_exceed_reset

Description Req-Resp: Violation Exceed Reset

Type: number

Format: counter

prog_first_req_time_exceed

Description Req-Resp: First Request Time Exceed

Type: number

Format: counter

prog_query_exceed

Description Req-Resp: Client Query Time Exceed

Type: number

Format: counter

prog_req_resp_time_exceed

Description Req-Resp: Request to Response Time Exceed

Type: number

Format: counter

prog_req_samples

Description Sample Collected: Req-Resp

Type: number

Format: counter

prog_req_samples_processed

Description Sample Processed: Req-Resp

Type: number

Format: counter

prog_request_len_exceed

Description Req-Resp: Request Length Exceed

Type: number

Format: counter

prog_resp_pkt_rate_exceed

Description Req-Resp: Response Packet Rate Exceed

Type: number

Format: counter

prog_resp_req_time_exceed

Description Req-Resp: Response to Request Time Exceed

Type: number

Format: counter

prog_response_len_exceed

Description Req-Resp: Response Length Exceed

Type: number

Format: counter

prog_think_exceed

Description Req-Resp: Server Think Time Exceed

Type: number

Format: counter

prog_win_exceed_bl

Description Time Window: Violation Exceed Blacklisted

Type: number

Format: counter

prog_win_exceed_drop

Description Time Window: Violation Exceed Dropped

Type: number

Format: counter

prog_win_exceed_reset

Description Time Window: Violation Exceed Reset

Type: number

Format: counter

prog_win_rcvd_exceed

Description Time Window: Received Exceed

Type: number

Format: counter

prog_win_rcvd_sent_ratio_exceed

Description Time Window: Received to Sent Exceed

Type: number

Format: counter

prog_win_samples

Description Sample Collected: Time Window

Type: number

Format: counter

prog_win_samples_processed

Description Sample Processed: Time Window

Type: number

Format: counter

prog_win_sent_exceed

Description Time Window: Sent Exceed

Type: number

Format: counter

referer_filter_blacklist

Description Referer Filter Blacklisted

Type: number

Format: counter

referer_filter_match

Description Referer Filter Match

Type: number

Format: counter

req

Description Request Total

Type: number

Format: counter

req_connect

Description Request Method CONNECT

Type: number

Format: counter

req_content_len

Description Request Content Length Received

Type: number

Format: counter

req_delete

Description Request Method DELETE

Type: number

Format: counter

req_get

Description Request Method GET

Type: number

Format: counter

req_head

Description Request Method HEAD

Type: number

Format: counter

req_http10

Description Request HTTP 1.0

Type: number

Format: counter

req_http11

Description Request HTTP 1.1

Type: number

Format: counter

req_ofo

Description Out-Of-Order Request

Type: number

Format: counter

req_options

Description Request Method OPTIONS

Type: number

Format: counter

req_post

Description Request Method POST

Type: number

Format: counter

req_put

Description Request Method PUT

Type: number

Format: counter

req_retran

Description Request Retransmit

Type: number

Format: counter

req_sz_16k

Description Request Payload Size Less Than or Equal to 16K

Type: number

Format: counter

req_sz_1k

Description Request Payload Size Less Than or Equal to 1K

Type: number

Format: counter

req_sz_256k

Description Request Payload Size Less Than or Equal to 256K

Type: number

Format: counter

req_sz_2k

Description Request Payload Size Less Than or Equal to 2K

Type: number

Format: counter

req_sz_32k

Description Request Payload Size Less Than or Equal to 32K

Type: number

Format: counter

req_sz_4k

Description Request Payload Size Less Than or Equal to 4K

Type: number

Format: counter

req_sz_64k

Description Request Payload Size Less Than or Equal to 64K

Type: number

Format: counter

req_sz_8k

Description Request Payload Size Less Than or Equal to 8K

Type: number

Format: counter

req_sz_gt_256k

Description Request Payload Size Larger Than 256K

Type: number

Format: counter

req_trace

Description Request Method TRACE

Type: number

Format: counter

req_unknown

Description Request Method UNKNOWN

Type: number

Format: counter

resp_code_1xx

Description HTTP Status Code 1XX

Type: number

Format: counter

resp_code_2xx

Description HTTP Status Code 2XX

Type: number

Format: counter

resp_code_3xx

Description HTTP Status Code 3XX

Type: number

Format: counter

resp_code_4xx

Description HTTP Status Code 4XX

Type: number

Format: counter

resp_code_5xx

Description HTTP Status Code 5XX

Type: number

Format: counter

resp_code_other

Description HTTP Status Code OTHER

Type: number

Format: counter

resp_mib_chunk_bad

Description Bad HTTP Response Chunk

Type: number

Format: counter

retransmit_excd

Description Retransmit Exceeded

Type: number

Format: counter

rsp_chunk

Description Response Chunk

Type: number

Format: counter

rst_cookie_fail

Description RST Cookie Failed

Type: number

Format: counter

same_sport_dport_drop

Description Same Source and Destination Port Drop

Type: number

Format: counter

secondary_port_conn_limm_exceed

Description Per Addr-Port Conn Limit Exceeded

Type: number

Format: counter

secondary_port_conn_rate_exceed

Description Per Addr-Port Conn Rate Exceeded

Type: number

Format: counter

secondary_port_hit

Description Per Addr-Port Hit

Type: number

Format: counter

secondary_port_kbit_rate_exceed

Description Per Addr-Port KiBit Rate Exceeded

Type: number

Format: counter

secondary_port_kbit_rate_exceed_pkt

Description Per Addr-Port KiBit Rate Exceeded Count

Type: number

Format: counter

secondary_port_pkt_rate_exceed

Description Per Addr-Port Packet Rate Exceeded

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Format: counter

slow_post

Description Slow Post

Type: number

Format: counter

small_window_excd

Description Small-Window Exceeded

Type: number

Format: counter

small_window_rcv

Description Small-Window Receive

Type: number

Format: counter

snat_fail

Description Source NAT Failure

Type: number

Format: counter

src_ack_auth_fail

Description Src ACK Retry Dropped

Type: number

Format: counter

src_ack_retry_blacklist

Description Src ACK Retry Timeout Blacklisted

Type: number

Format: counter

src_ack_retry_gap_drop

Description Src ACK Retry Retry-Gap Dropped

Type: number

Format: counter

interface-http-health-check attributes

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable

Description 'enable': enable;

Type: string

Supported Values: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-filtering-policy-list is **JSON List** of *ip-filtering-policy attributes*

ip-filtering-policy-list : [

{ *ip-filtering-policy attributes* },

{ *ip-filtering-policy attributes* },

...

]

ip-filtering-policy attributes

name

Description DDOS ip-filtering-policy name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

no-rule-match-action

Description 'drop': Drop all the packets not meet any rule; 'permit': Forward all the packets not meet any rule (Default);

Type: string

Supported Values: drop, permit

Default: permit

rule-list

Type: List

Reference Object: */axapi/v3/ddos/ip-filtering-policy/{name}/rule/{seq}*

rule-statistics

Description 'enable': Enable;

Type: string

Supported Values: enable

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rule-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop the packet (default); 'permit': Skip afterword rules and continue other ddos process; 'blacklist': Blacklist source hosts with glid; 'bypass': Bypass all other ddos process rules and forward;

Type: string

Supported Values: drop, permit, blacklist, bypass

Default: drop

dst-ip

Description IPv4 Subnet address

Type: string

Format: ipv4-cidr

Mutual Exclusion: dst-ip, src-ipv6, and dst-ipv6 are mutually exclusive

dst-ipv6

Description IPv6 Subnet address

Type: string

Format: ipv6-address-plen

Mutual Exclusion: dst-ipv6, src-ip, and dst-ip are mutually exclusive

dst-port

Description Match only packets with the port number

Type: number

Range: 1-65535

Mutual Exclusion: dst-port and dst-port-start are mutually exclusive

dst-port-end

Description Ending Port Number

Type: number

Range: 1-65535

dst-port-start

Description Match only packets in the range of port numbers (Starting Port Number)

Type: number

Range: 1-65535

Mutual Exclusion: dst-port-start and dst-port are mutually exclusive

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

icmp-code

Description ICMP code

Type: number

Range: 0-255

icmp-type

Description ICMP message type

Type: number

Range: 0-255

proto-num

Description IP proto number

Type: number

Range: 0-255

protocol

Description 'tcp': TCP; 'udp': UDP; 'icmp-v4': ICMP; 'icmp-v6': ICMPv6; 'number': Specify IP protocol number;

Type: string

Supported Values: tcp, udp, icmp-v4, icmp-v6, number

seq

Description Sequence number

Type: number

Range: 1-200

src-ip

Description IPv4 Subnet address

Type: string

Format: ipv4-cidr

Mutual Exclusion: src-ip, src-ipv6, and dst-ipv6 are mutually exclusive

src-ipv6

Description IPv6 Subnet address

Type: string

Format: ipv6-address-plen

Mutual Exclusion: src-ipv6, src-ip, and dst-ip are mutually exclusive

src-port

Description Match only packets with the port number

Type: number

Range: 1-65535

Mutual Exclusion: src-port and src-port-start are mutually exclusive

src-port-end

Description Ending Port Number

Type: number

Range: 1-65535

src-port-start

Description Match only packets in the range of port numbers (Starting Port Number)

Type: number

Range: 1-65535

Mutual Exclusion: src-port-start and src-port are mutually exclusive

tcp-flag

Description 'match-all': not = 0 match = 1; 'none-of': not = 1 match = 0; 'match-any': not = 0 match = 0;

Type: string

Supported Values: match-all, none-of, match-any

tcp-flags-bitmask

Description Bitmask in Hex

Type: string

Format: time

Maximum Length: 255 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rule attributes

rule-list

rule-list is **JSON List** of *rule attributes*

rule-list : [

{ *rule attributes* },

{ *rule attributes* },

…

]

rule attributes

action

Description 'drop': Drop the packet (default); 'permit': Skip afterword rules and continue other ddos process; 'blacklist': Blacklist source hosts with glid; 'bypass': Bypass all other ddos process rules and forward;

Type: string

Supported Values: drop, permit, blacklist, bypass

Default: drop

dst-ip

Description IPv4 Subnet address

Type: string

Format: ipv4-cidr

Mutual Exclusion: dst-ip, src-ipv6, and dst-ipv6 are mutually exclusive

dst-ipv6

Description IPv6 Subnet address

Type: string

Format: ipv6-address-plen

Mutual Exclusion: dst-ipv6, src-ip, and dst-ip are mutually exclusive

dst-port

Description Match only packets with the port number

Type: number

Range: 1-65535

Mutual Exclusion: dst-port and dst-port-start are mutually exclusive

dst-port-end

Description Ending Port Number

Type: number

Range: 1-65535

dst-port-start

Description Match only packets in the range of port numbers (Starting Port Number)

Type: number

Range: 1-65535

Mutual Exclusion: dst-port-start and dst-port are mutually exclusive

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

icmp-code

Description ICMP code

Type: number

Range: 0-255

icmp-type

Description ICMP message type

Type: number

Range: 0-255

proto-num

Description IP proto number

Type: number

Range: 0-255

protocol

Description 'tcp': TCP; 'udp': UDP; 'icmp-v4': ICMP; 'icmp-v6': ICMPv6; 'number': Specify IP protocol number;

Type: string

Supported Values: tcp, udp, icmp-v4, icmp-v6, number

seq

Description Sequence number

Type: number

Range: 1-200

src-ip

Description IPv4 Subnet address

Type: string

Format: ipv4-cidr

Mutual Exclusion: src-ip, src-ipv6, and dst-ipv6 are mutually exclusive

src-ipv6

Description IPv6 Subnet address

Type: string

Format: ipv6-address-plen

Mutual Exclusion: src-ipv6, src-ip, and dst-ip are mutually exclusive

src-port

Description Match only packets with the port number

Type: number

Range: 1-65535

Mutual Exclusion: src-port and src-port-start are mutually exclusive

src-port-end

Description Ending Port Number

Type: number

Range: 1-65535

src-port-start

Description Match only packets in the range of port numbers (Starting Port Number)

Type: number

Range: 1-65535

Mutual Exclusion: src-port-start and src-port are mutually exclusive

tcp-flag

Description 'match-all': not = 0 match = 1; 'none-of': not = 1 match = 0; 'match-any': not = 0 match = 0;

Type: string

Supported Values: match-all, none-of, match-any

tcp-flags-bitmask

Description Bitmask in Hex

Type: string

Format: time

Maximum Length: 255 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	Value
Type	*object*

ack_auth_fail

Description ACK Retry Dropped

Type: number

Format: counter

ack_retry_blacklist

Description ACK Retry Timeout Blacklisted

Type: number

Format: counter

ack_retry_gap_drop

Description ACK Retry Retry-Gap Dropped

Type: number

Format: counter

ack_retry_init

Description ACK Retry Init

Type: number

Format: counter

ack_retry_pass

Description ACK Retry Passed

Type: number

Format: counter

ack_retry_reset

Description ACK Retry Timeout Reset

Type: number

Format: counter

ack_retry_rto_fail

Description ACK Retry RTO Dropped

Type: number

Format: counter

ack_retry_rto_pass

Description ACK Retry RTO Passed

Type: number

Format: counter

ack_retry_rto_progress

Description ACK Retry RTO Progress

Type: number

Format: counter

ack_retry_timeout

Description ACK Retry Timeout

Type: number

Format: counter

auth_handshake_bl

Description Auth Handshake Blacklisted

Type: number

Format: counter

auth_handshake_fail

Description Auth Handshake Fail

Type: number

Format: counter

auth_handshake_success

Description Auth Handshake Success

Type: number

Format: counter

auth_handshake_timeout

Description Auth Handshake Timeout

Type: number

Format: counter

bl

Description Dst Blacklisted

Type: number

Format: counter

cipher_suites_limit_exceed

Description SSL ClientHello Cipher Suites exceed limit

Type: number

Format: counter

client_ext_limit_exceed

Description SSL ClientHello Client Extension exceed limit

Type: number

Format: counter

clienthello_to_appdata_timeout

Description SSL ClientHello to Application-Data timeout

Type: number

Format: counter

conn_close

Description Connections Closed

Type: number

Format: counter

conn_close_half_open

Description Half Open Connections Closed

Type: number

Format: counter

conn_close_w_fin

Description FIN Connections Closed

Type: number

Format: counter

conn_close_w_idle

Description Idle Connections Closed

Type: number

Format: counter

conn_close_w_rst

Description RST Connections Closed

Type: number

Format: counter

conn_create_from_ack

Description Connections Created From ACK

Type: number

Format: counter

conn_create_from_syn

Description Connections Created From SYN

Type: number

Format: counter

conn_create_from_synack

Description Connections Created From SYNACK

Type: number

Format: counter

conn_ofo_rate_excd

Description TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

conn_prate_excd

Description TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

conn_rexmit_rate_excd

Description TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

conn_zwindow_rate_excd

Description TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

create_conn_non_syn_dropped

Description Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

do_auth_handshake

Description Auth Handshake

Type: number

Format: counter

drop_packet

Description Packets Dropped

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

dst_req_rate_exceed

Description Dst Request Rate Exceeded

Type: number

Format: counter

er_condition

Description Error Condition

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action WL

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

handshake_finished_to_appdata_timeout

Description SSL Handshake finished to Application-Data timeout

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

Format: counter

hybrid_auth_auth_no_match_rst_rcv

Description SYN Auth Hybrid Auth No Match Drop: RST Received

Type: number

Format: counter

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

is_renegotiation

Description SSL Renegotiation

Type: number

Format: counter

is_ssl3

Description SSL v3

Type: number

Format: counter

is_tls1_0

Description TLS v1.0

Type: number

Format: counter

is_tls1_1

Description TLS v1.1

Type: number

Format: counter

is_tls1_2+

Description TLS v1.2 or higher version

Type: number

Format: counter

new_syn

Description TCP SYN

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

policy_drop

Description Policy Dropped

Type: number

Format: counter

policy_reset

Description Policy Reset

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_syn_rate_exceed

Description TCP SYN Rate Exceeded

Type: number

Format: counter

port_synack_rate_exceed

Description TCP SYNACK Rate Exceeded

Type: number

Format: counter

processed

Description Packets Processed

Type: number

Format: counter

prog_conn_exceed_bl

Description Connection: Violation Exceed Blacklisted

Type: number

Format: counter

prog_conn_exceed_drop

Description Connection: Violation Exceed Dropped

tcp_ack_data_rcvd

Description TCP ACK with Data Received

Type: number

Format: counter

tcp_ack_drop

Description TCP ACK Dropped

Type: number

Format: counter

tcp_ack_fwd

Description TCP ACK Forward

Type: number

Format: counter

tcp_ack_rcvd

Description TCP ACK Received

Type: number

Format: counter

tcp_auth_drop

Description TCP Auth Dropped

Type: number

Format: counter

tcp_auth_drop_ack

Description TCP Auth Dropped: ACK

Type: number

Format: counter

tcp_auth_drop_ack_fail_auth

Description TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

tcp_auth_drop_ack_pass_auth

Description TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

tcp_auth_drop_ack_xmit

Description TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

tcp_auth_drop_rst

Description TCP Auth Dropped: RST

Type: number

Format: counter

tcp_auth_drop_rst_fail_auth

Description TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

tcp_auth_drop_rst_pass_auth

Description TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

tcp_auth_drop_rst_xmit

Description TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

tcp_auth_drop_syn

Description TCP Auth Dropped: SYN

Type: number

Format: counter

tcp_auth_resp

Description TCP Auth Responded

Type: number

Format: counter

tcp_auth_rst

Description TCP Auth Reset

Type: number

Format: counter

tcp_cwr_drop

Description TCP CWR Dropped

Type: number

Format: counter

tcp_cwr_fwd

Description TCP CWR Forward

Type: number

Format: counter

tcp_cwr_rcvd

Description TCP CWR Received

Type: number

Format: counter

tcp_ece_drop

Description TCP ECE Dropped

Type: number

Format: counter

tcp_ece_fwd

Description TCP ECE Forward

Type: number

Format: counter

tcp_ece_rcvd

Description TCP ECE Received

Type: number

Format: counter

tcp_empty_ack_drop

Description TCP Empty ACK Dropped

Type: number

Format: counter

tcp_empty_ack_fwd

Description TCP Empty ACK Forward

Type: number

Format: counter

tcp_empty_ack_rcvd

Description TCP Empty ACK Received

Type: number

Format: counter

tcp_fin_ack_drop

Description TCP FIN ACK Dropped

Type: number

Format: counter

tcp_fin_ack_fwd

Description TCP FIN ACK Forward

Type: number

Format: counter

tcp_fin_ack_rcvd

Description TCP FIN ACK Received

Type: number

Format: counter

tcp_fin_drop

Description TCP FIN Dropped

Type: number

Format: counter

tcp_fin_fwd

Description TCP FIN Forward

Type: number

Format: counter

tcp_fin_psh_ack_drop

Description TCP FIN PSH ACK Drop

Type: number

Format: counter

tcp_fin_psh_ack_fwd

Description TCP FIN PSH ACK Forward

Type: number

Format: counter

tcp_fin_psh_ack_rcvd

Description TCP FIN PSH ACK Received

Type: number

Format: counter

tcp_fin_rcvd

Description TCP FIN Received

Type: number

Format: counter

tcp_psh_ack_drop

Description TCP PSH ACK Dropped

Type: number

Format: counter

tcp_psh_ack_fwd

Description TCP PSH ACK Forward

Type: number

Format: counter

tcp_psh_ack_rcvd

Description TCP PSH ACK Received

Type: number

Format: counter

tcp_psh_drop

Description TCP PSH Dropped

Type: number

Format: counter

tcp_psh_fwd

Description TCP PSH Forward

Type: number

Format: counter

tcp_psh_rcvd

Description TCP PSH Received

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP SYN Retransmit Exceeded Blacklist

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP SYN Retransmit Exceeded Drop

Type: number

Format: counter

tcp_rst_ack_drop

Description TCP RST ACK Dropped

Type: number

Format: counter

tcp_rst_ack_fwd

Description TCP RST ACK Forward

Type: number

Format: counter

tcp_rst_ack_rcvd

Description TCP RST ACK Received

Type: number

Format: counter

tcp_rst_drop

Description TCP RST Dropped

Type: number

Format: counter

tcp_rst_fwd

Description TCP RST Forward

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Type: number

Format: counter

tcp_syn_ack_drop

Description TCP SYN ACK Dropped

Type: number

Format: counter

tcp_syn_ack_fwd

Description TCP SYN ACK Forward

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_fwd

Description SYN Forward

Type: number

Format: counter

tcp_syn_rcvd

Description TCP Inbound SYN Received

Type: number

Format: counter

tcp_urg_drop

Description TCP URG Dropped

Type: number

Format: counter

tcp_urg_fwd

Description TCP URG Forward

Type: number

Format: counter

tcp_urg_rcvd

Description TCP URG Received

Type: number

Format: counter

unauth_drop

Description TCP Unauth Dropped

Type: number

Format: counter

virtualhost_policy_match

Description SSL Virtualhost Policy Match

Type: number

Format: counter

virtualhost_policy_not_match

Description SSL Virtualhost Policy Not Match

Type: number

Format: counter

wellknown_sport_drop

Description TCP SrcPort Wellknown

Type: number

Format: counter

zero_window_excd

Description Zero-Window Exceeded

Type: number

Format: counter

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action WL

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

handshake_finished_to_appdata_timeout

Description SSL Handshake finished to Application-Data timeout

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

ip_filtering_bl

Description IP Filtering Policy: Blacklisted

Type: number

Format: counter

ip_filtering_drop

Description IP Filtering Policy: Dropped

Type: number

Format: counter

is_renegotiation

Description SSL Renegotiation

Type: number

Format: counter

is_ssl3

Description SSL v3

Type: number

Format: counter

is_tls1_0

Description TLS v1.0

Type: number

Format: counter

is_tls1_1

Description TLS v1.1

Type: number

Format: counter

is_tls1_2+

Description TLS v1.2 or higher version

Type: number

Format: counter

new_syn

Description TCP SYN

Type: number

Format: counter

no_policy_class_list_match

Description No Policy Class-list Match

Type: number

Description Renegotiation Exceeded

Type: number

Format: counter

renegotiation_incomplete

Description Renegotiation Incomplete

Type: number

Format: counter

reset_while_other_in_handshake

Description Reset While Others in Handshake

Type: number

Format: counter

retransmit_excd

Description Retransmit Exceeded

Type: number

Format: counter

rst_cookie_fail

Description RST Cookie Failed

Type: number

Format: counter

same_sport_dport_drop

Description Same Source and Destination Port Drop

Type: number

Format: counter

secondary_port_conn_limm_exceed

Description Per Addr-Port Conn Limit Exceeded

Type: number

Format: counter

secondary_port_conn_rate_exceed

Description Per Addr-Port Conn Rate Exceeded

Type: number

Format: counter

secondary_port_hit

Description Per Addr-Port Hit

Type: number

Format: counter

secondary_port_kbit_rate_exceed

Description Per Addr-Port KiBit Rate Exceeded

Type: number

Format: counter

secondary_port_kbit_rate_exceed_pkt

Description Per Addr-Port KiBit Rate Exceeded Count

Type: number

Format: counter

secondary_port_pkt_rate_exceed

Description Per Addr-Port Packet Rate Exceeded

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Format: counter

small_window_excd

Description Small-Window Exceeded

Type: number

Format: counter

small_window_rcv

Description Small-Window Receive

Type: number

Format: counter

snat_fail

Description Source NAT Failure

Type: number

Format: counter

src_ack_auth_fail

Description Src ACK Retry Dropped

Type: number

Format: counter

src_ack_retry_blacklist

Description Src ACK Retry Timeout Blacklisted

Type: number

Format: counter

src_ack_retry_gap_drop

Description Src ACK Retry Retry-Gap Dropped

Type: number

Format: counter

src_ack_retry_init

Description Src ACK Retry Init

Type: number

Format: counter

src_ack_retry_reset

Description Src ACK Retry Timeout Reset

Type: number

Format: counter

src_ack_retry_rto_fail

Description Src ACK Retry RTO Dropped

Type: number

Format: counter

src_ack_retry_rto_pass

Description Src ACK Retry RTO Passed

Type: number

Format: counter

src_ack_retry_rto_progress

Description Src ACK Retry RTO Progress

Type: number

Format: counter

src_ack_retry_timeout

Description Src ACK Retry Timeout

Type: number

Format: counter

src_auth_drop

Description Src TCP Auth Dropped

Type: number

Format: counter

src_auth_drop_ack

Description Src TCP Auth Dropped: ACK

Type: number

Format: counter

src_auth_drop_ack_fail_auth

Description Src TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

src_auth_drop_ack_pass_auth

Description Src TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

src_auth_drop_ack_xmit

Description Src TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

src_auth_drop_rst

Description Src TCP Auth Dropped: RST

Type: number

Format: counter

src_auth_drop_rst_fail_auth

Description Src TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

src_auth_drop_rst_pass_auth

Description Src TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

src_auth_drop_rst_xmit

Description Src TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

src_auth_drop_syn

Description Src TCP Auth Dropped: SYN

Type: number

Format: counter

src_conn_ofo_rate_excd

Description Src TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

src_conn_pkt_rate_excd

Description Src TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

src_conn_rexmit_rate_excd

Description Src TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

src_conn_zwindow_rate_excd

Description Src TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

src_create_conn_non_syn_dropped

Description Src Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

src_drop

Description Src Packets Dropped

Type: number

Format: counter

src_drop_packet

Description Src Packets Dropped

Type: number

Format: counter

src_filter1_match

Description Src Filter1 Match

Type: number

Format: counter

src_filter2_match

Description Src Filter2 Match

Type: number

Format: counter

src_filter3_match

Description Src Filter3 Match

Type: number

Format: counter

src_filter4_match

Description Src Filter4 Match

Type: number

Format: counter

src_filter5_match

Description Src Filter5 Match

Type: number

Format: counter

src_filter_action_blacklist

Description Src Filter Action Blacklist

Type: number

Format: counter

src_filter_action_default_pass

Description Src Filter Action Default Pass

Type: number

Format: counter

src_filter_action_drop

Description Src Filter Action Drop

Type: number

Format: counter

src_filter_action_whitelist

Description Src Filter Action WL

Type: number

Format: counter

src_filter_auth_fail

Description Src Filter Auth Failed

Type: number

Format: counter

src_filter_none_match

Description Src Filter No Match

Type: number

Format: counter

src_filter_total_not_match

Description Src Filter Not Matched on Pkt

Type: number

Format: counter

src_frag_drop

Description Src Fragmented Packets Dropped

Type: number

Format: counter

src_handshaking_conn_exceed

Description SSL Src-handshake connection exceed limit

Type: number

Format: counter

src_hw_drop

Description Src Hardware Packets Dropped

Type: number

Format: counter

src_hw_drop_inserted

Description Src Hardware Drop Rules Inserted

Type: number

Format: counter

src_hw_drop_removed

Description Src Hardware Drop Rules Removed

Type: number

Format: counter

src_learn_overflow

Description Source Dynamic Entry Overflow

Type: number

Format: counter

src_out_of_seq_excd

Description Src Out-Of-Seq Exceeded

Type: number

Format: counter

src_policy_reset

Description Src Policy Reset

Type: number

Format: counter

src_req_rate_exceed

Description Src Request Rate Exceeded

Type: number

Format: counter

src_retransmit_excd

Description Src Retransmit Exceeded

Type: number

Format: counter

src_rst_cookie_fail

Description Src RST Cookie Failed

Type: number

Format: counter

src_small_window_excd

Description Src Small-Window Exceeded

Type: number

Format: counter

src_ssl_auth_drop

Description Src SSL Auth Dropped

Type: number

Format: counter

src_syn_auth_fail

Description Src SYN Auth Failed

Type: number

Format: counter

src_syn_cookie_fail

Description Src SYN Cookie Failed

Type: number

Format: counter

src_syn_cookie_sent

Description Src SYN Cookie Sent

Type: number

Format: counter

src_syn_rate_exceed

Description Src TCP SYN Rate Exceeded

Type: number

Format: counter

src_syn_retry_blacklist

Description Src SYN Retry Timeout Blacklisted

Type: number

Format: counter

src_syn_retry_failed

Description Src SYN Retry Dropped

Type: number

Format: counter

src_syn_retry_gap_drop

Description Src SYN Retry-Gap Dropped

Type: number

Format: counter

src_syn_retry_init

Description Src SYN Retry Init

Type: number

Format: counter

src_syn_retry_reset

Description Src SYN Retry Timeout Reset

Type: number

Format: counter

src_syn_retry_rto_fail

Description Src SYN Retry RTO Dropped

Type: number

Format: counter

src_syn_retry_rto_pass

Description Src SYN Retry RTO Passed

Type: number

Format: counter

src_syn_retry_rto_progress

Description Src SYN Retry RTO Progress

Type: number

Format: counter

src_syn_retry_timeout

Description Src SYN Retry Timeout

Type: number

Format: counter

src_tcp_auth_rst

Description Src TCP Auth Reset

Type: number

Format: counter

src_unauth_drop

Description Src TCP Unauth Dropped

Type: number

Format: counter

src_well_known_port

Description Src TCP SrcPort Wellknown

Type: number

Format: counter

src_zero_window_excd

Description Src Zero-Window Exceeded

Type: number

Format: counter

src_zone_service_entry_aged

Description SrcZoneService Entry Aged

Type: number

Format: counter

src_zone_service_entry_hit

Description SrcZoneService Entry Hit

Type: number

Format: counter

src_zone_service_entry_learned

Description SrcZoneService Entry Learned

Type: number

Format: counter

ssl_auth_drop

Description SSL Auth Dropped

Type: number

Format: counter

ssl_auth_resp

Description SSL Auth Responded

Type: number

Format: counter

ssl_bad_header_drop

Description SSL Traffic Check Bad Header Dropped

Type: number

Format: counter

ssl_bad_header_forw

Description SSL Traffic Check Bad Header Forwarded

Type: number

Format: counter

ssl_port_bad_len

Description SSL Header Bad Length

Type: number

Format: counter

ssl_port_bad_ver

Description SSL Header Bad Version

Type: number

Format: counter

ssl_port_clienthello_bad_len

Description SSL ClientHello Bad Length

Type: number

Format: counter

ssl_port_clienthello_ext_bad_len

Description SSL ClientHello Extension Bad Length

Type: number

Format: counter

ssl_port_invalid_type

Description SSL Header Invalid Type

Type: number

Format: counter

ssl_port_non_tls

Description SSL Non-TLS Dropped

Type: number

Format: counter

syn_auth_fail

Description SYN Auth Failed

Type: number

Format: counter

syn_auth_pass

Description SYN Auth Passed

Type: number

Format: counter

syn_auth_rst_ack_drop

Description SYN Auth RST-ACK Dropped

Type: number

Format: counter

syn_cookie_fail

Description SYN Cookie Failed

Type: number

Format: counter

syn_cookie_sent

Description SYN Cookie Sent

Type: number

Format: counter

syn_drop

Description SYN Dropped

Type: number

Format: counter

syn_retry_blacklist

Description SYN Retry Timeout Blacklisted

Type: number

Format: counter

syn_retry_failed

Description SYN Retry Dropped

Type: number

Format: counter

syn_retry_gap_drop

Description SYN Retry-Gap Dropped

Type: number

Format: counter

syn_retry_init

Description SYN Retry Init

Type: number

Format: counter

syn_retry_pass

Description SYN Retry Passed

Type: number

Format: counter

syn_retry_reset

Description SYN Retry Timeout Reset

Type: number

Format: counter

syn_retry_rto_fail

Description SYN Retry RTO Dropped

Type: number

Format: counter

syn_retry_rto_pass

Description SYN Retry RTO Passed

Type: number

Format: counter

syn_retry_rto_progress

Description SYN Retry RTO Progress

Type: number

Format: counter

syn_retry_timeout

Description SYN Retry Timeout

Type: number

Format: counter

syn_tfo_rcv

Description SYN TFO Received

Type: number

Format: counter

synack_multiple_attempts_per_ip_detected

Description SYNACK Multiple Attempts Per IP Detected

Type: number

Format: counter

synack_reset_sent

Description SYNACK Reset Sent

Type: number

Format: counter

tcp_ack_data_drop

Description TCP ACK with Data Dropped

Type: number

Format: counter

tcp_ack_data_fwd

Description TCP ACK with Data Forward

Type: number

Format: counter

tcp_ack_data_rcvd

Description TCP ACK with Data Received

Type: number

Format: counter

tcp_ack_drop

Description TCP ACK Dropped

Type: number

Format: counter

tcp_ack_fwd

Description TCP ACK Forward

Type: number

Format: counter

tcp_ack_rcvd

Description TCP ACK Received

Type: number

Format: counter

tcp_auth_drop

Description TCP Auth Dropped

Type: number

Format: counter

tcp_auth_drop_ack

Description TCP Auth Dropped: ACK

Type: number

Format: counter

tcp_auth_drop_ack_fail_auth

Description TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

tcp_auth_drop_ack_pass_auth

Description TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

tcp_auth_drop_ack_xmit

Description TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

tcp_auth_drop_rst

Description TCP Auth Dropped: RST

Type: number

Format: counter

tcp_auth_drop_rst_fail_auth

Description TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

tcp_auth_drop_rst_pass_auth

Description TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

tcp_auth_drop_rst_xmit

Description TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

tcp_auth_drop_syn

Description TCP Auth Dropped: SYN

Type: number

Format: counter

tcp_auth_resp

Description TCP Auth Responded

Type: number

Format: counter

tcp_auth_rst

Description TCP Auth Reset

Type: number

Format: counter

tcp_cwr_drop

Description TCP CWR Dropped

Type: number

Format: counter

tcp_cwr_fwd

Description TCP CWR Forward

Type: number

Format: counter

tcp_cwr_rcvd

Description TCP CWR Received

Type: number

Format: counter

tcp_ece_drop

Description TCP ECE Dropped

Type: number

Format: counter

tcp_ece_fwd

Description TCP ECE Forward

Type: number

Format: counter

tcp_ece_rcvd

Description TCP ECE Received

Type: number

Format: counter

tcp_empty_ack_drop

Description TCP Empty ACK Dropped

Type: number

Format: counter

tcp_empty_ack_fwd

Description TCP Empty ACK Forward

Type: number

Format: counter

tcp_empty_ack_rcvd

Description TCP Empty ACK Received

Type: number

Format: counter

tcp_fin_ack_drop

Description TCP FIN ACK Dropped

Type: number

Format: counter

tcp_fin_ack_fwd

Description TCP FIN ACK Forward

Type: number

Format: counter

tcp_fin_ack_rcvd

Description TCP FIN ACK Received

Type: number

Format: counter

tcp_fin_drop

Description TCP FIN Dropped

Type: number

Format: counter

tcp_fin_fwd

Description TCP FIN Forward

Type: number

Format: counter

tcp_fin_psh_ack_drop

Description TCP FIN PSH ACK Drop

Type: number

Format: counter

tcp_fin_psh_ack_fwd

Description TCP FIN PSH ACK Forward

Type: number

Format: counter

tcp_fin_psh_ack_rcvd

Description TCP FIN PSH ACK Received

Type: number

Format: counter

tcp_fin_rcvd

Description TCP FIN Received

Type: number

Format: counter

tcp_psh_ack_drop

Description TCP PSH ACK Dropped

Type: number

Format: counter

tcp_psh_ack_fwd

Description TCP PSH ACK Forward

Type: number

Format: counter

tcp_psh_ack_rcvd

Description TCP PSH ACK Received

Type: number

Format: counter

tcp_psh_drop

Description TCP PSH Dropped

Type: number

Format: counter

tcp_psh_fwd

Description TCP PSH Forward

Type: number

Format: counter

tcp_psh_rcvd

Description TCP PSH Received

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP SYN Retransmit Exceeded Blacklist

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP SYN Retransmit Exceeded Drop

Type: number

Format: counter

tcp_rst_ack_drop

Description TCP RST ACK Dropped

Type: number

Format: counter

tcp_rst_ack_fwd

Description TCP RST ACK Forward

Type: number

Format: counter

tcp_rst_ack_rcvd

Description TCP RST ACK Received

Type: number

Format: counter

tcp_rst_drop

Description TCP RST Dropped

Type: number

Format: counter

tcp_rst_fwd

Description TCP RST Forward

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Type: number

Format: counter

tcp_syn_ack_drop

Description TCP SYN ACK Dropped

Type: number

Format: counter

tcp_syn_ack_fwd

Description TCP SYN ACK Forward

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_fwd

Description SYN Forward

Type: number

Format: counter

tcp_syn_rcvd

Description TCP Inbound SYN Received

Type: number

Format: counter

tcp_urg_drop

Description TCP URG Dropped

Type: number

Format: counter

tcp_urg_fwd

Description TCP URG Forward

Type: number

Format: counter

tcp_urg_rcvd

Description TCP URG Received

Type: number

Format: counter

unauth_drop

Description TCP Unauth Dropped

Type: number

Format: counter

unauth_src_session_reset

Description Session Reset for Unauthenticated Src

Type: number

Format: counter

virtualhost_policy_match

Description SSL Virtualhost Policy Match

Type: number

Format: counter

virtualhost_policy_not_match

Description SSL Virtualhost Policy Not Match

Type: number

Format: counter

wellknown_sport_drop

Description TCP SrcPort Wellknown

Type: number

Format: counter

zero_window_excd

Description Zero-Window Exceeded

Type: number

Format: counter

dst_tcp_filter_action_blacklist

Description Dst Filter Action Blacklist

Type: number

Format: counter

dst_tcp_filter_action_default_pass

Description Dst Filter Action Default Pass

Type: number

Format: counter

dst_tcp_filter_action_drop

Description Dst Filter Action Drop

Type: number

Format: counter

dst_tcp_filter_action_whitelist

Description Dst Filter Action WL

Type: number

Format: counter

dst_tcp_filter_match

Description Dst Filter Match

Type: number

Format: counter

dst_tcp_filter_not_match

Description Dst Filter No Match

Type: number

Format: counter

hybrid_syn_auth_auth_no_match

Description SYN Auth Hybrid Auth no match

Type: number

Format: counter

hybrid_syn_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_syn_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_syn_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_syn_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_syn_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_syn_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_syn_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_syn_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_syn_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_syn_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_syn_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_syn_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

intcp

Description TCP Total Packets Received

Type: number

Format: counter

src_dst_tcp_filter_action_blacklist

Description SrcDst Filter Action Blacklist

Type: number

Format: counter

src_dst_tcp_filter_action_default_pass

Description SrcDst Filter Action Default Pass

Type: number

Format: counter

src_dst_tcp_filter_action_drop

Description SrcDst Filter Action Drop

Type: number

Format: counter

src_dst_tcp_filter_action_whitelist

Description SrcDst Filter Action WL

Type: number

Format: counter

src_dst_tcp_filter_match

Description SrcDst Filter Match

Type: number

Format: counter

src_dst_tcp_filter_not_match

Description SrcDst Filter No Match

Type: number

Format: counter

src_tcp_filter_action_blacklist

Description Src Filter Action Blacklist

Type: number

Format: counter

src_tcp_filter_action_default_pass

Description Src Filter Action Default Pass

Type: number

Format: counter

src_tcp_filter_action_drop

Description Src Filter Action Drop

Type: number

Format: counter

src_tcp_filter_action_whitelist

Description Src Filter Action WL

Type: number

Format: counter

src_tcp_filter_match

Description Src Filter Match

Type: number

Format: counter

src_tcp_filter_not_match

Description Src Filter No Match

Type: number

Format: counter

syn_auth_pass

Description TCP SYN Auth Passed

Type: number

Format: counter

syn_auth_pass_wl

Description TCP SYN Auth Pass WL

Type: number

Format: counter

syn_auth_skip

Description TCP SYN Auth Skipped

Type: number

Format: counter

tcp_ack_no_syn

Description TCP ACK No SYN

Type: number

Format: counter

tcp_ack_rcvd

Description TCP ACK Received

Type: number

Format: counter

tcp_action_on_ack_bl

Description TCP ACK Retry Timeout Blacklisted

Type: number

Format: counter

tcp_action_on_ack_failed

Description TCP ACK Retry Dropped

Type: number

Format: counter

tcp_action_on_ack_gap_drop

Description TCP ACK Retry Retry-Gap Dropped

Type: number

Format: counter

tcp_action_on_ack_gap_pass

Description TCP ACK Retry Retry-Gap Passed

Type: number

Format: counter

tcp_action_on_ack_matched

Description TCP ACK Retry Matched

Type: number

Format: counter

tcp_action_on_ack_passed

Description TCP ACK Retry Passed

Type: number

Format: counter

tcp_action_on_ack_reset

Description TCP ACK Retry Timeout Reset

Type: number

Format: counter

tcp_action_on_ack_start

Description TCP ACK Retry Init

Type: number

Format: counter

tcp_action_on_ack_timeout

Description TCP ACK Retry Timeout

Type: number

Format: counter

tcp_action_on_syn_bl

Description TCP SYN Retry Timeout Blacklisted

Type: number

Format: counter

tcp_action_on_syn_failed

Description TCP SYN Retry Dropped

Type: number

Format: counter

tcp_action_on_syn_gap_drop

Description TCP SYN Retry Retry-Gap Dropped

Type: number

Format: counter

tcp_action_on_syn_gap_pass

Description TCP SYN Retry Retry-Gap Passed

Type: number

Format: counter

tcp_action_on_syn_passed

Description TCP SYN Retry Passed

Type: number

Format: counter

tcp_action_on_syn_reset

Description TCP SYN Retry Timeout Reset

Type: number

Format: counter

tcp_action_on_syn_start

Description TCP SYN Retry Init

Type: number

Format: counter

tcp_action_on_syn_timeout

Description TCP SYN Retry Timeout

Type: number

Format: counter

tcp_any_exceed

Description TCP Exceeded

Type: number

Format: counter

tcp_auth_drop

Description TCP Auth Dropped

Type: number

Format: counter

tcp_auth_resp

Description TCP Auth Responded

Type: number

Format: counter

tcp_auth_rst

Description TCP Auth Reset

Type: number

Format: counter

tcp_concurrent

Description TCP Concurrent Port Access

Type: number

Format: counter

tcp_drop_bl

Description TCP Blacklist Packets Dropped

Type: number

Format: counter

tcp_drop_black_user_cfg_src

Description TCP Src Blacklist User Packets Dropped

Type: number

Format: counter

tcp_drop_black_user_cfg_src_dst

Description TCP SrcDst Blacklist User Packets Dropped

Type: number

Format: counter

tcp_dst_drop

Description TCP Dst Packets Dropped

Type: number

Format: counter

tcp_fin_rcvd

Description TCP FIN Received

Type: number

Format: counter

tcp_frag_drop

Description TCP Frag Dropped

Type: number

Format: counter

tcp_frag_rcvd

Description TCP Frag Received

Type: number

Format: counter

tcp_invalid_syn_rcvd

Description TCP Invalid SYN Received

Type: number

Format: counter

tcp_invalid_synack_rcvd

Description TCP Invalid SYNACK Received

Type: number

Format: counter

tcp_out_of_seq

Description TCP Out-Of-Seq Total

Type: number

Format: counter

tcp_out_of_seq_bl

Description TCP Out-Of-Seq Blacklisted

Type: number

Format: counter

tcp_out_of_seq_drop

Description TCP Out-Of-Seq Dropped

Type: number

Format: counter

tcp_outrst

Description TCP Outbound RST

Type: number

Format: counter

tcp_per_conn_ofo_rate_exceed_bl

Description TCP Conn Out-Of-Seq Rate Blacklisted

Type: number

Format: counter

tcp_per_conn_ofo_rate_exceed_drop

Description TCP Conn Out-Of-Seq Rate Dropped

Type: number

Format: counter

tcp_per_conn_prate_exceed

Description TCP Conn Pkt Rate Dropped

Type: number

Format: counter

tcp_per_conn_prate_exceed_bl

Description TCP Conn Pkt Rate Blacklisted

Type: number

Format: counter

tcp_per_conn_rexmit_rate_exceed_bl

Description TCP Conn Retransmit Rate Blacklisted

Type: number

Format: counter

tcp_per_conn_rexmit_rate_exceed_drop

Description TCP Conn Retransmit Rate Dropped

Type: number

Format: counter

tcp_per_conn_zwindow_rate_exceed_bl

Description TCP Conn Zero-Window Rate Blacklisted

Type: number

Format: counter

tcp_per_conn_zwindow_rate_exceed_drop

Description TCP Conn Zero-Window Rate Dropped

Type: number

Format: counter

tcp_port_zero_drop

Description TCP Port 0 Packets Dropped

Type: number

Format: counter

tcp_progression_violation_exceed

Description Progression: Violation Exceeded

Type: number

Format: counter

tcp_progression_violation_exceed_bl

Description Progression: Violation Exceeded Blacklisted

Type: number

Format: counter

tcp_progression_violation_exceed_drop

Description Progression: Violation Exceeded Dropped

Type: number

Format: counter

tcp_progression_violation_exceed_reset

Description Progression: Violation Exceeded Reset

Type: number

Format: counter

tcp_reset_client

Description TCP Reset Client

Type: number

Format: counter

tcp_reset_server

Description TCP Reset Server

Type: number

Format: counter

tcp_retransmit

Description TCP Retransmit Total

Type: number

Format: counter

tcp_retransmit_bl

Description TCP Retransmit Blacklisted

Type: number

Format: counter

tcp_retransmit_drop

Description TCP Retransmit Dropped

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP Retransmit SYN Exceed Blacklisted

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP Retransmit SYN Exceed Dropped

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Type: number

Format: counter

tcp_sess_create

Description TCP Sessions Created

Type: number

Format: counter

tcp_small_window

Description TCP Small-Window Total

Type: number

Format: counter

tcp_small_window_bl

Description TCP Small-Window Blacklisted

Type: number

Format: counter

tcp_small_window_drop

Description TCP Small-Window Dropped

Type: number

Format: counter

tcp_src_drop

Description TCP Src Packets Dropped

Type: number

Format: counter

tcp_src_dst_drop

Description TCP SrcDst Packets Dropped

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_rate

Description TCP SYN Rate Per Sec

Type: number

Format: counter

tcp_syn_rcvd

Description TCP SYN Received

Type: number

Format: counter

tcp_syn_tfo_rcvd

Description TCP SYN TFO Received

Type: number

Format: counter

tcp_syncookie_check_fail

Description TCP SYN Cookie Check Failed

Type: number

Format: counter

tcp_syncookie_fail_bl

Description TCP SYN Cookie Blacklist Failed

Type: number

Format: counter

tcp_syncookie_hw_missing

Description TCP SYN Cookie HW Missed

Type: number

Format: counter

tcp_syncookie_pass

Description TCP SYN Cookie Passed

Type: number

Format: counter

tcp_syncookie_sent

Description TCP SYN Cookie Sent

Type: number

Format: counter

tcp_syncookie_sent_fail

Description TCP SYN Cookie Send Failed

Type: number

Format: counter

tcp_total_bytes_drop

Description TCP Total Bytes Dropped

Type: number

Format: counter

tcp_total_bytes_rcv

Description TCP Total Bytes Received

Type: number

Format: counter

tcp_total_drop

Description TCP Total Packets Dropped

Type: number

Format: counter

tcp_unauth_rst_drop

Description TCP Unauth RST Dropped

Type: number

Format: counter

tcp_zero_window

Description TCP Zero-Window Total

Type: number

Format: counter

tcp_zero_window_bl

Description TCP Zero-Window Blacklisted

Type: number

Format: counter

tcp_zero_window_drop

Description TCP Zero-Window Dropped

Type: number

Format: counter

dns_auth_drop

Description DNS Auth Dropped

Type: number

Format: counter

dns_auth_resp

Description DNS Auth Responded

Type: number

Format: counter

dns_auth_udp

Description DNS Auth UDP

Type: number

Format: counter

dns_auth_udp_fail

Description DNS Auth UDP Failed

Type: number

Format: counter

dns_auth_udp_fail_bl

Description DNS Auth UDP Fail Blacklisted

Type: number

Format: counter

dns_auth_udp_pass

Description DNS Auth UDP Passed

Type: number

Format: counter

dns_auth_udp_timeout

Description DNS Auth UDP Timeout

Type: number

Format: counter

dns_dg_action_deny

Description DNS Domain Group Action Deny

Type: number

Format: counter

dns_dg_action_permit

Description DNS Domain Group Action Permit

Type: number

Format: counter

dns_dg_rate_exceed

Description DNS Domain Group Domain Query Rate Exceeded

Type: number

Format: counter

dns_fqdn_label_count_exceed

Description FQDN Label Count Exceeded

Type: number

Format: counter

dns_fqdn_label_len_exceed

Description FQDN Label Length Exceeded

Type: number

Format: counter

dns_fqdn_rate_by_label_count_exceed

Description FQDN Rate by Label Count Exceeded

Type: number

Format: counter

dns_fqdn_stage2_exceed

Description FQDN Rate Exceeded

Type: number

Format: counter

dns_is_nx

Description NXDOMAIN Response

Type: number

Format: counter

dns_malform_drop

Description DNS Malform Query Dropped

Type: number

Format: counter

dns_nx_bl

Description NXDOMAIN Query Blacklisted

Type: number

Format: counter

dns_nx_drop

Description NXDOMAIN Query Dropped

Type: number

Format: counter

dns_nx_exceed

Description NXDOMAIN Response Rate Exceeded

Type: number

Format: counter

dns_outbound_query_response_size_exceed

Description DNS Outbound Query Resp Size Exceeded

Type: number

Format: counter

dns_outbound_query_sess_timed_out

Description DNS Outbound Query Session Timed Out

Type: number

Format: counter

dns_pkt_processed

Description DNS Packets Processed

Type: number

Format: counter

dns_policy_drop

Description DNS Policy Dropped

Type: number

Format: counter

dns_qry_any_drop

Description DNS Query ANY Dropped

Type: number

Format: counter

dns_query_class_any

Description DNS Query Class ANY

Type: number

Format: counter

dns_query_class_chaos

Description DNS Query Class CHAOS

Type: number

Format: counter

dns_query_class_csnet

Description DNS Query Class CSNET

Type: number

Format: counter

dns_query_class_hs

Description DNS Query Class HESIOD

Type: number

Format: counter

dns_query_class_in

Description DNS Query Class INTERNET

Type: number

Format: counter

dns_query_class_none

Description DNS Query Class NONE

Type: number

Format: counter

dns_query_class_whitelist_miss

Description DNS Query Class Whitelist Miss

Type: number

Format: counter

dns_query_type_a

Description DNS Query Type A

Type: number

Format: counter

dns_query_type_aaaa

Description DNS Query Type AAAA

Type: number

Format: counter

dns_query_type_any

Description DNS Query Type ANY

Type: number

Format: counter

dns_query_type_cname

Description DNS Query Type CNAME

Type: number

Format: counter

dns_query_type_mx

Description DNS Query Type MX

Type: number

Format: counter

dns_query_type_ns

Description DNS Query Type NS

Type: number

Format: counter

dns_query_type_opt

Description DNS Query Type OPT

Type: number

Format: counter

dns_query_type_soa

Description DNS Query Type SOA

Type: number

Format: counter

dns_query_type_srv

Description DNS Query Type SRV

Type: number

Format: counter

dns_rrtype_drop

Description DNS Record Type Dropped

Type: number

Format: counter

dns_tcp_auth_pass

Description DNS Auth Force-TCP Passed

Type: number

Format: counter

dns_udp_auth_retry_gap_drop

Description DNS Auth UDP Retry-Gap Drop

Type: number

http_trace

Description Request Method TRACE

Type: number

Format: counter

http_unknown

Description Request Method UNKNOWN

Type: number

Format: counter

invalid_hdr_name

Description HTTP Header Name Invalid

Type: number

Format: counter

invalid_hdr_val

Description HTTP Header Value Invalid

Type: number

Format: counter

invalid_header

Description HTTP Header Invalid

Type: number

Format: counter

line_too_long

Description Line Too Long

Type: number

Format: counter

lower_than_mss_exceed

Description Min Payload Size Fail Exceeded

Type: number

Format: counter

malform_bad_chunk

Description Malform Bad Chunk

Type: number

Format: counter

malform_content_len_too_long

Description Malform Content Length Too Long

Type: number

Format: counter

malform_header_name_too_long

Description Malform Header Name Too Long

Type: number

Format: counter

malform_line_too_long

Description Malform Line Too Long

Type: number

Format: counter

malform_req_line_invalid_method

Description Malform Request Line Invalid Method

Type: number

Format: counter

malform_req_line_too_long

Description Malform Request Line Too Long

Type: number

Format: counter

malform_req_line_too_small

Description Malform Request Line Too Small

Type: number

Format: counter

malform_too_many_headers

Description Malform Too Many Headers

Type: number

Format: counter

neg_req_remain

Description Negative Request Remain

Type: number

Format: counter

neg_rsp_remain

Description Negative Response Remain

Type: number

Format: counter

new_syn

Description TCP SYN

Type: number

Format: counter

ofo

Description Out-Of-Order Packets

Type: number

Format: counter

ofo_queue_exceed

Description Out-Of-Order Queue Exceeded

Type: number

Format: counter

ofo_timer_expired

Description Out-Of-Order Timeout

Type: number

Format: counter

parsereq_fail

Description Parse Request Failed

Type: number

Format: counter

partial_hdr

Description Partial Header

Type: number

Format: counter

policy_drop

Description Policy Dropped

Type: number

Format: counter

referer_filter_blacklist

Description Referer Filter Blacklisted

Type: number

Format: counter

referer_filter_match

Description Referer Filter Match

Type: number

Format: counter

req_content_len

Description Request Content-Length Received

Type: number

Format: counter

req_ofo

Description Out-Of-Order Request

Type: number

Format: counter

req_processed

Description Packets Processed

Type: number

Format: counter

body_too_big

Description Body Too Big

Type: number

Format: counter

client_rst

Description Client Rst

Type: number

Format: counter

concatenate_msg

Description Concatenate Msessage

Type: number

Format: counter

error_condition

Description Error Condition

Type: number

Format: counter

get_content_fail_error

Description Get Content Fail

Type: number

Format: counter

header_filter_action_blacklist

Description Header Filter Action Blacklist

Type: number

Format: counter

header_filter_action_default_pass

Description Header Filter Action Default Pass

Type: number

Format: counter

header_filter_action_drop

Description Header Filter Action Drop

Type: number

Format: counter

header_filter_action_whitelist

Description Header Filter Action Whitelist

Type: number

Format: counter

header_filter_match

Description Header Filter Match

Type: number

Format: counter

header_filter_none_match

Description None Header Filter Match

Type: number

Format: counter

header_filter_not_match

Description Header Filter Not Match

Type: number

Format: counter

header_name_too_long

Description Max Header Name Length Exceed

Type: number

Format: counter

idle_timeout

Description Idle Timeout

Type: number

Format: counter

invalid_header

Description Invalid Header

Type: number

Format: counter

invalid_start_line_error

Description Invalid Start Line

Type: number

Format: counter

keep_alive_msg

Description KeepAlive Message

Type: number

Format: counter

line_mem_allocated

Description Line Memory Allocated

Type: number

Format: counter

line_mem_freed

Description Line Memory Freed

Type: number

Format: counter

line_too_long

Description Line Too Long

Type: number

Format: counter

malform_request

Description Malformed Request

Type: number

Format: counter

max_call_id_len_exceed

Description Max Call ID Length Exceed

Type: number

Format: counter

max_header_value_len_exceed

Description Max Header Value Length Exceed

Type: number

Format: counter

max_sdp_len_exceed

Description Max SDP Length Exceed

Type: number

Format: counter

max_uri_len_exceed

Description Max URI Length Exceed

Type: number

Format: counter

mem_alloc_fail_error

Description Memory Allocate Fail

Type: number

Format: counter

ofo_queue_size_exceed

Description Out-Of-Order Queue Size Exceed

Type: number

Format: counter

ofo_timeout

Description Out-of-Order Timeout

Type: number

Format: counter

parse_header_fail_error

Description Header Parse Fail

Type: number

Format: counter

parse_start_line_error

Description Start Line Parse Error

Type: number

Format: counter

pkts_ofo_total

Description Packet Out-Of-Order Total

Type: number

Format: counter

pkts_retrans_total

Description Packets Retransmit Total

Type: number

Format: counter

policy_drop

Description Policy Drop

Type: number

Format: counter

policy_violation

Description Policy Violation

Type: number

Format: counter

rate1_limit_exceed

Description Dst Request Rate 1 Limit Exceed

Type: number

Format: counter

rate2_limit_exceed

Description Dst Request Rate 2 Limit Exceed

Type: number

Format: counter

read_start_line_error

Description Read Start Line Read Error

Type: number

Format: counter

request_method_ack

Description Request Method ACK

Type: number

Format: counter

request_method_bye

Description Request Method BYE

Type: number

Type: List

Reference Object: */axapi/v3/ddos/local-address/ipv6/{ipv6-addr}*

ip-list

Specification	Value
Type	*list*
Block object keys	

ip-addr

Description DDoS IPv4 Address for syn cookie usage

Type: string

Format: ipv4-address

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6-list

Specification	Value
Type	*list*
Block object keys	

ipv6-addr

Description DDoS IPv6 Address for syn cookie usage

Type: string

Format: ipv6-address

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.377 ddos local-address ip

Configure DDoS ipv4 address

ip Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*ip-addr*
Collection Name	*ip-list*
Collection URI	/axapi/v3/ddos/local-address/ip
Element Name	ip
Element URI	/axapi/v3/ddos/local-address/ip/{ip-addr}
Element Attributes	ip_attributes
Partition Visibility	shared
Schema	`ip schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/local-address/ip

ip attributes

```
POST /axapi/v3/ddos/local-address/ip/
Payload:
{
    "ip": {
        "ip-addr": "3.3.3.3"
    }
}
```

Create List

POST

/axapi/v3/ddos/local-address/ip

ip attributes

Get Object

GET

/axapi/v3/ddos/local-address/ip/{ip-addr}

ip attributes

```
GET /axapi/v3/ddos/local-address/ip/3.3.3.3
Reponse:
{
    "ip": {
```

(continues on next page)

(continued from previous page)

```

network-object-list

network-object-list is **JSON List** of *network-object attributes*

network-object-list : [

{ *network-object attributes* },

{ *network-object attributes* },

...

]

network-object attributes

anomaly-detection-trigger

Description 'all': Use both learned and static thresholds (static thresholds take precedence); 'static-threshold-only': Use static thresholds only;

Type: string

Supported Values: all, static-threshold-only

Default: all

enable-top-k

Type: List

flooding-multiplier

Description multiplier for flooding detection threshold in network objects (default 2x threshold)

Type: number

Range: 2-10

Default: 2

histogram-mode

Description 'off': histogram feature disabled; 'monitor': histogram feature enabled with anomaly escalation; 'observe': histogram feature enabled and observe only;

Type: string

Supported Values: off, monitor, observe

Default: observe

host-anomaly-threshold

Description: host-anomaly-threshold is a **JSON Block**. Please see below for *host-anomaly-threshold*

Type: Object

host-sport-discovery

Description 'enable': Enable source port discovery.; 'disable': Disable source port discovery.;

Type: string

Supported Values: enable, disable

indicators-to-monitor

Description: indicators-to-monitor is a **JSON Block**. Please see below for *indicators-to-monitor*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/indicators-to-monitor*

ip-list

Type: List

Reference Object: */axapi/v3/ddos/network-object/{object-name}/ip/{subnet-ip-addr}*

ipv6-list

Type: List

Reference Object: */axapi/v3/ddos/network-object/{object-name}/ipv6/{subnet-ipv6-addr}*

network-object-anomaly-threshold

Description: network-object-anomaly-threshold is a **JSON Block**. Please see below for *network-object-anomaly-threshold*

Type: Object

notification

Description: notification is a **JSON Block**. Please see below for *notification*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/notification*

object-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

operational-mode

Description 'monitor': Monitor mode; 'learning': Learning mode;

Type: string

Supported Values: monitor, learning

Default: learning

relative-auto-break-down-threshold

Description: relative-auto-break-down-threshold is a **JSON Block**. Please see below for *relative-auto-break-down-threshold*

Type: Object

sampling-enable

Type: List

service-break-down-threshold-local

Description: service-break-down-threshold-local is a **JSON Block**. Please see below for *service-break-down-threshold-local*

Type: Object

service-discovery

Description 'disable': Disable service discovery for hosts (default: enabled);

Type: string

Supported Values: disable

sport-anomaly-detection

Description 'disable': Disable source port anomaly detection (default: enabled);

Type: string

Supported Values: disable

sport-anomaly-threshold

Description: sport-anomaly-threshold is a **JSON Block**. Please see below for *sport-anomaly-threshold*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/sport-anomaly-threshold*

sport-discovery-threshold

Description: sport-discovery-threshold is a **JSON Block**. Please see below for *sport-discovery-threshold*

Type: Object

sport-list

Type: List

Reference Object: */axapi/v3/ddos/network-object/{object-name}/sport/{port-num}+{protocol}*

static-auto-break-down-threshold

Description: static-auto-break-down-threshold is a **JSON Block**. Please see below for *static-auto-break-down-threshold*

Type: Object

sub-network

Description: sub-network is a **JSON Block**. Please see below for *sub-network*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/sub-network*

threshold-sensitivity

Description 'LOW': LOW; 'MEDIUM': MEDIUM; 'HIGH': HIGH; 'OFF': OFF;

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Default: OFF

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/topk-destinations*

trustlist

Description: trustlist is a **JSON Block**. Please see below for *trustlist*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/trustlist*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

service-break-down-threshold-local

Specification	Value
Type	*object*

svc-percentage

Description percentage of parent ip node

Type: number

Range: 5-99

network-object-anomaly-threshold

Specification	Value
Type	*object*

network-object-bit-rate

Description Bit rate of the network-object

Type: number

Range: 800-87960930222080

network-object-pkt-rate

Description Packet rate of the network-object

Type: number

Range: 1-10995116277760

indicators-to-monitor

Specification	Value
Type	*object*

enable

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-bit-rate

Description Forward bit rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-fin-rate

Description FIN packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-flow-count

Description Flow count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-icmp-pkt-rate

Description ICMP packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-pkt-rate

Description Forward packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-rev-bit-rate

Description Reverse bit rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-rev-pkt-rate

Description Reverse packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-rst-rate

Description RST packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-syn-rate

Description SYN packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-tcp-pkt-rate

Description TCP packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-udp-pkt-rate

Description UDP packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-undiscovered-pkt-rate

Description Undiscovered forward packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trustlist

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v4-class-list

Description IPv4 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

v6-class-list

Description IPv6 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

relative-auto-break-down-threshold

Specification	Value
Type	*object*

network-percentage

Description percentage of parent node

Type: number

Range: 1-99

permil

Description permil of root node

Type: number

Range: 1-999

host-anomaly-threshold

Specification	Value
Type	*object*

host-bit-rate

Description Forward bit rate of per host

Type: number

Range: 800-34359738360

host-fin-rate

Description FIN packet rate of per host

Type: number

Range: 1-2147483647

host-flow-count

Description Flow count of per host

Type: number

Range: 1-2147483647

host-icmp-pkt-rate

Description ICMP packet rate of per host

Type: number

Range: 1-2147483647

host-pkt-rate

notification-template attributes

api

Description: api is a **JSON Block**. Please see below for *api*

Type: Object

Reference Object: */axapi/v3/ddos/notification-template/{name}/api*

debug-mode

Description Enable debug mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable the notification template (Disable notification temaplate)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description DDOS nofitication template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

test-connectivity

Description Test connectivity to notification receiver

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

verbose

Description Dump zone IPs to the payload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api

Specification	Value
Type	*object*

authentication

Description: authentication is a **JSON Block**. Please see below for *api_authentication*

Type: Object

Reference Object: */axapi/v3/ddos/notification-template/{name}/api/authentication*

disable-authentication

Description Disable authentication to communicate to the host

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

host-ipv4-address

Description Configure the host IPv4 address to send notification (IPv4 address of the host)

Type: string

Format: ipv4-address

Mutual Exclusion: host-ipv4-address, host-ipv6-address, and hostname are mutually exclusive

host-ipv6-address

Description Configure the host IPv6 address to send notification (IPv6 address of the host)

Type: string

Format: ipv6-address

Mutual Exclusion: host-ipv6-address, host-ipv4-address, and hostname are mutually exclusive

hostname

Description host name(e.g www.a10networks.com)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Mutual Exclusion: hostname, host-ipv4-address, and host-ipv6-address are mutually exclusive

http-port

Description Configure the http port to use(default 80) (http port(default 80))

Type: number

Range: 1-65535

Default: 80

http-protocol

Description 'http': Use http protocol; 'https': Use https protocol(default); (http protocol)

Type: string

Supported Values: http, https

Default: https

https-port

Description Configure the https port to use(default 443) (https port(default 443))

Type: number

Range: 1-65535

Default: 443

relative-uri

Description Configure the relative uri for the api(e.g /example , default /) (api relative uri)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Default: /

timeout

Description Configure the api execution timeout(default 10secs) (api timeout)

Type: number

Range: 5-60

Default: 10

use-mgmt-port

Description Use management port to send out notification

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

api_authentication

Specification	Value
Type	*object*

api-key

Description Configure api-key as a mode of authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api-key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

api-key-string

Description Configure api-key as a mode of authentication

Type: string

Format: password

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-password

Description Configure the authentication user password (Authentication password)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-password-val

Description Configure the authentication user password (Authentication password)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-username

Description Configure the authentication user name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

relative-login-uri

Description Configure the authentication login uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

relative-logoff-uri

Description Configure the authentication logoff uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protection attributes

blacklist-reason-tracking

Description Enable blacklist reason tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sess-for-unauth-src-without-rst

Description When closing unauthenticated sessions, don't send TCP RST for established TCP sessions. (Default disabled / sending TCP RST for

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-advanced-core-analysis

Description Disable advanced context info in coredump file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-delay-dynamic-src-learning

Description Disable delay dynamic src entry learning

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-on-reboot

Description Disable DDoS protection upon reboot/reload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disallow-rst-ack-in-syn-auth

Description Disallow RST-ACK passing syn-auth

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-now

Description Override disable-on-reboot to enable runtime DDOS protection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fast-aging

Description: fast-aging is a **JSON Block**. Please see below for *fast-aging*

Type: Object

fast-path-disable

Description Disable fast path in SLB processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-routing-on-transp

Description Force use of routing in transparent mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-traffic-to-same-blade-disable

Description Allow traffic to be distributed among blades on Chassis

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-blocking-enable

Description Enable hardware blacklist blocking for src or dst default entries (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-blocking-threshold-limit

Description Threshold to initiate hardware blocking (default 10000)

Type: number

Range: 1-16000000

Default: 10000

ipv6-src-hash-mask-bits

Description: ipv6-src-hash-mask-bits is a **JSON Block**. Please see below for *ipv6-src-hash-mask-bits*

Type: Object

Reference Object: */axapi/v3/ddos/protection/ipv6-src-hash-mask-bits*

mpls

Description Enable MPLS packet inspection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multi-pu-zone-distribution

Description: multi-pu-zone-distribution is a **JSON Block**. Please see below for *multi-pu-zone-distribution*

Type: Object

Reference Object: */axapi/v3/ddos/protection/multi-pu-zone-distribution*

non-zero-win-size-syncookie

Description Send syn-cookie with fix TCP window size if SYN packet has zero window size (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

per-service-szp-entry-limit

Description: per-service-szp-entry-limit is a **JSON Block**. Please see below for *per-service-szp-entry-limit*

Type: Object

Reference Object: */axapi/v3/ddos/protection/per-service-szp-entry-limit*

pkt-rate-limit-on-reassemble

Description 'enable': enable; 'disable': disable (Default);

Type: string

Supported Values: enable, disable

Default: disable

progression-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 100ms

rate-limit-sync-interval

Description Multi-PU rate limit syncing interval (default 3)

Type: number

Range: 1-5

Default: 3

rexmit-syn-log

Description Enable ddos per flow rexmit syn exceeded log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dst-entry-limit

Description '8M': 8 Million; '16M': 16 Million; 'unlimited': Unlimited; 'platform-default': Half of platform maximum;

Type: string

Supported Values: 8M, 16M, unlimited, platform-default

Default: 16M

src-hash-function

Description 'v1': v1; 'v2': v2;

Type: string

Supported Values: v1, v2

Default: v1

src-ip-hash-bit

Description Configure which bit hashed on

Type: number

Range: 0-31

Default: 2

src-ipv6-hash-bit

Description Configure which bit hashed on

Type: number

Range: 0-127

Default: 2

src-zone-port-entry-limit

Description '8M': 8 Million; '16M': 16 Million; 'unlimited': Unlimited; 'platform-default': Half of platform maximum;

Type: string

Supported Values: 8M, 16M, unlimited, platform-default

Default: 16M

szp-clist-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

szp-warn-exceed-enable

Description Send logs if src-zone-port count exceeds "max-src-dst-entry"

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

szp-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

use-route

Description Use route table, default use receive hop for device initiated traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan-outbound-check

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

fast-aging

Specification	Value
Type	*object*

half-open-conn-ratio

Description Minimum half-open session to total session ratio before session fast aging will take effect (default 25)

Type: number

Range: 1-99

Default: 25

half-open-conn-threshold

Description Minimum half-open session (percentage) before session fast aging will take effect (default 1)

Type: number

Range: 1-99

Default: 1

per-service-szp-entry-limit

Specification	Value
Type	*object*

dns-tcp-limit

Description Szp limit for port / port-range dns-tcp

Type: number

Range: 0-2147483647

dns-udp-limit

Description Szp limit for port / port-range dns-udp

Type: number

Range: 0-2147483647

http-limit

Description Szp limit for port / port-range http

Type: number

Range: 0-2147483647

ip-proto-custom-limit

Description Szp limit for custom ip-proto

Type: number

Range: 0-2147483647

ip-proto-gre-limit

Description Szp limit for ip-proto gre

Type: number

Range: 0-2147483647

ip-proto-icmp-v4-limit

Description Szp limit for ip-proto icmp-v4

Type: number

Range: 0-2147483647

ip-proto-icmp-v6-limit

Description Szp limit for ip-proto icmp-v6

Type: number

Range: 0-2147483647

ip-proto-ipv4-encap-limit

Description Szp limit for ip-proto ipv4-encap

Type: number

Range: 0-2147483647

ip-proto-ipv6-encap-limit

Description Szp limit for ip-proto ipv6-encap

Type: number

Range: 0-2147483647

ip-proto-other-limit

Description Szp limit for ip-proto other

Type: number

Range: 0-2147483647

quic-limit

Description Szp limit for port / port-range quic

Type: number

Range: 0-2147483647

sip-tcp-limit

Description Szp limit for port / port-range sip-tcp

Type: number

Range: 0-2147483647

sip-udp-limit

2.33.439 ddos reporting

Reporting service configuration

reporting Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	reporting
Element URI	/axapi/v3/ddos/reporting
Element Attributes	reporting_attributes
Partition Visibility	shared
Schema	`reporting schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/reporting

reporting attributes

Get Object

GET

/axapi/v3/ddos/reporting

reporting attributes

Modify Object

POST

/axapi/v3/ddos/reporting

reporting attributes

Replace Object

PUT

/axapi/v3/ddos/reporting

reporting attributes

Delete Object

DELETE

/axapi/v3/ddos/reporting

reporting attributes

reporting attributes

toggle

Description 'disable-on-limit-reached': Disable reporting on DST/Port entry when the max reporting count is reached; 'reject-on-limit-reached': Reject the configuration when the max reporting count is reached;

Type: string

Supported Values: disable-on-limit-reached, reject-on-limit-reached

Default: reject-on-limit-reached

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.440 ddos resource-tracking

DDoS Resource Tracking

resource-tracking Specification

Parameter	Value
Type	*Intermediate Resource*
Element Name	resource-tracking
Element URI	/axapi/v3/ddos/resource-tracking
Element Attributes	resource-tracking_attributes
Partition Visibility	shared
Schema	`resource-tracking schema`

Operations Allowed:

Description Line Too Long

Type: number

Format: counter

malform_request

Description Malformed Request

Type: number

Format: counter

max_call_id_len_exceed

Description Max Call ID Length Exceed

Type: number

Format: counter

max_header_value_len_exceed

Description Max Header Value Length Exceed

Type: number

Format: counter

max_sdp_len_exceed

Description Max SDP Length Exceed

Type: number

Format: counter

max_uri_len_exceed

Description Max URI Length Exceed

Type: number

Format: counter

mem_alloc_fail_error

Description Memory Allocate Fail

Type: number

Format: counter

ofo_queue_size_exceed

Description Out-Of-Order Queue Size Exceed

Type: number

Format: counter

ofo_timeout

Description Out-of-Order Timeout

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

parse_header_fail_error

Description Header Parse Fail

Type: number

Format: counter

parse_start_line_error

Description Start Line Parse Error

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

pkts_ofo_total

Description Packet Out-Of-Order Total

Type: number

Format: counter

pkts_retrans_total

Description Packets Retransmit Total

Type: number

Format: counter

policy_drop

Description Policy Drop

Type: number

Format: counter

policy_violation

Description Policy Violation

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_syn_rate_exceed

Description TCP SYN Rate Exceeded

Type: number

Format: counter

port_synack_rate_exceed

Description TCP SYNACK Rate Exceeded

Type: number

Format: counter

prog_conn_exceed_bl

Description Connection: Violation Exceed Blacklisted

Type: number

Format: counter

prog_conn_exceed_drop

Description Connection: Violation Exceed Dropped

Type: number

Format: counter

prog_conn_exceed_reset

Description Connection: Violation Exceed Reset

Type: number

Format: counter

prog_conn_rcvd_exceed

Description Connection: Received Exceed

Type: number

Format: counter

prog_conn_rcvd_sent_ratio_exceed

Description Connection: Reveived to Sent Ratio Exceed

Type: number

Format: counter

prog_conn_samples

Description Sample Collected: Connection

Type: number

Format: counter

prog_conn_samples_processed

Description Sample Processed: Connnection

Type: number

Format: counter

prog_conn_sent_exceed

Description Connection: Sent Exceed

Type: number

Format: counter

prog_conn_time_exceed

Description Connection: Time Exceed

Type: number

Format: counter

prog_exceed_bl

Description Req-Resp: Violation Exceed Blacklisted

Type: number

Format: counter

prog_exceed_drop

Description Req-Resp: Violation Exceed Dropped

Type: number

Format: counter

prog_exceed_reset

Description Req-Resp: Violation Exceed Reset

Type: number

Format: counter

prog_first_req_time_exceed

Description Req-Resp: First Request Time Exceed

Type: number

Format: counter

prog_query_exceed

Description Req-Resp: Client Query Time Exceed

Type: number

Format: counter

prog_req_resp_time_exceed

Description Req-Resp: Request to Response Time Exceed

Type: number

Format: counter

prog_req_samples

Description Sample Collected: Req-Resp

Type: number

Format: counter

prog_req_samples_processed

Description Sample Processed: Req-Resp

Type: number

Format: counter

prog_request_len_exceed

Description Req-Resp: Request Length Exceed

Type: number

Format: counter

prog_resp_pkt_rate_exceed

Description Req-Resp: Response Packet Rate Exceed

Type: number

Format: counter

prog_resp_req_time_exceed

Description Req-Resp: Response to Request Time Exceed

Type: number

Format: counter

prog_response_len_exceed

Description Req-Resp: Response Length Exceed

Type: number

Format: counter

prog_think_exceed

Description Req-Resp: Server Think Time Exceed

Type: number

Format: counter

prog_win_exceed_bl

Description Time Window: Violation Exceed Blacklisted

Type: number

Format: counter

prog_win_exceed_drop

Description Time Window: Violation Exceed Dropped

Type: number

Format: counter

prog_win_exceed_reset

Description Time Window: Violation Exceed Reset

Type: number

Format: counter

prog_win_rcvd_exceed

Description Time Window: Received Exceed

Type: number

Format: counter

prog_win_rcvd_sent_ratio_exceed

Description Time Window: Received to Sent Exceed

Type: number

Format: counter

prog_win_samples

Description Sample Collected: Time Window

Type: number

Format: counter

prog_win_samples_processed

Description Sample Processed: Time Window

Type: number

Format: counter

prog_win_sent_exceed

Description Time Window: Sent Exceed

Type: number

Format: counter

rate1_limit_exceed

Description Dst Request Rate 1 Limit Exceed

Type: number

Format: counter

rate2_limit_exceed

Description Dst Request Rate 2 Limit Exceed

Type: number

Format: counter

rate3_limit_exceed

Description Dst Request Rate 3 Limit Exceed

Type: number

Format: counter

read_start_line_error

Description Start Line Read Error

Type: number

Format: counter

request_method_ack

Description Request Method ACK

Type: number

Format: counter

request_method_bye

Description Request Method BYE

Type: number

Format: counter

request_method_cancel

Description Request Method CANCEL

Type: number

Format: counter

request_method_info

Description Request Method INFO

Type: number

Format: counter

request_method_invite

Description Request Method INVITE

Type: number

Format: counter

request_method_message

Description Request Method MESSAGE

Type: number

Format: counter

request_method_notify

Description Request Method NOTIFY

Type: number

Format: counter

request_method_options

Description Request Method OPTIONS

Type: number

Format: counter

request_method_prack

Description Request Method PRACK

Type: number

Format: counter

request_method_publish

Description Request Method PUBLISH

Type: number

Format: counter

request_method_refer

Description Request Method REFER

Type: number

Format: counter

request_method_register

Description Request Method REGISTER

Type: number

Format: counter

request_method_subscribe

Description Request Method SUBSCRIBE

Type: number

Format: counter

request_method_unknown

Description Unknown Request Method

Type: number

Format: counter

request_method_update

Description Request Method UPDATE

Type: number

Format: counter

request_unknown_version

Description Unknown Request Version

Type: number

Format: counter

response_1xx

Description Response Status Code 1xx

Type: number

Format: counter

response_2xx

Description Response Status Code 2xx

Type: number

Format: counter

response_3xx

Description Response Status Code 3xx

Type: number

Format: counter

response_4xx

Description Response Status Code 4xx

Type: number

Format: counter

response_5xx

Description Response Status Code 5xx

Type: number

Format: counter

response_6xx

Description Response Status Code 6xx

Type: number

Format: counter

response_unknown

Description Unknown Response Status Code

Type: number

Format: counter

response_unknown_version

Description Unknown Response Version

Type: number

Format: counter

retransmit_excd

Description Retransmit Exceeded

Type: number

Format: counter

rst_cookie_fail

Description RST Cookie Failed

Type: number

Format: counter

seq_check_ofo

Description Sequence Check Out-Of-Order

Type: number

Format: counter

seq_check_retrans_fin

Description Sequence Check Retransmit Fin

Type: number

Format: counter

seq_check_retrans_other

Description Sequence Check Retransmit Other

Type: number

Format: counter

seq_check_retrans_push

Description Sequence Check Retransmit Push

Type: number

Format: counter

seq_check_retrans_rst

Description Sequence Check Retransmit Rst

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Format: counter

small_window_excd

Description Small-Window Exceeded

Type: number

Format: counter

small_window_rcv

Description Small-Window Receive

Type: number

Format: counter

snat_fail

Description Source NAT Failure

Type: number

Format: counter

src_ack_auth_fail

Description Src ACK Retry Dropped

Type: number

Format: counter

src_ack_retry_blacklist

Description Src ACK Retry Timeout Blacklisted

Type: number

Format: counter

src_ack_retry_gap_drop

Description Src ACK Retry Retry-Gap Dropped

Type: number

Format: counter

src_ack_retry_init

Description Src ACK Retry Init

Type: number

Format: counter

src_ack_retry_reset

Description Src ACK Retry Timeout Reset

Type: number

Format: counter

src_ack_retry_rto_fail

Description Src ACK Retry RTO Dropped

Type: number

Format: counter

src_ack_retry_rto_pass

Description Src ACK Retry RTO Passed

Type: number

Format: counter

src_ack_retry_rto_progress

Description Src ACK Retry RTO Progress

Type: number

Format: counter

src_ack_retry_timeout

Description Src ACK Retry Timeout

Type: number

Format: counter

src_auth_drop

Description Src TCP Auth Dropped

Type: number

Format: counter

src_auth_drop_ack

Description Src TCP Auth Dropped: ACK

Type: number

Format: counter

src_auth_drop_ack_fail_auth

Description Src TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

src_auth_drop_ack_pass_auth

Description Src TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

src_auth_drop_ack_xmit

Description Src TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

src_auth_drop_rst

Description Src TCP Auth Dropped: RST

Type: number

Format: counter

src_auth_drop_rst_fail_auth

Description Src TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

src_auth_drop_rst_pass_auth

Description Src TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

src_auth_drop_rst_xmit

Description Src TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

src_auth_drop_syn

Description Src TCP Auth Dropped: SYN

Type: number

Format: counter

src_conn_ofo_rate_excd

Description Src TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

src_conn_pkt_rate_excd

Description Src TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

src_conn_rexmit_rate_excd

Description Src TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

src_conn_zwindow_rate_excd

Description Src TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

src_create_conn_non_syn_dropped

Description Src Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

src_drop

Description Src Packets Dropped

Type: number

Format: counter

src_filter1_match

Description Src Filter1 Match

Type: number

Format: counter

src_filter2_match

Description Src Filter2 Match

Type: number

Format: counter

src_filter3_match

Description Src Filter3 Match

Type: number

Format: counter

src_filter4_match

Description Src Filter4 Match

Type: number

Format: counter

src_filter5_match

Description Src Filter5 Match

Type: number

Format: counter

src_filter_action_blacklist

Description Src Filter Action Blacklist

Type: number

Format: counter

src_filter_action_default_pass

Description Src Filter Action Default Pass

Type: number

Format: counter

src_filter_action_drop

Description Src Filter Action Drop

Type: number

Format: counter

src_filter_action_whitelist

Description Src Filter Action WL

Type: number

Format: counter

src_filter_auth_fail

Description Src Filter Auth Failed

Type: number

Format: counter

src_filter_none_match

Description Src Filter No Match

Type: number

Format: counter

src_filter_total_not_match

Description Src Filter Not Matched on Pkt

Type: number

Format: counter

src_frag_drop

Description Src Fragmented Packets Dropped

Type: number

Format: counter

src_out_of_seq_excd

Description Src Out-Of-Seq Exceeded

Type: number

Format: counter

src_rate1_limit_exceed

Description Src Request Rate 1 Limit Exceed

Type: number

Format: counter

src_rate2_limit_exceed

Description Src Request Rate 2 Limit Exceed

Type: number

Format: counter

src_rate3_limit_exceed

Description Src Request Rate 3 Limit Exceed

Type: number

Format: counter

src_retransmit_excd

Description Src Retransmit Exceeded

Type: number

Format: counter

src_rst_cookie_fail

Description Src RST Cookie Failed

Type: number

Format: counter

src_small_window_excd

Description Src Small-Window Exceeded

Type: number

Format: counter

src_syn_auth_fail

Description Src SYN Auth Failed

Type: number

Format: counter

src_syn_cookie_fail

Description Src SYN Cookie Failed

Type: number

Format: counter

src_syn_cookie_sent

Description Src SYN Cookie Sent

Type: number

Format: counter

src_syn_rate_exceed

Description Src TCP SYN Rate Exceeded

Type: number

Format: counter

src_syn_retry_blacklist

Description Src SYN Retry Timeout Blacklisted

Type: number

Format: counter

src_syn_retry_failed

Description Src SYN Retry Dropped

Type: number

Format: counter

src_syn_retry_gap_drop

Description Src SYN Retry-Gap Dropped

Type: number

Format: counter

src_syn_retry_init

Description Src SYN Retry Init

Type: number

Format: counter

src_syn_retry_reset

Description Src SYN Retry Timeout Reset

Type: number

Format: counter

src_syn_retry_rto_fail

Description Src SYN Retry RTO Dropped

Type: number

Format: counter

src_syn_retry_rto_pass

Description Src SYN Retry RTO Passed

Type: number

Format: counter

src_syn_retry_rto_progress

Description Src SYN Retry RTO Progress

Type: number

Format: counter

src_syn_retry_timeout

Description Src SYN Retry Timeout

Type: number

Format: counter

src_tcp_auth_rst

Description Src TCP Auth Reset

Type: number

Format: counter

src_unauth_drop

Description Src TCP Unauth Dropped

Type: number

Format: counter

src_well_known_port

Description Src TCP SrcPort Wellknown

Type: number

Format: counter

src_zero_window_excd

Description Src Zero-Window Exceeded

Type: number

Format: counter

syn_auth_fail

Description SYN Auth Failed

Type: number

Format: counter

syn_auth_pass

Description SYN Auth Passed

Type: number

Format: counter

syn_auth_rst_ack_drop

Description SYN Auth RST-ACK Dropped

Type: number

Format: counter

syn_cookie_fail

Description SYN Cookie Failed

Type: number

Format: counter

syn_cookie_sent

Description SYN Cookie Sent

Type: number

Format: counter

syn_drop

Description SYN Dropped

Type: number

Format: counter

syn_retry_blacklist

Description SYN Retry Timeout Blacklisted

Type: number

Format: counter

syn_retry_failed

Description SYN Retry Dropped

Type: number

Format: counter

syn_retry_gap_drop

Description SYN Retry-Gap Dropped

Type: number

Format: counter

syn_retry_init

Description SYN Retry Init

Type: number

Format: counter

syn_retry_pass

Description SYN Retry Passed

Type: number

Format: counter

syn_retry_reset

Description SYN Retry Timeout Reset

Type: number

Format: counter

syn_retry_rto_fail

Description SYN Retry RTO Dropped

Type: number

Format: counter

syn_retry_rto_pass

Description SYN Retry RTO Passed

Type: number

Format: counter

syn_retry_rto_progress

Description SYN Retry RTO Progress

Type: number

Format: counter

syn_retry_timeout

Description SYN Retry Timeout

Type: number

Format: counter

syn_tfo_rcv

Description SYN TFO Received

Type: number

Format: counter

synack_multiple_attempts_per_ip_detected

Description SYNACK Multiple Attempts Per IP Detected

Type: number

Format: counter

synack_reset_sent

Description SYNACK Reset Sent

Type: number

Format: counter

tcp_ack_data_drop

Description TCP ACK with Data Dropped

Type: number

Format: counter

tcp_ack_data_fwd

Description TCP ACK with Data Forward

Type: number

Format: counter

tcp_ack_data_rcvd

Description TCP ACK with Data Received

Type: number

Format: counter

tcp_ack_drop

Description TCP ACK Dropped

Type: number

Format: counter

tcp_ack_fwd

Description TCP ACK Forward

Type: number

Format: counter

tcp_ack_rcvd

Description TCP ACK Received

Type: number

Format: counter

tcp_auth_drop

Description TCP Auth Dropped

Type: number

Format: counter

tcp_auth_drop_ack

Description TCP Auth Dropped: ACK

Type: number

Format: counter

tcp_auth_drop_ack_fail_auth

Description TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

tcp_auth_drop_ack_pass_auth

Description TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

tcp_auth_drop_ack_xmit

Description TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

tcp_auth_drop_rst

Description TCP Auth Dropped: RST

Type: number

Format: counter

tcp_auth_drop_rst_fail_auth

Description TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

tcp_auth_drop_rst_pass_auth

Description TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

tcp_auth_drop_rst_xmit

Description TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

tcp_auth_drop_syn

Description TCP Auth Dropped: SYN

Type: number

Format: counter

tcp_auth_resp

Description TCP Auth Responded

Type: number

Format: counter

tcp_auth_rst

Description TCP Auth Reset

Type: number

Format: counter

tcp_cwr_drop

Description TCP CWR Dropped

Type: number

Format: counter

tcp_cwr_fwd

Description TCP CWR Forward

Type: number

Format: counter

tcp_cwr_rcvd

Description TCP CWR Received

Type: number

Format: counter

tcp_ece_drop

Description TCP ECE Dropped

Type: number

Format: counter

tcp_ece_fwd

Description TCP ECE Forward

Type: number

Format: counter

tcp_ece_rcvd

Description TCP ECE Received

Type: number

Format: counter

tcp_empty_ack_drop

Description TCP Empty ACK Dropped

Type: number

Format: counter

tcp_empty_ack_fwd

Description TCP Empty ACK Forward

Type: number

Format: counter

tcp_empty_ack_rcvd

Description TCP Empty ACK Received

Type: number

Format: counter

tcp_fin_ack_drop

Description TCP FIN ACK Dropped

Type: number

Format: counter

tcp_fin_ack_fwd

Description TCP FIN ACK Forward

Type: number

Format: counter

tcp_fin_ack_rcvd

Description TCP FIN ACK Received

Type: number

Format: counter

tcp_fin_drop

Description TCP FIN Dropped

Type: number

Format: counter

tcp_fin_fwd

Description TCP FIN Forward

Type: number

Format: counter

tcp_fin_psh_ack_drop

Description TCP FIN PSH ACK Drop

Type: number

Format: counter

tcp_fin_psh_ack_fwd

Description TCP FIN PSH ACK Forward

Type: number

Format: counter

tcp_fin_psh_ack_rcvd

Description TCP FIN PSH ACK Received

Type: number

Format: counter

tcp_fin_rcvd

Description TCP FIN Received

Type: number

Format: counter

tcp_psh_ack_drop

Description TCP PSH ACK Dropped

Type: number

Format: counter

tcp_psh_ack_fwd

Description TCP PSH ACK Forward

Type: number

Format: counter

tcp_psh_ack_rcvd

Description TCP PSH ACK Received

Type: number

Format: counter

tcp_psh_drop

Description TCP PSH Dropped

Type: number

Format: counter

tcp_psh_fwd

Description TCP PSH Forward

Type: number

Format: counter

tcp_psh_rcvd

Description TCP PSH Received

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP SYN Retransmit Exceeded Blacklist

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP SYN Retransmit Exceeded Drop

Type: number

Format: counter

tcp_rst_ack_drop

Description TCP RST ACK Dropped

Type: number

Format: counter

tcp_rst_ack_fwd

Description TCP RST ACK Forward

Type: number

Format: counter

tcp_rst_ack_rcvd

Description TCP RST ACK Received

Type: number

Format: counter

tcp_rst_drop

Description TCP RST Dropped

Type: number

Format: counter

tcp_rst_fwd

Description TCP RST Forward

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Type: number

Format: counter

tcp_syn_ack_drop

Description TCP SYN ACK Dropped

Type: number

Format: counter

tcp_syn_ack_fwd

Description TCP SYN ACK Forward

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_fwd

Description SYN Forward

Type: number

Format: counter

tcp_syn_rcvd

Description TCP Inbound SYN Received

Type: number

Format: counter

tcp_urg_drop

Description TCP URG Dropped

Type: number

Format: counter

tcp_urg_fwd

Description TCP URG Forward

Type: number

Format: counter

tcp_urg_rcvd

Description TCP URG Received

Type: number

Format: counter

too_many_header

Description Max Header Count Exceed

Type: number

Format: counter

unauth_drop

Description TCP Unauth Dropped

Type: number

Format: counter

wellknown_sport_drop

Description TCP SrcPort Wellknown

Type: number

Format: counter

zero_window_excd

Description Zero-Window Exceeded

Type: number

Format: counter

2.33.450 ddos sip-tcp-zone-port stats

Statistics for the object sip-tcp-zone-port

sip-tcp-zone-port Specification

Parameter	Value
Type	*Collection*

Description Body Too Big

Type: number

Format: counter

clear_session_upon_deescalation

Description Clear Session Upon De-escalation to Level 0

Type: number

Format: counter

client_rst

Description Client Rst

Type: number

Format: counter

concatenate_msg

Description Concatenate Message

Type: number

Format: counter

conn_close

Description Connections Closed

Type: number

Format: counter

conn_close_half_open

Description Half Open Connections Closed

Type: number

Format: counter

conn_close_w_fin

Description FIN Connections Closed

Type: number

Format: counter

conn_close_w_idle

Description Idle Connections Closed

Type: number

Format: counter

conn_close_w_rst

Description RST Connections Closed

Type: number

Format: counter

conn_create_from_ack

Description Connections Created From ACK

Type: number

Format: counter

conn_create_from_syn

Description Connections Created From SYN

Type: number

Format: counter

conn_create_from_synack

Description Connections Created From SYNACK

Type: number

Format: counter

conn_ofo_rate_excd

Description TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

conn_prate_excd

Description TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

conn_rexmit_rate_excd

Description TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

conn_zwindow_rate_excd

Description TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

create_conn_non_syn_dropped

Description Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

current_es_level

Description Current Escalation Level

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

dst_hw_drop_inserted

Description Dst Hardware Drop Rules Inserted

Type: number

Format: counter

dst_hw_drop_removed

Description Dst Hardware Drop Rules Removed

Type: number

Format: counter

dst_tcp_conn_half_open_timeout

Description Half Open Connections Timeout

Type: number

Format: counter

dst_tcp_conn_half_open_timeout_rst_sent

Description Half Open Connections Timeout RST Sent

Type: number

Format: counter

dst_tcp_sess_aged_rst_sent

Description Sessions Aged Out RST Sent

Type: number

Format: counter

dynamic_count_warn

Description dynamic-entry-count warning send

Type: number

Format: counter

error_condition

Description Error Condition

Type: number

Format: counter

ew_inbound_port_byte_drop

Description East-West Inbound Bytes Dropped

Type: number

Format: counter

ew_inbound_port_byte_rcv

Description East-West Inbound Bytes Recevied

Type: number

Format: counter

ew_inbound_port_byte_sent

Description East-West Inbound Bytes Forwarded

Type: number

Format: counter

ew_inbound_port_drop

Description East-West Inbound Packets Dropped

Type: number

Format: counter

ew_inbound_port_rcv

Description East-West Inbound Packets Received

Type: number

Format: counter

ew_inbound_port_sent

Description East-West Inbound Packets Forwarded

Type: number

Format: counter

Format: counter

ew_outbound_port_byte_sent

Description East-West Outbound Bytes Dropped

Type: number

Format: counter

ew_outbound_port_drop

Description East-West Outbound Packets Dropped

Type: number

Format: counter

ew_outbound_port_rcv

Description East-West Outbound Packets Received

Type: number

Format: counter

ew_outbound_port_sent

Description East-West Outbound Packets Forwarded

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action WL

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

get_content_fail_error

Description Get Content Fail

Type: number

Format: counter

header_filter_action_blacklist

Description Header Filter Action Blacklist

Type: number

Format: counter

header_filter_action_default_pass

Description Header Filter Action Default Pass

Type: number

Format: counter

header_filter_action_drop

Description Header Filter Action Drop

Type: number

Format: counter

header_filter_action_whitelist

Description Header Filter Action Whitelist

Type: number

Format: counter

header_filter_filter1_match

Description Header Filter 1 Match

Type: number

Format: counter

header_filter_filter2_match

Description Header Filter 2 Match

Type: number

Format: counter

header_filter_filter3_match

Description Header Filter 3 Match

Type: number

Format: counter

header_filter_filter4_match

Description Header Filter 4 Match

Type: number

Format: counter

header_filter_filter5_match

Description Header Filter 5 Match

Type: number

Format: counter

header_filter_match

Description Header Filter Match

Type: number

Format: counter

header_filter_none_match

Description None Header Filter Match

Type: number

Format: counter

header_filter_not_match

Description Header Filter Not Match

Type: number

Format: counter

header_name_too_long

Description Max Header Name Length Exceed

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

Format: counter

hybrid_auth_auth_no_match_rst_rcv

Description SYN Auth Hybrid Auth No Match Drop: RST Received

Type: number

Format: counter

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

idle_timeout

Description Idle Timeout

Type: number

Format: counter

invalid_header

Description Invalid Header

Type: number

Format: counter

invalid_start_line_error

Description Invalid Start Line

Type: number

Format: counter

ip_filtering_bl

Description IP Filtering Policy: Blacklisted

Type: number

Format: counter

ip_filtering_drop

Description IP Filtering Policy: Dropped

Type: number

Format: counter

keep_alive_msg

Description KeepAlive Message

Type: number

Format: counter

line_mem_allocated

Description Line Memory Allocated

Type: number

Format: counter

line_mem_freed

Description Line Memory Freed

Type: number

Format: counter

line_too_long

Description Line Too Long

Type: number

Format: counter

malform_request

Description Malformed Request

Type: number

Format: counter

max_call_id_len_exceed

Description Max Call ID Length Exceed

Type: number

Format: counter

max_header_value_len_exceed

Description Max Header Value Length Exceed

Type: number

Format: counter

max_sdp_len_exceed

Description Max SDP Length Exceed

Type: number

Format: counter

max_uri_len_exceed

Description Max URI Length Exceed

Type: number

Format: counter

mem_alloc_fail_error

Description Memory Allocate Fail

Type: number

Format: counter

no_policy_class_list_match

Description No Policy Class-list Match

Type: number

Format: counter

no_route_drop

Description No Route Dropped

Type: number

Format: counter

ofo_queue_size_exceed

Description Out-Of-Order Queue Size Exceed

Type: number

Format: counter

ofo_timeout

Description Out-of-Order Timeout

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

parse_header_fail_error

Description Header Parse Fail

Type: number

Format: counter

parse_start_line_error

Description Start Line Parse Error

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

pkts_ofo_total

Description Packet Out-Of-Order Total

Type: number

Format: counter

pkts_retrans_total

Description Packets Retransmit Total

Type: number

Format: counter

policy_drop

Description Policy Drop

Type: number

Format: counter

policy_violation

Description Policy Violation

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

Description UDP Retry Timeout Blacklisted

Type: number

Format: counter

dynamic_count_warn

Description dynamic-entry-count warning send

Type: number

Format: counter

ew_inbound_port_byte_drop

Description East-West Inbound Bytes Dropped

Type: number

Format: counter

ew_inbound_port_byte_rcv

Description East-West Inbound Bytes Recevied

Type: number

Format: counter

ew_inbound_port_byte_sent

Description East-West Inbound Bytes Forwarded

Type: number

Format: counter

ew_inbound_port_drop

Description East-West Inbound Packets Dropped

Type: number

Format: counter

ew_inbound_port_rcv

Description East-West Inbound Packets Received

Type: number

Format: counter

ew_inbound_port_sent

Description East-West Inbound Packets Forwarded

Type: number

Format: counter

ew_outbound_port_byte_drop

Description East-West Outbound Bytes Forwarded

Type: number

Format: counter

ew_outbound_port_byte_rcv

Description East-West Outbound Bytes Recevied

Type: number

Format: counter

ew_outbound_port_byte_sent

Description East-West Outbound Bytes Dropped

Type: number

Format: counter

ew_outbound_port_drop

Description East-West Outbound Packets Dropped

Type: number

Format: counter

ew_outbound_port_rcv

Description East-West Outbound Packets Received

Type: number

Format: counter

ew_outbound_port_sent

Description East-West Outbound Packets Forwarded

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action Whitelist

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

get_content_fail_error

Description Get Content Fail

Type: number

Format: counter

header_filter_action_blacklist

Description Header Filter Action Blacklist

Type: number

Format: counter

header_filter_action_default_pass

Description Header Filter Action Default Pass

Type: number

Format: counter

header_filter_action_drop

Description Header Filter Action Drop

Type: number

Format: counter

header_filter_action_whitelist

Description Header Filter Action Whitelist

Type: number

Format: counter

header_filter_filter1_match

Description Header Filter 1 Match

Type: number

Format: counter

header_filter_filter2_match

Description Header Filter 2 Match

Type: number

Format: counter

header_filter_filter3_match

Description Header Filter 3 Match

Type: number

Format: counter

header_filter_filter4_match

Description Header Filter 4 Match

Type: number

Format: counter

header_filter_filter5_match

Description Header Filter 5 Match

Type: number

Format: counter

header_filter_match

Description Header Filter Match

Type: number

Format: counter

header_filter_none_match

Description None Header Filter Match

Type: number

Format: counter

header_filter_not_match

Description Header Filter Not Match

Type: number

Format: counter

header_name_too_long

Description Max Header Name Length Exceed

Type: number

Format: counter

invalid_header

Description Invalid Header

Type: number

Format: counter

invalid_start_line_error

Description Invalid Start Line

Type: number

Format: counter

ip_filtering_bl

Description IP Filtering Policy: Blacklisted

Type: number

Format: counter

ip_filtering_drop

Description IP Filtering Policy: Dropped

Type: number

Format: counter

keep_alive_msg

Description KeepAlive Message

Type: number

Format: counter

line_mem_allocated

Description Line Memory Allocated

Type: number

Format: counter

line_mem_freed

Description Line Memory Freed

Type: number

Format: counter

line_too_long

Description Line Too Long

Type: number

Format: counter

malform_request

Description Malformed Request

Type: number

Format: counter

max_call_id_len_exceed

Description Max Call ID Length Exceed

Type: number

Format: counter

max_header_value_len_exceed

Description Max Header Value Length Exceed

Type: number

Format: counter

max_sdp_len_exceed

Description Max SDP Length Exceed

Type: number

Format: counter

max_uri_len_exceed

Description Max URI Length Exceed

Type: number

Format: counter

mem_alloc_fail_error

Description Memory Allocate Fail

Type: number

Format: counter

no_policy_class_list_match

Description No Policy Class-list Match

Type: number

Format: counter

no_route_drop

Description No Route Dropped

Type: number

Format: counter

ntp_monlist_req

Description NTP Monlist Request

Type: number

Format: counter

ntp_monlist_resp

Description NTP Monlist Response

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

parse_header_fail_error

Description Header Parse Fail

Type: number

Format: counter

parse_start_line_error

Description Start Line Parse Error

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

payload_too_big

Description UDP Payload Too Large

Type: number

Format: counter

payload_too_small

Description UDP Payload Too Small

Type: number

Format: counter

policy_drop

Description Policy Drop

Type: number

Format: counter

policy_violation

Description Policy Violation

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_src_escalation

Description Src Escalation

Type: number

Format: counter

rate1_limit_exceed

Description Dst Request Rate 1 Limit Exceed

Type: number

Format: counter

rate2_limit_exceed

Description Dst Request Rate 2 Limit Exceed

Type: number

Format: counter

rate3_limit_exceed

Description Dst Request Rate 3 Limit Exceed

Type: number

Format: counter

read_start_line_error

Description Start Line Read Error

Type: number

Format: counter

request_method_ack

Description Request Method ACK

Type: number

Format: counter

request_method_bye

Description Request Method BYE

Type: number

Format: counter

request_method_cancel

Description Request Method CANCEL

Type: number

Format: counter

request_method_info

Description Request Method INFO

Type: number

Format: counter

request_method_invite

Description Request Method INVITE

Type: number

Format: counter

request_method_message

Description Request Method MESSAGE

Type: number

Format: counter

request_method_notify

Description Request Method NOTIFY

Type: number

Format: counter

request_method_options

Description Request Method OPTIONS

Type: number

Format: counter

request_method_prack

Description Request Method PRACK

Type: number

Format: counter

request_method_publish

Description Request Method PUBLISH

Type: number

Format: counter

request_method_refer

Description Request Method REFER

Type: number

Format: counter

request_method_register

Description Request Method REGISTER

Type: number

Format: counter

request_method_subscribe

Description Request Method SUBSCRIBE

Type: number

Format: counter

request_method_unknown

Description Unknown Request Method

Type: number

Format: counter

request_method_update

Description Request Method UPDATE

Type: number

Format: counter

request_unknown_version

Description Unknown Request Version

Type: number

Format: counter

response_1xx

Description Response Status Code 1xx

Type: number

Format: counter

response_2xx

Description Response Status Code 2xx

Type: number

Format: counter

response_3xx

Description Response Status Code 3xx

Type: number

Format: counter

response_4xx

Description Response Status Code 4xx

Type: number

Format: counter

response_5xx

Description Response Status Code 5xx

Type: number

Format: counter

response_6xx

Description Response Status Code 6xx

Type: number

Format: counter

response_unknown

Description Unknown Response Status Code

Type: number

Format: counter

response_unknown_version

Description Unknown Response Version

Type: number

Format: counter

same_sport_dport_drop

Description Same Source and Destination Port Drop

Type: number

Format: counter

secondary_port_conn_limm_exceed

Description Per Addr-Port Conn Limit Exceeded

Type: number

Format: counter

secondary_port_conn_rate_exceed

Description Per Addr-Port Conn Rate Exceeded

Type: number

Format: counter

secondary_port_hit

Description Per Addr-Port Hit

Type: number

Format: counter

secondary_port_kbit_rate_exceed

Description Per Addr-Port KiBit Rate Exceeded

Type: number

Format: counter

secondary_port_kbit_rate_exceed_pkt

Description Per Addr-Port KiBit Rate Exceeded Count

Type: number

Format: counter

secondary_port_pkt_rate_exceed

Description Per Addr-Port Packet Rate Exceeded

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Format: counter

snat_fail

Description Source NAT Failure

Type: number

Format: counter

spoof_detect_fail

Description UDP Retry Timeout

Type: number

Format: counter

src_conn_pkt_rate_excd

Description Src UDP Conn Pkt Rate Exceeded

Type: number

Format: counter

src_drop

Description Src Packets Dropped

Type: number

Format: counter

src_filter1_match

Description Src Filter1 Match

Type: number

Format: counter

src_filter2_match

Description Src Filter2 Match

Type: number

Format: counter

src_filter3_match

Description Src Filter3 Match

Type: number

Format: counter

src_filter4_match

Description Src Filter4 Match

Type: number

Format: counter

src_filter5_match

Description Src Filter5 Match

Type: number

Format: counter

src_filter_action_blacklist

Description Src Filter Action Blacklist

Type: number

Format: counter

src_filter_action_default_pass

Description Src Filter Action Default Pass

Type: number

Format: counter

src_filter_action_drop

Description Src Filter Action Drop

Type: number

Format: counter

src_filter_action_whitelist

Description Src Filter Action Whitelist

Type: number

Format: counter

src_filter_auth_fail

Description Src Filter Auth Failed

Type: number

Format: counter

src_filter_none_match

Description Src Filter No Match

Type: number

Format: counter

src_filter_total_not_match

Description Src Filter Not Matched on Pkt

Type: number

Format: counter

src_frag_drop

Description Src Fragmented Packets Dropped

Type: number

Format: counter

src_hw_drop

Description Src Hardware Packets Dropped

Type: number

Format: counter

src_hw_drop_inserted

Description Src Hardware Drop Rules Inserted

Type: number

Format: counter

src_hw_drop_removed

Description Src Hardware Drop Rules Removed

Type: number

Format: counter

src_learn_overflow

Description Source Dynamic Entry Overflow

Type: number

Format: counter

src_ntp_monlist_req

Description Src NTP Monlist Request

Type: number

Format: counter

src_ntp_monlist_resp

Description Src NTP Monlist Response

Type: number

Format: counter

src_payload_too_big

Description Src UDP Payload Too Large

Type: number

Format: counter

src_payload_too_small

Description Src UDP Payload Too Small

Type: number

Format: counter

src_rate1_limit_exceed

Description Src Request Rate 1 Limit Exceed

Type: number

Format: counter

src_rate2_limit_exceed

Description Src Request Rate 2 Limit Exceed

Type: number

Format: counter

src_rate3_limit_exceed

Description Src Request Rate 3 Limit Exceed

Type: number

Format: counter

src_udp_auth

Description Src Auth UDP Init

Type: number

Format: counter

src_udp_auth_drop

Description Src UDP Auth Dropped

Type: number

Format: counter

src_udp_auth_fail

Description Src Auth UDP Failed

Type: number

Format: counter

src_udp_auth_timeout

Description Src UDP Retry Timeout

Type: number

Format: counter

src_udp_retry_gap_drop

Description Src UDP Retry-Gap Dropped

Type: number

Format: counter

src_udp_retry_init

Description Src UDP Retry Init

Type: number

Format: counter

src_udp_retry_pass

Description Src UDP Retry Passed

Type: number

Format: counter

src_well_known_port

Description Src UDP SrcPort Wellknown

Type: number

Format: counter

src_zone_service_entry_aged

Description SrcZoneService Entry Aged

Type: number

Format: counter

src_zone_service_entry_hit

Description SrcZoneService Entry Hit

Type: number

Format: counter

src_zone_service_entry_learned

Description SrcZoneService Entry Learned

Type: number

Format: counter

token_authentication_curr_salt_matched

Description Token Authentication Current Salt Matched

Type: number

Format: counter

token_authentication_invalid

Description Token Authentication Invalid Packets

Type: number

Format: counter

token_authentication_mismatched

Description Token Authentication Mismatched Packets

Type: number

Format: counter

token_authentication_prev_salt_matched

Description Token Authentication Previous Salt Matched

Type: number

Format: counter

token_authentication_session_created

Description Token Authentication Session Created

Type: number

Format: counter

token_authentication_session_created_fail

Description Token Authentication Session Created Fail

Type: number

Format: counter

too_many_header

Description Max Header Count Exceed

Type: number

Format: counter

udp_auth

Description Auth UDP Init

Type: number

Format: counter

udp_auth_drop

Description UDP Auth Dropped

Type: number

Format: counter

udp_auth_fail

Description Auth UDP Failed

Type: number

Format: counter

udp_auth_pass

Description Auth UDP Passed

Type: number

Format: counter

udp_auth_retry_fail

Description Auth UDP Retry Failed

Type: number

Format: counter

udp_auth_retry_gap_drop

Description Auth UDP Retry-Gap Dropped

Type: number

Format: counter

udp_retry_gap_drop

Description UDP Retry-Gap Dropped

Type: number

Format: counter

udp_retry_init

Description UDP Retry Init

Type: number

Format: counter

udp_retry_pass

Description UDP Retry Passed

Type: number

Format: counter

unauth_src_session_reset

Description Session Reset for Unauthenticated Src

Type: number

Format: counter

wellknown_sport_drop

Description UDP SrcPort Wellknown

Type: number

Format: counter

zone_src_udp_retry_timeout_blacklist

Description Src UDP Retry Timeout Blacklisted

Type: number

Format: counter

2.33.453 ddos src

Create Source ip limit entry

src Specification

Parameter	Value
Type	*Intermediate Resource*
Element Name	src
Element URI	/axapi/v3/ddos/src
Element Attributes	src_attributes
Partition Visibility	shared
Schema	`src schema`

Operations Allowed:

Get Object

GET

/axapi/v3/ddos/src

src_attributes

src attributes

default-list

Type: List

Reference Object: */axapi/v3/ddos/src/default/{default-address-type}*

dynamic-entries-resource-usage

Description: dynamic-entries-resource-usage is a **JSON Block**. Please see below for *dynamic-entries-resource-usage*

Type: Object

Reference Object: */axapi/v3/ddos/src/dynamic-entries-resource-usage*

dynamic-entry

Description: dynamic-entry is a **JSON Block**. Please see below for *dynamic-entry*

Type: Object

Reference Object: */axapi/v3/ddos/src/dynamic-entry*

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/src/dynamic-entry-overflow-policy/{default-address-type}*

entry-list

Type: List

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}*

geo-location-list

Type: List

Reference Object: */axapi/v3/ddos/src/geo-location/{geolocation-name}*

default-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

app-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/default/{default-address-type}/app-type/{protocol}*

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-address-type

Description 'ip': ip; 'ipv6': ipv6;

Type: string

Supported Values: ip, ipv6

disable

Description Disable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *default-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/default/{default-address-type}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src entry

Type: number

Range: 0-2147483647

template

Description: template is a **JSON Block**. Please see below for *default-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_app-type-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *default-list_app-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_app-type-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

default-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

default-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *default-list_l4-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_l4-type-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

default-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entries-resource-usage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list

Specification	Value
Type	*list*
Block object keys	

app-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}/app-type/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

description

Description Description for this Source Entry

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *entry-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *entry-list_hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}/hw-blacklist-blocking*

ip-addr

Description

Type: string

Format: ipv4-address

ipv6-addr

Description

Type: string

Format: ipv6-address

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-entry-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

template

Description: template is a **JSON Block**. Please see below for *entry-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_app-type-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *entry-list_app-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_app-type-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_hw-blacklist-blocking

Specification	Value
Type	*object*

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'permit': Whitelist incoming packets for protocol; 'deny': Blacklist incoming packets for protocol;

Type: string

Supported Values: permit, deny

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *entry-list_l4-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_l4-type-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

geo-location-list

Specification	Value
Type	*list*
Block object keys	

app-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/geo-location/{geolocation-name}/app-type/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

description

Description Description for this Geolocation Entry

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

geolocation-name

Description Geolocation Name

Type: string

Format: string-rlx

Maximum Length: 15 characters

Maximum Length: 1 characters

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/geo-location/{geolocation-name}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *geo-location-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

geo-location-list_app-type-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *geo-location-list_app-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

geo-location-list_app-type-list_template

Specification	Value
Type	*object*

dns

Description DDOS DNS template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS HTTP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

geo-location-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'permit': Whitelist incoming packets for protocol; 'deny': Blacklist incoming packets for protocol;

Type: string

Supported Values: permit, deny

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *geo-location-list_l4-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

geo-location-list_l4-type-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS ICMP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

geo-location-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

app-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/dynamic-entry-overflow-policy/{default-address-type}/app-type/{protocol}*

default-address-type

Description 'ip': ip; 'ipv6': ipv6;

Type: string

Supported Values: ip, ipv6

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_exceed-log-cfg*

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_l4-type-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

with-sflow-sample

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.454 ddos src-based-policy

Configure src-based policy

src-based-policy Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*name*
Collection Name	*src-based-policy-list*
Collection URI	/axapi/v3/ddos/src-based-policy
Element Name	src-based-policy

...

]

app-type attributes

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

2.33.465 ddos src dynamic-entry-overflow-policy l4-type

DDOS L4 type

l4-type Specification

Parameter	Value

l4-type-list

l4-type-list is **JSON List** of *l4-type attributes*

l4-type-list : [

{ *l4-type attributes* },

{ *l4-type attributes* },

...

]

l4-type attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

2.33.466 ddos src entry

Configure IP/IPv6 static Entry

entry Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*src-entry-name*
Collection Name	*entry-list*
Collection URI	/axapi/v3/ddos/src/entry
Element Name	entry
Element URI	/axapi/v3/ddos/src/entry/{src-entry-name}
Element Attributes	entry_attributes
Partition Visibility	shared
Operational Data URI	/axapi/v3/ddos/src/entry/{src-entry-name}/oper
Schema	`entry schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/src/entry

entry attributes

```
POST /axapi/v3/ddos/src/entry/
Payload:
{
    "entry": {
        "src-entry-name": "a",
        "ipv6-addr": "2003::1"
    }
}
```

Create List

POST

/axapi/v3/ddos/src/entry

entry attributes

Get Object

GET

/axapi/v3/ddos/src/entry/{src-entry-name}

entry attributes

```
GET /axapi/v3/ddos/src/entry/a
Reponse:
{
    "entry": {
        "src-entry-name": "a",
        "ipv6-addr": "2003::1",
        "bypass": 0,
        "exceed-log-cfg": {
            "log-enable": 0
        },
        "log-periodic": 0,
        "uuid": "cd0cafcc-0882-11f0-b674-001fa04507c0",
        "a10-url": "/axapi/v3/ddos/src/entry/a"
    }
}
```

Get List

GET

/axapi/v3/ddos/src/entry

entry-list

Modify Object

POST

/axapi/v3/ddos/src/entry/{src-entry-name}

entry attributes

Replace Object

PUT

/axapi/v3/ddos/src/entry/{src-entry-name}

entry attributes

```
PUT /axapi/v3/ddos/src/entry/a
Payload:
{

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

hw-blacklist-blocking

Specification	Value
Type	*object*

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-type-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'permit': Whitelist incoming packets for protocol; 'deny': Blacklist incoming packets for protocol;

Type: string

Supported Values: permit, deny

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

2.33.475 ddos src-port-template

Define a DDOS src template

src-port-template Specification

Parameter	Value
Type	*Intermediate Resource*
Element Name	src-port-template
Element URI	/axapi/v3/ddos/src-port-template
Element Attributes	src-port-template_attributes
Partition Visibility	shared
Schema	`src-port-template schema`

Operations Allowed:

Get Object

GET

/axapi/v3/ddos/src-port-template

src-port-template_attributes

src-port-template attributes

dns-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/dns/{name}*

tcp-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/tcp/{name}*

udp-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/udp/{name}*

udp-list

Specification	Value
Type	*list*
Block object keys	

drop-ntp-monlist

Description Drop NTP monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/udp/{name}/filter/{udp-filter-seq}*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-5

udp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-list

Specification	Value
Type	*list*
Block object keys	

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

query-resolution-check

Description: query-resolution-check is a **JSON Block**. Please see below for *dns-list_query-resolution-check*

Type: Object

Reference Object: */axapi/v3/ddos/src-port-template/dns/{name}/query-resolution-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-list_query-resolution-check

Specification	Value
Type	*object*

big-response-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

big-response-size

Description Max DNS response size (in Bytes)

Type: number

Range: 1-4096

domain-lockup-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

session-timeout-value

Description max session timeout (secs) between DNS external server and Protected object

Type: number

Range: 1-30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/tcp/{name}/filter/{tcp-filter-seq}*

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-5

tcp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

    }
}
```

query-resolution-check attributes

big-response-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

big-response-size

Description Max DNS response size (in Bytes)

Type: number

Range: 1-4096

domain-lockup-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

session-timeout-value

Description max session timeout (secs) between DNS external server and Protected object

Type: number

Range: 1-30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Format: counter

dynamic_count_warn

Description dynamic-entry-count warning send

Type: number

Format: counter

ew_inbound_port_byte_drop

Description East-West Inbound Bytes Dropped

Type: number

Format: counter

ew_inbound_port_byte_rcv

Description East-West Inbound Bytes Recevied

Type: number

Format: counter

ew_inbound_port_byte_sent

Description East-West Inbound Bytes Forwarded

Type: number

Format: counter

ew_inbound_port_drop

Description East-West Inbound Packets Dropped

Type: number

Format: counter

ew_inbound_port_rcv

Description East-West Inbound Packets Received

Type: number

Format: counter

ew_inbound_port_sent

Description East-West Inbound Packets Forwarded

Type: number

Format: counter

ew_outbound_port_byte_drop

Description East-West Outbound Bytes Forwarded

Type: number

Format: counter

ew_outbound_port_byte_rcv

Description East-West Outbound Bytes Recevied

Type: number

Format: counter

ew_outbound_port_byte_sent

Description East-West Outbound Bytes Dropped

Type: number

Format: counter

ew_outbound_port_drop

Description East-West Outbound Packets Dropped

Type: number

Format: counter

ew_outbound_port_rcv

Description East-West Outbound Packets Received

Type: number

Format: counter

ew_outbound_port_sent

Description East-West Outbound Packets Forwarded

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action WL

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

Format: counter

hybrid_auth_auth_no_match_rst_rcv

Description SYN Auth Hybrid Auth No Match Drop: RST Received

Type: number

Format: counter

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

ip_filtering_bl

Description IP Filtering Policy: Blacklisted

Type: number

Format: counter

ip_filtering_drop

Description IP Filtering Policy: Dropped

Type: number

Format: counter

no_policy_class_list_match

Description No Policy Class-list Match

Type: number

Format: counter

no_route_drop

Description No Route Dropped

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_src_escalation

Description Src Escalation

Type: number

Format: counter

port_syn_rate_exceed

Description TCP SYN Rate Exceeded

Type: number

Format: counter

port_synack_rate_exceed

Description TCP SYNACK Rate Exceeded

Type: number

Format: counter

prog_conn_exceed_bl

Description Connection: Violation Exceed Blacklisted

Type: number

Format: counter

prog_conn_exceed_drop

Description Connection: Violation Exceed Dropped

Type: number

Format: counter

prog_conn_exceed_reset

Description Connection: Violation Exceed Reset

Type: number

Format: counter

prog_conn_rcvd_exceed

Description Connection: Received Exceed

Type: number

Format: counter

prog_conn_rcvd_sent_ratio_exceed

Description Connection: Reveived to Sent Ratio Exceed

Type: number

Format: counter

prog_conn_samples

Description Sample Collected: Connnection

Type: number

Format: counter

prog_conn_samples_processed

Description Sample Processed: Connnection

Type: number

Format: counter

prog_conn_sent_exceed

Description Connection: Sent Exceed

Type: number

Format: counter

prog_conn_time_exceed

Description Connection: Time Exceed

Type: number

Format: counter

prog_exceed_bl

Description Req-Resp: Violation Exceed Blacklisted

Type: number

Format: counter

prog_exceed_drop

Description Req-Resp: Violation Exceed Dropped

Type: number

Format: counter

prog_exceed_reset

Description Req-Resp: Violation Exceed Reset

Type: number

Format: counter

prog_first_req_time_exceed

Description Req-Resp: First Request Time Exceed

Type: number

Format: counter

prog_query_exceed

Description Req-Resp: Client Query Time Exceed

Type: number

Format: counter

prog_req_resp_time_exceed

Description Req-Resp: Request to Response Time Exceed

Type: number

Format: counter

prog_req_samples

Description Sample Collected: Req-Resp

Type: number

Format: counter

prog_think_exceed

Description Req-Resp: Server Think Time Exceed

Type: number

Format: counter

prog_win_exceed_bl

Description Time Window: Violation Exceed Blacklisted

Type: number

Format: counter

prog_win_exceed_drop

Description Time Window: Violation Exceed Dropped

Type: number

Format: counter

prog_win_exceed_reset

Description Time Window: Violation Exceed Reset

Type: number

Format: counter

prog_win_rcvd_exceed

Description Time Window: Received Exceed

Type: number

Format: counter

prog_win_rcvd_sent_ratio_exceed

Description Time Window: Received to Sent Exceed

Type: number

Format: counter

prog_win_samples

Description Sample Collected: Time Window

Type: number

Format: counter

prog_win_samples_processed

Description Sample Processed: Time Window

Type: number

Format: counter

prog_win_sent_exceed

Description Time Window: Sent Exceed

Type: number

Format: counter

retransmit_excd

Description Retransmit Exceeded

Type: number

Format: counter

rst_cookie_fail

Description RST Cookie Failed

Type: number

Format: counter

same_sport_dport_drop

Description Same Source and Destination Port Drop

Type: number

Format: counter

secondary_port_conn_limm_exceed

Description Per Addr-Port Conn Limit Exceeded

Type: number

Format: counter

secondary_port_conn_rate_exceed

Description Per Addr-Port Conn Rate Exceeded

Type: number

Format: counter

secondary_port_hit

Description Per Addr-Port Hit

Type: number

Format: counter

secondary_port_kbit_rate_exceed

Description Per Addr-Port KiBit Rate Exceeded

Type: number

Format: counter

secondary_port_kbit_rate_exceed_pkt

Description Per Addr-Port KiBit Rate Exceeded Count

Type: number

Format: counter

secondary_port_pkt_rate_exceed

Description Per Addr-Port Packet Rate Exceeded

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Format: counter

small_window_excd

Description Small-Window Exceeded

Type: number

Format: counter

small_window_rcv

Description Small-Window Receive

Type: number

Format: counter

snat_fail

Description Source NAT Failure

Type: number

Format: counter

src_ack_auth_fail

Description Src ACK Retry Dropped

Type: number

Format: counter

src_ack_retry_blacklist

Description Src ACK Retry Timeout Blacklisted

Type: number

Format: counter

src_ack_retry_gap_drop

Description Src ACK Retry Retry-Gap Dropped

Type: number

Format: counter

src_ack_retry_init

Description Src ACK Retry Init

Type: number

Format: counter

src_ack_retry_reset

Description Src ACK Retry Timeout Reset

Type: number

Format: counter

src_ack_retry_rto_fail

Description Src ACK Retry RTO Dropped

Type: number

Format: counter

src_ack_retry_rto_pass

Description Src ACK Retry RTO Passed

Type: number

Format: counter

src_ack_retry_rto_progress

Description Src ACK Retry RTO Progress

Type: number

Format: counter

src_ack_retry_timeout

Description Src ACK Retry Timeout

Type: number

Format: counter

src_auth_drop

Description Src TCP Auth Dropped

Type: number

Format: counter

src_auth_drop_ack

Description Src TCP Auth Dropped: ACK

Type: number

Format: counter

src_auth_drop_ack_fail_auth

Description Src TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

src_auth_drop_ack_pass_auth

Description Src TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

src_auth_drop_ack_xmit

Description Src TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

src_auth_drop_rst

Description Src TCP Auth Dropped: RST

Type: number

Format: counter

src_auth_drop_rst_fail_auth

Description Src TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

src_auth_drop_rst_pass_auth

Description Src TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

src_auth_drop_rst_xmit

Description Src TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

src_auth_drop_syn

Description Src TCP Auth Dropped: SYN

Type: number

Format: counter

src_conn_ofo_rate_excd

Description Src TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

src_conn_pkt_rate_excd

Description Src TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

src_conn_rexmit_rate_excd

Description Src TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

src_conn_zwindow_rate_excd

Description Src TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

src_create_conn_non_syn_dropped

Description Src Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

src_drop

Description Src Packets Dropped

Type: number

Format: counter

src_filter1_match

Description Src Filter1 Match

Type: number

Format: counter

Description TCP PSH Received

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP SYN Retransmit Exceeded Blacklist

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP SYN Retransmit Exceeded Drop

Type: number

Format: counter

tcp_rst_ack_drop

Description TCP RST ACK Dropped

Type: number

Format: counter

tcp_rst_ack_fwd

Description TCP RST ACK Forward

Type: number

Format: counter

tcp_rst_ack_rcvd

Description TCP RST ACK Received

Type: number

Format: counter

tcp_rst_drop

Description TCP RST Dropped

Type: number

Format: counter

tcp_rst_fwd

Description TCP RST Forward

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Type: number

Format: counter

tcp_syn_ack_drop

Description TCP SYN ACK Dropped

Type: number

Format: counter

tcp_syn_ack_fwd

Description TCP SYN ACK Forward

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_fwd

Description SYN Forward

Type: number

Format: counter

tcp_syn_rcvd

Description TCP Inbound SYN Received

Type: number

Format: counter

tcp_urg_drop

Description TCP URG Dropped

Type: number

Format: counter

tcp_urg_fwd

Description TCP URG Forward

Type: number

Format: counter

tcp_urg_rcvd

Description TCP URG Received

Type: number

Format: counter

unauth_drop

Description TCP Unauth Dropped

Type: number

Format: counter

unauth_src_session_reset

Description Session Reset for Unauthenticated Src

Type: number

Format: counter

wellknown_sport_drop

Description TCP SrcPort Wellknown

Type: number

Format: counter

zero_window_excd

Description Zero-Window Exceeded

Type: number

Format: counter

2.33.494 ddos template

Define a DDOS template

template Specification

Parameter	Value
Type	*Intermediate Resource*

logging-list

Type: List

Reference Object: */axapi/v3/ddos/template/logging/{logging-tmpl-name}*

other-list

Type: List

Reference Object: */axapi/v3/ddos/template/other/{name}*

sip-list

Type: List

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}*

ssl-l4-list

Type: List

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}*

tcp-list

Type: List

Reference Object: */axapi/v3/ddos/template/tcp/{name}*

udp-list

Type: List

Reference Object: */axapi/v3/ddos/template/udp/{name}*

logging-list

Specification	Value
Type	*list*
Block object keys	

enable-action-logging

Description Log action taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-cef

Description Log in CEF format

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-custom

Description Customize log format

Type: string

Format: string-rlx

Maximum Length: 512 characters

Maximum Length: 1 characters

logging-tmpl-name

Description DDOS Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: default

use-obj-name

Description Show obj name instead of ip in the log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

encap-list

Specification	Value
Type	*list*
Block object keys	

encap-tmpl-name

Description DDOS Tunnel Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

preserve-source-ip

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *encap-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

encap-list_tunnel-encap

Specification	Value
Type	*object*

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *encap-list_tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *encap-list_tunnel-encap_ip-cfg*

Type: Object

encap-list_tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *encap-list_tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encap for IP packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-list_tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

encap-list_tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *encap-list_tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encap for GRE packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-list_tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

ssl-l4-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': drop; 'reset': reset;

Type: string

Supported Values: drop, reset

Default: drop

allow-non-tls

Description Allow Non-TLS (SSLv3 and lower) traffic (Warning: security may be compromised)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-config-cfg

Description: auth-config-cfg is a **JSON Block**. Please see below for *ssl-l4-list_auth-config-cfg*

Type: Object

cert-cfg

Description: cert-cfg is a **JSON Block**. Please see below for *ssl-l4-list_cert-cfg*

Type: Object

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *ssl-l4-list_multi-pu-threshold-distribution*

Type: Object

renegotiation

Description Configure renegotiation limiting for SSL (Number of renegotiation allowed)

Type: number

Range: 0-7

request-rate-limit

Description Configure rate limiting for SSL

Type: number

Range: 1-16000000

server-name-list

Type: List

ssl-handshake-policy

Description: ssl-handshake-policy is a **JSON Block**. Please see below for *ssl-l4-list_ssl-handshake-policy*

Type: Object

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}/ssl-handshake-policy*

ssl-l4-tmpl-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-traffic-check

Description: ssl-traffic-check is a **JSON Block**. Please see below for *ssl-l4-list_ssl-traffic-check*

Type: Object

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}/ssl-traffic-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-l4-list_cert-cfg

Specification	Value
Type	*object*

cert

Description SSL certificate

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key

Description SSL key

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

key-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4-list_auth-config-cfg

Specification	Value
Type	*object*

auth-handshake-fail-action

Description 'blacklist-src': Blacklist-src when auth handshake fails;

Type: string

Supported Values: blacklist-src

timeout

Description Connection timeout

Type: number

Range: 1-31

Default: 5

trials

Description Number of failed handshakes

Type: number

Range: 0-15

Default: 5

ssl-l4-list_ssl-traffic-check

Specification	Value
Type	*object*

check-resumed-connection

Description Apply checks to SSL connections initialized by ACK packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-action

Description 'drop': Drop packets with bad ssl header; 'ignore': Forward packets with bad ssl header;

Type: string

Supported Values: drop, ignore

header-inspection

Description Inspect ssl header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-l4-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

ssl-l4-list_ssl-handshake-policy

Specification	Value
Type	*object*

action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist source IP;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: action and ssl-handshake-policy-action-list-name are mutually exclusive

cipher-suites-limit

Description Set cipher suites limit

Type: number

Range: 1-600

client-extensions-limit

Description Set client extensions limit

Type: number

Range: 1-600

clienthello-to-appdata-timeout

Description Set maximum timeout seconds from ClientHello to Application-Data

Type: number

Range: 1-600

finished-to-appdata-timeout

Description Set maximum timeout seconds from Handshake finished to Application-Data

Type: number

Range: 1-600

src-handshaking-conn-limit

Description Set handshaking connection limit

Type: number

Range: 1-16000000

ssl-handshake-policy-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-handshake-policy-action-list-name and action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-l4-list_server-name-list

Specification	Value
Type	*list*
Block object keys	

server-cert

Description Server Certificate associated to SNI (Server Certificate Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

server-key

Description Server Private Key associated to SNI (Server Private Key Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-name

Description Server name indication in Client hello extension (Server name String)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

dns-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop packets (Default action); 'reset': Send Client RST for TCP connections;

Type: string

Supported Values: drop, reset

Default: drop

alias-rate-threshold

Description ALIAS(Record Type 65300) Query Forwarding Rate Limit (Only for DNS Cache Mode)

Type: number

Range: 1-16000000

allow-query-class

Description: allow-query-class is a **JSON Block**. Please see below for *dns-list_allow-query-class*

Type: Object

allow-record-type

Description: allow-record-type is a **JSON Block**. Please see below for *dns-list_allow-record-type*

Type: Object

dns-any-check

Description Drop DNS queries of Type ANY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-auth-cfg

Description: dns-auth-cfg is a **JSON Block**. Please see below for *dns-list_dns-auth-cfg*

Type: Object

dns-request-rate-limit

Description: dns-request-rate-limit is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit*

Type: Object

dnssec-wildcard-rate-threshold

Description DNSSEC Wildcard Query Forwarding Rate Limit (only for DNS Cache Mode)

Type: number

Range: 1-16000000

domain-group-name

Description Apply a domain-group to the DNS template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

domain-group-rate-exceed-action

Description 'drop': Drop the query (default); 'tunnel-encap-packet': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: drop, tunnel-encap-packet

Default: drop

domain-group-rate-per-service

Description Enable per service domain rate checking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

fqdn-cfg

Type: List

fqdn-label-count

Description Maximum number of length of FQDN labels

Type: number

Range: 1-10

fqdn-label-len-cfg

Type: List

malformed-query-check

Description: malformed-query-check is a **JSON Block**. Please see below for *dns-list_malformed-query-check*

Type: Object

Reference Object: */axapi/v3/ddos/template/dns/{name}/malformed-query-check*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *dns-list_multi-pu-threshold-distribution*

Type: Object

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

nxdomain-cfg

Description: nxdomain-cfg is a **JSON Block**. Please see below for *dns-list_nxdomain-cfg*

Type: Object

on-no-match

Description 'permit': permit; 'deny': deny (default);

Type: string

Supported Values: permit, deny

Default: deny

query-rate-threshold-for-cache-serving

Description This is for DNS cache mode only, it sets a DNS query rate threshold such that queries under the rate threshold would be forward

Type: number

Range: 1-16000000

symtimeout-cfg

Description: symtimeout-cfg is a **JSON Block**. Please see below for *dns-list_symtimeout-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-list_dns-request-rate-limit

Specification	Value
Type	*object*

type

Description: type is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit_type*

Type: Object

dns-list_dns-request-rate-limit_type

Specification	Value
Type	*object*

A-cfg

Description: A-cfg is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit_type_A-cfg*

Type: Object

AAAA-cfg

Description: AAAA-cfg is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit_type_AAAA-cfg*

Type: Object

CNAME-cfg

Description: CNAME-cfg is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit_type_CNAME-cfg*

Type: Object

MX-cfg

Description: MX-cfg is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit_type_MX-cfg*

Type: Object

NS-cfg

Description: NS-cfg is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit_type_NS-cfg*

Type: Object

SRV-cfg

Description: SRV-cfg is a **JSON Block**. Please see below for *dns-list_dns-request-rate-limit_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

dns-list_dns-request-rate-limit_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

dns-list_dns-request-rate-limit_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cname-rate

Description

Type: number

Range: 1-16000000

dns-list_dns-request-rate-limit_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

dns-request-type

Description Other type value

Type: number

Range: 1-65535

dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

dns-list_dns-request-rate-limit_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-aaaa-rate

Description

Type: number

Range: 1-16000000

dns-list_dns-request-rate-limit_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-a-rate

Description

Type: number

Range: 1-16000000

dns-list_dns-request-rate-limit_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-mx-rate

Description

Type: number

Range: 1-16000000

dns-list_dns-request-rate-limit_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-ns-rate

Description

Type: number

Range: 1-16000000

dns-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

dns-list_nxdomain-cfg

Specification	Value
Type	*object*

dns-nxdomain-rate

Description Limiting rate

Type: number

Range: 1-16000000

dns-nxdomain-rate-limit

Description DNS NXDOMAIN Rate Limiting (SRC support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-nxdomain-rate-limit-action

Description 'drop': Drop queries if rate is exceeded; 'black-list': Black-List source if rate is exceeded;

Type: string

Supported Values: drop, black-list

dns-list_fqdn-cfg

Specification	Value
Type	*list*
Block object keys	

by

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'both': Use both Domain Name and Source IP address for rate-limiting;

Type: string

Supported Values: domain-name, src-ip, both

Mutual Exclusion: by and per are mutually exclusive

dns-fqdn-rate

Description Limiting rate (Range: 5-8000 for FQDN domain based rate limiting, 5-16000000 for FQDN label count based rate limiting)

Type: number

Range: 5-16000000

dns-fqdn-rate-limit

Description DNS Rate limiting on the basis of FQDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fqdn-rate-label-count

Description FQDN label count (Range: 1-8)

Type: number

Range: 1-8

fqdn-rate-suffix

Description Suffix count

Type: number

Range: 1-5

fqdn-rate-suffix-by

Description Number of suffixes

Type: number

Range: 1-5

per

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'label-count': FQDN label count;

Type: string

Supported Values: domain-name, src-ip, label-count

Mutual Exclusion: per and by are mutually exclusive

per-domain-per-src-ip

Description Use both Domain Name and Source IP address for rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-list_dns-auth-cfg

Specification	Value
Type	*object*

dns-auth

Description DNS authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-auth-type

Description 'udp': Drop DNS request and monitor client retry; 'force-tcp': Force DNS request over TCP;

Type: string

Supported Values: udp, force-tcp

force-tcp-ignore-client-source-port

Description Allow client to retransmit DNS request using different source port during udp-auth (supported in asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-tcp-min-retry-gap

Description Minimum sec gap in between 2 dns-udp packets for auth to pass

Type: number

Range: 1-15

force-tcp-timeout

Description TCP authentication timeout in seconds

Type: number

Range: 1-16

min-retry-gap

Description Optional minimum sec gap in between 2 dns-udp packets for auth to pass, unit is specified by min-retry-gap-interval

Type: number

Range: 1-80

min-retry-gap-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

udp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

udp-timeout-val-only

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

with-udp-auth

Description Monitor client retry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-list_symtimeout-cfg

Specification	Value
Type	*object*

sym-timeout

Description Timeout for DNS Symmetric session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sym-timeout-value

Description Session timeout value in seconds

Type: number

Range: 1-31

dns-list_allow-query-class

Specification	Value
Type	*object*

allow-any-query-class

Description ANY query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-chaos-query-class

Description CHAOS query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-csnet-query-class

Description CSNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-hesiod-query-class

Description HESIOD query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-internet-query-class

Description INTERNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-none-query-class

Description NONE query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-list_fqdn-label-len-cfg

Specification	Value
Type	*list*
Block object keys	

fqdn-label-length

Description Maximum FQDN label length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fqdn-label-suffix

Description Number of suffixes

Type: number

Range: 1-5

label-length

Description Maximum length of FQDN label

Type: number

Range: 1-63

dns-list_allow-record-type

Specification	Value
Type	*object*

allow-a-type

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-aaaa-type

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-cname-type

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-mx-type

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-ns-type

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-srv-type

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-num-cfg

Type: List

dns-list_allow-record-type_record-num-cfg

Specification	Value
Type	*list*
Block object keys	

allow-num-type

Description Other record type value

Type: number

Range: 1-65535

dns-list_malformed-query-check

Specification	Value
Type	*object*

non-query-opcode-check

Description 'disable': When malform check is enabled, TPS always drops DNS query with non query opcode, this option disables this opcode check;

Type: string

Supported Values: disable

skip-multi-packet-check

Description Bypass DNS fragmented and TCP segmented Queries(Default: dropped)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

validation-type

Description 'basic-header-check': Basic header validation for DNS TCP/UDP queries; 'extended-header-check': Extended header/query validation for DNS TCP/UDP queries; 'disable': Disable Malform query validation for DNS TCP/UDP;

Type: string

Supported Values: basic-header-check, extended-header-check, disable

icmp-v4-list

Specification	Value
Type	*list*
Block object keys	

icmp-tmpl-name

Description DDOS ICMPv4 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *icmp-v4-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v4-list_type-other

Specification	Value
Type	*object*

type-other-deny

Description Deny all other type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-other-deny and type-other-rate are mutually exclusive

type-other-rate

Description Specify rate with other type

Type: number

Range: 1-16000000

Mutual Exclusion: type-other-rate and type-other-deny are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v4-list_type-list

Specification	Value
Type	*list*
Block object keys	

code

Type: List

code-other

Description: code-other is a **JSON Block**. Please see below for *icmp-v4-list_type-list_code-other*

Type: Object

type-deny

Description Reject this ICMP type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-deny, type-rate, and code-other-rate are mutually exclusive

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

type-rate

Description Specify the whole rate with this type

Type: number

Range: 1-16000000

Mutual Exclusion: type-rate and type-deny are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v4-list_type-list_code

Specification	Value
Type	*list*
Block object keys	

code-number

Description Specify the ICMP code

Type: number

Range: 0-255

code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

icmp-v4-list_type-list_code-other

Specification	Value
Type	*object*

code-other-rate

Description Specify rate with other code

Type: number

Range: 1-16000000

Mutual Exclusion: code-other-rate and type-deny are mutually exclusive

tcp-list

Specification	Value
Type	*list*
Block object keys	

ack-authentication-synack-reset

Description Enable Reset client TCP SYN+ACK for authentication (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-cfg

Description: action-cfg is a **JSON Block**. Please see below for *tcp-list_action-cfg*

Type: Object

action-on-ack-rto-retry-count

Description Take action if action-on-ack RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-on-syn-rto-retry-count

Description Take action if action-on-syn RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-syn-cfg

Description: action-syn-cfg is a **JSON Block**. Please see below for *tcp-list_action-syn-cfg*

Type: Object

age

Description Session age in minutes

Type: number

Range: 1-63

allow-syn-otherflags

Description Treat TCP SYN+PSH as a TCP SYN (DST tcp ports support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-synack-skip-authentications

Description Allow create sessions on SYNACK without syn-auth and ack-auth (ASYM Mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-tcp-tfo

Description Allow TCP Fast Open

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

black-list-out-of-seq

Description Black list Src IP if out of seq pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: black-list-out-of-seq and per-conn-out-of-seq-rate-limit are mutually exclusive

black-list-retransmit

Description Black list Src IP if retransmit pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: black-list-retransmit and per-conn-retransmit-rate-limit are mutually exclusive

black-list-zero-win

Description Black list Src IP if zero window pkts exceed configured threshold

Type: number

Range: 1-250

Mutual Exclusion: black-list-zero-win and per-conn-zero-win-rate-limit are mutually exclusive

conn-rate-limit-on-syn-only

Description Only count SYN-initiated connections towards connection-rate tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-conn-on-syn-only

Description Enable connection establishment on SYN only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-known-resp-src-port-cfg

Description: drop-known-resp-src-port-cfg is a **JSON Block**. Please see below for *tcp-list_drop-known-resp-src-port-cfg*

Type: Object

dst

Description: dst is a **JSON Block**. Please see below for *tcp-list_dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/tcp/{name}/filter/{tcp-filter-seq}*

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

per-conn-out-of-seq-rate-action

Description 'drop': Drop packets for out-of-seq rate exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq rate exceed; 'ignore': help Ignore out-of-seq rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-out-of-seq-rate-limit

Description Take action if out-of-seq pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-out-of-seq-rate-limit and black-list-out-of-seq are mutually exclusive

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec; '10sec': 10sec;

Type: string

Supported Values: 100ms, 1sec, 10sec

Default: 1sec

per-conn-retransmit-rate-action

Description 'drop': Drop packets for retransmit rate exceed (Default); 'blacklist-src': help Blacklist-src for retransmit rate exceed; 'ignore': help Ignore retransmit rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-retransmit-rate-limit

Description Take action if retransmit pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-retransmit-rate-limit and black-list-retransmit are mutually exclusive

per-conn-zero-win-rate-action

Description 'drop': Drop packets for zero-win rate exceed (Default); 'blacklist-src': help Blacklist-src for zero-win rate exceed; 'ignore': help Ignore zero-win rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-zero-win-rate-limit

Description Take action if zero window pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-zero-win-rate-limit and black-list-zero-win are mutually exclusive

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking*

src

Description: src is a **JSON Block**. Please see below for *tcp-list_src*

Type: Object

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable, send-rst-once

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synack-rate-limit

Description Config SYNACK rate limit

Type: number

Range: 1-16000000

Mutual Exclusion: synack-rate-limit and track-together-with-syn are mutually exclusive

track-together-with-syn

Description SYNACK will be counted in Dst Syn-rate limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: track-together-with-syn and synack-rate-limit are mutually exclusive

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *tcp-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_tunnel-encap

Specification	Value
Type	*object*

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *tcp-list_tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *tcp-list_tunnel-encap_ip-cfg*

Type: Object

tcp-list_tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *tcp-list_tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list_tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

preserve-src-ipv4

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list_tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *tcp-list_tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list_tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

preserve-src-ipv4-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *tcp-list_dst_rate-limit*

Type: Object

tcp-list_dst_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *tcp-list_dst_rate-limit_syn-rate-limit*

Type: Object

tcp-list_dst_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

dst-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, ignore

Default: drop

dst-syn-rate-limit

Description

Type: number

Range: 1-16000000

tcp-list_action-cfg

Specification	Value
Type	*object*

action-on-ack

Description Monitor tcp ack for age-out session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authenticate-only

Description Apply action-on-ack once per source address for authentication purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

min-retry-gap

Description Min gap between 2 ACKs for action-on-ack pass in 100ms interval

Type: number

Range: 1-80

reset

Description Send RST to client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rto-authentication

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout

Description ACK retry timeout in sec

Type: number

Range: 1-31

tcp-list_progression-tracking

Specification	Value
Type	*object*

ignore-TLS-handshake

Description Ignore TLS handshake, support SSL-L4 port only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mitigation

Description: mitigation is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation*

profiling

Description: profiling is a **JSON Block**. Please see below for *tcp-list_progression-tracking_profiling*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/profiling*

progression-tracking-enabled

Description 'enable-check': Enable Progression Tracking Check;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_progression-tracking_mitigation

Specification	Value
Type	*object*

connection-tracking

Description: connection-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_connection-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/connection-tracking*

request-tracking

Description: request-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_request-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/request-tracking*

slow-attack

Description: slow-attack is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_slow-attack*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/slow-attack*

time-window-tracking

Description: time-window-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_time-window-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/time-window-tracking*

tcp-list_progression-tracking_mitigation_time-window-tracking

Specification	Value
Type	*object*

progression-tracking-win-enabled

Description 'enable-check': Enable Progression Tracking per Time Window;

Type: string

Supported Values: enable-check

Default: enable-check

progression-tracking-windows-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-windows-action and progression-tracking-windows-action-list-name are mutually exclusive

progression-tracking-windows-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-windows-action-list-name and progression-tracking-windows-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

tcp-list_progression-tracking_mitigation_slow-attack

Specification	Value
Type	*object*

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_progression-tracking_mitigation_connection-tracking

Specification	Value
Type	*object*

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_progression-tracking_mitigation_request-tracking

Specification	Value
Type	*object*

first-request-max-time

Description Set the maximum idle time before the first request (in unit of 100ms)

Type: number

Range: 1-65535

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model (Default); 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

tcp-list_progression-tracking_profiling

Specification	Value
Type	*object*

profiling-connection-life-model

Description Enable auto-config progression tracking learning for connection model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-request-response-model

Description Enable auto-config progression tracking learning for request response model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-time-window-model

Description Enable auto-config progression tracking learning for time window model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-5

tcp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *tcp-list_src_rate-limit*

Type: Object

tcp-list_src_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *tcp-list_src_rate-limit_syn-rate-limit*

Type: Object

tcp-list_src_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

src-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'blacklist-src': Blacklist-src for syn-rate exceed; 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

src-syn-rate-limit

Description

Type: number

Range: 1-16000000

tcp-list_action-syn-cfg

Specification	Value
Type	*object*

action-on-syn

Description Monitor tcp syn for age-out session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-gap

Description Min gap between 2 SYNs for action-on-syn pass in 100ms interval

Type: number

Range: 1-80

action-on-syn-reset

Description Send RST to client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-timeout

Description SYN retry timeout in sec

Type: number

Range: 1-31

tcp-list_drop-known-resp-src-port-cfg

Specification	Value
Type	*object*

drop-known-resp-src-port

Description Drop well-known if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exclude-src-resp-port

Description excluding src port equal destination port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

other-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/other/{name}/filter/{other-filter-seq}*

name

Description DDOS OTHER Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

other-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

other-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-seq

Description Sequence number

Type: number

Range: 1-5

other-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

udp-list

Specification	Value
Type	*list*
Block object keys	

age

Description Configure session age(in minutes) for UDP sessions

Type: number

Range: 1-63

drop-known-resp-src-port-cfg

Description: drop-known-resp-src-port-cfg is a **JSON Block**. Please see below for *udp-list_drop-known-resp-src-port-cfg*

Type: Object

drop-ntp-monlist

Description Drop NTP monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/udp/{name}/filter/{udp-filter-seq}*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

previous-salt-timeout

Description Token-Authentication previous salt-prefix timeout in minutes, default is 1 min

Type: number

Range: 1-10080

Default: 1

public-ipv4-addr

Description IP address

Type: string

Format: ipv4-address

public-ipv6-addr

Description IPV6 address

Type: string

Format: ipv6-address

spoof-detect-cfg

Description: spoof-detect-cfg is a **JSON Block**. Please see below for *udp-list_spoof-detect-cfg*

Type: Object

token-authentication

Description Enable Token Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-formula

Description 'md5_Salt-SrcIp-SrcPort-DstIp-DstPort': md5 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'md5_Salt-DstIp-DstPort': md5 of Salt-DstIp-DstPort; 'md5_Salt-SrcIp-DstIp': md5 of Salt-SrcIp-DstIp; 'md5_Salt-SrcPort-DstPort': md5 of Salt-SrcPort-DstPort; 'md5_Salt-UintDstIp-DstPort': Using the uint value of IP for md5 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-SrcPort-DstIp-DstPort': sha1 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'sha1_Salt-DstIp-DstPort': sha1 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-DstIp': sha1 of Salt-SrcIp-DstIp; 'sha1_Salt-SrcPort-DstPort': sha1 of Salt-SrcPort-DstPort; 'sha1_Salt-UintDstIp-DstPort': Using the uint value of IP for sha1 of Salt-DstIp-DstPort;

Type: string

Supported Values: md5_Salt-SrcIp-SrcPort-DstIp-DstPort, md5_Salt-DstIp-DstPort, md5_Salt-SrcIp-DstIp, md5_Salt-SrcPort-DstPort, md5_Salt-UintDstIp-DstPort, sha1_Salt-SrcIp-SrcPort-DstIp-DstPort, sha1_Salt-DstIp-DstPort, sha1_Salt-SrcIp-DstIp, sha1_Salt-SrcPort-DstPort, sha1_Salt-UintDstIp-DstPort

token-authentication-hw-assist-disable

Description token-authentication disable hardware assistance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-public-address

Description The server public IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix

Description token-authentication salt-prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix-curr

Description

Type: number

Range: 1-4294967295

token-authentication-salt-prefix-prev

Description

Type: number

Range: 1-4294967295

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *udp-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

udp-list_tunnel-encap

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *udp-list_tunnel-encap_always*

Type: Object

gre-always

Description: gre-always is a **JSON Block**. Please see below for *udp-list_tunnel-encap_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: gre-encap and ip-encap are mutually exclusive

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: ip-encap and gre-encap are mutually exclusive

udp-list_tunnel-encap_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

preserve-src-ipv4-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-list_tunnel-encap_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

preserve-src-ipv4

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-list_spoof-detect-cfg

Specification	Value
Type	*object*

min-retry-gap

Description Optional minimum gap between 2 UDP packets for spoof-detect pass, unit is specified by min-retry-gap-interval

Type: number

Range: 1-80

min-retry-gap-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

spoof-detect

Description Force client to retry on udp

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spoof-detect-retry-timeout

Description timeout in seconds

Type: number

Range: 1-31

Default: 5

Mutual Exclusion: spoof-detect-retry-timeout and spoof-detect-retry-timeout-val-only are mutually exclusive

spoof-detect-retry-timeout-val-only

Description timeout in seconds

Type: number

Range: 1-31

Default: 5

Mutual Exclusion: spoof-detect-retry-timeout-val-only and spoof-detect-retry-timeout are mutually exclusive

udp-list_drop-known-resp-src-port-cfg

Specification	Value
Type	*object*

drop-known-resp-src-port

Description Drop well-known if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exclude-src-resp-port

Description excluding src port equal destination port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-5

udp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop packets for the connection; 'reset': Send RST for the connection;

Type: string

Supported Values: drop, reset

Default: drop

agent-filter

Description: agent-filter is a **JSON Block**. Please see below for *http-list_agent-filter*

Type: Object

challenge-cookie-name

Description Set the cookie name used to send back to client. Default is sto-idd

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: sto-idd

challenge-interval

Description Specify the challenge interval. Default is 8 seconds

Type: number

Range: 1-31

Default: 8

challenge-keep-cookie

Description Keep the challenge cookie from client and forward to backend. Default is do not keep

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disallow-connect-method

Description Do not allow HTTP Connect method (asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-header-list

Type: List

Reference Object: */axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}*

http-tmpl-name

Description DDOS HTTP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

idle-timeout

Description Set the the idle timeout value in seconds for HTTP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http

Description: malformed-http is a **JSON Block**. Please see below for *http-list_malformed-http*

Type: Object

mss-cfg

Description: mss-cfg is a **JSON Block**. Please see below for *http-list_mss-cfg*

Type: Object

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *http-list_multi-pu-threshold-distribution*

Type: Object

non-http-bypass

Description Bypass non-http traffic instead of dropping

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-queue-size

Description Set the number of packets for the out-of-order HTTP queue (asym mode only)

Type: number

Range: 0-15

Default: 3

out-of-order-queue-timeout

Description Set the timeout value in seconds for out-of-order queue in HTTP (asym mode only)

Type: number

Range: 0-15

Default: 3

post-rate-limit

Description Configure rate limiting for HTTP POST request

Type: number

Range: 1-16000000

referer-filter

Description: referer-filter is a **JSON Block**. Please see below for *http-list_referer-filter*

Type: Object

request-header

Description: request-header is a **JSON Block**. Please see below for *http-list_request-header*

Type: Object

request-rate-limit

Description: request-rate-limit is a **JSON Block**. Please see below for *http-list_request-rate-limit*

Type: Object

response-rate-limit

Description: response-rate-limit is a **JSON Block**. Please see below for *http-list_response-rate-limit*

Type: Object

slow-read-drop

Description: slow-read-drop is a **JSON Block**. Please see below for *http-list_slow-read-drop*

Type: Object

use-hdr-ip-cfg

Description: use-hdr-ip-cfg is a **JSON Block**. Please see below for *http-list_use-hdr-ip-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-list_request-rate-limit

Specification	Value
Type	*object*

request-rate

Description HTTP request rate limit

Type: number

Range: 1-16000000

uri

Type: List

http-list_request-rate-limit_uri

Specification	Value
Type	*list*
Block object keys	

contains-cfg

Description: contains-cfg is a **JSON Block**. Please see below for *http-list_request-rate-limit_uri_contains-cfg*

Type: Object

ends-cfg

Description: ends-cfg is a **JSON Block**. Please see below for *http-list_request-rate-limit_uri_ends-cfg*

Type: Object

equal-cfg

Description: equal-cfg is a **JSON Block**. Please see below for *http-list_request-rate-limit_uri_equal-cfg*

Type: Object

starts-cfg

Description: starts-cfg is a **JSON Block**. Please see below for *http-list_request-rate-limit_uri_starts-cfg*

Type: Object

http-list_request-rate-limit_uri_equal-cfg

Specification	Value
Type	*object*

url-equals

Description Request rate-limit HTTP URI matching a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-equals-rate

Description Request rate limit

Type: number

Range: 1-16000000

http-list_request-rate-limit_uri_starts-cfg

Specification	Value
Type	*object*

url-starts-with

Description Request rate-limit HTTP URI strting with a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-starts-with-rate

Description Request rate limit

Type: number

Range: 1-16000000

http-list_request-rate-limit_uri_contains-cfg

Specification	Value
Type	*object*

url-contains

Description Request rate-limit HTTP URI containing a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-contains-rate

Description Request rate limit

Type: number

Range: 1-16000000

http-list_request-rate-limit_uri_ends-cfg

Specification	Value
Type	*object*

url-ends-with

Description Request rate-limit HTTP URI ending with a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-ends-with-rate

Description Request rate limit

Type: number

Range: 1-16000000

http-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

http-list_malformed-http

Specification	Value
Type	*object*

malformed-http-bad-chunk-mon-enabled

Description Enabling bad chunk monitoring. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-enabled

Description Enabling ddos malformed http protection. Default value is disabled.

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-max-content-length

Description Set the maximum content-length header. Default value is 4294967295 bytes

Type: number

Range: 1-4294967295

Default: 4294967295

malformed-http-max-header-name-size

Description Set the maxinum header name length. Default value is 64.

Type: number

Range: 1-64

Default: 64

malformed-http-max-line-size

Description Set the maximum line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

malformed-http-max-num-headers

Description Set the maximum number of headers. Default value is 90

Type: number

Range: 1-90

Default: 90

malformed-http-max-req-line-size

Description Set the maximum request line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

http-list_request-header

Specification	Value
Type	*object*

timeout

Description

Type: number

Range: 1-63

http-list_agent-filter

Specification	Value
Type	*object*

agent-contains-cfg

Type: List

agent-ends-cfg

Type: List

agent-equals-cfg

Type: List

agent-filter-blacklist

Description Blacklist the source if the user-agent matches

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

agent-starts-cfg

Type: List

http-list_agent-filter_agent-contains-cfg

Specification	Value
Type	*list*
Block object keys	

agent-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_agent-filter_agent-ends-cfg

Specification	Value
Type	*list*
Block object keys	

agent-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_agent-filter_agent-equals-cfg

Specification	Value
Type	*list*
Block object keys	

agent-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_agent-filter_agent-starts-cfg

Specification	Value
Type	*list*
Block object keys	

agent-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-header-list

Specification	Value
Type	*list*
Block object keys	

http-filter-header-blacklist

Description Also blacklist the source when action is taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-count-only

Description Take no action and continue processing the next filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

http-filter-header-seq

Description Sequence number

Type: number

Range: 1-5

http-filter-header-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-whitelist

Description Whitelist the source after filter passes, packets are dropped until then

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-list_response-rate-limit

Specification	Value
Type	*object*

obj-size

Description: obj-size is a **JSON Block**. Please see below for *http-list_response-rate-limit_obj-size*

Type: Object

http-list_response-rate-limit_obj-size

Specification	Value
Type	*object*

between-cfg

Type: List

greater-cfg

Type: List

less-cfg

Type: List

http-list_response-rate-limit_obj-size_between-cfg

Specification	Value
Type	*list*
Block object keys	

obj-between-rate

Description Response rate limit

Type: number

Range: 1-16000000

obj-between1

Description Response size configuration

Type: number

Range: 1-16000000

obj-between2

Description Response size configuration

Type: number

Range: 1-16000000

http-list_response-rate-limit_obj-size_greater-cfg

Specification	Value
Type	*list*
Block object keys	

obj-greater

Description Response size configuration

Type: number

Range: 1-16000000

obj-greater-rate

Description Response rate limit

Type: number

Range: 1-16000000

http-list_response-rate-limit_obj-size_less-cfg

Specification	Value
Type	*list*
Block object keys	

obj-less

Description Response size configuration

Type: number

Range: 1-16000000

obj-less-rate

Description Response rate limit

Type: number

Range: 1-16000000

http-list_mss-cfg

Specification	Value
Type	*object*

mss-percent

Description Configure percentage of mss such that if a packet size is below the mss times mss-percent, packet is considered bad.

Type: number

Range: 1-100

mss-timeout

Description Configure DDOS detection based on mss and packet size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

number-packets

Description Specify percentage of mss. Default is 0, mss-timeout is not enabled.

Type: number

Range: 1-31

http-list_referer-filter

Specification	Value
Type	*object*

ref-filter-blacklist

Description Blacklist the source if the referer matches

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-contains-cfg

Type: List

referer-ends-cfg

Type: List

referer-equals-cfg

Type: List

referer-starts-cfg

Type: List

http-list_referer-filter_referer-equals-cfg

Specification	Value
Type	*list*
Block object keys	

referer-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_referer-filter_referer-starts-cfg

Specification	Value
Type	*list*
Block object keys	

referer-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_referer-filter_referer-contains-cfg

Specification	Value
Type	*list*
Block object keys	

referer-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_referer-filter_referer-ends-cfg

Specification	Value
Type	*list*
Block object keys	

referer-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_slow-read-drop

Specification	Value
Type	*object*

min-window-count

Description Number of packets

Type: number

Range: 1-31

min-window-size

Description minimum window size

Type: number

Range: 1-65535

http-list_use-hdr-ip-cfg

Specification	Value
Type	*object*

l7-hdr-name

Description Set the http header name to parse for client ip. Default is X-Forwarded-For

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: X-Forwarded-For

use-hdr-ip-as-source

Description Mitigate on src ip specified by http header for example X-Forwarded-For header. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop packets for sip connection; 'reset': Send RST for sip-tcp connection;

Type: string

Supported Values: drop, reset

Default: drop

dst

Description: dst is a **JSON Block**. Please see below for *sip-list_dst*

Type: Object

filter-header-list

Type: List

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}/filter-header/{sip-filter-header-seq}*

idle-timeout

Description Set the the idle timeout value for sip-tcp connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-sip

Description: malformed-sip is a **JSON Block**. Please see below for *sip-list_malformed-sip*

Type: Object

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}/malformed-sip*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *sip-list_multi-pu-threshold-distribution*

Type: Object

sip-tmpl-name

Description DDOS SIP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src

Description: src is a **JSON Block**. Please see below for *sip-list_src*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Description: update-cfg is a **JSON Block**. Please see below for *sip-list_src_sip-request-rate-limit_method_update-cfg*

Type: Object

sip-list_src_sip-request-rate-limit_method_options-cfg

Specification	Value
Type	*object*

src-sip-options-cfg-flag

Description OPTIONS method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-options-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_refer-cfg

Specification	Value
Type	*object*

src-sip-refer-cfg-flag

Description REFER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-refer-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_bye-cfg

Specification	Value
Type	*object*

src-sip-bye-cfg-flag

Description BYE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-bye-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_subscribe-cfg

Specification	Value
Type	*object*

src-sip-subscribe-cfg-flag

Description SUBSCRIBE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-subscribe-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_register-cfg

Specification	Value
Type	*object*

src-sip-register-cfg-flag

Description REGISTER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-register-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_invite-cfg

Specification	Value
Type	*object*

src-sip-invite-cfg-flag

Description INVITE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-invite-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_message-cfg

Specification	Value
Type	*object*

src-sip-message-cfg-flag

Description MESSAGE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-message-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_update-cfg

Specification	Value
Type	*object*

src-sip-update-cfg-flag

Description UPDATE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-update-rate

Description

Type: number

Range: 1-16000000

sip-list_src_sip-request-rate-limit_method_notify-cfg

Specification	Value
Type	*object*

src-sip-notify-cfg-flag

Description NOTIFY method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-notify-rate

Description

Type: number

Range: 1-16000000

sip-list_dst

Specification	Value

sip-list_dst_sip-request-rate-limit_method_options-cfg

Specification	Value
Type	*object*

dst-sip-options-cfg-flag

Description OPTIONS method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-options-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_refer-cfg

Specification	Value
Type	*object*

dst-sip-refer-cfg-flag

Description REFER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-refer-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_bye-cfg

Specification	Value
Type	*object*

dst-sip-bye-cfg-flag

Description BYE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-bye-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_subscribe-cfg

Specification	Value
Type	*object*

dst-sip-subscribe-cfg-flag

Description SUBSCRIBE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-subscribe-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_register-cfg

Specification	Value
Type	*object*

dst-sip-register-cfg-flag

Description REGISTER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-register-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_invite-cfg

Specification	Value
Type	*object*

dst-sip-invite-cfg-flag

Description INVITE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-invite-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_message-cfg

Specification	Value
Type	*object*

dst-sip-message-cfg-flag

Description MESSAGE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-message-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_update-cfg

Specification	Value
Type	*object*

dst-sip-update-cfg-flag

Description UPDATE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-update-rate

Description

Type: number

Range: 1-16000000

sip-list_dst_sip-request-rate-limit_method_notify-cfg

Specification	Value
Type	*object*

dst-sip-notify-cfg-flag

Description NOTIFY method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-notify-rate

Description

Type: number

Range: 1-16000000

sip-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

sip-list_malformed-sip

Specification	Value
Type	*object*

malformed-sip-call-id-max-length

Description Set the maximum call-id length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-check

Description 'enable-check': Enable malformed SIP parameters;

Type: string

Supported Values: enable-check

malformed-sip-max-header-name-length

Description Set the maximum header name length. Default value is 63

Type: number

Range: 1-63

Default: 63

malformed-sip-max-header-value-length

Description Set the maximum header value length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-line-size

Description Set the maximum line size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-uri-length

Description Set the maximum uri size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-sdp-max-length

Description Set the maxinum SDP content length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sip-list_filter-header-list

Specification	Value
Type	*list*
Block object keys	

sip-filter-header-blacklist

Description Also blacklist the source when action is taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-count-only

Description Take no action and continue processing the next filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

sip-filter-header-seq

Description Sequence number

Type: number

Range: 1-5

sip-filter-header-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-whitelist

Description Whitelist the source after filter passes, packets are dropped until then

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v6-list

Specification	Value
Type	*list*
Block object keys	

icmp-tmpl-name

Description DDOS ICMPv6 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/template/icmp-v6/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *icmp-v6-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/template/icmp-v6/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v6-list_type-other

Specification	Value
Type	*object*

type-other-deny

Description Deny all other type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-other-deny and type-other-rate are mutually exclusive

type-other-rate

Description Specify rate with other type

Type: number

Range: 1-16000000

Mutual Exclusion: type-other-rate and type-other-deny are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v6-list_type-list

Specification	Value
Type	*list*
Block object keys	

code

Type: List

code-other

Description: code-other is a **JSON Block**. Please see below for *icmp-v6-list_type-list_code-other*

Type: Object

type-deny

Description Reject this ICMP type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-deny, type-rate, and code-other-rate are mutually exclusive

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

type-rate

Description Specify the whole rate with this type

Type: number

Range: 1-16000000

Mutual Exclusion: type-rate and type-deny are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v6-list_type-list_code

Specification	Value
Type	*list*
Block object keys	

code-number

Description Specify the ICMP code

Type: number

Range: 0-255

code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

icmp-v6-list_type-list_code-other

Specification	Value
Type	*object*

code-other-rate

Description Specify rate with other code

Type: number

Range: 1-16000000

Mutual Exclusion: code-other-rate and type-deny are mutually exclusive

2.33.495 ddos template dns

DNS template Configuration

}
```

dns-list

dns-list is **JSON List** of *dns attributes*

dns-list : [

{ *dns attributes* },

{ *dns attributes* },

...

]

dns attributes

action

Description 'drop': Drop packets (Default action); 'reset': Send Client RST for TCP connections;

Type: string

Supported Values: drop, reset

Default: drop

alias-rate-threshold

Description ALIAS(Record Type 65300) Query Forwarding Rate Limit (Only for DNS Cache Mode)

Type: number

Range: 1-16000000

allow-query-class

Description: allow-query-class is a **JSON Block**. Please see below for *allow-query-class*

Type: Object

allow-record-type

Description: allow-record-type is a **JSON Block**. Please see below for *allow-record-type*

Type: Object

dns-any-check

Description Drop DNS queries of Type ANY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-auth-cfg

Description: dns-auth-cfg is a **JSON Block**. Please see below for *dns-auth-cfg*

Type: Object

dns-request-rate-limit

Description: dns-request-rate-limit is a **JSON Block**. Please see below for *dns-request-rate-limit*

Type: Object

dnssec-wildcard-rate-threshold

Description DNSSEC Wildcard Query Forwarding Rate Limit (only for DNS Cache Mode)

Type: number

Range: 1-16000000

domain-group-name

Description Apply a domain-group to the DNS template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

domain-group-rate-exceed-action

Description 'drop': Drop the query (default); 'tunnel-encap-packet': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: drop, tunnel-encap-packet

Default: drop

domain-group-rate-per-service

Description Enable per service domain rate checking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

fqdn-cfg

Type: List

fqdn-label-count

Description Maximum number of length of FQDN labels

Type: number

Range: 1-10

fqdn-label-len-cfg

Type: List

malformed-query-check

Description: malformed-query-check is a **JSON Block**. Please see below for *malformed-query-check*

Type: Object

Reference Object: */axapi/v3/ddos/template/dns/{name}/malformed-query-check*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *multi-pu-threshold-distribution*

Type: Object

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

nxdomain-cfg

Description: nxdomain-cfg is a **JSON Block**. Please see below for *nxdomain-cfg*

Type: Object

on-no-match

Description 'permit': permit; 'deny': deny (default);

Type: string

Supported Values: permit, deny

Default: deny

query-rate-threshold-for-cache-serving

Description This is for DNS cache mode only, it sets a DNS query rate threshold such that queries under the rate threshold would be forward

Type: number

Range: 1-16000000

symtimeout-cfg

Description: symtimeout-cfg is a **JSON Block**. Please see below for *symtimeout-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-request-rate-limit

Specification	Value

Description: MX-cfg is a **JSON Block**. Please see below for *dns-request-rate-limit_type_MX-cfg*

Type: Object

NS-cfg

Description: NS-cfg is a **JSON Block**. Please see below for *dns-request-rate-limit_type_NS-cfg*

Type: Object

SRV-cfg

Description: SRV-cfg is a **JSON Block**. Please see below for *dns-request-rate-limit_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

dns-request-rate-limit_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

dns-request-rate-limit_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cname-rate

Description

Type: number

Range: 1-16000000

dns-request-rate-limit_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

dns-request-type

Description Other type value

Type: number

Range: 1-65535

dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

dns-request-rate-limit_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-aaaa-rate

Description

Type: number

Range: 1-16000000

dns-request-rate-limit_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-a-rate

Description

Type: number

Range: 1-16000000

dns-request-rate-limit_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-mx-rate

Description

Type: number

Range: 1-16000000

dns-request-rate-limit_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-ns-rate

Description

Type: number

Range: 1-16000000

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

nxdomain-cfg

Specification	Value
Type	*object*

dns-nxdomain-rate

Description Limiting rate

Type: number

Range: 1-16000000

dns-nxdomain-rate-limit

Description DNS NXDOMAIN Rate Limiting (SRC support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-nxdomain-rate-limit-action

Description 'drop': Drop queries if rate is exceeded; 'black-list': Black-List source if rate is exceeded;

Type: string

Supported Values: drop, black-list

fqdn-cfg

Specification	Value
Type	*list*
Block object keys	

by

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'both': Use both Domain Name and Source IP address for rate-limiting;

Type: string

Supported Values: domain-name, src-ip, both

Mutual Exclusion: by and per are mutually exclusive

dns-fqdn-rate

Description Limiting rate (Range: 5-8000 for FQDN domain based rate limiting, 5-16000000 for FQDN label count based rate limiting)

Type: number

Range: 5-16000000

dns-fqdn-rate-limit

Description DNS Rate limiting on the basis of FQDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fqdn-rate-label-count

Description FQDN label count (Range: 1-8)

Type: number

Range: 1-8

fqdn-rate-suffix

Description Suffix count

Type: number

Range: 1-5

fqdn-rate-suffix-by

Description Number of suffixes

Type: number

Range: 1-5

per

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'label-count': FQDN label count;

Type: string

Supported Values: domain-name, src-ip, label-count

Mutual Exclusion: per and by are mutually exclusive

per-domain-per-src-ip

Description Use both Domain Name and Source IP address for rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-auth-cfg

Specification	Value
Type	*object*

dns-auth

Description DNS authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-auth-type

Description 'udp': Drop DNS request and monitor client retry; 'force-tcp': Force DNS request over TCP;

Type: string

Supported Values: udp, force-tcp

force-tcp-ignore-client-source-port

Description Allow client to retransmit DNS request using different source port during udp-auth (supported in asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-tcp-min-retry-gap

Description Minimum sec gap in between 2 dns-udp packets for auth to pass

Type: number

Range: 1-15

force-tcp-timeout

Description TCP authentication timeout in seconds

Type: number

Range: 1-16

min-retry-gap

Description Optional minimum sec gap in between 2 dns-udp packets for auth to pass, unit is specified by min-retry-gap-interval

Type: number

Range: 1-80

min-retry-gap-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

udp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

udp-timeout-val-only

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

with-udp-auth

Description Monitor client retry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

symtimeout-cfg

Specification	Value
Type	*object*

sym-timeout

Description Timeout for DNS Symmetric session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sym-timeout-value

Description Session timeout value in seconds

Type: number

Range: 1-31

allow-query-class

Specification	Value
Type	*object*

allow-any-query-class

Description ANY query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-chaos-query-class

Description CHAOS query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-csnet-query-class

Description CSNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-hesiod-query-class

Description HESIOD query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-internet-query-class

Description INTERNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-none-query-class

Description NONE query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fqdn-label-len-cfg

Specification	Value
Type	*list*
Block object keys	

fqdn-label-length

Description Maximum FQDN label length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fqdn-label-suffix

Description Number of suffixes

Type: number

Range: 1-5

label-length

Description Maximum length of FQDN label

Type: number

Range: 1-63

allow-record-type

Specification	Value
Type	*object*

allow-a-type

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-aaaa-type

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-cname-type

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-mx-type

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-ns-type

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-srv-type

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-num-cfg

Type: List

allow-record-type_record-num-cfg

Specification	Value
Type	*list*
Block object keys	

allow-num-type

Description Other record type value

Type: number

Range: 1-65535

malformed-query-check

Specification	Value
Type	*object*

non-query-opcode-check

Description 'disable': When malform check is enabled, TPS always drops DNS query with non query opcode, this option disables this opcode check;

Type: string

Supported Values: disable

skip-multi-packet-check

Description Bypass DNS fragmented and TCP segmented Queries(Default: dropped)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

validation-type

Description 'basic-header-check': Basic header validation for DNS TCP/UDP queries; 'extended-header-check': Extended header/query validation for DNS TCP/UDP queries; 'disable': Disable Malform query validation for DNS TCP/UDP;

Type: string

Supported Values: basic-header-check, extended-header-check, disable

2.33.496 ddos template dns malformed-query-check

DNS Malform Query check options

malformed-query-check Specification

encap-list

encap-list is **JSON List** of *encap attributes*

encap-list : [

{ *encap attributes* },

{ *encap attributes* },

...

]

encap attributes

encap-tmpl-name

Description DDOS Tunnel Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

preserve-source-ip

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel-encap

Specification	Value
Type	*object*

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *tunnel-encap_ip-cfg*

Type: Object

tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encap for IP packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encap for GRE packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

```

http-list

http-list is **JSON List** of *http attributes*

http-list : [

{ *http attributes* },

{ *http attributes* },

...

]

http attributes

action

Description 'drop': Drop packets for the connection; 'reset': Send RST for the connection;

Type: string

Supported Values: drop, reset

Default: drop

agent-filter

Description: agent-filter is a **JSON Block**. Please see below for *agent-filter*

Type: Object

challenge-cookie-name

Description Set the cookie name used to send back to client. Default is sto-idd

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: sto-idd

challenge-interval

Description Specify the challenge interval. Default is 8 seconds

Type: number

Range: 1-31

Default: 8

challenge-keep-cookie

Description Keep the challenge cookie from client and forward to backend. Default is do not keep

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disallow-connect-method

Description Do not allow HTTP Connect method (asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-header-list

Type: List

Reference Object: */axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}*

http-tmpl-name

Description DDOS HTTP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

idle-timeout

Description Set the the idle timeout value in seconds for HTTP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http

Description: malformed-http is a **JSON Block**. Please see below for *malformed-http*

Type: Object

mss-cfg

Description: mss-cfg is a **JSON Block**. Please see below for *mss-cfg*

Type: Object

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *multi-pu-threshold-distribution*

Type: Object

non-http-bypass

Description Bypass non-http traffic instead of dropping

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-queue-size

Description Set the number of packets for the out-of-order HTTP queue (asym mode only)

Type: number

Range: 0-15

Default: 3

out-of-order-queue-timeout

Description Set the timeout value in seconds for out-of-order queue in HTTP (asym mode only)

Type: number

Range: 0-15

Default: 3

post-rate-limit

Description Configure rate limiting for HTTP POST request

Type: number

Range: 1-16000000

referer-filter

Description: referer-filter is a **JSON Block**. Please see below for *referer-filter*

Type: Object

request-header

Description: request-header is a **JSON Block**. Please see below for *request-header*

Type: Object

request-rate-limit

Description: request-rate-limit is a **JSON Block**. Please see below for *request-rate-limit*

Type: Object

response-rate-limit

Description: response-rate-limit is a **JSON Block**. Please see below for *response-rate-limit*

Type: Object

slow-read-drop

Description: slow-read-drop is a **JSON Block**. Please see below for *slow-read-drop*

Type: Object

use-hdr-ip-cfg

Description: use-hdr-ip-cfg is a **JSON Block**. Please see below for *use-hdr-ip-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

request-rate-limit

Specification	Value
Type	*object*

request-rate

Description HTTP request rate limit

Type: number

Range: 1-16000000

uri

Type: List

request-rate-limit_uri

Specification	Value
Type	*list*
Block object keys	

contains-cfg

Description: contains-cfg is a **JSON Block**. Please see below for *request-rate-limit_uri_contains-cfg*

Type: Object

ends-cfg

Description: ends-cfg is a **JSON Block**. Please see below for *request-rate-limit_uri_ends-cfg*

Type: Object

equal-cfg

Description: equal-cfg is a **JSON Block**. Please see below for *request-rate-limit_uri_equal-cfg*

Type: Object

starts-cfg

Description: starts-cfg is a **JSON Block**. Please see below for *request-rate-limit_uri_starts-cfg*

Type: Object

request-rate-limit_uri_equal-cfg

Specification	Value
Type	*object*

url-equals

Description Request rate-limit HTTP URI matching a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-equals-rate

Description Request rate limit

Type: number

Range: 1-16000000

request-rate-limit_uri_starts-cfg

Specification	Value
Type	*object*

url-starts-with

Description Request rate-limit HTTP URI strting with a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-starts-with-rate

Description Request rate limit

Type: number

Range: 1-16000000

request-rate-limit_uri_contains-cfg

Specification	Value
Type	*object*

url-contains

Description Request rate-limit HTTP URI containing a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-contains-rate

Description Request rate limit

Type: number

Range: 1-16000000

request-rate-limit_uri_ends-cfg

Specification	Value
Type	*object*

url-ends-with

Description Request rate-limit HTTP URI ending with a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-ends-with-rate

Description Request rate limit

Type: number

Range: 1-16000000

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

malformed-http

Specification	Value
Type	*object*

malformed-http-bad-chunk-mon-enabled

Description Enabling bad chunk monitoring. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-enabled

Description Enabling ddos malformed http protection. Default value is disabled.

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-max-content-length

Description Set the maximum content-length header. Default value is 4294967295 bytes

Type: number

Range: 1-4294967295

Default: 4294967295

malformed-http-max-header-name-size

Description Set the maxinum header name length. Default value is 64.

Type: number

Range: 1-64

Default: 64

malformed-http-max-line-size

Description Set the maximum line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

malformed-http-max-num-headers

Description Set the maximum number of headers. Default value is 90

Type: number

Range: 1-90

Default: 90

malformed-http-max-req-line-size

Description Set the maximum request line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

request-header

Specification	Value
Type	*object*

timeout

Description

Type: number

Range: 1-63

agent-filter

Specification	Value
Type	*object*

agent-contains-cfg

Type: List

agent-ends-cfg

Type: List

agent-equals-cfg

Type: List

agent-filter-blacklist

Description Blacklist the source if the user-agent matches

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

agent-starts-cfg

Type: List

agent-filter_agent-contains-cfg

Specification	Value
Type	*list*
Block object keys	

agent-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

agent-filter_agent-ends-cfg

Specification	Value
Type	*list*
Block object keys	

agent-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

agent-filter_agent-equals-cfg

Specification	Value
Type	*list*
Block object keys	

agent-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

agent-filter_agent-starts-cfg

Specification	Value
Type	*list*
Block object keys	

agent-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

filter-header-list

Specification	Value
Type	*list*
Block object keys	

http-filter-header-blacklist

Description Also blacklist the source when action is taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-count-only

Description Take no action and continue processing the next filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

http-filter-header-seq

Description Sequence number

Type: number

Range: 1-5

http-filter-header-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-whitelist

Description Whitelist the source after filter passes, packets are dropped until then

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

response-rate-limit

Specification	Value
Type	*object*

obj-size

Description: obj-size is a **JSON Block**. Please see below for *response-rate-limit_obj-size*

Type: Object

response-rate-limit_obj-size

Specification	Value
Type	*object*

between-cfg

Type: List

greater-cfg

Type: List

less-cfg

Type: List

response-rate-limit_obj-size_between-cfg

Specification	Value
Type	*list*
Block object keys	

obj-between-rate

Description Response rate limit

Type: number

Range: 1-16000000

obj-between1

Description Response size configuration

Type: number

Range: 1-16000000

obj-between2

Description Response size configuration

Type: number

Range: 1-16000000

response-rate-limit_obj-size_greater-cfg

Specification	Value
Type	*list*
Block object keys	

obj-greater

Description Response size configuration

Type: number

Range: 1-16000000

obj-greater-rate

Description Response rate limit

Type: number

Range: 1-16000000

response-rate-limit_obj-size_less-cfg

Specification	Value
Type	*list*
Block object keys	

obj-less

Description Response size configuration

Type: number

Range: 1-16000000

obj-less-rate

Description Response rate limit

Type: number

Range: 1-16000000

mss-cfg

Specification	Value
Type	*object*

mss-percent

Description Configure percentage of mss such that if a packet size is below the mss times mss-percent, packet is considered bad.

Type: number

Range: 1-100

mss-timeout

Description Configure DDOS detection based on mss and packet size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

number-packets

Description Specify percentage of mss. Default is 0, mss-timeout is not enabled.

Type: number

Range: 1-31

referer-filter

Specification	Value
Type	*object*

ref-filter-blacklist

Description Blacklist the source if the referer matches

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-contains-cfg

Type: List

referer-ends-cfg

Type: List

referer-equals-cfg

Type: List

referer-starts-cfg

Type: List

referer-filter_referer-equals-cfg

Specification	Value
Type	*list*
Block object keys	

referer-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

referer-filter_referer-starts-cfg

Specification	Value
Type	*list*
Block object keys	

referer-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

referer-filter_referer-contains-cfg

Specification	Value
Type	*list*
Block object keys	

referer-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

referer-filter_referer-ends-cfg

Specification	Value
Type	*list*
Block object keys	

referer-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

slow-read-drop

Specification	Value
Type	*object*

min-window-count

Description Number of packets

Type: number

Range: 1-31

min-window-size

Description minimum window size

Type: number

Range: 1-65535

use-hdr-ip-cfg

Specification	Value
Type	*object*

l7-hdr-name

Description Set the http header name to parse for client ip. Default is X-Forwarded-For

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: X-Forwarded-For

use-hdr-ip-as-source

Description Mitigate on src ip specified by http header for example X-Forwarded-For header. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.33.499 ddos template http filter-header

HTTP Header Regex Filter Configuration

filter-header Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*http-filter-header-seq*
Collection Name	*filter-header-list*
Collection URI	/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header
Element Name	filter-header
Element URI	/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}
Element Attributes	filter-header_attributes
Partition Visibility	shared
Schema	`filter-header schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header

filter-header attributes

Create List

POST

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header

filter-header attributes

Get Object

GET

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}

filter-header attributes

Get List

GET

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header

filter-header-list

Modify Object

POST

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}

filter-header attributes

Replace Object

PUT

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}

filter-header attributes

Replace List

PUT

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header

filter-header-list

Delete Object

DELETE

/axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}

filter-header attributes

filter-header-list

filter-header-list is **JSON List** of *filter-header attributes*

filter-header-list : [

{ *filter-header attributes* },

{ *filter-header attributes* },

...

]

filter-header attributes

http-filter-header-blacklist

Description Also blacklist the source when action is taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-count-only

Description Take no action and continue processing the next filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

http-filter-header-seq

Description Sequence number

Type: number

Range: 1-5

http-filter-header-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-whitelist

Description Whitelist the source after filter passes, packets are dropped until then

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.500 ddos template icmp-v4

ICMPv4 template Configuration

icmp-v4 Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*icmp-tmpl-name*
Collection Name	*icmp-v4-list*
Collection URI	/axapi/v3/ddos/template/icmp-v4
Element Name	icmp-v4
Element URI	/axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}
Element Attributes	icmp-v4_attributes
Partition Visibility	shared
Schema	`icmp-v4 schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/template/icmp-v4

icmp-v4 attributes

```
POST /axapi/v3/ddos/template/icmp-v4/
Payload:
{
    "icmp-v4": {
        "icmp-tmpl-name": "a"
    }
}
```

Create List

POST

/axapi/v3/ddos/template/icmp-v4

        "status": "OK",
        "msg": "Success"
    }
}
```

icmp-v4-list

icmp-v4-list is **JSON List** of *icmp-v4 attributes*

icmp-v4-list : [

{ *icmp-v4 attributes* },

{ *icmp-v4 attributes* },

...

]

icmp-v4 attributes

icmp-tmpl-name

Description DDOS ICMPv4 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *type-other*

Type: Object

Reference Object: */axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

type-other

Specification	Value
Type	*object*

type-other-deny

Description Deny all other type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-other-deny and type-other-rate are mutually exclusive

type-other-rate

Description Specify rate with other type

Type: number

Range: 1-16000000

Mutual Exclusion: type-other-rate and type-other-deny are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

type-list

Specification	Value
Type	*list*
Block object keys	

code

Type: List

code-other

Description: code-other is a **JSON Block**. Please see below for *type-list_code-other*

Type: Object

type-deny

Description Reject this ICMP type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-deny, type-rate, and code-other-rate are mutually exclusive

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

type-rate

Description Specify the whole rate with this type

Type: number

Range: 1-16000000

Mutual Exclusion: type-rate and type-deny are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

type-list_code

Specification	Value
Type	*list*
Block object keys	

code-number

Description Specify the ICMP code

sip-list

sip-list is **JSON List** of *sip attributes*

sip-list : [

{ *sip attributes* },

{ *sip attributes* },

...

]

sip attributes

action

Description 'drop': Drop packets for sip connection; 'reset': Send RST for sip-tcp connection;

Type: string

Supported Values: drop, reset

Default: drop

dst

Description: dst is a **JSON Block**. Please see below for *dst*

Type: Object

filter-header-list

Type: List

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}/filter-header/{sip-filter-header-seq}*

idle-timeout

Description Set the the idle timeout value for sip-tcp connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-sip

Description: malformed-sip is a **JSON Block**. Please see below for *malformed-sip*

Type: Object

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}/malformed-sip*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *multi-pu-threshold-distribution*

Type: Object

sip-tmpl-name

Description DDOS SIP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src

Description: src is a **JSON Block**. Please see below for *src*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src

Specification	Value
Type	*object*

sip-request-rate-limit

dst-sip-message-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_update-cfg

Specification	Value
Type	*object*

dst-sip-update-cfg-flag

Description UPDATE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-update-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_notify-cfg

Specification	Value
Type	*object*

dst-sip-notify-cfg-flag

Description NOTIFY method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-notify-rate

Description

Type: number

Range: 1-16000000

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

malformed-sip

Specification	Value
Type	*object*

malformed-sip-call-id-max-length

Description Set the maximum call-id length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-check

Description 'enable-check': Enable malformed SIP parameters;

Type: string

Supported Values: enable-check

malformed-sip-max-header-name-length

Description Set the maximum header name length. Default value is 63

Type: number

Range: 1-63

Default: 63

malformed-sip-max-header-value-length

Description Set the maximum header value length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-line-size

Description Set the maximum line size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-uri-length

Description Set the maximum uri size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-sdp-max-length

Description Set the maxinum SDP content length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

filter-header-list

Specification	Value
Type	*list*
Block object keys	

sip-filter-header-blacklist

Description Also blacklist the source when action is taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-count-only

Description Take no action and continue processing the next filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

sip-filter-header-seq

Description Sequence number

Type: number

Range: 1-5

sip-filter-header-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-whitelist

Description Whitelist the source after filter passes, packets are dropped until then

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-l4-list

ssl-l4-list is **JSON List** of *ssl-l4 attributes*

ssl-l4-list : [

{ *ssl-l4 attributes* },

{ *ssl-l4 attributes* },

...

]

ssl-l4 attributes

action

Description 'drop': drop; 'reset': reset;

Type: string

Supported Values: drop, reset

Default: drop

allow-non-tls

Description Allow Non-TLS (SSLv3 and lower) traffic (Warning: security may be compromised)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-config-cfg

Description: auth-config-cfg is a **JSON Block**. Please see below for *auth-config-cfg*

Type: Object

cert-cfg

Description: cert-cfg is a **JSON Block**. Please see below for *cert-cfg*

Type: Object

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *multi-pu-threshold-distribution*

Type: Object

renegotiation

Description Configure renegotiation limiting for SSL (Number of renegotiation allowed)

Type: number

Range: 0-7

request-rate-limit

Description Configure rate limiting for SSL

Type: number

Range: 1-16000000

server-name-list

Type: List

ssl-handshake-policy

Description: ssl-handshake-policy is a **JSON Block**. Please see below for *ssl-handshake-policy*

Type: Object

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}/ssl-handshake-policy*

ssl-l4-tmpl-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-traffic-check

Description: ssl-traffic-check is a **JSON Block**. Please see below for *ssl-traffic-check*

Type: Object

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}/ssl-traffic-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cert-cfg

Specification	Value
Type	*object*

cert

Description SSL certificate

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key

Description SSL key

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

key-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

auth-config-cfg

Specification	Value
Type	*object*

auth-handshake-fail-action

Description 'blacklist-src': Blacklist-src when auth handshake fails;

Type: string

Supported Values: blacklist-src

timeout

Description Connection timeout

Type: number

Range: 1-31

Default: 5

trials

Description Number of failed handshakes

Type: number

Range: 0-15

Default: 5

ssl-traffic-check

Specification	Value
Type	*object*

check-resumed-connection

Description Apply checks to SSL connections initialized by ACK packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-action

Description 'drop': Drop packets with bad ssl header; 'ignore': Forward packets with bad ssl header;

Type: string

Supported Values: drop, ignore

header-inspection

Description Inspect ssl header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

ssl-handshake-policy

Specification	Value
Type	*object*

action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist source IP;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: action and ssl-handshake-policy-action-list-name are mutually exclusive

cipher-suites-limit

Description Set cipher suites limit

Type: number

Range: 1-600

client-extensions-limit

Description Set client extensions limit

Type: number

Range: 1-600

clienthello-to-appdata-timeout

Description Set maximum timeout seconds from ClientHello to Application-Data

Type: number

Range: 1-600

finished-to-appdata-timeout

Description Set maximum timeout seconds from Handshake finished to Application-Data

Type: number

Range: 1-600

src-handshaking-conn-limit

Description Set handshaking connection limit

Type: number

Range: 1-16000000

ssl-handshake-policy-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-handshake-policy-action-list-name and action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

server-name-list

Specification	Value
Type	*list*
Block object keys	

server-cert

Description Server Certificate associated to SNI (Server Certificate Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

server-key

Description Server Private Key associated to SNI (Server Private Key Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-name

Description Server name indication in Client hello extension (Server name String)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp-list

tcp-list is **JSON List** of *tcp attributes*

tcp-list : [

{ *tcp attributes* },

{ *tcp attributes* },

...

]

tcp attributes

ack-authentication-synack-reset

Description Enable Reset client TCP SYN+ACK for authentication (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-cfg

Description: action-cfg is a **JSON Block**. Please see below for *action-cfg*

Type: Object

action-on-ack-rto-retry-count

Description Take action if action-on-ack RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-on-syn-rto-retry-count

Description Take action if action-on-syn RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-syn-cfg

Description: action-syn-cfg is a **JSON Block**. Please see below for *action-syn-cfg*

Type: Object

age

Description Session age in minutes

Type: number

Range: 1-63

allow-syn-otherflags

Description Treat TCP SYN+PSH as a TCP SYN (DST tcp ports support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-synack-skip-authentications

Description Allow create sessions on SYNACK without syn-auth and ack-auth (ASYM Mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-tcp-tfo

Description Allow TCP Fast Open

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

black-list-out-of-seq

Description Black list Src IP if out of seq pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: black-list-out-of-seq and per-conn-out-of-seq-rate-limit are mutually exclusive

black-list-retransmit

Description Black list Src IP if retransmit pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: black-list-retransmit and per-conn-retransmit-rate-limit are mutually exclusive

black-list-zero-win

Description Black list Src IP if zero window pkts exceed configured threshold

Type: number

Range: 1-250

Mutual Exclusion: black-list-zero-win and per-conn-zero-win-rate-limit are mutually exclusive

conn-rate-limit-on-syn-only

Description Only count SYN-initiated connections towards connection-rate tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-conn-on-syn-only

Description Enable connection establishment on SYN only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-known-resp-src-port-cfg

Description: drop-known-resp-src-port-cfg is a **JSON Block**. Please see below for *drop-known-resp-src-port-cfg*

Type: Object

dst

Description: dst is a **JSON Block**. Please see below for *dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/tcp/{name}/filter/{tcp-filter-seq}*

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

per-conn-out-of-seq-rate-action

Description 'drop': Drop packets for out-of-seq rate exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq rate exceed; 'ignore': help Ignore out-of-seq rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-out-of-seq-rate-limit

Description Take action if out-of-seq pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-out-of-seq-rate-limit and black-list-out-of-seq are mutually exclusive

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec; '10sec': 10sec;

Type: string

Supported Values: 100ms, 1sec, 10sec

Default: 1sec

per-conn-retransmit-rate-action

Description 'drop': Drop packets for retransmit rate exceed (Default); 'blacklist-src': help Blacklist-src for retransmit rate exceed; 'ignore': help Ignore retransmit rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-retransmit-rate-limit

Description Take action if retransmit pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-retransmit-rate-limit and black-list-retransmit are mutually exclusive

per-conn-zero-win-rate-action

Description 'drop': Drop packets for zero-win rate exceed (Default); 'blacklist-src': help Blacklist-src for zero-win rate exceed; 'ignore': help Ignore zero-win rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-zero-win-rate-limit

Description Take action if zero window pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-zero-win-rate-limit and black-list-zero-win are mutually exclusive

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking*

src

Description: src is a **JSON Block**. Please see below for *src*

Type: Object

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable, send-rst-once

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synack-rate-limit

Description Config SYNACK rate limit

Type: number

Range: 1-16000000

Mutual Exclusion: synack-rate-limit and track-together-with-syn are mutually exclusive

track-together-with-syn

Description SYNACK will be counted in Dst Syn-rate limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: track-together-with-syn and synack-rate-limit are mutually exclusive

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *tunnel-encap_ip-cfg*

Type: Object

tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

preserve-src-ipv4

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

preserve-src-ipv4-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *dst_rate-limit*

Type: Object

dst_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *dst_rate-limit_syn-rate-limit*

Type: Object

dst_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

dst-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, ignore

Default: drop

dst-syn-rate-limit

Description

Type: number

Range: 1-16000000

action-cfg

Specification	Value
Type	*object*

action-on-ack

Description Monitor tcp ack for age-out session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authenticate-only

Description Apply action-on-ack once per source address for authentication purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

min-retry-gap

Description Min gap between 2 ACKs for action-on-ack pass in 100ms interval

Type: number

Range: 1-80

reset

Description Send RST to client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rto-authentication

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout

Description ACK retry timeout in sec

Type: number

Range: 1-31

progression-tracking

Specification	Value
Type	*object*

ignore-TLS-handshake

Description Ignore TLS handshake, support SSL-L4 port only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mitigation

Description: mitigation is a **JSON Block**. Please see below for *progression-tracking_mitigation*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation*

profiling

Description: profiling is a **JSON Block**. Please see below for *progression-tracking_profiling*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/profiling*

progression-tracking-enabled

Description 'enable-check': Enable Progression Tracking Check;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking_mitigation

Specification	Value
Type	*object*

connection-tracking

Description: connection-tracking is a **JSON Block**. Please see below for *progression-tracking_mitigation_connection-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/connection-tracking*

request-tracking

Description: request-tracking is a **JSON Block**. Please see below for *progression-tracking_mitigation_request-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/request-tracking*

slow-attack

Description: slow-attack is a **JSON Block**. Please see below for *progression-tracking_mitigation_slow-attack*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/slow-attack*

time-window-tracking

Description: time-window-tracking is a **JSON Block**. Please see below for *progression-tracking_mitigation_time-window-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/time-window-tracking*

progression-tracking_mitigation_time-window-tracking

Specification	Value
Type	*object*

progression-tracking-win-enabled

Description 'enable-check': Enable Progression Tracking per Time Window;

Type: string

Supported Values: enable-check

Default: enable-check

progression-tracking-windows-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-windows-action and progression-tracking-windows-action-list-name are mutually exclusive

progression-tracking-windows-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-windows-action-list-name and progression-tracking-windows-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking_mitigation_slow-attack

Specification	Value
Type	*object*

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking_mitigation_connection-tracking

Specification	Value
Type	*object*

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking_mitigation_request-tracking

Specification	Value
Type	*object*

first-request-max-time

Description Set the maximum idle time before the first request (in unit of 100ms)

Type: number

Range: 1-65535

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model (Default); 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking_profiling

Specification	Value
Type	*object*

profiling-connection-life-model

Description Enable auto-config progression tracking learning for connection model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-request-response-model

Description Enable auto-config progression tracking learning for request response model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-time-window-model

Description Enable auto-config progression tracking learning for time window model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-5

tcp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *src_rate-limit*

Type: Object

src_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *src_rate-limit_syn-rate-limit*

Type: Object

src_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

src-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'blacklist-src': Blacklist-src for syn-rate exceed; 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

src-syn-rate-limit

Description

Type: number

Range: 1-16000000

action-syn-cfg

Specification	Value
Type	*object*

action-on-syn

Description Monitor tcp syn for age-out session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-gap

Description Min gap between 2 SYNs for action-on-syn pass in 100ms interval

Type: number

Range: 1-80

action-on-syn-reset

Description Send RST to client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-timeout

Description SYN retry timeout in sec

Type: number

Range: 1-31

drop-known-resp-src-port-cfg

Specification	Value
Type	*object*

drop-known-resp-src-port

Description Drop well-known if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exclude-src-resp-port

Description excluding src port equal destination port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.33.516 ddos template tcp filter

TCP Filter Configuration

filter Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*tcp-filter-seq*
Collection Name	*filter-list*
Collection URI	/axapi/v3/ddos/template/tcp/{name}/filter
Element Name	filter
Element URI	/axapi/v3/ddos/template/tcp/{name}/filter/{tcp-filter-seq}
Element Attributes	filter_attributes

filter-list

Delete Object

DELETE

/axapi/v3/ddos/template/tcp/{name}/filter/{tcp-filter-seq}

filter attributes

filter-list

filter-list is **JSON List** of *filter attributes*

filter-list : [

{ *filter attributes* },

{ *filter attributes* },

...

]

filter attributes

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-5

tcp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.517 ddos template tcp progression-tracking

Configure and enable TCP Progression Tracking

progression-tracking Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	progression-tracking
Element URI	/axapi/v3/ddos/template/tcp/{name}/progression-tracking
Element Attributes	progression-tracking_attributes
Partition Visibility	shared
Schema	`progression-tracking schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/template/tcp/{name}/progression-tracking

progression-tracking attributes

```
POST /axapi/v3/ddos/template/tcp/a/progression-tracking
Payload:
{
    "progression-tracking": {
        "progression-tracking-enabled": "enable-check",
        "ignore-TLS-handshake": 1
    }
}
```

Get Object

GET

/axapi/v3/ddos/template/tcp/{name}/progression-tracking

progression-tracking attributes

```
GET /axapi/v3/ddos/template/tcp/a/progression-tracking
Reponse:
{
    "progression-tracking": {
        "progression-tracking-enabled": "enable-check",

        "uuid": "5cb3d27c-0888-11f0-b674-001fa04507c0",
        "a10-url": "/axapi/v3/ddos/template/tcp/a/progression-tracking"
    }
}
```

Modify Object

POST

/axapi/v3/ddos/template/tcp/{name}/progression-tracking

progression-tracking attributes

Replace Object

PUT

/axapi/v3/ddos/template/tcp/{name}/progression-tracking

progression-tracking attributes

```
PUT /axapi/v3/ddos/template/tcp/a/progression-tracking
Payload:
{
    "progression-tracking": {
        "progression-tracking-enabled": "enable-check",
        "ignore-TLS-handshake": 0
    }
}
```

Delete Object

DELETE

/axapi/v3/ddos/template/tcp/{name}/progression-tracking

progression-tracking attributes

```
DELETE /axapi/v3/ddos/template/tcp/a/progression-tracking
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Success"
    }
}
```

progression-tracking attributes

ignore-TLS-handshake

Description Ignore TLS handshake, support SSL-L4 port only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mitigation

Description: mitigation is a **JSON Block**. Please see below for *mitigation*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation*

profiling

Description: profiling is a **JSON Block**. Please see below for *profiling*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/profiling*

progression-tracking-enabled

Description 'enable-check': Enable Progression Tracking Check;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

mitigation

Specification	Value
Type	*object*

connection-tracking

Description: connection-tracking is a **JSON Block**. Please see below for *mitigation_connection-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/connection-tracking*

request-tracking

Description: request-tracking is a **JSON Block**. Please see below for *mitigation_request-tracking*

mitigation_time-window-tracking

Specification	Value
Type	*object*

progression-tracking-win-enabled

Description 'enable-check': Enable Progression Tracking per Time Window;

Type: string

Supported Values: enable-check

Default: enable-check

progression-tracking-windows-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-windows-action and progression-tracking-windows-action-list-name are mutually exclusive

progression-tracking-windows-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-windows-action-list-name and progression-tracking-windows-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

mitigation_slow-attack

Specification	Value
Type	*object*

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Specification	Value
Type	*object*

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

mitigation_request-tracking

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model (Default); 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

profiling

Specification	Value
Type	*object*

profiling-connection-life-model

Description Enable auto-config progression tracking learning for connection model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-request-response-model

Description Enable auto-config progression tracking learning for request response model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-time-window-model

Description Enable auto-config progression tracking learning for time window model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

}
```

slow-attack attributes

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.522 ddos template tcp progression-tracking mitigation time-window-tracking

Configure and enable TCP Progression Tracking Mitigation per Time Window

time-window-tracking Specification

Parameter	Value
Type	*Configuration Resource*

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

2.33.523 ddos template tcp progression-tracking profiling

Configure and enable TCP Progression Tracking Profiling

```

udp-list

udp-list is **JSON List** of *udp attributes*

udp-list : [

{ *udp attributes* },

{ *udp attributes* },

...

]

udp attributes

age

Description Configure session age(in minutes) for UDP sessions

Type: number

Range: 1-63

drop-known-resp-src-port-cfg

Description: drop-known-resp-src-port-cfg is a **JSON Block**. Please see below for *drop-known-resp-src-port-cfg*

Type: Object

drop-ntp-monlist

Description Drop NTP monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/udp/{name}/filter/{udp-filter-seq}*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

previous-salt-timeout

Description Token-Authentication previous salt-prefix timeout in minutes, default is 1 min

Type: number

Range: 1-10080

Default: 1

public-ipv4-addr

Description IP address

Type: string

Format: ipv4-address

public-ipv6-addr

Description IPV6 address

Type: string

Format: ipv6-address

spoof-detect-cfg

Description: spoof-detect-cfg is a **JSON Block**. Please see below for *spoof-detect-cfg*

Type: Object

token-authentication

Description Enable Token Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-formula

Description 'md5_Salt-SrcIp-SrcPort-DstIp-DstPort': md5 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'md5_Salt-DstIp-DstPort': md5 of Salt-DstIp-DstPort; 'md5_Salt-SrcIp-DstIp': md5 of Salt-SrcIp-DstIp; 'md5_Salt-SrcPort-DstPort': md5 of Salt-SrcPort-DstPort; 'md5_Salt-UintDstIp-DstPort': Using the uint value of IP for md5 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-SrcPort-DstIp-DstPort': sha1 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'sha1_Salt-DstIp-DstPort': sha1 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-DstIp': sha1 of Salt-SrcIp-DstIp; 'sha1_Salt-SrcPort-DstPort': sha1 of Salt-SrcPort-DstPort; 'sha1_Salt-UintDstIp-DstPort': Using the uint value of IP for sha1 of Salt-DstIp-DstPort;

Type: string

Supported Values: md5_Salt-SrcIp-SrcPort-DstIp-DstPort, md5_Salt-DstIp-DstPort, md5_Salt-SrcIp-DstIp, md5_Salt-SrcPort-DstPort, md5_Salt-UintDstIp-DstPort, sha1_Salt-SrcIp-SrcPort-DstIp-DstPort, sha1_Salt-DstIp-DstPort, sha1_Salt-SrcIp-DstIp, sha1_Salt-SrcPort-DstPort, sha1_Salt-UintDstIp-DstPort

token-authentication-hw-assist-disable

Description token-authentication disable hardware assistance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-public-address

Description The server public IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix

Description token-authentication salt-prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix-curr

Description

Type: number

Range: 1-4294967295

token-authentication-salt-prefix-prev

Description

Type: number

Range: 1-4294967295

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel-encap

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *tunnel-encap_always*

Type: Object

gre-always

Description: gre-always is a **JSON Block**. Please see below for *tunnel-encap_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: gre-encap and ip-encap are mutually exclusive

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: ip-encap and gre-encap are mutually exclusive

tunnel-encap_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

preserve-src-ipv4-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

preserve-src-ipv4

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spoof-detect-cfg

Specification	Value
Type	*object*

min-retry-gap

Description Optional minimum gap between 2 UDP packets for spoof-detect pass, unit is specified by min-retry-gap-interval

Type: number

Range: 1-80

min-retry-gap-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

spoof-detect

Description Force client to retry on udp

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spoof-detect-retry-timeout

Description timeout in seconds

Type: number

Range: 1-31

Default: 5

Mutual Exclusion: spoof-detect-retry-timeout and spoof-detect-retry-timeout-val-only are mutually exclusive

spoof-detect-retry-timeout-val-only

Description timeout in seconds

Type: number

Range: 1-31

Default: 5

Mutual Exclusion: spoof-detect-retry-timeout-val-only and spoof-detect-retry-timeout are mutually exclusive

drop-known-resp-src-port-cfg

Specification	Value
Type	*object*

drop-known-resp-src-port

Description Drop well-known if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exclude-src-resp-port

Description excluding src port equal destination port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-5

udp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.544 ddos zone-profile ip-proto proto-name indicator

DDoS zone profile indicator config

indicator Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*indicator-name*
Collection Name	*indicator-list*
Collection URI	/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator
Element Name	indicator
Element URI	/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator/{indicator-name}
Element Attributes	indicator_attributes
Partition Visibility	shared
Schema	`indicator schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator

indicator attributes

Create List

POST

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator

indicator attributes

Get Object

GET

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator/{indicator-name}

indicator attributes

Get List

GET

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator

indicator-list

Modify Object

POST

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator/{indicator-name}

indicator attributes

Replace Object

PUT

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator/{indicator-name}

indicator attributes

Replace List

PUT

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator

indicator-list

Delete Object

DELETE

/axapi/v3/ddos/zone-profile/{profile-name}/ip-proto/proto-name/{protocol}/indicator/{indicator-name}

indicator attributes

indicator-list

indicator-list is **JSON List** of *indicator attributes*

indicator-list : [

{ *indicator attributes* },

{ *indicator attributes* },

...

]

indicator attributes

indicator-name

Description 'pkt-rate': pkt-rate; 'pkt-drop-rate': pkt-drop-rate; 'bit-rate': bit-rate; 'pkt-drop-ratio': pkt-drop-ratio; 'bytes-to-bytes-from-ratio': bytes-to-bytes-from-ratio; 'frag-rate': frag-rate; 'cpu-utilization': cpu-utilization; 'interface-utilization': interface-utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

src-threshold-cfg

Description: src-threshold-cfg is a **JSON Block**. Please see below for *src-threshold-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-cfg

Description: zone-threshold-cfg is a **JSON Block**. Please see below for *zone-threshold-cfg*

Type: Object

src-threshold-cfg

Specification	Value
Type	*object*

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-threshold-cfg

Specification	Value
Type	*object*

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

2.33.545 ddos zone-profile ip-proto proto-number

DDOS IP protocol profile configuration

proto-number Specification

Parameter	Value

indicator-list

indicator-list is **JSON List** of *indicator attributes*

```
indicator-list : [
        { indicator attributes },
        { indicator attributes },
        ...
    ]
```

indicator attributes

indicator-name

Description 'pkt-rate': pkt-rate; 'pkt-drop-rate': pkt-drop-rate; 'bit-rate': bit-rate; 'pkt-drop-ratio': pkt-drop-ratio; 'bytes-to-bytes-from-ratio': bytes-to-bytes-from-ratio; 'concurrent-conns': concurrent-conns; 'conn-miss-rate': conn-miss-rate; 'syn-rate': syn-rate; 'fin-rate': fin-rate; 'rst-rate': rst-rate; 'small-window-ack-rate': small-window-ack-rate; 'empty-ack-rate': empty-ack-rate; 'small-payload-rate': small-payload-rate; 'syn-fin-ratio': syn-fin-ratio; 'cpu-utilization': cpu-utilization; 'interface-utilization': interface-utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

src-threshold-cfg

Description: src-threshold-cfg is a **JSON Block**. Please see below for *src-threshold-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-cfg

Description: zone-threshold-cfg is a **JSON Block**. Please see below for *zone-threshold-cfg*

Type: Object

src-threshold-cfg

Specification	Value
Type	*object*

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-threshold-cfg

Specification	Value
Type	*object*

zone-threshold-large-num

Description Threshold for the entire zone

udp-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/udp/{name}/filter/{udp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

max-payload-size-cfg

Description: max-payload-size-cfg is a **JSON Block**. Please see below for *udp-list_max-payload-size-cfg*

Type: Object

min-payload-size-cfg

Description: min-payload-size-cfg is a **JSON Block**. Please see below for *udp-list_min-payload-size-cfg*

Type: Object

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Description: ntp-monlist-cfg is a **JSON Block**. Please see below for *udp-list_ntp-monlist-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

udp-list_ntp-monlist-cfg

Specification	Value
Type	*object*

ntp-monlist

Description Take action for ntp monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntp-monlist-action

Description 'drop': Drop packets for ntp-monlist (Default); 'blacklist-src': Blacklist-src for ntp-monlist; 'ignore': Ignore ntp-monlist;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: ntp-monlist-action and ntp-monlist-action-list-name are mutually exclusive

ntp-monlist-action-list-name

Description Configure action-list to take for ntp-monlist

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ntp-monlist-action-list-name and ntp-monlist-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

udp-list_max-payload-size-cfg

Specification	Value
Type	*object*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

max-payload-size-action

Description 'drop': Drop packets for max-payload-size exceed (Default); 'blacklist-src': Blacklist-src for max-payload-size exceed; 'ignore': Do nothing for max-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: max-payload-size-action and max-payload-size-action-list-name are mutually exclusive

max-payload-size-action-list-name

Description Configure action-list to take for max-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: max-payload-size-action-list-name and max-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

udp-list_min-payload-size-cfg

Specification	Value
Type	*object*

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size-action

Description 'drop': Drop packets for min-payload-size (Default); 'blacklist-src': Blacklist-src for min-payload-size; 'ignore': Do nothing for min-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: min-payload-size-action and min-payload-size-action-list-name are mutually exclusive

min-payload-size-action-list-name

Description Configure action-list to take for min-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: min-payload-size-action-list-name and min-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-list

Specification	Value
Type	*list*
Block object keys	

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

query-resolution-check

Description: query-resolution-check is a **JSON Block**. Please see below for *dns-list_query-resolution-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-src-port-template/dns/{name}/query-resolution-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-list_query-resolution-check

Specification	Value
Type	*object*

big-response-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

big-response-size

Description Max DNS response size (in Bytes)

Type: number

Range: 1-4096

domain-lockup-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

session-timeout-value

Description max session timeout (secs) between DNS external server and Protected object

Type: number

Range: 1-30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter/{tcp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: tcp-filter-action and tcp-filter-action-list-name are mutually exclusive

tcp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp-filter-action-list-name and tcp-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.555 ddos zone-src-port-template tcp filter

TCP Filter Configuration

filter Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*tcp-filter-name*
Collection Name	*filter-list*
Collection URI	/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter
Element Name	filter
Element URI	/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter/{tcp-filter-name}
Element Attributes	filter_attributes
Partition Visibility	shared
Schema	`filter schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter

filter attributes

Create List

POST

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter

filter attributes

Get Object

GET

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter/{tcp-filter-name}

filter attributes

Get List

GET

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter

filter-list

Modify Object

POST

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter/{tcp-filter-name}

filter attributes

Replace Object

PUT

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter/{tcp-filter-name}

filter attributes

Replace List

PUT

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter

filter-list

Delete Object

DELETE

/axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter/{tcp-filter-name}

filter attributes

filter-list

filter-list is **JSON List** of *filter attributes*

```
filter-list : [
        { filter attributes },
        { filter attributes },
        ...
    ]
```

filter attributes

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: tcp-filter-action and tcp-filter-action-list-name are mutually exclusive

tcp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp-filter-action-list-name and tcp-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.556 ddos zone-src-port-template udp

UDP template configuration

udp Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*name*

        "status": "OK",
        "msg": "Success"
    }
}
```

udp-list

udp-list is **JSON List** of *udp attributes*

udp-list : [

{ *udp attributes* },

{ *udp attributes* },

...

]

udp attributes

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/udp/{name}/filter/{udp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

max-payload-size-cfg

Description: max-payload-size-cfg is a **JSON Block**. Please see below for *max-payload-size-cfg*

Type: Object

min-payload-size-cfg

Description: min-payload-size-cfg is a **JSON Block**. Please see below for *min-payload-size-cfg*

Type: Object

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Description: ntp-monlist-cfg is a **JSON Block**. Please see below for *ntp-monlist-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Specification	Value
Type	*object*

ntp-monlist

Description Take action for ntp monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntp-monlist-action

Description 'drop': Drop packets for ntp-monlist (Default); 'blacklist-src': Blacklist-src for ntp-monlist; 'ignore': Ignore ntp-monlist;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: ntp-monlist-action and ntp-monlist-action-list-name are mutually exclusive

ntp-monlist-action-list-name

Description Configure action-list to take for ntp-monlist

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ntp-monlist-action-list-name and ntp-monlist-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

max-payload-size-cfg

Specification	Value
Type	*object*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

max-payload-size-action

Description 'drop': Drop packets for max-payload-size exceed (Default); 'blacklist-src': Blacklist-src for max-payload-size exceed; 'ignore': Do nothing for max-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: max-payload-size-action and max-payload-size-action-list-name are mutually exclusive

max-payload-size-action-list-name

Description Configure action-list to take for max-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: max-payload-size-action-list-name and max-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

min-payload-size-cfg

Specification	Value
Type	*object*

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size-action

Description 'drop': Drop packets for min-payload-size (Default); 'blacklist-src': Blacklist-src for min-payload-size; 'ignore': Do nothing for min-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: min-payload-size-action and min-payload-size-action-list-name are mutually exclusive

min-payload-size-action-list-name

Description Configure action-list to take for min-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: min-payload-size-action-list-name and min-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.557 ddos zone-src-port-template udp filter

UDP Filter Configuration

filter Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*udp-filter-name*
Collection Name	*filter-list*
Collection URI	/axapi/v3/ddos/zone-src-port-template/udp/{name}/filter

filter attributes

filter-list

filter-list is **JSON List** of *filter attributes*

filter-list : [

{ *filter attributes* },

{ *filter attributes* },

...

]

filter attributes

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.558 ddos zone-template

Define a DDOS zone-template

zone-template Specification

Parameter	Value
Type	*Intermediate Resource*
Element Name	zone-template
Element URI	/axapi/v3/ddos/zone-template
Element Attributes	zone-template_attributes
Partition Visibility	shared
Schema	`zone-template schema`

Operations Allowed:

Get Object

GET

/axapi/v3/ddos/zone-template

zone-template_attributes

zone-template attributes

dns-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/dns/{name}*

encap-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/encap/{encap-tmpl-name}*

http-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/http/{http-tmpl-name}*

icmp-v4-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}*

icmp-v6-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}*

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/ip-proto/{name}*

logging-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/logging/{logging-tmpl-name}*

quic-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}*

sip-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/sip/{sip-tmpl-name}*

ssl-l4-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/ssl-l4/{ssl-l4-tmpl-name}*

tcp-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}*

udp-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/udp/{name}*

logging-list

Specification	Value
Type	*list*
Block object keys	

enable-action-logging

Description Log action taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-cef

Description Log in CEF format

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-custom

Description Customize log format

Type: string

Format: string-rlx

Maximum Length: 512 characters

Maximum Length: 1 characters

logging-tmpl-name

Description DDOS Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: default

use-obj-name

Description Show obj name instead of ip in the log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list

Specification	Value
Type	*list*
Block object keys	

ack-authentication

Description: ack-authentication is a **JSON Block**. Please see below for *tcp-list_ack-authentication*

Type: Object

ack-authentication-synack-reset

Description Reset client TCP SYN+ACK for authentication (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-ack-rto-retry-count

Description Take action if ack-auth RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-on-syn-rto-retry-count

Description Take action if syn-auth RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

age

Description Session age in minutes

Type: number

Range: 1-63

Default: 2

Mutual Exclusion: age and age-second are mutually exclusive

age-out-reset-server

Description Send TCP reset to server if aging time has passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

age-second

Description Session age in seconds

Type: number

Range: 1-3600

Default: 120

Mutual Exclusion: age-second and age are mutually exclusive

allow-syn-otherflags

Description Treat TCP SYN+PSH as a TCP SYN (DST tcp ports support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-synack-skip-authentications

Description Allow create sessions on SYNACK without syn-auth and ack-auth (ASYM Mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-tcp-tfo

Description Allow TCP Fast Open

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

concurrent

Description Enable concurrent port access for non-matching ports (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn-rate-limit-on-syn-only

Description Only count SYN-initiated connections towards connection-rate tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-conn-on-syn-only

Description Enable connection establishment on SYN only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Description: dst is a **JSON Block**. Please see below for *tcp-list_dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/filter/{tcp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

known-resp-src-port-cfg

Description: known-resp-src-port-cfg is a **JSON Block**. Please see below for *tcp-list_known-resp-src-port-cfg*

Type: Object

max-rexmit-syn-per-flow-cfg

Description: max-rexmit-syn-per-flow-cfg is a **JSON Block**. Please see below for *tcp-list_max-rexmit-syn-per-flow-cfg*

Type: Object

name

Description DDOS TCP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

out-of-seq-cfg

Description: out-of-seq-cfg is a **JSON Block**. Please see below for *tcp-list_out-of-seq-cfg*

Type: Object

per-conn-out-of-seq-rate-cfg

Description: per-conn-out-of-seq-rate-cfg is a **JSON Block**. Please see below for *tcp-list_per-conn-out-of-seq-rate-cfg*

Type: Object

per-conn-pkt-rate-cfg

Description: per-conn-pkt-rate-cfg is a **JSON Block**. Please see below for *tcp-list_per-conn-pkt-rate-cfg*

Type: Object

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec; '10sec': 10sec;

Type: string

Supported Values: 100ms, 1sec, 10sec

Default: 1sec

per-conn-retransmit-rate-cfg

Description: per-conn-retransmit-rate-cfg is a **JSON Block**. Please see below for *tcp-list_per-conn-retransmit-rate-cfg*

Type: Object

per-conn-zero-win-rate-cfg

Description: per-conn-zero-win-rate-cfg is a **JSON Block**. Please see below for *tcp-list_per-conn-zero-win-rate-cfg*

Type: Object

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking*

retransmit-cfg

Description: retransmit-cfg is a **JSON Block**. Please see below for *tcp-list_retransmit-cfg*

Type: Object

small-win-cfg

Description: small-win-cfg is a **JSON Block**. Please see below for *tcp-list_small-win-cfg*

Type: Object

src

Description: src is a **JSON Block**. Please see below for *tcp-list_src*

Type: Object

syn-authentication

Description: syn-authentication is a **JSON Block**. Please see below for *tcp-list_syn-authentication*

Type: Object

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synack-rate-limit

Description Config SYNACK rate limit

Type: number

Range: 1-16000000

Mutual Exclusion: synack-rate-limit and track-together-with-syn are mutually exclusive

tcp-half-open-timeout

Description TCP half-open session age in seconds

Type: number

Range: 1-3600

Default: 120

tcp-half-open-timeout-reset-server

Description Send TCP reset to server if TCP half-open session timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

track-together-with-syn

Description SYNACK will be counted in Dst Syn-rate limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: track-together-with-syn and synack-rate-limit are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zero-win-cfg

Description: zero-win-cfg is a **JSON Block**. Please see below for *tcp-list_zero-win-cfg*

Type: Object

tcp-list_syn-authentication

Specification	Value
Type	*object*

syn-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Send reset to client (Applicable to retransmit-check only);

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: syn-auth-fail-action and syn-auth-fail-action-list-name are mutually exclusive

syn-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication.

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: syn-auth-fail-action-list-name and syn-auth-fail-action are mutually exclusive

syn-auth-min-delay

Description Minimum delay (in 100ms intervals) between SYN retransmits for retransmit-check to pass

Type: number

Range: 1-80

Mutual Exclusion: syn-auth-min-delay and syn-auth-type are mutually exclusive

syn-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: syn-auth-pass-action and syn-auth-pass-action-list-name are mutually exclusive

syn-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: syn-auth-pass-action-list-name and syn-auth-pass-action are mutually exclusive

syn-auth-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth-timeout

Description syn retransmit timeout in seconds(default timeout: 5 seconds)

Type: number

Range: 1-31

Mutual Exclusion: syn-auth-timeout and syn-auth-type are mutually exclusive

syn-auth-type

Description 'send-rst': Send reset to client after syn cookie check pass; 'force-rst-by-ack': Send client a bad ack after syn cookie check pass; 'force-rst-by-synack': Send client a bad synack after syn cookie check pass;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, send-rst-once, hybrid

Mutual Exclusion: syn-auth-type, syn-auth-timeout, and syn-auth-min-delay are mutually exclusive

tcp-list_ack-authentication

Specification	Value
Type	*object*

ack-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Send reset to client;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: ack-auth-fail-action and ack-auth-fail-action-list-name are mutually exclusive

ack-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication.

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ack-auth-fail-action-list-name and ack-auth-fail-action are mutually exclusive

ack-auth-min-delay

Description Minimum delay (in 100ms intervals) between ACK retransmits for retransmit-check to pass

Type: number

Range: 1-80

ack-auth-only

Description Apply retransmit-check only once per source address for authentication purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ack-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: ack-auth-pass-action and ack-auth-pass-action-list-name are mutually exclusive

ack-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ack-auth-pass-action-list-name and ack-auth-pass-action are mutually exclusive

ack-auth-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ack-auth-timeout

Description ack retransmit timeout in seconds(default timeout: 5 seconds)

Type: number

Range: 1-31

tcp-list_retransmit-cfg

Specification	Value
Type	*object*

retransmit

Description Take action if retransmit pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: retransmit and per-conn-retransmit-rate-limit are mutually exclusive

retransmit-action

Description 'drop': Drop packets for retrans exceed (Default); 'blacklist-src': help Blacklist-src for retrans exceed; 'ignore': help Ignore retrans exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: retransmit-action and retransmit-action-list-name are mutually exclusive

retransmit-action-list-name

Description Configure action-list to take for retransmit exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: retransmit-action-list-name and retransmit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *tcp-list_dst_rate-limit*

Type: Object

tcp-list_dst_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *tcp-list_dst_rate-limit_syn-rate-limit*

Type: Object

tcp-list_dst_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

dst-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, ignore

Default: drop

dst-syn-rate-limit

Description

Type: number

Range: 1-16000000

tcp-list_per-conn-retransmit-rate-cfg

Specification	Value
Type	*object*

per-conn-retransmit-rate-action

Description 'drop': Drop packets for retrans rate exceed (Default); 'blacklist-src': help Blacklist-src for retrans rate exceed; 'ignore': help Ignore retrans rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-retransmit-rate-action and per-conn-retransmit-rate-action-list-name are mutually exclusive

per-conn-retransmit-rate-action-list-name

Description Configure action-list to take for retransmit rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-retransmit-rate-action-list-name and per-conn-retransmit-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-retransmit-rate-limit

Description Take action if retransmit pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-retransmit-rate-limit and retransmit are mutually exclusive

tcp-list_per-conn-zero-win-rate-cfg

Specification	Value
Type	*object*

per-conn-zero-win-rate-action

Description 'drop': Drop packets for zero-win rate exceed (Default); 'blacklist-src': help Blacklist-src for zero-win rate exceed; 'ignore': Ignore zero-win rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-zero-win-rate-action and per-conn-zero-win-rate-action-list-name are mutually exclusive

per-conn-zero-win-rate-action-list-name

Description Configure action-list to take for zero window rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-zero-win-rate-action-list-name and per-conn-zero-win-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-zero-win-rate-limit

Description Take action if zero window pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-zero-win-rate-limit and zero-win are mutually exclusive

tcp-list_per-conn-pkt-rate-cfg

Specification	Value
Type	*object*

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-pkt-rate-action and per-conn-pkt-rate-action-list-name are mutually exclusive

per-conn-pkt-rate-action-list-name

Description Configure action-list to take for per-conn-pkt-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-pkt-rate-action-list-name and per-conn-pkt-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

tcp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: tcp-filter-action and tcp-filter-action-list-name are mutually exclusive

tcp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp-filter-action-list-name and tcp-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_max-rexmit-syn-per-flow-cfg

Specification	Value
Type	*object*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow

Type: number

Range: 1-6

max-rexmit-syn-per-flow-action

Description 'drop': Drop SYN packets for max-rexmit-syn-per-flow exceed (Default); 'blacklist-src': help Blacklist-src for max-rexmit-syn-per-flow exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

max-rexmit-syn-per-flow-action-list-name

Description Configure action-list to take for max-rexmit-syn-per-flow exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

tcp-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *tcp-list_src_rate-limit*

Type: Object

tcp-list_src_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *tcp-list_src_rate-limit_syn-rate-limit*

Type: Object

tcp-list_src_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

src-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'blacklist-src': Blacklist-src for syn-rate exceed; 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: src-syn-rate-action and src-syn-rate-action-list-name are mutually exclusive

src-syn-rate-action-list-name

Description Configure action-list to take for syn-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-syn-rate-action-list-name and src-syn-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-syn-rate-limit

Description

Type: number

Range: 1-16000000

tcp-list_progression-tracking

Specification	Value
Type	*object*

ignore-TLS-handshake

Description Ignore TLS handshake, support SSL-L4 port only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mitigation

Description: mitigation is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation*

profiling

Description: profiling is a **JSON Block**. Please see below for *tcp-list_progression-tracking_profiling*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/profiling*

progression-tracking-enabled

Description 'enable-check': Enable Progression Tracking Check;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_progression-tracking_mitigation

Specification	Value
Type	*object*

connection-tracking

Description: connection-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_connection-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/connection-tracking*

request-tracking

Description: request-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_request-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/request-tracking*

slow-attack

Description: slow-attack is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_slow-attack*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/slow-attack*

time-window-tracking

Description: time-window-tracking is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_time-window-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/time-window-tracking*

tcp-list_progression-tracking_mitigation_time-window-tracking

Specification	Value
Type	*object*

progression-tracking-win-enabled

Description 'enable-check': Enable Progression Tracking per Time Window;

Type: string

Supported Values: enable-check

Default: enable-check

progression-tracking-windows-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-windows-action and progression-tracking-windows-action-list-name are mutually exclusive

progression-tracking-windows-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-windows-action-list-name and progression-tracking-windows-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

tcp-list_progression-tracking_mitigation_slow-attack

Specification	Value
Type	*object*

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

slow-attack

Description 'enable-check': Enter Progression Tracking Tracking Slow Attack;

Type: string

Supported Values: enable-check

Default: enable-check

slow-attacker-identification

Description: slow-attacker-identification is a **JSON Block**. Please see below for *tcp-list_progression-tracking_mitigation_slow-attack_slow-attacker-identification*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/slow-attack/slow-attacker-identification*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_progression-tracking_mitigation_slow-attack_slow-attacker-identification

Specification	Value
Type	*object*

active-connection

Description Set the minimum tracking active connection to start identifying slow attacker, default value is 3

Type: number

Range: 1-65535

Default: 3

bad-connection

Description Set the maximum percentage of slow connection (per source), default value is 75

Type: number

Range: 1-100

Default: 75

enable-identification

Description Progression tracking will identify slow attacker and blacklist it based on the config value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_progression-tracking_mitigation_connection-tracking

Specification	Value
Type	*object*

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-2147483647

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-2147483647

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_progression-tracking_mitigation_request-tracking

Specification	Value
Type	*object*

first-request-max-time

Description Set the maximum idle time before the first request (in unit of 100ms)

Type: number

Range: 1-65535

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model (Default); 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

tcp-list_progression-tracking_profiling

Specification	Value
Type	*object*

profiling-connection-life-model

Description Enable auto-config progression tracking learning for connection model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-request-response-model

Description Enable auto-config progression tracking learning for request response model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-time-window-model

Description Enable auto-config progression tracking learning for time window model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list_known-resp-src-port-cfg

Specification	Value
Type	*object*

exclude-src-resp-port

Description Exclude src port equal to dst port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port

Description Take action if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port-action

Description 'drop': Drop packets from well-known src-port(Default); 'blacklist-src': Blacklist-src from well-known src-port; 'ignore': Ignore well-known src-port;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: known-resp-src-port-action and known-resp-src-port-action-list-name are mutually exclusive

known-resp-src-port-action-list-name

Description Configure action-list to take for well-known src-port

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: known-resp-src-port-action-list-name and known-resp-src-port-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-list_zero-win-cfg

Specification	Value
Type	*object*

zero-win

Description Take action if zero window pkts exceed configured threshold

Type: number

Range: 1-250

Mutual Exclusion: zero-win and per-conn-zero-win-rate-limit are mutually exclusive

zero-win-action

Description 'drop': Drop packets for zero-win exceed (Default); 'blacklist-src': help Blacklist-src for zero-win exceed; 'ignore': Ignore zero-win exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: zero-win-action and zero-win-action-list-name are mutually exclusive

zero-win-action-list-name

Description Configure action-list to take for zero window exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: zero-win-action-list-name and zero-win-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-list_per-conn-out-of-seq-rate-cfg

Specification	Value
Type	*object*

per-conn-out-of-seq-rate-action

Description 'drop': Drop packets for out-of-seq rate exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq rate exceed; 'ignore': help Ignore out-of-seq rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-out-of-seq-rate-action and per-conn-out-of-seq-rate-action-list-name are mutually exclusive

per-conn-out-of-seq-rate-action-list-name

Description Configure action-list to take for out-of-seq rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-out-of-seq-rate-action-list-name and per-conn-out-of-seq-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-out-of-seq-rate-limit

Description Take action if out-of-seq pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-out-of-seq-rate-limit and out-of-seq are mutually exclusive

tcp-list_out-of-seq-cfg

Specification	Value
Type	*object*

out-of-seq

Description Take action if out-of-seq pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: out-of-seq and per-conn-out-of-seq-rate-limit are mutually exclusive

out-of-seq-action

Description 'drop': Drop packets for out-of-seq exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq exceed; 'ignore': help Ignore out-of-seq exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: out-of-seq-action and out-of-seq-action-list-name are mutually exclusive

out-of-seq-action-list-name

Description Configure action-list to take for out-of-seq exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: out-of-seq-action-list-name and out-of-seq-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-list_small-win-cfg

Specification	Value
Type	*object*

small-window

Description Smallest allowed window size

Type: number

Range: 1-65535

small-window-action

Description 'drop': Drop packets for small-window exceed (Default); 'blacklist-src': help Blacklist-src for small-window exceed; 'ignore': Ignore small-window exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: small-window-action and small-window-action-list-name are mutually exclusive

small-window-action-list-name

Description Configure action-list to take for small window exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: small-window-action-list-name and small-window-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

small-window-threshold

Description Take action if small window pkts exceed configured threshold

Type: number

Range: 1-250

quic-list

Specification	Value
Type	*list*
Block object keys	

action-on-initial

Description: action-on-initial is a **JSON Block**. Please see below for *quic-list_action-on-initial*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}/action-on-initial*

create-conn-on-initial-only

Description Create connection on QUIC Initial Packets Only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fixed-bit-check-disable

Description Disable fixed-bit malform check

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-rate-cfg

Description: pkt-rate-cfg is a **JSON Block**. Please see below for *quic-list_pkt-rate-cfg*

Type: Object

quic-tmpl-name

Description DDOS QUIC Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

version-supported-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}/version-supported/{version-start}+{version-end}*

quic-list_version-supported-list

Specification	Value
Type	*list*
Block object keys	

malformed-check

Description: malformed-check is a **JSON Block**. Please see below for *quic-list_version-supported-list_malformed-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}/version-supported/{version-start}+{version-end}/malformed-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

version-action

Description 'drop': Drop packets; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: version-action and version-action-list-name are mutually exclusive

version-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: version-action-list-name and version-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

version-end

Description Version supported range end

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

version-start

Description Configure versions supported

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

quic-list_version-supported-list_malformed-check

Specification	Value
Type	*object*

malformed-check-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: malformed-check-action and malformed-check-action-list-name are mutually exclusive

malformed-check-action-list-name

Description Configure action-list to take. Overwrites version action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-check-action-list-name and malformed-check-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-enable

Description 'enable': Enable malformed check;

Type: string

Supported Values: enable

Default: enable

max-destination-cid-length

Description Set the maximum destination CID length

Type: number

Range: 0-255

Default: 255

max-source-cid-length

Description Set the maximum source CID length

Type: number

Range: 0-255

Default: 255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

quic-list_pkt-rate-cfg

Specification	Value
Type	*object*

per

Description 'aead-tag': AEAD Tag; 'dcid': Destination Connection ID;

Type: string

Supported Values: aead-tag, dcid

quic-pkt-rate

Description Limiting rate (Range: 5-16000000)

Type: number

Range: 5-16000000

quic-pkt-rate-limit

Description QUIC Packet Rate Limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

quic-list_action-on-initial

Specification	Value
Type	*object*

retry-token-authentication-dynamic

Description 'cid-hash': Dynamic retry token based on Destination and Source CID;

Type: string

Supported Values: cid-hash

Mutual Exclusion: retry-token-authentication-dynamic and retry-token-authentication-static are mutually exclusive

retry-token-authentication-static

Description Static retry token (Maximum of 4 bytes)

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

Mutual Exclusion: retry-token-authentication-static and retry-token-authentication-dynamic are mutually exclusive

retry-unauthenticated-initial-decrypt

Description Decrypt incoming initial packets for unauthenticated clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scid-length

Description Set Max SCID length for SCID generation

Type: number

Range: 8-20

Default: 20

unauth-short-hdr-action

Description 'drop': Drop short header packet;

Type: string

Supported Values: drop

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-l4-list

Specification	Value
Type	*list*
Block object keys	

allow-non-tls

Description Allow Non-TLS (SSLv3 and lower) traffic (Warning: security may be compromised)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-handshake

Description: auth-handshake is a **JSON Block**. Please see below for *ssl-l4-list_auth-handshake*

Type: Object

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Description: dst is a **JSON Block**. Please see below for *ssl-l4-list_dst*

Type: Object

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *ssl-l4-list_multi-pu-threshold-distribution*

Type: Object

renegotiation

Description: renegotiation is a **JSON Block**. Please see below for *ssl-l4-list_renegotiation*

Type: Object

src

Description: src is a **JSON Block**. Please see below for *ssl-l4-list_src*

Type: Object

ssl-handshake-policy

Description: ssl-handshake-policy is a **JSON Block**. Please see below for *ssl-l4-list_ssl-handshake-policy*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/ssl-l4/{ssl-l4-tmpl-name}/ssl-handshake-policy*

ssl-l4-tmpl-name

Description DDOS SSL-L4 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-traffic-check

Description: ssl-traffic-check is a **JSON Block**. Please see below for *ssl-l4-list_ssl-traffic-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/ssl-l4/{ssl-l4-tmpl-name}/ssl-traffic-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-l4-list_auth-handshake

Specification	Value
Type	*object*

auth-handshake-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: auth-handshake-fail-action and auth-handshake-fail-action-list-name are mutually exclusive

auth-handshake-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: auth-handshake-fail-action-list-name and auth-handshake-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

auth-handshake-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: auth-handshake-pass-action and auth-handshake-pass-action-list-name are mutually exclusive

auth-handshake-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: auth-handshake-pass-action-list-name and auth-handshake-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

auth-handshake-timeout

Description Connection timeout (default 5 seconds) and trials (default 5 times) (DST support only)

Type: number

Range: 1-31

Default: 5

auth-handshake-trials

Description Number of failed handshakes before entry marked black

Type: number

Range: 0-15

Default: 5

cert-cfg

Description: cert-cfg is a **JSON Block**. Please see below for *ssl-l4-list_auth-handshake_cert-cfg*

Type: Object

server-name-list

Type: List

ssl-l4-list_auth-handshake_cert-cfg

Specification	Value
Type	*object*

cert

Description SSL certificate

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key

Description SSL key

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

key-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4-list_auth-handshake_server-name-list

Specification	Value
Type	*list*
Block object keys	

server-cert

Description Server Certificate associated to SNI (Server Certificate Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

server-key

Description Server Private Key associated to SNI (Server Private Key Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-name

Description Server name indication in Client hello extension (Server name String)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *ssl-l4-list_src_rate-limit*

Type: Object

ssl-l4-list_src_rate-limit

Specification	Value
Type	*object*

request

Description: request is a **JSON Block**. Please see below for *ssl-l4-list_src_rate-limit_request*

Type: Object

ssl-l4-list_src_rate-limit_request

Specification	Value
Type	*object*

src-request-rate-limit

Description

Type: number

Range: 1-16000000

src-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, reset

Mutual Exclusion: src-request-rate-limit-action and src-request-rate-limit-action-list-name are mutually exclusive

src-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-request-rate-limit-action-list-name and src-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

ssl-l4-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *ssl-l4-list_dst_rate-limit*

Type: Object

ssl-l4-list_dst_rate-limit

Specification	Value
Type	*object*

request

Description: request is a **JSON Block**. Please see below for *ssl-l4-list_dst_rate-limit_request*

Type: Object

ssl-l4-list_dst_rate-limit_request

Specification	Value
Type	*object*

dst-request-rate-limit

Description

Type: number

Range: 1-16000000

dst-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, reset

Mutual Exclusion: dst-request-rate-limit-action and dst-request-rate-limit-action-list-name are mutually exclusive

dst-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-request-rate-limit-action-list-name and dst-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

ssl-l4-list_ssl-traffic-check

Specification	Value
Type	*object*

check-resumed-connection

Description Apply checks to SSL connections initialized by ACK packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-action

Description 'drop': Drop packets with bad ssl header; 'ignore': Forward packets with bad ssl header;

Type: string

Supported Values: drop, ignore

header-inspection

Description Inspect ssl header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-l4-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

ssl-l4-list_renegotiation

Specification	Value
Type	*object*

num-renegotiation

Description Number of renegotiation allowed

Type: number

Range: 0-7

ssl-l4-reneg-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: ssl-l4-reneg-action and ssl-l4-reneg-action-list-name are mutually exclusive

ssl-l4-reneg-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4-reneg-action-list-name and ssl-l4-reneg-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

ssl-l4-list_ssl-handshake-policy

Specification	Value
Type	*object*

action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist source IP;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: action and ssl-handshake-policy-action-list-name are mutually exclusive

cipher-suites-limit

Description Set cipher suites limit

Type: number

Range: 1-600

client-extensions-limit

Description Set client extensions limit

Type: number

Range: 1-600

clienthello-to-appdata-timeout

Description Set maximum timeout seconds from ClientHello to App-Data

Type: number

Range: 1-600

finished-to-appdata-timeout

Description Set maximum timeout seconds from Handshake finished to App-Data

Type: number

Range: 1-600

src-handshaking-conn-limit

Description Set handshaking connection limit

Type: number

Range: 1-16000000

ssl-handshake-policy-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-handshake-policy-action-list-name and action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/ip-proto/{name}/filter/{other-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

name

Description DDOS Ip-proto Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: other-filter-action and other-filter-action-list-name are mutually exclusive

other-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: other-filter-action-list-name and other-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

other-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

other-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

other-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-list

Specification	Value
Type	*list*
Block object keys	

allow-query-class

Description: allow-query-class is a **JSON Block**. Please see below for *dns-list_allow-query-class*

Type: Object

allow-record-type

Description: allow-record-type is a **JSON Block**. Please see below for *dns-list_allow-record-type*

Type: Object

dns-any-check

Description Drop DNS queries of Type ANY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-any-check-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Default: drop

Mutual Exclusion: dns-any-check-action and dns-any-check-action-list-name are mutually exclusive

dns-any-check-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-any-check-action-list-name and dns-any-check-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-udp-authentication

Description: dns-udp-authentication is a **JSON Block**. Please see below for *dns-list_dns-udp-authentication*

Type: Object

domain-group-name

Description Apply a domain-group to the DNS template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst

Description: dst is a **JSON Block**. Please see below for *dns-list_dst*

Type: Object

fqdn-label-count-cfg

Description: fqdn-label-count-cfg is a **JSON Block**. Please see below for *dns-list_fqdn-label-count-cfg*

Type: Object

fqdn-label-len-cfg

Type: List

malformed-query-check

Description: malformed-query-check is a **JSON Block**. Please see below for *dns-list_malformed-query-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *dns-list_multi-pu-threshold-distribution*

Type: Object

name

Description DDOS DNS Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

on-no-match

Description 'permit': permit; 'deny': deny (default);

Type: string

Supported Values: permit, deny

Default: deny

src

Description: src is a **JSON Block**. Please see below for *dns-list_src*

Type: Object

symtimeout-cfg

Description: symtimeout-cfg is a **JSON Block**. Please see below for *dns-list_symtimeout-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *dns-list_src_rate-limit*

Type: Object

dns-list_src_rate-limit

Specification	Value
Type	*object*

nxdomain

Description: nxdomain is a **JSON Block**. Please see below for *dns-list_src_rate-limit_nxdomain*

Type: Object

request

Description: request is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request*

Type: Object

dns-list_src_rate-limit_request

Specification	Value
Type	*object*

src-dns-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: src-dns-request-rate-limit-action and src-dns-request-rate-limit-action-list-name are mutually exclusive

src-dns-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-dns-request-rate-limit-action-list-name and src-dns-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type

Description: type is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request_type*

Type: Object

dns-list_src_rate-limit_request_type

Specification	Value
Type	*object*

A-cfg

Description: A-cfg is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request_type_A-cfg*

Type: Object

AAAA-cfg

Description: AAAA-cfg is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request_type_AAAA-cfg*

Type: Object

CNAME-cfg

Description: CNAME-cfg is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request_type_CNAME-cfg*

Type: Object

MX-cfg

Description: MX-cfg is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request_type_MX-cfg*

Type: Object

NS-cfg

Description: NS-cfg is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request_type_NS-cfg*

Type: Object

SRV-cfg

Description: SRV-cfg is a **JSON Block**. Please see below for *dns-list_src_rate-limit_request_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

dns-list_src_rate-limit_request_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

dns-list_src_rate-limit_request_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-cname-rate

Description

Type: number

Range: 1-16000000

dns-list_src_rate-limit_request_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

src-dns-request-type

Description Other type value

Type: number

Range: 1-65535

src-dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

dns-list_src_rate-limit_request_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-aaaa-rate

Description

Type: number

Range: 1-16000000

dns-list_src_rate-limit_request_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-a-rate

Description

Type: number

Range: 1-16000000

dns-list_src_rate-limit_request_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-mx-rate

Description

Type: number

Range: 1-16000000

dns-list_src_rate-limit_request_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-ns-rate

Description

Type: number

Range: 1-16000000

dns-list_src_rate-limit_nxdomain

Specification	Value
Type	*object*

dns-nxdomain-rate

Description Limiting rate

Type: number

Range: 1-16000000

dns-nxdomain-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: dns-nxdomain-rate-limit-action and dns-nxdomain-rate-limit-action-list-name are mutually exclusive

dns-nxdomain-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-nxdomain-rate-limit-action-list-name and dns-nxdomain-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-list_fqdn-label-count-cfg

Specification	Value
Type	*object*

fqdn-label-count-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Send reset to client;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: fqdn-label-count-action and fqdn-label-count-action-list-name are mutually exclusive

fqdn-label-count-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: fqdn-label-count-action-list-name and fqdn-label-count-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

label-count

Description Maximum number of FQDN labels per FQDN

Type: number

Range: 1-10

dns-list_malformed-query-check

Specification	Value
Type	*object*

dns-malformed-query-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: dns-malformed-query-action and dns-malformed-query-action-list-name are mutually exclusive

dns-malformed-query-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-malformed-query-action-list-name and dns-malformed-query-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

non-query-opcode-check

Description 'disable': When malform check is enabled, TPS always drops DNS query with non query opcode, this option disables this opcode check;

Type: string

Supported Values: disable

skip-multi-packet-check

Description Bypass DNS fragmented and TCP segmented Queries(Default: dropped)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

validation-type

Description 'basic-header-check': Basic header validation for DNS TCP/UDP queries; 'extended-header-check': Extended header/query validation for DNS TCP/UDP queries; 'disable': Disable Malform query validation for DNS TCP/UDP;

Type: string

Supported Values: basic-header-check, extended-header-check, disable

dns-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *dns-list_dst_rate-limit*

Type: Object

dns-list_dst_rate-limit

Specification	Value
Type	*object*

domain-group-rate-exceed-action

Description 'drop': Drop the query (default); 'tunnel-encap-packet': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: drop, tunnel-encap-packet

Default: drop

domain-group-rate-per-service

Description Enable per service domain rate checking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-template/encap*

fqdn

Description: fqdn is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_fqdn*

Type: Object

request

Description: request is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request*

Type: Object

dns-list_dst_rate-limit_request

Specification	Value
Type	*object*

dst-dns-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Mutual Exclusion: dst-dns-request-rate-limit-action and dst-dns-request-rate-limit-action-list-name are mutually exclusive

dst-dns-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-dns-request-rate-limit-action-list-name and dst-dns-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type

Description: type is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request_type*

Type: Object

dns-list_dst_rate-limit_request_type

Specification	Value
Type	*object*

A-cfg

Description: A-cfg is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request_type_A-cfg*

Type: Object

AAAA-cfg

Description: AAAA-cfg is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request_type_AAAA-cfg*

Type: Object

CNAME-cfg

Description: CNAME-cfg is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request_type_CNAME-cfg*

Type: Object

MX-cfg

Description: MX-cfg is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request_type_MX-cfg*

Type: Object

NS-cfg

Description: NS-cfg is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request_type_NS-cfg*

Type: Object

SRV-cfg

Description: SRV-cfg is a **JSON Block**. Please see below for *dns-list_dst_rate-limit_request_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

dns-list_dst_rate-limit_request_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

dns-list_dst_rate-limit_request_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cname-rate

Description

Type: number

Range: 1-16000000

dns-list_dst_rate-limit_request_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

dns-request-type

Description Other type value

Type: number

Range: 1-65535

dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

dns-list_dst_rate-limit_request_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-aaaa-rate

Description

Type: number

Range: 1-16000000

dns-list_dst_rate-limit_request_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-a-rate

Description

Type: number

Range: 1-16000000

dns-list_dst_rate-limit_request_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-mx-rate

Description

Type: number

Range: 1-16000000

dns-list_dst_rate-limit_request_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-ns-rate

Description

Type: number

Range: 1-16000000

dns-list_dst_rate-limit_fqdn

Specification	Value
Type	*object*

dns-fqdn-rate-cfg

Type: List

dns-fqdn-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Mutual Exclusion: dns-fqdn-rate-limit-action and dns-fqdn-rate-limit-action-list-name are mutually exclusive

dns-fqdn-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-fqdn-rate-limit-action-list-name and dns-fqdn-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-list_dst_rate-limit_fqdn_dns-fqdn-rate-cfg

Specification	Value
Type	*list*
Block object keys	

dns-fqdn-rate

Description Limiting rate (Range: 5-8000 for FQDN domain based rate limiting, 5-16000000 for FQDN label count based rate limiting)

Type: number

Range: 5-16000000

fqdn-rate-label-count

Description FQDN label count (Range: 1-8)

Type: number

Range: 1-8

fqdn-rate-suffix

Description Suffix count

Type: number

Range: 1-5

per

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'label-count': FQDN label count;

Type: string

Supported Values: domain-name, src-ip, label-count

per-domain-per-src-ip

Description Use both Domain Name and Source IP address for rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-list_allow-record-type

Specification	Value
Type	*object*

allow-a-type

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-aaaa-type

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-cname-type

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-mx-type

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-ns-type

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-record-type-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: allow-record-type-action and allow-record-type-action-list-name are mutually exclusive

allow-record-type-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: allow-record-type-action-list-name and allow-record-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

allow-srv-type

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-num-cfg

Type: List

dns-list_allow-record-type_record-num-cfg

Specification	Value
Type	*list*
Block object keys	

allow-num-type

Description Other record type value

Type: number

Range: 1-65535

dns-list_allow-query-class

Specification	Value
Type	*object*

allow-any-query-class

Description ANY query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-chaos-query-class

Description CHAOS query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-csnet-query-class

Description CSNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-hesiod-query-class

Description HESIOD query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-internet-query-class

Description INTERNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-none-query-class

Description NONE query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-query-class-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: allow-query-class-action and allow-query-class-action-list-name are mutually exclusive

allow-query-class-action-list-name

Description Configure action-list to take when query class doesn't match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: allow-query-class-action-list-name and allow-query-class-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-list_dns-udp-authentication

Specification	Value
Type	*object*

dns-udp-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: dns-udp-auth-fail-action and dns-udp-auth-fail-action-list-name are mutually exclusive

dns-udp-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication. (Applicable to dns-udp retry only)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-udp-auth-fail-action-list-name and dns-udp-auth-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-udp-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: dns-udp-auth-pass-action and dns-udp-auth-pass-action-list-name are mutually exclusive

dns-udp-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-udp-auth-pass-action-list-name and dns-udp-auth-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

force-tcp-cfg

Description: force-tcp-cfg is a **JSON Block**. Please see below for *dns-list_dns-udp-authentication_force-tcp-cfg*

Type: Object

min-delay

Description Optional minimum delay between DNS retransmits for authentication to pass, unit is specified by min-delay-interval

Type: number

Range: 1-80

Mutual Exclusion: min-delay and force-tcp are mutually exclusive

min-delay-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

udp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

Mutual Exclusion: udp-timeout and force-tcp are mutually exclusive

dns-list_dns-udp-authentication_force-tcp-cfg

Specification	Value
Type	*object*

force-tcp

Description Force DNS request over TCP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: force-tcp, udp-timeout, and min-delay are mutually exclusive

force-tcp-ignore-client-source-port

Description Allow client to retransmit DNS request using different source port during udp-auth (supported in asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-tcp-min-delay

Description Optional minimum delay (seconds) between DNS retransmits for authentication to pass

Type: number

Range: 1-15

force-tcp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

dns-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

dns-list_fqdn-label-len-cfg

Specification	Value
Type	*list*
Block object keys	

fqdn-label-length-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: fqdn-label-length-action and fqdn-label-length-action-list-name are mutually exclusive

fqdn-label-length-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: fqdn-label-length-action-list-name and fqdn-label-length-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

fqdn-label-suffix

Description Number of suffixes

Type: number

Range: 1-5

label-length

Description Maximum length of FQDN label

Type: number

Range: 1-63

dns-list_symtimeout-cfg

Specification	Value
Type	*object*

sym-timeout

Description Timeout for DNS Symmetric session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sym-timeout-value

Description Session timeout value in seconds

Type: number

Range: 1-31

icmp-v4-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}/filter/{icmp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

icmp-tmpl-name

Description DDOS ICMPv4 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *icmp-v4-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v4-list_type-list

Specification	Value
Type	*list*
Block object keys	

dst-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

dst-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-other-rate-action and dst-code-other-rate-action-list-name are mutually exclusive

dst-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-other-rate-action-list-name and dst-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-type-action

Description 'drop': Reject this ICMP type; 'blacklist-src': Blacklist-src this ICMP type; 'ignore': Ignore this ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-action and icmp-type-action-list-name are mutually exclusive

icmp-type-action-list-name

Description Configure action-list to take for this ICMP type

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-action-list-name and icmp-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

src-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-other-rate-action and src-code-other-rate-action-list-name are mutually exclusive

src-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-other-rate-action-list-name and src-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v4-dst-code-cfg

Type: List

v4-dst-rate-cfg

Description: v4-dst-rate-cfg is a **JSON Block**. Please see below for *icmp-v4-list_type-list_v4-dst-rate-cfg*

Type: Object

v4-src-code-cfg

Type: List

v4-src-rate-cfg

Description: v4-src-rate-cfg is a **JSON Block**. Please see below for *icmp-v4-list_type-list_v4-src-rate-cfg*

Type: Object

icmp-v4-list_type-list_v4-src-rate-cfg

Specification	Value
Type	*object*

src-type-rate

Description Specify the whole src rate for this type

Type: number

Range: 1-16000000

src-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-rate-action and src-type-rate-action-list-name are mutually exclusive

src-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-rate-action-list-name and src-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v4-list_type-list_v4-dst-code-cfg

Specification	Value
Type	*list*
Block object keys	

dst-code-number

Description Specify the ICMP code for this dst rate

Type: number

Range: 0-255

dst-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

dst-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-rate-action and dst-code-rate-action-list-name are mutually exclusive

dst-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-rate-action-list-name and dst-code-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v4-list_type-list_v4-src-code-cfg

Specification	Value
Type	*list*
Block object keys	

src-code-number

Description Specify the ICMP code for this src rate

Type: number

Range: 0-255

src-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

src-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-rate-action and src-code-rate-action-list-name are mutually exclusive

src-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-rate-action-list-name and src-code-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v4-list_type-list_v4-dst-rate-cfg

Specification	Value
Type	*object*

dst-type-rate

Description Specify the whole dst rate for this type

Type: number

Range: 1-16000000

dst-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-rate-action and dst-type-rate-action-list-name are mutually exclusive

dst-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-rate-action-list-name and dst-type-rate-action are mutually exclusive

icmp-v4-list_type-other

Specification	Value
Type	*object*

dst

Description: dst is a **JSON Block**. Please see below for *icmp-v4-list_type-other_dst*

Type: Object

icmp-type-other-action

Description 'drop': Reject wildcard ICMP type; 'blacklist-src': Blacklist-src wildcard ICMP type; 'ignore': Ignore wildcard ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-other-action and icmp-type-other-action-list-name are mutually exclusive

icmp-type-other-action-list-name

Description Configure action-list to take for wildcard ICMP match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-other-action-list-name and icmp-type-other-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src

Description: src is a **JSON Block**. Please see below for *icmp-v4-list_type-other_src*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v4-list_type-other_src

Specification	Value
Type	*object*

src-type-other-rate

Description Specify the whole src rate for wildcard ICMP type

Type: number

Range: 1-16000000

src-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-other-rate-action and src-type-other-rate-action-list-name are mutually exclusive

src-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-other-rate-action-list-name and src-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v4-list_type-other_dst

Specification	Value
Type	*object*

dst-type-other-rate

Description Specify the whole dst rate for wildcard ICMP type

Type: number

Range: 1-16000000

dst-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-other-rate-action and dst-type-other-rate-action-list-name are mutually exclusive

dst-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-other-rate-action-list-name and dst-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v4-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description filter using Berkeley packet filter syntax

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

icmp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, blacklist-src

Default: drop

Mutual Exclusion: icmp-filter-action and icmp-filter-action-list-name are mutually exclusive

icmp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-filter-action-list-name and icmp-filter-action are mutually exclusive

icmp-filter-inverse-match

Description Inverse the result of matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

icmp-filter-seq

Description sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

encap-list

Specification	Value
Type	*list*
Block object keys	

encap-tmpl-name

Description DDOS Tunnel Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

preserve-source-ip

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *encap-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

encap-list_tunnel-encap

Specification	Value
Type	*object*

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *encap-list_tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *encap-list_tunnel-encap_ip-cfg*

Type: Object

encap-list_tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *encap-list_tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-list_tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

encap-list_tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *encap-list_tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-list_tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

udp-list

Specification	Value
Type	*list*
Block object keys	

age

Description Configure session age(in minutes) for UDP sessions

Type: number

Range: 1-63

Default: 2

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

known-resp-src-port-cfg

Description: known-resp-src-port-cfg is a **JSON Block**. Please see below for *udp-list_known-resp-src-port-cfg*

Type: Object

max-payload-size-cfg

Description: max-payload-size-cfg is a **JSON Block**. Please see below for *udp-list_max-payload-size-cfg*

Type: Object

min-payload-size-cfg

Description: min-payload-size-cfg is a **JSON Block**. Please see below for *udp-list_min-payload-size-cfg*

Type: Object

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Description: ntp-monlist-cfg is a **JSON Block**. Please see below for *udp-list_ntp-monlist-cfg*

Type: Object

per-conn-pkt-rate-cfg

Description: per-conn-pkt-rate-cfg is a **JSON Block**. Please see below for *udp-list_per-conn-pkt-rate-cfg*

Type: Object

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

previous-salt-timeout

Description Token-Authentication previous salt-prefix timeout in minutes, default is 1 min

Type: number

Range: 1-10080

Default: 1

public-ipv4-addr

Description IP address

Type: string

Format: ipv4-address

public-ipv6-addr

Description IPV6 address

Type: string

Format: ipv6-address

spoof-detect-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src for spoof-detect fail;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: spoof-detect-fail-action and spoof-detect-fail-action-list-name are mutually exclusive

spoof-detect-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: spoof-detect-fail-action-list-name and spoof-detect-fail-action are mutually exclusive

spoof-detect-min-delay

Description Optional minimum delay between UDP retransmits for authentication to pass, unit is specified by min-delay-interval

Type: number

Range: 1-80

spoof-detect-min-delay-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

spoof-detect-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: spoof-detect-pass-action and spoof-detect-pass-action-list-name are mutually exclusive

spoof-detect-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: spoof-detect-pass-action-list-name and spoof-detect-pass-action are mutually exclusive

spoof-detect-retry-timeout

Description Timeout in seconds

Type: number

Range: 1-31

token-authentication

Description Enable Token Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-formula

Description 'md5_Salt-SrcIp-SrcPort-DstIp-DstPort': md5 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'md5_Salt-DstIp-DstPort': md5 of Salt-DstIp-DstPort; 'md5_Salt-SrcIp-DstIp': md5 of Salt-SrcIp-DstIp; 'md5_Salt-SrcPort-DstPort': md5 of Salt-SrcPort-DstPort; 'md5_Salt-UintDstIp-DstPort': Using the uint value of IP for md5 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-SrcPort-DstIp-DstPort': sha1 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'sha1_Salt-DstIp-DstPort': sha1 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-DstIp': sha1 of Salt-SrcIp-DstIp; 'sha1_Salt-SrcPort-DstPort': sha1 of Salt-SrcPort-DstPort; 'sha1_Salt-UintDstIp-DstPort': Using the uint value of IP for sha1 of Salt-DstIp-DstPort;

Type: string

Supported Values: md5_Salt-SrcIp-SrcPort-DstIp-DstPort, md5_Salt-DstIp-DstPort, md5_Salt-SrcIp-DstIp, md5_Salt-SrcPort-DstPort, md5_Salt-UintDstIp-DstPort, sha1_Salt-SrcIp-SrcPort-DstIp-DstPort, sha1_Salt-DstIp-DstPort, sha1_Salt-SrcIp-DstIp, sha1_Salt-SrcPort-DstPort, sha1_Salt-UintDstIp-DstPort

token-authentication-hw-assist-disable

Description token-authentication disable hardware assistance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-public-address

Description The server public IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix

Description token-authentication salt-prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix-curr

Description

Type: number

Range: 1-4294967295

token-authentication-salt-prefix-prev

Description

Type: number

Range: 1-4294967295

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

udp-list_ntp-monlist-cfg

Specification	Value
Type	*object*

ntp-monlist

Description Take action for ntp monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntp-monlist-action

Description 'drop': Drop packets for ntp-monlist (Default); 'blacklist-src': Blacklist-src for ntp-monlist; 'ignore': Ignore ntp-monlist;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: ntp-monlist-action and ntp-monlist-action-list-name are mutually exclusive

ntp-monlist-action-list-name

Description Configure action-list to take for ntp-monlist

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ntp-monlist-action-list-name and ntp-monlist-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

udp-list_known-resp-src-port-cfg

Specification	Value
Type	*object*

exclude-src-resp-port

Description Exclude src port equal to dst port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port

Description Take action if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port-action

Description 'drop': Drop packets from well-known src-port(Default); 'blacklist-src': Blacklist-src from well-known src-port; 'ignore': Ignore well-known src-port;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: known-resp-src-port-action and known-resp-src-port-action-list-name are mutually exclusive

known-resp-src-port-action-list-name

Description Configure action-list to take for well-known src-port

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: known-resp-src-port-action-list-name and known-resp-src-port-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

udp-list_per-conn-pkt-rate-cfg

Specification	Value
Type	*object*

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-pkt-rate-action and per-conn-pkt-rate-action-list-name are mutually exclusive

per-conn-pkt-rate-action-list-name

Description Configure action-list to take for per-conn-pkt-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-pkt-rate-action-list-name and per-conn-pkt-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

udp-list_min-payload-size-cfg

Specification	Value
Type	*object*

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size-action

Description 'drop': Drop packets for min-payload-size (Default); 'blacklist-src': Blacklist-src for min-payload-size; 'ignore': Do nothing for min-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: min-payload-size-action and min-payload-size-action-list-name are mutually exclusive

min-payload-size-action-list-name

Description Configure action-list to take for min-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: min-payload-size-action-list-name and min-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

udp-list_max-payload-size-cfg

Specification	Value
Type	*object*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

max-payload-size-action

Description 'drop': Drop packets for max-payload-size exceed (Default); 'blacklist-src': Blacklist-src for max-payload-size exceed; 'ignore': Do nothing for max-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: max-payload-size-action and max-payload-size-action-list-name are mutually exclusive

max-payload-size-action-list-name

Description Configure action-list to take for max-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: max-payload-size-action-list-name and max-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-list

Specification	Value
Type	*list*
Block object keys	

challenge

Description: challenge is a **JSON Block**. Please see below for *http-list_challenge*

Type: Object

client-source-ip

Description: client-source-ip is a **JSON Block**. Please see below for *http-list_client-source-ip*

Type: Object

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disallow-connect-method

Description Do not allow HTTP Connect method (asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Description: dst is a **JSON Block**. Please see below for *http-list_dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/http/{http-tmpl-name}/filter/{http-filter-name}*

http-tmpl-name

Description DDOS HTTP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

idle-timeout

Description: idle-timeout is a **JSON Block**. Please see below for *http-list_idle-timeout*

Type: Object

malformed-http

Description: malformed-http is a **JSON Block**. Please see below for *http-list_malformed-http*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/http/{http-tmpl-name}/malformed-http*

mss-timeout

Description: mss-timeout is a **JSON Block**. Please see below for *http-list_mss-timeout*

Type: Object

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *http-list_multi-pu-threshold-distribution*

Type: Object

non-http-bypass

Description Bypass non-http traffic instead of dropping

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-queue-size

Description Set the number of packets for the out-of-order HTTP queue (asym mode only)

Type: number

Range: 0-15

Default: 3

out-of-order-queue-timeout

Description Set the timeout value in seconds for out-of-order queue in HTTP (asym mode only)

Type: number

Range: 0-15

Default: 3

request-header

Description: request-header is a **JSON Block**. Please see below for *http-list_request-header*

Type: Object

slow-read

Description: slow-read is a **JSON Block**. Please see below for *http-list_slow-read*

Type: Object

src

Description: src is a **JSON Block**. Please see below for *http-list_src*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-list_client-source-ip

Specification	Value
Type	*object*

client-source-ip

Description Mitigate on src ip specified by http header for example X-Forwarded-For header. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-header-name

Description Set the http header name to parse for client ip. Default is X-Forwarded-For

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: X-Forwarded-For

http-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *http-list_dst_rate-limit*

http-request

Description: http-request is a **JSON Block**. Please see below for *http-list_dst_rate-limit_http-request*

Type: Object

response-size

Description: response-size is a **JSON Block**. Please see below for *http-list_dst_rate-limit_response-size*

Type: Object

http-list_dst_rate-limit_response-size

Specification	Value
Type	*object*

between-cfg

Type: List

greater-cfg

Type: List

less-cfg

Type: List

response-size-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: response-size-action and response-size-action-list-name are mutually exclusive

response-size-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: response-size-action-list-name and response-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-list_dst_rate-limit_response-size_between-cfg

Specification	Value
Type	*list*
Block object keys	

obj-between-rate

Description Response rate limit

Type: number

Range: 1-16000000

obj-between1

Description Response size configuration

Type: number

Range: 1-16000000

obj-between2

Description Response size configuration

Type: number

Range: 1-16000000

http-list_dst_rate-limit_response-size_greater-cfg

Specification	Value
Type	*list*
Block object keys	

obj-greater

Description Response size configuration

Type: number

Range: 1-16000000

obj-greater-rate

Description Response rate limit

Type: number

Range: 1-16000000

http-list_dst_rate-limit_response-size_less-cfg

Specification	Value
Type	*list*
Block object keys	

obj-less

Description Response size configuration

Type: number

Range: 1-16000000

obj-less-rate

Description Response rate limit

Type: number

Range: 1-16000000

http-list_dst_rate-limit_http-post

Specification	Value
Type	*object*

dst-post-rate-limit

Description

Type: number

Range: 1-16000000

dst-post-rate-limit-action

Description 'drop': Drop packets(Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Default: drop

Mutual Exclusion: dst-post-rate-limit-action and dst-post-rate-limit-action-list-name are mutually exclusive

dst-post-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Range: 1-16000000

src-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Default: drop

Mutual Exclusion: src-request-rate-limit-action and src-request-rate-limit-action-list-name are mutually exclusive

src-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-request-rate-limit-action-list-name and src-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-list_challenge

Specification	Value
Type	*object*

challenge-cookie-name

Description Set the cookie name used to send back to client. Default is sto-idd

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: sto-idd

challenge-fail-action

Description 'blacklist-src': Blacklist-src; 'reset': Reset client connection(Default);

Type: string

Supported Values: blacklist-src, reset

Default: reset

Mutual Exclusion: challenge-fail-action and challenge-fail-action-list-name are mutually exclusive

challenge-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: challenge-fail-action-list-name and challenge-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

challenge-interval

Description Specify the challenge interval. Default is 8 seconds

Type: number

Range: 1-31

Default: 8

challenge-keep-cookie

Description Keep the challenge cookie from client and forward to backend. Default is do not keep

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-pass-action

Description 'authenticate-src': Authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: challenge-pass-action and challenge-pass-action-list-name are mutually exclusive

challenge-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: challenge-pass-action-list-name and challenge-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-list_idle-timeout

Specification	Value
Type	*object*

idle-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: idle-timeout-action and idle-timeout-action-list-name are mutually exclusive

idle-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: idle-timeout-action-list-name and idle-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

idle-timeout-value

Description Set the the idle timeout value in seconds for HTTP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-list_slow-read

Specification	Value
Type	*object*

min-window-count

Description Number of packets

Type: number

Range: 1-31

min-window-size

Description minimum window size

Type: number

Range: 1-65535

slow-read-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'ignore': Take no action; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, ignore, reset

Mutual Exclusion: slow-read-action and slow-read-action-list-name are mutually exclusive

slow-read-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: slow-read-action-list-name and slow-read-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

http-list_filter-list

Specification	Value
Type	*list*
Block object keys	

dst

Description: dst is a **JSON Block**. Please see below for *http-list_filter-list_dst*

Type: Object

http-agent-cfg

Description: http-agent-cfg is a **JSON Block**. Please see below for *http-list_filter-list_http-agent-cfg*

Type: Object

http-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src, reset

Mutual Exclusion: http-filter-action and http-filter-action-list-name are mutually exclusive

http-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http-filter-action-list-name and http-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-filter-seq

Description Sequence number

Type: number

Range: 1-200

http-header-cfg

Description: http-header-cfg is a **JSON Block**. Please see below for *http-list_filter-list_http-header-cfg*

Type: Object

http-referer-cfg

Description: http-referer-cfg is a **JSON Block**. Please see below for *http-list_filter-list_http-referer-cfg*

Type: Object

http-uri-cfg

Description: http-uri-cfg is a **JSON Block**. Please see below for *http-list_filter-list_http-uri-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-list_filter-list_http-uri-cfg

Specification	Value
Type	*object*

uri-contains-cfg

Type: List

uri-ends-cfg

Type: List

uri-equal-cfg

Type: List

uri-starts-cfg

Type: List

http-list_filter-list_http-uri-cfg_uri-equal-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-uri-equals

Description

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

http-list_filter-list_http-uri-cfg_uri-starts-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-uri-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

http-list_filter-list_http-uri-cfg_uri-ends-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-uri-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

http-list_filter-list_http-uri-cfg_uri-contains-cfg

Specification	Value
Type	*list*
Block object keys

Description

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

http-list_filter-list_dst

Specification	Value
Type	*object*

http-filter-rate-limit

Description Set rate limit

Type: number

Range: 1-16000000

http-list_filter-list_http-agent-cfg

Specification	Value
Type	*object*

agent-contains-cfg

Type: List

agent-ends-cfg

Type: List

agent-equals-cfg

Type: List

agent-starts-cfg

Type: List

http-list_filter-list_http-agent-cfg_agent-contains-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-agent-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-list_http-agent-cfg_agent-ends-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-agent-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-list_http-agent-cfg_agent-equals-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-agent-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-list_http-agent-cfg_agent-starts-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-agent-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-list_http-header-cfg

Specification	Value
Type	*object*

http-filter-header-inverse-match

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

http-list_filter-list_http-referer-cfg

Specification	Value
Type	*object*

referer-contains-cfg

Type: List

referer-ends-cfg

Type: List

referer-equals-cfg

Type: List

referer-starts-cfg

Type: List

http-list_filter-list_http-referer-cfg_referer-equals-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-referer-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-list_http-referer-cfg_referer-starts-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-referer-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-list_http-referer-cfg_referer-contains-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-referer-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_filter-list_http-referer-cfg_referer-ends-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-referer-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-list_mss-timeout

Specification	Value
Type	*object*

mss-percent

Description Configure percentage of mss such that if a packet size is below the mss times mss-percent, packet is considered bad.

Type: number

Range: 1-100

mss-timeout-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: mss-timeout-action and mss-timeout-action-list-name are mutually exclusive

mss-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: mss-timeout-action-list-name and mss-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

number-packets

Description Specify percentage of mss. Default is 0, mss-timeout is not enabled.

Type: number

Range: 1-31

http-list_malformed-http

Specification	Value
Type	*object*

malformed-http

Description 'check': Configure malformed HTTP parameters;

Type: string

Supported Values: check

Default: check

malformed-http-action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: malformed-http-action and malformed-http-action-list-name are mutually exclusive

malformed-http-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-http-action-list-name and malformed-http-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-http-bad-chunk-mon-enabled

Description Enabling bad chunk monitoring. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-max-content-length

Description Set the maxinum content-length header. Default value is 4294967295 bytes

Type: number

Range: 1-4294967295

Default: 4294967295

malformed-http-max-header-name-size

Description Set the maxinum header name length. Default value is 64.

Type: number

Range: 1-64

Default: 64

malformed-http-max-line-size

Description Set the maximum line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

malformed-http-max-num-headers

Description Set the maximum number of headers. Default value is 90

Type: number

Range: 1-90

Default: 90

malformed-http-max-req-line-size

Description Set the maximum request line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-list_request-header

Specification	Value
Type	*object*

header-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Default: drop

Mutual Exclusion: header-timeout-action and header-timeout-action-list-name are mutually exclusive

header-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: header-timeout-action-list-name and header-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

timeout

Description

Type: number

Range: 1-63

sip-list

Specification	Value
Type	*list*
Block object keys	

dst

Description: dst is a **JSON Block**. Please see below for *sip-list_dst*

Type: Object

filter-header-list

Type: List

Supported Values: true, false, 1, 0

Default: 0

dst-sip-notify-rate

Description

Type: number

Range: 1-16000000

sip-list_idle-timeout

Specification	Value
Type	*object*

idle-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset (sip-tcp) client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: idle-timeout-action and idle-timeout-action-list-name are mutually exclusive

idle-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: idle-timeout-action-list-name and idle-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

idle-timeout-value

Description Set the the idle timeout value for SIP-TCP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

sip-list_malformed-sip

Specification	Value
Type	*object*

malformed-sip-action

Description 'drop': Drop packets (Default); 'reset': Reset (sip-tcp) client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: malformed-sip-action and malformed-sip-action-list-name are mutually exclusive

malformed-sip-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-sip-action-list-name and malformed-sip-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-sip-call-id-max-length

Description Set the maximum call-id length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-check

Description 'enable-check': Enable malformed SIP parameters;

Type: string

Supported Values: enable-check

malformed-sip-max-header-name-length

Description Set the maximum header name length. Default value is 63

Type: number

Range: 1-63

Default: 63

malformed-sip-max-header-value-length

Description Set the maximum header value length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-line-size

Description Set the maximum line size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-uri-length

Description Set the maximum uri size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-sdp-max-length

Description Set the maxinum SDP content length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sip-list_filter-header-list

Specification	Value
Type	*list*
Block object keys	

sip-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src; 'reset': Reset client connection(for sip-tcp);

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src, reset

Mutual Exclusion: sip-filter-action and sip-filter-action-list-name are mutually exclusive

sip-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip-filter-action-list-name and sip-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

sip-filter-header-seq

Description Sequence number

Type: number

Range: 1-200

sip-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip-header-cfg

Description: sip-header-cfg is a **JSON Block**. Please see below for *sip-list_filter-header-list_sip-header-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sip-list_filter-header-list_sip-header-cfg

Specification	Value
Type	*object*

sip-filter-header-inverse-match

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

icmp-v6-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}/filter/{icmp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

icmp-tmpl-name

Description DDOS ICMPv6 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *icmp-v6-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v6-list_type-list

Specification	Value
Type	*list*
Block object keys	

dst-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

dst-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-other-rate-action and dst-code-other-rate-action-list-name are mutually exclusive

dst-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-other-rate-action-list-name and dst-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-type-action

Description 'drop': Reject this ICMP type; 'blacklist-src': Blacklist-src this ICMP type; 'ignore': Ignore this ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-action and icmp-type-action-list-name are mutually exclusive

icmp-type-action-list-name

Description Configure action-list to take for this ICMP type

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-action-list-name and icmp-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

src-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-other-rate-action and src-code-other-rate-action-list-name are mutually exclusive

src-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-other-rate-action-list-name and src-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v6-dst-code-cfg

Type: List

v6-dst-rate-cfg

Description: v6-dst-rate-cfg is a **JSON Block**. Please see below for *icmp-v6-list_type-list_v6-dst-rate-cfg*

Type: Object

v6-src-code-cfg

Type: List

v6-src-rate-cfg

Description: v6-src-rate-cfg is a **JSON Block**. Please see below for *icmp-v6-list_type-list_v6-src-rate-cfg*

Type: Object

icmp-v6-list_type-list_v6-dst-rate-cfg

Specification	Value
Type	*object*

dst-type-rate

Description Specify the whole dst rate for this type

Type: number

Range: 1-16000000

dst-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-rate-action and dst-type-rate-action-list-name are mutually exclusive

dst-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-rate-action-list-name and dst-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v6-list_type-list_v6-src-rate-cfg

Specification	Value
Type	*object*

src-type-rate

Description Specify the whole src rate for this type

Type: number

Range: 1-16000000

src-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-rate-action and src-type-rate-action-list-name are mutually exclusive

src-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-rate-action-list-name and src-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v6-list_type-list_v6-src-code-cfg

Specification	Value
Type	*list*
Block object keys	

src-code-number

Description Specify the ICMP code for this src rate

Type: number

Range: 0-255

src-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

src-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-rate-action and src-code-rate-action-list-name are mutually exclusive

src-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-rate-action-list-name and src-code-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v6-list_type-list_v6-dst-code-cfg

Specification	Value
Type	*list*
Block object keys	

dst-code-number

Description Specify the ICMP code for this dst rate

Type: number

Range: 0-255

dst-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

dst-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-rate-action and dst-code-rate-action-list-name are mutually exclusive

dst-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-rate-action-list-name and dst-code-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v6-list_type-other

Specification	Value
Type	*object*

dst

Description: dst is a **JSON Block**. Please see below for *icmp-v6-list_type-other_dst*

Type: Object

icmp-type-other-action

Description 'drop': Reject wildcard ICMP type; 'blacklist-src': Blacklist-src wildcard ICMP type; 'ignore': Ignore wildcard ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-other-action and icmp-type-other-action-list-name are mutually exclusive

icmp-type-other-action-list-name

Description Configure action-list to take for wildcard ICMP match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-other-action-list-name and icmp-type-other-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src

Description: src is a **JSON Block**. Please see below for *icmp-v6-list_type-other_src*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-v6-list_type-other_src

Specification	Value
Type	*object*

src-type-other-rate

Description Specify the whole src rate for wildcard ICMP type

Type: number

Range: 1-16000000

src-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-other-rate-action and src-type-other-rate-action-list-name are mutually exclusive

src-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-other-rate-action-list-name and src-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v6-list_type-other_dst

Specification	Value
Type	*object*

dst-type-other-rate

Description Specify the whole dst rate for wildcard ICMP type

Type: number

Range: 1-16000000

dst-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-other-rate-action and dst-type-other-rate-action-list-name are mutually exclusive

dst-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-other-rate-action-list-name and dst-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-v6-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description filter using Berkeley packet filter syntax

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

icmp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, blacklist-src

Default: drop

Mutual Exclusion: icmp-filter-action and icmp-filter-action-list-name are mutually exclusive

icmp-filter-action-list-name

Description list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-filter-action-list-name and icmp-filter-action are mutually exclusive

icmp-filter-inverse-match

Description Inverse the result of matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

icmp-filter-seq

Description sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns attributes

allow-query-class

Description: allow-query-class is a **JSON Block**. Please see below for *allow-query-class*

Type: Object

allow-record-type

Description: allow-record-type is a **JSON Block**. Please see below for *allow-record-type*

Type: Object

dns-any-check

Description Drop DNS queries of Type ANY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-any-check-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Default: drop

Mutual Exclusion: dns-any-check-action and dns-any-check-action-list-name are mutually exclusive

dns-any-check-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-any-check-action-list-name and dns-any-check-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-udp-authentication

Description: dns-udp-authentication is a **JSON Block**. Please see below for *dns-udp-authentication*

Type: Object

domain-group-name

Description Apply a domain-group to the DNS template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst

Description: dst is a **JSON Block**. Please see below for *dst*

Type: Object

fqdn-label-count-cfg

Description: fqdn-label-count-cfg is a **JSON Block**. Please see below for *fqdn-label-count-cfg*

Type: Object

fqdn-label-len-cfg

Type: List

malformed-query-check

Description: malformed-query-check is a **JSON Block**. Please see below for *malformed-query-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *multi-pu-threshold-distribution*

Type: Object

name

Description DDOS DNS Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

on-no-match

Description 'permit': permit; 'deny': deny (default);

Type: string

Supported Values: permit, deny

Default: deny

src

Description: src is a **JSON Block**. Please see below for *src*

Type: Object

symtimeout-cfg

Description: symtimeout-cfg is a **JSON Block**. Please see below for *symtimeout-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *src_rate-limit*

Type: Object

src_rate-limit

Specification	Value
Type	*object*

nxdomain

Description: nxdomain is a **JSON Block**. Please see below for *src_rate-limit_nxdomain*

Type: Object

request

Description: request is a **JSON Block**. Please see below for *src_rate-limit_request*

Type: Object

src_rate-limit_request

Specification	Value
Type	*object*

src-dns-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: src-dns-request-rate-limit-action and src-dns-request-rate-limit-action-list-name are mutually exclusive

src-dns-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-dns-request-rate-limit-action-list-name and src-dns-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type

Description: type is a **JSON Block**. Please see below for *src_rate-limit_request_type*

Type: Object

src_rate-limit_request_type

Specification	Value
Type	*object*

A-cfg

Description: A-cfg is a **JSON Block**. Please see below for *src_rate-limit_request_type_A-cfg*

Type: Object

AAAA-cfg

Description: AAAA-cfg is a **JSON Block**. Please see below for *src_rate-limit_request_type_AAAA-cfg*

Type: Object

CNAME-cfg

Description: CNAME-cfg is a **JSON Block**. Please see below for *src_rate-limit_request_type_CNAME-cfg*

Type: Object

MX-cfg

Description: MX-cfg is a **JSON Block**. Please see below for *src_rate-limit_request_type_MX-cfg*

Type: Object

NS-cfg

Description: NS-cfg is a **JSON Block**. Please see below for *src_rate-limit_request_type_NS-cfg*

Type: Object

SRV-cfg

Description: SRV-cfg is a **JSON Block**. Please see below for *src_rate-limit_request_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

src_rate-limit_request_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

src_rate-limit_request_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-cname-rate

Description

Type: number

Range: 1-16000000

src_rate-limit_request_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

src-dns-request-type

Description Other type value

Type: number

Range: 1-65535

src-dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

src_rate-limit_request_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-aaaa-rate

Description

Type: number

Range: 1-16000000

src_rate-limit_request_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-a-rate

Description

Type: number

Range: 1-16000000

src_rate-limit_request_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-mx-rate

Description

Type: number

Range: 1-16000000

src_rate-limit_request_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-ns-rate

Description

Type: number

Range: 1-16000000

src_rate-limit_nxdomain

Specification	Value
Type	*object*

dns-nxdomain-rate

Description Limiting rate

Type: number

Range: 1-16000000

dns-nxdomain-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: dns-nxdomain-rate-limit-action and dns-nxdomain-rate-limit-action-list-name are mutually exclusive

dns-nxdomain-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-nxdomain-rate-limit-action-list-name and dns-nxdomain-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

fqdn-label-count-cfg

Specification	Value
Type	*object*

fqdn-label-count-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Send reset to client;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: fqdn-label-count-action and fqdn-label-count-action-list-name are mutually exclusive

fqdn-label-count-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: fqdn-label-count-action-list-name and fqdn-label-count-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

label-count

Description Maximum number of FQDN labels per FQDN

Type: number

Range: 1-10

malformed-query-check

Specification	Value
Type	*object*

dns-malformed-query-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: dns-malformed-query-action and dns-malformed-query-action-list-name are mutually exclusive

dns-malformed-query-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-malformed-query-action-list-name and dns-malformed-query-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

non-query-opcode-check

Description 'disable': When malform check is enabled, TPS always drops DNS query with non query opcode, this option disables this opcode check;

Type: string

Supported Values: disable

skip-multi-packet-check

Description Bypass DNS fragmented and TCP segmented Queries(Default: dropped)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

validation-type

Description 'basic-header-check': Basic header validation for DNS TCP/UDP queries; 'extended-header-check': Extended header/query validation for DNS TCP/UDP queries; 'disable': Disable Malform query validation for DNS TCP/UDP;

Type: string

Supported Values: basic-header-check, extended-header-check, disable

dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *dst_rate-limit*

Type: Object

dst_rate-limit

Specification	Value
Type	*object*

domain-group-rate-exceed-action

Description 'drop': Drop the query (default); 'tunnel-encap-packet': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: drop, tunnel-encap-packet

Default: drop

domain-group-rate-per-service

Description Enable per service domain rate checking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-template/encap*

fqdn

Description: fqdn is a **JSON Block**. Please see below for *dst_rate-limit_fqdn*

Type: Object

request

Description: request is a **JSON Block**. Please see below for *dst_rate-limit_request*

Type: Object

dst_rate-limit_request

Specification	Value
Type	*object*

dst-dns-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Mutual Exclusion: dst-dns-request-rate-limit-action and dst-dns-request-rate-limit-action-list-name are mutually exclusive

dst-dns-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-dns-request-rate-limit-action-list-name and dst-dns-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type

Description: type is a **JSON Block**. Please see below for *dst_rate-limit_request_type*

Type: Object

dst_rate-limit_request_type

Specification	Value

Description: SRV-cfg is a **JSON Block**. Please see below for *dst_rate-limit_request_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

dst_rate-limit_request_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

dst_rate-limit_request_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cname-rate

Description

Type: number

Range: 1-16000000

dst_rate-limit_request_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

dns-request-type

Description Other type value

Type: number

Range: 1-65535

dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

dst_rate-limit_request_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-aaaa-rate

Description

Type: number

Range: 1-16000000

dst_rate-limit_request_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-a-rate

Description

Type: number

Range: 1-16000000

dst_rate-limit_request_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

dns-ns-rate

Description

Type: number

Range: 1-16000000

dst_rate-limit_fqdn

Specification	Value
Type	*object*

dns-fqdn-rate-cfg

Type: List

dns-fqdn-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Mutual Exclusion: dns-fqdn-rate-limit-action and dns-fqdn-rate-limit-action-list-name are mutually exclusive

dns-fqdn-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-fqdn-rate-limit-action-list-name and dns-fqdn-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dst_rate-limit_fqdn_dns-fqdn-rate-cfg

Specification	Value
Type	*list*
Block object keys	

dns-fqdn-rate

Description Limiting rate (Range: 5-8000 for FQDN domain based rate limiting, 5-16000000 for FQDN label count based rate limiting)

Type: number

Range: 5-16000000

fqdn-rate-label-count

Description FQDN label count (Range: 1-8)

Type: number

Range: 1-8

fqdn-rate-suffix

Description Suffix count

Type: number

Range: 1-5

per

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'label-count': FQDN label count;

Type: string

Supported Values: domain-name, src-ip, label-count

per-domain-per-src-ip

Description Use both Domain Name and Source IP address for rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-record-type

Specification	Value
Type	*object*

allow-a-type

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-aaaa-type

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-cname-type

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-mx-type

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-ns-type

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-record-type-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: allow-record-type-action and allow-record-type-action-list-name are mutually exclusive

allow-record-type-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: allow-record-type-action-list-name and allow-record-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

allow-srv-type

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-num-cfg

Type: List

allow-record-type_record-num-cfg

Specification	Value
Type	*list*
Block object keys	

allow-num-type

Description Other record type value

Type: number

Range: 1-65535

allow-query-class

Specification	Value
Type	*object*

allow-any-query-class

Description ANY query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-chaos-query-class

Description CHAOS query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-csnet-query-class

Description CSNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-hesiod-query-class

Description HESIOD query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-internet-query-class

Description INTERNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-none-query-class

Description NONE query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-query-class-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: allow-query-class-action and allow-query-class-action-list-name are mutually exclusive

allow-query-class-action-list-name

Description Configure action-list to take when query class doesn't match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: allow-query-class-action-list-name and allow-query-class-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-udp-authentication

Specification	Value
Type	*object*

dns-udp-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: dns-udp-auth-fail-action and dns-udp-auth-fail-action-list-name are mutually exclusive

dns-udp-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication. (Applicable to dns-udp retry only)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-udp-auth-fail-action-list-name and dns-udp-auth-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-udp-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: dns-udp-auth-pass-action and dns-udp-auth-pass-action-list-name are mutually exclusive

dns-udp-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-udp-auth-pass-action-list-name and dns-udp-auth-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

force-tcp-cfg

Description: force-tcp-cfg is a **JSON Block**. Please see below for *dns-udp-authentication_force-tcp-cfg*

Type: Object

min-delay

Description Optional minimum delay between DNS retransmits for authentication to pass, unit is specified by min-delay-interval

Type: number

Range: 1-80

Mutual Exclusion: min-delay and force-tcp are mutually exclusive

min-delay-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

udp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

Mutual Exclusion: udp-timeout and force-tcp are mutually exclusive

dns-udp-authentication_force-tcp-cfg

Specification	Value
Type	*object*

force-tcp

Description Force DNS request over TCP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: force-tcp, udp-timeout, and min-delay are mutually exclusive

force-tcp-ignore-client-source-port

Description Allow client to retransmit DNS request using different source port during udp-auth (supported in asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-tcp-min-delay

Description Optional minimum delay (seconds) between DNS retransmits for authentication to pass

Type: number

Range: 1-15

force-tcp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

fqdn-label-len-cfg

Specification	Value
Type	*list*
Block object keys	

fqdn-label-length-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: fqdn-label-length-action and fqdn-label-length-action-list-name are mutually exclusive

fqdn-label-length-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: fqdn-label-length-action-list-name and fqdn-label-length-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

fqdn-label-suffix

Description Number of suffixes

Type: number

Range: 1-5

label-length

Description Maximum length of FQDN label

Type: number

Range: 1-63

symtimeout-cfg

Specification	Value
Type	*object*

sym-timeout

Description Timeout for DNS Symmetric session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sym-timeout-value

Description Session timeout value in seconds

Type: number

Range: 1-31

2.33.560 ddos zone-template dns malformed-query-check

DNS Malform Query check options

malformed-query-check Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	malformed-query-check
Element URI	/axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check
Element Attributes	malformed-query-check_attributes
Partition Visibility	shared
Schema	`malformed-query-check schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check

malformed-query-check attributes

```
POST /axapi/v3/ddos/zone-template/dns/a/malformed-query-check
Payload:
{
    "malformed-query-check": {
        "validation-type": "basic-header-check"
    }
}
```

Get Object

GET

/axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check

malformed-query-check attributes

```
GET /axapi/v3/ddos/zone-template/dns/a/malformed-query-check
Reponse:
{
    "malformed-query-check": {
        "validation-type": "basic-header-check",
        "skip-multi-packet-check": 0,
        "uuid": "c80d7bc8-088c-11f0-b674-001fa04507c0",
        "a10-url": "/axapi/v3/ddos/zone-template/dns/a/malformed-query-check"
    }
}
```

Modify Object

POST

/axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check

malformed-query-check attributes

Replace Object

PUT

/axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check

malformed-query-check attributes

```
PUT /axapi/v3/ddos/zone-template/dns/a/malformed-query-check
Payload:
{
    "malformed-query-check": {
        "validation-type": "extended-header-check"
    }
}
```

Delete Object

DELETE

/axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check

malformed-query-check attributes

```
DELETE /axapi/v3/ddos/zone-template/dns/a/malformed-query-check
Reponse:
{
    "response": {

    }
}
```

malformed-query-check attributes

dns-malformed-query-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: dns-malformed-query-action and dns-malformed-query-action-list-name are mutually exclusive

dns-malformed-query-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-malformed-query-action-list-name and dns-malformed-query-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

non-query-opcode-check

Description 'disable': When malform check is enabled, TPS always drops DNS query with non query opcode, this option disables this opcode check;

Type: string

Supported Values: disable

skip-multi-packet-check

Description Bypass DNS fragmented and TCP segmented Queries(Default: dropped)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

validation-type

Description 'basic-header-check': Basic header validation for DNS TCP/UDP queries; 'extended-header-check': Extended header/query validation for DNS TCP/UDP queries; 'disable': Disable Malform query validation for DNS TCP/UDP;

Type: string

Supported Values: basic-header-check, extended-header-check, disable

challenge

Specification	Value
Type	*object*

challenge-cookie-name

Description Set the cookie name used to send back to client. Default is sto-idd

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: sto-idd

challenge-fail-action

Description 'blacklist-src': Blacklist-src; 'reset': Reset client connection(Default);

Type: string

Supported Values: blacklist-src, reset

Default: reset

Mutual Exclusion: challenge-fail-action and challenge-fail-action-list-name are mutually exclusive

challenge-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: challenge-fail-action-list-name and challenge-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

challenge-interval

Description Specify the challenge interval. Default is 8 seconds

Type: number

Range: 1-31

Default: 8

challenge-keep-cookie

Description Keep the challenge cookie from client and forward to backend. Default is do not keep

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-pass-action

Description 'authenticate-src': Authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: challenge-pass-action and challenge-pass-action-list-name are mutually exclusive

challenge-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: challenge-pass-action-list-name and challenge-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

idle-timeout

Specification	Value
Type	*object*

idle-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: idle-timeout-action and idle-timeout-action-list-name are mutually exclusive

idle-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: idle-timeout-action-list-name and idle-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

idle-timeout-value

Description Set the the idle timeout value in seconds for HTTP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

slow-read

Specification	Value
Type	*object*

min-window-count

Description Number of packets

Type: number

Range: 1-31

min-window-size

Description minimum window size

Type: number

Range: 1-65535

slow-read-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'ignore': Take no action; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, ignore, reset

Mutual Exclusion: slow-read-action and slow-read-action-list-name are mutually exclusive

slow-read-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

filter-list

Specification	Value
Type	*list*
Block object keys	

dst

Description: dst is a **JSON Block**. Please see below for *filter-list_dst*

Type: Object

http-agent-cfg

Description: http-agent-cfg is a **JSON Block**. Please see below for *filter-list_http-agent-cfg*

Type: Object

http-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src, reset

Mutual Exclusion: http-filter-action and http-filter-action-list-name are mutually exclusive

http-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http-filter-action-list-name and http-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-filter-seq

Description Sequence number

Type: number

Range: 1-200

http-header-cfg

Description: http-header-cfg is a **JSON Block**. Please see below for *filter-list_http-header-cfg*

Type: Object

http-referer-cfg

Description: http-referer-cfg is a **JSON Block**. Please see below for *filter-list_http-referer-cfg*

Type: Object

http-uri-cfg

Description: http-uri-cfg is a **JSON Block**. Please see below for *filter-list_http-uri-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Type	*list*
Block object keys	

http-filter-referer-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

filter-list_http-referer-cfg_referer-ends-cfg

Specification	Value
Type	*list*
Block object keys	

http-filter-referer-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

mss-timeout

Specification	Value
Type	*object*

mss-percent

Description Configure percentage of mss such that if a packet size is below the mss times mss-percent, packet is considered bad.

Type: number

Range: 1-100

mss-timeout-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: mss-timeout-action and mss-timeout-action-list-name are mutually exclusive

mss-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: mss-timeout-action-list-name and mss-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

number-packets

Description Specify percentage of mss. Default is 0, mss-timeout is not enabled.

Type: number

Range: 1-31

malformed-http

Specification	Value
Type	*object*

malformed-http

Description 'check': Configure malformed HTTP parameters;

Type: string

Supported Values: check

Default: check

malformed-http-action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: malformed-http-action and malformed-http-action-list-name are mutually exclusive

malformed-http-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-http-action-list-name and malformed-http-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-http-bad-chunk-mon-enabled

Description Enabling bad chunk monitoring. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-max-content-length

Description Set the maxinum content-length header. Default value is 4294967295 bytes

Type: number

Range: 1-4294967295

Default: 4294967295

malformed-http-max-header-name-size

Description Set the maxinum header name length. Default value is 64.

Type: number

Range: 1-64

Default: 64

malformed-http-max-line-size

Description Set the maximum line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

malformed-http-max-num-headers

Description Set the maximum number of headers. Default value is 90

Type: number

Range: 1-90

Default: 90

malformed-http-max-req-line-size

Description Set the maximum request line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

request-header

Specification	Value
Type	*object*

header-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Default: drop

Mutual Exclusion: header-timeout-action and header-timeout-action-list-name are mutually exclusive

header-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: header-timeout-action-list-name and header-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

timeout

Description

Description: type-other is a **JSON Block**. Please see below for *type-other*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

type-list

Specification	Value
Type	*list*
Block object keys	

dst-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

dst-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-other-rate-action and dst-code-other-rate-action-list-name are mutually exclusive

dst-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-other-rate-action-list-name and dst-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-type-action

Description 'drop': Reject this ICMP type; 'blacklist-src': Blacklist-src this ICMP type; 'ignore': Ignore this ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-action and icmp-type-action-list-name are mutually exclusive

icmp-type-action-list-name

Description Configure action-list to take for this ICMP type

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-action-list-name and icmp-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

src-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-other-rate-action and src-code-other-rate-action-list-name are mutually exclusive

src-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-other-rate-action-list-name and src-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v4-dst-code-cfg

Type: List

v4-dst-rate-cfg

Description: v4-dst-rate-cfg is a **JSON Block**. Please see below for *type-list_v4-dst-rate-cfg*

Type: Object

v4-src-code-cfg

Type: List

v4-src-rate-cfg

Description: v4-src-rate-cfg is a **JSON Block**. Please see below for *type-list_v4-src-rate-cfg*

Type: Object

type-list_v4-src-rate-cfg

Specification	Value
Type	*object*

src-type-rate

Description Specify the whole src rate for this type

Type: number

Range: 1-16000000

src-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-rate-action and src-type-rate-action-list-name are mutually exclusive

src-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-rate-action-list-name and src-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-list_v4-dst-code-cfg

Specification	Value
Type	*list*
Block object keys	

dst-code-number

Description Specify the ICMP code for this dst rate

Type: number

Range: 0-255

dst-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

dst-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-rate-action and dst-code-rate-action-list-name are mutually exclusive

dst-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-rate-action-list-name and dst-code-rate-action are mutually exclusive

Specification	Value
Type	*object*

dst-type-rate

Description Specify the whole dst rate for this type

Type: number

Range: 1-16000000

dst-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-rate-action and dst-type-rate-action-list-name are mutually exclusive

dst-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-rate-action-list-name and dst-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-other

Specification	Value
Type	*object*

dst

Description: dst is a **JSON Block**. Please see below for *type-other_dst*

Type: Object

icmp-type-other-action

Description 'drop': Reject wildcard ICMP type; 'blacklist-src': Blacklist-src wildcard ICMP type; 'ignore': Ignore wildcard ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-other-action and icmp-type-other-action-list-name are mutually exclusive

icmp-type-other-action-list-name

Description Configure action-list to take for wildcard ICMP match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-other-action-list-name and icmp-type-other-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src

Description: src is a **JSON Block**. Please see below for *type-other_src*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

type-other_src

Specification	Value
Type	*object*

src-type-other-rate

Description Specify the whole src rate for wildcard ICMP type

Type: number

Range: 1-16000000

src-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-other-rate-action and src-type-other-rate-action-list-name are mutually exclusive

src-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-other-rate-action-list-name and src-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-other_dst

Specification	Value
Type	*object*

dst-type-other-rate

Description Specify the whole dst rate for wildcard ICMP type

Type: number

Range: 1-16000000

dst-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-other-rate-action and dst-type-other-rate-action-list-name are mutually exclusive

dst-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-other-rate-action-list-name and dst-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description filter using Berkeley packet filter syntax

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

icmp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, blacklist-src

Default: drop

Mutual Exclusion: icmp-filter-action and icmp-filter-action-list-name are mutually exclusive

icmp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-filter-action-list-name and icmp-filter-action are mutually exclusive

icmp-filter-inverse-match

Description Inverse the result of matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

icmp-filter-seq

Description sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

type-list

Specification	Value
Type	*list*
Block object keys	

dst-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

dst-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-other-rate-action and dst-code-other-rate-action-list-name are mutually exclusive

dst-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-other-rate-action-list-name and dst-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-type-action

Description 'drop': Reject this ICMP type; 'blacklist-src': Blacklist-src this ICMP type; 'ignore': Ignore this ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-action and icmp-type-action-list-name are mutually exclusive

icmp-type-action-list-name

Description Configure action-list to take for this ICMP type

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-action-list-name and icmp-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

src-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-other-rate-action and src-code-other-rate-action-list-name are mutually exclusive

src-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-other-rate-action-list-name and src-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description filter using Berkeley packet filter syntax

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

icmp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, blacklist-src

Default: drop

Mutual Exclusion: icmp-filter-action and icmp-filter-action-list-name are mutually exclusive

icmp-filter-action-list-name

Description list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-filter-action-list-name and icmp-filter-action are mutually exclusive

icmp-filter-inverse-match

Description Inverse the result of matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

icmp-filter-seq

Description sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

version-action

Description 'drop': Drop packets; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: version-action and version-action-list-name are mutually exclusive

version-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: version-action-list-name and version-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

version-end

Description Version supported range end

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

version-start

Description Configure versions supported

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

version-supported-list_malformed-check

Specification	Value
Type	*object*

malformed-check-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: malformed-check-action and malformed-check-action-list-name are mutually exclusive

malformed-check-action-list-name

Description Configure action-list to take. Overwrites version action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-check-action-list-name and malformed-check-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-enable

Description 'enable': Enable malformed check;

Type: string

Supported Values: enable

Default: enable

max-destination-cid-length

Description Set the maximum destination CID length

Type: number

Range: 0-255

Default: 255

max-source-cid-length

Description Set the maximum source CID length

Type: number

Range: 0-255

Default: 255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

pkt-rate-cfg

Specification	Value
Type	*object*

per

Description 'aead-tag': AEAD Tag; 'dcid': Destination Connection ID;

Type: string

Supported Values: aead-tag, dcid

quic-pkt-rate

Description Limiting rate (Range: 5-16000000)

Type: number

Range: 5-16000000

quic-pkt-rate-limit

Description QUIC Packet Rate Limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-initial

Specification	Value
Type	*object*

retry-token-authentication-dynamic

Description 'cid-hash': Dynamic retry token based on Destination and Source CID;

Type: string

Supported Values: cid-hash

Mutual Exclusion: retry-token-authentication-dynamic and retry-token-authentication-static are mutually exclusive

retry-token-authentication-static

Description Static retry token (Maximum of 4 bytes)

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

Mutual Exclusion: retry-token-authentication-static and retry-token-authentication-dynamic are mutually exclusive

retry-unauthenticated-initial-decrypt

Description Decrypt incoming initial packets for unauthenticated clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scid-length

Description Set Max SCID length for SCID generation

Type: number

Range: 8-20

Default: 20

unauth-short-hdr-action

Description 'drop': Drop short header packet;

Type: string

Supported Values: drop

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

retry-token-authentication-dynamic

Description 'cid-hash': Dynamic retry token based on Destination and Source CID;

Type: string

Supported Values: cid-hash

Mutual Exclusion: retry-token-authentication-dynamic and retry-token-authentication-static are mutually exclusive

retry-token-authentication-static

Description Static retry token (Maximum of 4 bytes)

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

Mutual Exclusion: retry-token-authentication-static and retry-token-authentication-dynamic are mutually exclusive

retry-unauthenticated-initial-decrypt

Description Decrypt incoming initial packets for unauthenticated clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scid-length

Description Set Max SCID length for SCID generation

Type: number

Range: 8-20

Default: 20

unauth-short-hdr-action

Description 'drop': Drop short header packet;

Type: string

Supported Values: drop

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_refer-cfg

Specification	Value
Type	*object*

REFER

Description REFER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-refer-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_bye-cfg

Specification	Value
Type	*object*

BYE

Description BYE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-bye-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_subscribe-cfg

Specification	Value
Type	*object*

SUBSCRIBE

Description SUBSCRIBE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-subscribe-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_register-cfg

Specification	Value
Type	*object*

REGISTER

Description REGISTER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-register-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_invite-cfg

Specification	Value
Type	*object*

INVITE

Description INVITE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-invite-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_message-cfg

Specification	Value
Type	*object*

MESSAGE

Description MESSAGE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-message-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_update-cfg

Specification	Value
Type	*object*

UPDATE

Description UPDATE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-update-rate

Description

Type: number

Range: 1-16000000

dst_sip-request-rate-limit_method_notify-cfg

Specification	Value
Type	*object*

NOTIFY

Description NOTIFY method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-notify-rate

Description

Type: number

Range: 1-16000000

idle-timeout

Specification	Value
Type	*object*

idle-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset (sip-tcp) client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: idle-timeout-action and idle-timeout-action-list-name are mutually exclusive

idle-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: idle-timeout-action-list-name and idle-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

idle-timeout-value

Description Set the the idle timeout value for SIP-TCP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

malformed-sip

Specification	Value
Type	*object*

malformed-sip-action

Description 'drop': Drop packets (Default); 'reset': Reset (sip-tcp) client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: malformed-sip-action and malformed-sip-action-list-name are mutually exclusive

malformed-sip-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-sip-action-list-name and malformed-sip-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-sip-call-id-max-length

Description Set the maximum call-id length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-check

Description 'enable-check': Enable malformed SIP parameters;

Type: string

Supported Values: enable-check

malformed-sip-max-header-name-length

Description Set the maximum header name length. Default value is 63

Type: number

Range: 1-63

Default: 63

malformed-sip-max-header-value-length

Description Set the maximum header value length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-line-size

Description Set the maximum line size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-uri-length

Description Set the maximum uri size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-sdp-max-length

Description Set the maxinum SDP content length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

filter-header-list

Specification	Value
Type	*list*
Block object keys	

sip-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src; 'reset': Reset client connection(for sip-tcp);

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src, reset

Mutual Exclusion: sip-filter-action and sip-filter-action-list-name are mutually exclusive

sip-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip-filter-action-list-name and sip-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

sip-filter-header-seq

Description Sequence number

Type: number

Range: 1-200

sip-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip-header-cfg

Description: sip-header-cfg is a **JSON Block**. Please see below for *filter-header-list_sip-header-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

filter-header-list_sip-header-cfg

Specification	Value
Type	*object*

sip-filter-header-inverse-match

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

2.33.581 ddos zone-template sip filter-header

SIP Header Filter Configuration

filter-header Specification

Parameter	Value
Type	*Collection*

    }
}
```

malformed-sip attributes

malformed-sip-action

Description 'drop': Drop packets (Default); 'reset': Reset (sip-tcp) client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: malformed-sip-action and malformed-sip-action-list-name are mutually exclusive

malformed-sip-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-sip-action-list-name and malformed-sip-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-sip-call-id-max-length

Description Set the maximum call-id length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-check

Description 'enable-check': Enable malformed SIP parameters;

Type: string

Supported Values: enable-check

malformed-sip-max-header-name-length

Description Set the maximum header name length. Default value is 63

Type: number

Range: 1-63

Default: 63

malformed-sip-max-header-value-length

Description Set the maximum header value length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-line-size

Description Set the maximum line size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-uri-length

Description Set the maximum uri size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-sdp-max-length

Description Set the maxinum SDP content length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-handshake

Specification	Value
Type	*object*

auth-handshake-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: auth-handshake-fail-action and auth-handshake-fail-action-list-name are mutually exclusive

auth-handshake-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: auth-handshake-fail-action-list-name and auth-handshake-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

auth-handshake-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: auth-handshake-pass-action and auth-handshake-pass-action-list-name are mutually exclusive

auth-handshake-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: auth-handshake-pass-action-list-name and auth-handshake-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

auth-handshake-timeout

Description Connection timeout (default 5 seconds) and trials (default 5 times) (DST support only)

Type: number

Range: 1-31

Default: 5

auth-handshake-trials

Description Number of failed handshakes before entry marked black

Type: number

Range: 0-15

Default: 5

cert-cfg

Description: cert-cfg is a **JSON Block**. Please see below for *auth-handshake_cert-cfg*

Type: Object

Mutual Exclusion: dst-request-rate-limit-action-list-name and dst-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

ssl-traffic-check

Specification	Value
Type	*object*

check-resumed-connection

Description Apply checks to SSL connections initialized by ACK packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-action

Description 'drop': Drop packets with bad ssl header; 'ignore': Forward packets with bad ssl header;

Type: string

Supported Values: drop, ignore

header-inspection

Description Inspect ssl header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

renegotiation

Specification	Value
Type	*object*

num-renegotiation

Description Number of renegotiation allowed

Type: number

Range: 0-7

ssl-l4-reneg-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: ssl-l4-reneg-action and ssl-l4-reneg-action-list-name are mutually exclusive

ssl-l4-reneg-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4-reneg-action-list-name and ssl-l4-reneg-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

ssl-handshake-policy

Specification	Value
Type	*object*

action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist source IP;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: action and ssl-handshake-policy-action-list-name are mutually exclusive

cipher-suites-limit

Description Set cipher suites limit

Type: number

Range: 1-600

client-extensions-limit

Description Set client extensions limit

Type: number

Range: 1-600

clienthello-to-appdata-timeout

Description Set maximum timeout seconds from ClientHello to App-Data

Type: number

Range: 1-600

finished-to-appdata-timeout

Description Set maximum timeout seconds from Handshake finished to App-Data

Type: number

Range: 1-600

src-handshaking-conn-limit

Description Set handshaking connection limit

Type: number

Range: 1-16000000

ssl-handshake-policy-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-handshake-policy-action-list-name and action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-list

tcp-list is **JSON List** of *tcp attributes*

tcp-list : [

{ *tcp attributes* },

{ *tcp attributes* },

...

]

tcp attributes

ack-authentication

Description: ack-authentication is a **JSON Block**. Please see below for *ack-authentication*

Type: Object

ack-authentication-synack-reset

Description Reset client TCP SYN+ACK for authentication (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-ack-rto-retry-count

Description Take action if ack-auth RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-on-syn-rto-retry-count

Description Take action if syn-auth RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

age

Description Session age in minutes

Type: number

Range: 1-63

Default: 2

Mutual Exclusion: age and age-second are mutually exclusive

age-out-reset-server

Description Send TCP reset to server if aging time has passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

age-second

Description Session age in seconds

Type: number

Range: 1-3600

Default: 120

Mutual Exclusion: age-second and age are mutually exclusive

allow-syn-otherflags

Description Treat TCP SYN+PSH as a TCP SYN (DST tcp ports support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-synack-skip-authentications

Description Allow create sessions on SYNACK without syn-auth and ack-auth (ASYM Mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-tcp-tfo

Description Allow TCP Fast Open

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

concurrent

Description Enable concurrent port access for non-matching ports (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn-rate-limit-on-syn-only

Description Only count SYN-initiated connections towards connection-rate tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-conn-on-syn-only

Description Enable connection establishment on SYN only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Description: dst is a **JSON Block**. Please see below for *dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/filter/{tcp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

known-resp-src-port-cfg

Description: known-resp-src-port-cfg is a **JSON Block**. Please see below for *known-resp-src-port-cfg*

Type: Object

max-rexmit-syn-per-flow-cfg

Description: max-rexmit-syn-per-flow-cfg is a **JSON Block**. Please see below for *max-rexmit-syn-per-flow-cfg*

Type: Object

name

Description DDOS TCP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

out-of-seq-cfg

Description: out-of-seq-cfg is a **JSON Block**. Please see below for *out-of-seq-cfg*

Type: Object

per-conn-out-of-seq-rate-cfg

Description: per-conn-out-of-seq-rate-cfg is a **JSON Block**. Please see below for *per-conn-out-of-seq-rate-cfg*

Type: Object

per-conn-pkt-rate-cfg

Description: per-conn-pkt-rate-cfg is a **JSON Block**. Please see below for *per-conn-pkt-rate-cfg*

Type: Object

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec; '10sec': 10sec;

Type: string

Supported Values: 100ms, 1sec, 10sec

Default: 1sec

per-conn-retransmit-rate-cfg

Description: per-conn-retransmit-rate-cfg is a **JSON Block**. Please see below for *per-conn-retransmit-rate-cfg*

Type: Object

per-conn-zero-win-rate-cfg

Description: per-conn-zero-win-rate-cfg is a **JSON Block**. Please see below for *per-conn-zero-win-rate-cfg*

Type: Object

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking*

retransmit-cfg

Description: retransmit-cfg is a **JSON Block**. Please see below for *retransmit-cfg*

Type: Object

small-win-cfg

Description: small-win-cfg is a **JSON Block**. Please see below for *small-win-cfg*

Type: Object

src

Description: src is a **JSON Block**. Please see below for *src*

Type: Object

syn-authentication

Description: syn-authentication is a **JSON Block**. Please see below for *syn-authentication*

Type: Object

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synack-rate-limit

Description Config SYNACK rate limit

Type: number

Range: 1-16000000

Mutual Exclusion: synack-rate-limit and track-together-with-syn are mutually exclusive

tcp-half-open-timeout

Description TCP half-open session age in seconds

Type: number

Range: 1-3600

Default: 120

tcp-half-open-timeout-reset-server

Description Send TCP reset to server if TCP half-open session timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

track-together-with-syn

Description SYNACK will be counted in Dst Syn-rate limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: track-together-with-syn and synack-rate-limit are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zero-win-cfg

Description: zero-win-cfg is a **JSON Block**. Please see below for *zero-win-cfg*

Type: Object

syn-authentication

Specification	Value
Type	*object*

syn-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Send reset to client (Applicable to retransmit-check only);

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: syn-auth-fail-action and syn-auth-fail-action-list-name are mutually exclusive

syn-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication.

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: syn-auth-fail-action-list-name and syn-auth-fail-action are mutually exclusive

syn-auth-min-delay

Description Minimum delay (in 100ms intervals) between SYN retransmits for retransmit-check to pass

Type: number

Range: 1-80

Mutual Exclusion: syn-auth-min-delay and syn-auth-type are mutually exclusive

syn-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: syn-auth-pass-action and syn-auth-pass-action-list-name are mutually exclusive

syn-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: syn-auth-pass-action-list-name and syn-auth-pass-action are mutually exclusive

syn-auth-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth-timeout

Description syn retransmit timeout in seconds(default timeout: 5 seconds)

Type: number

Range: 1-31

Mutual Exclusion: syn-auth-timeout and syn-auth-type are mutually exclusive

syn-auth-type

Description 'send-rst': Send reset to client after syn cookie check pass; 'force-rst-by-ack': Send client a bad ack after syn cookie check pass; 'force-rst-by-synack': Send client a bad synack after syn cookie check pass;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, send-rst-once, hybrid

Mutual Exclusion: syn-auth-type, syn-auth-timeout, and syn-auth-min-delay are mutually exclusive

ack-authentication

Specification	Value
Type	*object*

ack-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Send reset to client;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: ack-auth-fail-action and ack-auth-fail-action-list-name are mutually exclusive

ack-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication.

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ack-auth-fail-action-list-name and ack-auth-fail-action are mutually exclusive

ack-auth-min-delay

Description Minimum delay (in 100ms intervals) between ACK retransmits for retransmit-check to pass

Type: number

Range: 1-80

ack-auth-only

Description Apply retransmit-check only once per source address for authentication purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ack-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: ack-auth-pass-action and ack-auth-pass-action-list-name are mutually exclusive

ack-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ack-auth-pass-action-list-name and ack-auth-pass-action are mutually exclusive

ack-auth-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ack-auth-timeout

Description ack retransmit timeout in seconds(default timeout: 5 seconds)

Type: number

Range: 1-31

retransmit-cfg

Specification	Value
Type	*object*

retransmit

Description Take action if retransmit pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: retransmit and per-conn-retransmit-rate-limit are mutually exclusive

retransmit-action

Description 'drop': Drop packets for retrans exceed (Default); 'blacklist-src': help Blacklist-src for retrans exceed; 'ignore': help Ignore retrans exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: retransmit-action and retransmit-action-list-name are mutually exclusive

retransmit-action-list-name

Description Configure action-list to take for retransmit exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: retransmit-action-list-name and retransmit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *dst_rate-limit_syn-rate-limit*

Type: Object

dst_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

dst-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, ignore

Default: drop

dst-syn-rate-limit

Description

Type: number

Range: 1-16000000

per-conn-retransmit-rate-cfg

Specification	Value
Type	*object*

per-conn-retransmit-rate-action

Description 'drop': Drop packets for retrans rate exceed (Default); 'blacklist-src': help Blacklist-src for retrans rate exceed; 'ignore': help Ignore retrans rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-retransmit-rate-action and per-conn-retransmit-rate-action-list-name are mutually exclusive

per-conn-retransmit-rate-action-list-name

Description Configure action-list to take for retransmit rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-retransmit-rate-action-list-name and per-conn-retransmit-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-retransmit-rate-limit

Description Take action if retransmit pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-retransmit-rate-limit and retransmit are mutually exclusive

per-conn-zero-win-rate-cfg

Specification	Value
Type	*object*

per-conn-zero-win-rate-action

Description 'drop': Drop packets for zero-win rate exceed (Default); 'blacklist-src': help Blacklist-src for zero-win rate exceed; 'ignore': Ignore zero-win rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-zero-win-rate-action and per-conn-zero-win-rate-action-list-name are mutually exclusive

per-conn-zero-win-rate-action-list-name

Description Configure action-list to take for zero window rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-zero-win-rate-action-list-name and per-conn-zero-win-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-zero-win-rate-limit

Description Take action if zero window pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-zero-win-rate-limit and zero-win are mutually exclusive

per-conn-pkt-rate-cfg

Specification	Value
Type	*object*

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-pkt-rate-action and per-conn-pkt-rate-action-list-name are mutually exclusive

per-conn-pkt-rate-action-list-name

Description Configure action-list to take for per-conn-pkt-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-pkt-rate-action-list-name and per-conn-pkt-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: tcp-filter-action and tcp-filter-action-list-name are mutually exclusive

tcp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp-filter-action-list-name and tcp-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

max-rexmit-syn-per-flow-cfg

Specification	Value
Type	*object*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow

Type: number

Range: 1-6

max-rexmit-syn-per-flow-action

Description 'drop': Drop SYN packets for max-rexmit-syn-per-flow exceed (Default); 'blacklist-src': help Blacklist-src for max-rexmit-syn-per-flow exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

max-rexmit-syn-per-flow-action-list-name

Description Configure action-list to take for max-rexmit-syn-per-flow exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *src_rate-limit*

Type: Object

src_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *src_rate-limit_syn-rate-limit*

Type: Object

src_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

src-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'blacklist-src': Blacklist-src for syn-rate exceed; 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: src-syn-rate-action and src-syn-rate-action-list-name are mutually exclusive

src-syn-rate-action-list-name

Description Configure action-list to take for syn-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-syn-rate-action-list-name and src-syn-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-syn-rate-limit

Description

Type: number

Range: 1-16000000

progression-tracking

Specification	Value
Type	*object*

ignore-TLS-handshake

Description Ignore TLS handshake, support SSL-L4 port only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mitigation

Description: mitigation is a **JSON Block**. Please see below for *progression-tracking_mitigation*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation*

profiling

Description: profiling is a **JSON Block**. Please see below for *progression-tracking_profiling*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/profiling*

progression-tracking-enabled

Description 'enable-check': Enable Progression Tracking Check;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking_mitigation

Specification	Value
Type	*object*

connection-tracking

Description: connection-tracking is a **JSON Block**. Please see below for *progression-tracking_mitigation_connection-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/connection-tracking*

request-tracking

Description: request-tracking is a **JSON Block**. Please see below for *progression-tracking_mitigation_request-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/request-tracking*

slow-attack

Description: slow-attack is a **JSON Block**. Please see below for *progression-tracking_mitigation_slow-attack*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/slow-attack*

time-window-tracking

Description: time-window-tracking is a **JSON Block**. Please see below for *progression-tracking_mitigation_time-window-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/time-window-tracking*

progression-tracking_mitigation_time-window-tracking

Specification	Value
Type	*object*

progression-tracking-win-enabled

Description 'enable-check': Enable Progression Tracking per Time Window;

Type: string

Supported Values: enable-check

Default: enable-check

progression-tracking-windows-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-windows-action and progression-tracking-windows-action-list-name are mutually exclusive

progression-tracking-windows-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-windows-action-list-name and progression-tracking-windows-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking_mitigation_slow-attack

Specification	Value
Type	*object*

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

slow-attack

Description 'enable-check': Enter Progression Tracking Tracking Slow Attack;

Type: string

Supported Values: enable-check

Default: enable-check

slow-attacker-identification

Description: slow-attacker-identification is a **JSON Block**. Please see below for *progression-tracking_mitigation_slow-attack_slow-attacker-identification*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/slow-attack/slow-attacker-identification*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking_mitigation_slow-attack_slow-attacker-identification

Specification	Value
Type	*object*

active-connection

Description Set the minimum tracking active connection to start identifying slow attacker, default value is 3

Type: number

Range: 1-65535

Default: 3

bad-connection

Description Set the maximum percentage of slow connection (per source), default value is 75

Type: number

Range: 1-100

Default: 75

enable-identification

Description Progression tracking will identify slow attacker and blacklist it based on the config value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking_mitigation_connection-tracking

Specification	Value
Type	*object*

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-2147483647

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-2147483647

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking_mitigation_request-tracking

Specification	Value
Type	*object*

first-request-max-time

Description Set the maximum idle time before the first request (in unit of 100ms)

Type: number

Range: 1-65535

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model (Default); 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking_profiling

Specification	Value
Type	*object*

profiling-connection-life-model

Description Enable auto-config progression tracking learning for connection model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-request-response-model

Description Enable auto-config progression tracking learning for request response model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-time-window-model

Description Enable auto-config progression tracking learning for time window model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

known-resp-src-port-cfg

Specification	Value
Type	*object*

exclude-src-resp-port

Description Exclude src port equal to dst port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port

Description Take action if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port-action

Description 'drop': Drop packets from well-known src-port(Default); 'blacklist-src': Blacklist-src from well-known src-port; 'ignore': Ignore well-known src-port;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: known-resp-src-port-action and known-resp-src-port-action-list-name are mutually exclusive

known-resp-src-port-action-list-name

Description Configure action-list to take for well-known src-port

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: known-resp-src-port-action-list-name and known-resp-src-port-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zero-win-cfg

Specification	Value
Type	*object*

zero-win

Description Take action if zero window pkts exceed configured threshold

Type: number

Range: 1-250

Mutual Exclusion: zero-win and per-conn-zero-win-rate-limit are mutually exclusive

zero-win-action

Description 'drop': Drop packets for zero-win exceed (Default); 'blacklist-src': help Blacklist-src for zero-win exceed; 'ignore': Ignore zero-win exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: zero-win-action and zero-win-action-list-name are mutually exclusive

zero-win-action-list-name

Description Configure action-list to take for zero window exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: zero-win-action-list-name and zero-win-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-out-of-seq-rate-cfg

Specification	Value
Type	*object*

per-conn-out-of-seq-rate-action

Description 'drop': Drop packets for out-of-seq rate exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq rate exceed; 'ignore': help Ignore out-of-seq rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-out-of-seq-rate-action and per-conn-out-of-seq-rate-action-list-name are mutually exclusive

per-conn-out-of-seq-rate-action-list-name

Description Configure action-list to take for out-of-seq rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-out-of-seq-rate-action-list-name and per-conn-out-of-seq-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-out-of-seq-rate-limit

Description Take action if out-of-seq pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-out-of-seq-rate-limit and out-of-seq are mutually exclusive

out-of-seq-cfg

Specification	Value
Type	*object*

out-of-seq

Description Take action if out-of-seq pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: out-of-seq and per-conn-out-of-seq-rate-limit are mutually exclusive

out-of-seq-action

Description 'drop': Drop packets for out-of-seq exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq exceed; 'ignore': help Ignore out-of-seq exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: out-of-seq-action and out-of-seq-action-list-name are mutually exclusive

out-of-seq-action-list-name

Description Configure action-list to take for out-of-seq exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: out-of-seq-action-list-name and out-of-seq-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

small-win-cfg

Specification	Value
Type	*object*

small-window

Description Smallest allowed window size

Type: number

Range: 1-65535

small-window-action

Description 'drop': Drop packets for small-window exceed (Default); 'blacklist-src': help Blacklist-src for small-window exceed; 'ignore': Ignore small-window exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: small-window-action and small-window-action-list-name are mutually exclusive

small-window-action-list-name

Description Configure action-list to take for small window exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: small-window-action-list-name and small-window-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

small-window-threshold

Description Take action if small window pkts exceed configured threshold

Type: number

Range: 1-250

]

filter attributes

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: tcp-filter-action and tcp-filter-action-list-name are mutually exclusive

tcp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp-filter-action-list-name and tcp-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

    }
}
```

connection-tracking attributes

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-2147483647

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-2147483647

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.591 ddos zone-template tcp progression-tracking mitigation request-tracking

Configure and enable TCP Progression Tracking Mitigation per Request response

request-tracking Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	request-tracking

        "status": "OK",
        "msg": "Success"
    }
}
```

request-tracking attributes

first-request-max-time

Description Set the maximum idle time before the first request (in unit of 100ms)

Type: number

Range: 1-65535

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model; 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

2.33.592 ddos zone-template tcp progression-tracking mitigation slow-attack

Configure and enable TCP progression Tracking Mitigation for slow attack (identify slow attacker)

slow-attack Specification

Parameter	Value

    }
}
```

slow-attack attributes

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

slow-attack

Description 'enable-check': Enter Progression Tracking Tracking Slow Attack;

Type: string

Supported Values: enable-check

Default: enable-check

slow-attacker-identification

Description: slow-attacker-identification is a **JSON Block**. Please see below for *slow-attacker-identification*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/slow-attack/slow-attacker-identification*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

slow-attacker-identification

Specification	Value
Type	*object*

active-connection

Description Set the minimum tracking active connection to start identifying slow attacker, default value is 3

Type: number

Range: 1-65535

Default: 3

bad-connection

Description Set the maximum percentage of slow connection (per source), default value is 75

Type: number

Range: 1-100

Default: 75

enable-identification

Description Progression tracking will identify slow attacker and blacklist it based on the config value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Configure session age(in minutes) for UDP sessions

Type: number

Range: 1-63

Default: 2

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

known-resp-src-port-cfg

Description: known-resp-src-port-cfg is a **JSON Block**. Please see below for *known-resp-src-port-cfg*

Type: Object

max-payload-size-cfg

Description: max-payload-size-cfg is a **JSON Block**. Please see below for *max-payload-size-cfg*

Type: Object

min-payload-size-cfg

Description: min-payload-size-cfg is a **JSON Block**. Please see below for *min-payload-size-cfg*

Type: Object

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Description: ntp-monlist-cfg is a **JSON Block**. Please see below for *ntp-monlist-cfg*

Type: Object

per-conn-pkt-rate-cfg

Description: per-conn-pkt-rate-cfg is a **JSON Block**. Please see below for *per-conn-pkt-rate-cfg*

Type: Object

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

previous-salt-timeout

Description Token-Authentication previous salt-prefix timeout in minutes, default is 1 min

Type: number

Range: 1-10080

Default: 1

public-ipv4-addr

Description IP address

Type: string

Format: ipv4-address

public-ipv6-addr

Description IPV6 address

Type: string

Format: ipv6-address

spoof-detect-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src for spoof-detect fail;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: spoof-detect-fail-action and spoof-detect-fail-action-list-name are mutually exclusive

spoof-detect-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: spoof-detect-fail-action-list-name and spoof-detect-fail-action are mutually exclusive

spoof-detect-min-delay

Description Optional minimum delay between UDP retransmits for authentication to pass, unit is specified by min-delay-interval

Type: number

Range: 1-80

spoof-detect-min-delay-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

spoof-detect-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: spoof-detect-pass-action and spoof-detect-pass-action-list-name are mutually exclusive

spoof-detect-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: spoof-detect-pass-action-list-name and spoof-detect-pass-action are mutually exclusive

spoof-detect-retry-timeout

Description Timeout in seconds

Type: number

Range: 1-31

token-authentication

Description Enable Token Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-formula

Description 'md5_Salt-SrcIp-SrcPort-DstIp-DstPort': md5 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'md5_Salt-DstIp-DstPort': md5 of Salt-DstIp-DstPort; 'md5_Salt-SrcIp-DstIp': md5 of Salt-SrcIp-DstIp; 'md5_Salt-SrcPort-DstPort': md5 of Salt-SrcPort-DstPort; 'md5_Salt-UintDstIp-DstPort': Using the uint value of IP for md5 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-SrcPort-DstIp-DstPort': sha1 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'sha1_Salt-DstIp-DstPort': sha1 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-DstIp': sha1 of Salt-SrcIp-DstIp; 'sha1_Salt-SrcPort-DstPort': sha1 of Salt-SrcPort-DstPort; 'sha1_Salt-UintDstIp-DstPort': Using the uint value of IP for sha1 of Salt-DstIp-DstPort;

Type: string

Supported Values: md5_Salt-SrcIp-SrcPort-DstIp-DstPort, md5_Salt-DstIp-DstPort, md5_Salt-SrcIp-DstIp, md5_Salt-SrcPort-DstPort, md5_Salt-UintDstIp-DstPort, sha1_Salt-SrcIp-SrcPort-DstIp-DstPort, sha1_Salt-DstIp-DstPort, sha1_Salt-SrcIp-DstIp, sha1_Salt-SrcPort-DstPort, sha1_Salt-UintDstIp-DstPort

token-authentication-hw-assist-disable

Description token-authentication disable hardware assistance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-public-address

Description The server public IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix

Description token-authentication salt-prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix-curr

Description

Type: number

Range: 1-4294967295

token-authentication-salt-prefix-prev

Description

Type: number

Range: 1-4294967295

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Specification	Value
Type	*object*

ntp-monlist

Description Take action for ntp monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntp-monlist-action

Description 'drop': Drop packets for ntp-monlist (Default); 'blacklist-src': Blacklist-src for ntp-monlist; 'ignore': Ignore ntp-monlist;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: ntp-monlist-action and ntp-monlist-action-list-name are mutually exclusive

ntp-monlist-action-list-name

Description Configure action-list to take for ntp-monlist

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ntp-monlist-action-list-name and ntp-monlist-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

known-resp-src-port-cfg

Specification	Value
Type	*object*

exclude-src-resp-port

Description Exclude src port equal to dst port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port

Description Take action if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port-action

Description 'drop': Drop packets from well-known src-port(Default); 'blacklist-src': Blacklist-src from well-known src-port; 'ignore': Ignore well-known src-port;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: known-resp-src-port-action and known-resp-src-port-action-list-name are mutually exclusive

known-resp-src-port-action-list-name

Description Configure action-list to take for well-known src-port

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: known-resp-src-port-action-list-name and known-resp-src-port-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-pkt-rate-cfg

Specification	Value
Type	*object*

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-pkt-rate-action and per-conn-pkt-rate-action-list-name are mutually exclusive

per-conn-pkt-rate-action-list-name

Description Configure action-list to take for per-conn-pkt-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-pkt-rate-action-list-name and per-conn-pkt-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

min-payload-size-cfg

Specification	Value
Type	*object*

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size-action

Description 'drop': Drop packets for min-payload-size (Default); 'blacklist-src': Blacklist-src for min-payload-size; 'ignore': Do nothing for min-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: min-payload-size-action and min-payload-size-action-list-name are mutually exclusive

min-payload-size-action-list-name

Description Configure action-list to take for min-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: min-payload-size-action-list-name and min-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

max-payload-size-cfg

Specification	Value
Type	*object*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

max-payload-size-action

Description 'drop': Drop packets for max-payload-size exceed (Default); 'blacklist-src': Blacklist-src for max-payload-size exceed; 'ignore': Do nothing for max-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: max-payload-size-action and max-payload-size-action-list-name are mutually exclusive

max-payload-size-action-list-name

Description Configure action-list to take for max-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: max-payload-size-action-list-name and max-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

2.33.597 ddos zone-template udp filter

UDP Filter Configuration

filter Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*udp-filter-name*
Collection Name	*filter-list*
Collection URI	/axapi/v3/ddos/zone-template/udp/{name}/filter
Element Name	filter
Element URI	/axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}
Element Attributes	filter_attributes
Partition Visibility	shared
Schema	`filter schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/zone-template/udp/{name}/filter

filter attributes

Create List

POST

/axapi/v3/ddos/zone-template/udp/{name}/filter

filter attributes

Get Object

GET

/axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}

filter attributes

Get List

GET

/axapi/v3/ddos/zone-template/udp/{name}/filter

filter-list

Modify Object

POST

/axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}

filter attributes

Replace Object

PUT

/axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}

filter attributes

Replace List

PUT

/axapi/v3/ddos/zone-template/udp/{name}/filter

filter-list

Delete Object

DELETE

/axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}

filter attributes

filter-list

filter-list is **JSON List** of *filter attributes*

```
filter-list : [
        { filter attributes },
        { filter attributes },
        ...
    ]
```

filter attributes

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.34 debug

Objects:

2.34.1 debug

Debugging functions

debug Specification

Parameter	Value
Type	*operational*
Element Name	debug
Element URI	/axapi/v3/debug
Element Attributes	debug_attributes
Partition Visibility	shared
Schema	`debug schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug

debug attributes

debug attributes

a10support

Description: a10support is a **JSON Block**. Please see below for *a10support*

Type: Object

Reference Object: */axapi/v3/debug/a10support*

aflow

Description: aflow is a **JSON Block**. Please see below for *aflow*

Type: Object

Reference Object: */axapi/v3/debug/aflow*

appcls

Description: appcls is a **JSON Block**. Please see below for *appcls*

Type: Object

Reference Object: */axapi/v3/debug/appcls*

auth

Description: auth is a **JSON Block**. Please see below for *auth*

Type: Object

Reference Object: */axapi/v3/debug/auth*

backtrace

Description: backtrace is a **JSON Block**. Please see below for *backtrace*

Type: Object

Reference Object: */axapi/v3/debug/backtrace*

bgp

Description: bgp is a **JSON Block**. Please see below for *bgp*

Type: Object

Reference Object: */axapi/v3/debug/bgp*

bridge-vlan-group

Description: bridge-vlan-group is a **JSON Block**. Please see below for *bridge-vlan-group*

Type: Object

Reference Object: */axapi/v3/debug/bridge-vlan-group*

cache

Description: cache is a **JSON Block**. Please see below for *cache*

Type: Object

Reference Object: */axapi/v3/debug/cache*

cgnv6

Description: cgnv6 is a **JSON Block**. Please see below for *cgnv6*

Type: Object

Reference Object: */axapi/v3/debug/cgnv6*

cli

Description: cli is a **JSON Block**. Please see below for *cli*

Type: Object

Reference Object: */axapi/v3/debug/cli*

conn-reuse

Description: conn-reuse is a **JSON Block**. Please see below for *conn-reuse*

Type: Object

Reference Object: */axapi/v3/debug/conn-reuse*

controller

Description: controller is a **JSON Block**. Please see below for *controller*

Type: Object

Reference Object: */axapi/v3/debug/controller*

cpu

Description: cpu is a **JSON Block**. Please see below for *cpu*

Type: Object

Reference Object: */axapi/v3/debug/cpu*

ddos

Description: ddos is a **JSON Block**. Please see below for *ddos*

Type: Object

Reference Object: */axapi/v3/debug/ddos*

diameter

Description: diameter is a **JSON Block**. Please see below for *diameter*

Type: Object

Reference Object: */axapi/v3/debug/diameter*

dns-cache

Description: dns-cache is a **JSON Block**. Please see below for *dns-cache*

Type: Object

Reference Object: */axapi/v3/debug/dns-cache*

dns-rrl

Description: dns-rrl is a **JSON Block**. Please see below for *dns-rrl*

Type: Object

Reference Object: */axapi/v3/debug/dns-rrl*

drop

Description: drop is a **JSON Block**. Please see below for *drop*

Type: Object

Reference Object: */axapi/v3/debug/drop*

dumpthread

Description: dumpthread is a **JSON Block**. Please see below for *dumpthread*

Type: Object

Reference Object: */axapi/v3/debug/dumpthread*

es

Description: es is a **JSON Block**. Please see below for *es*

Type: Object

Reference Object: */axapi/v3/debug/es*

fix

Description: fix is a **JSON Block**. Please see below for *fix*

Type: Object

Reference Object: */axapi/v3/debug/fix*

ftp

Description: ftp is a **JSON Block**. Please see below for *ftp*

Type: Object

Reference Object: */axapi/v3/debug/ftp*

ftp-proxy

Description: ftp-proxy is a **JSON Block**. Please see below for *ftp-proxy*

Type: Object

Reference Object: */axapi/v3/debug/ftp-proxy*

fw

Description: fw is a **JSON Block**. Please see below for *fw*

Type: Object

Reference Object: */axapi/v3/debug/fw*

generic-proxy

Description: generic-proxy is a **JSON Block**. Please see below for *generic-proxy*

Type: Object

Reference Object: */axapi/v3/debug/generic-proxy*

gslb

Description: gslb is a **JSON Block**. Please see below for *gslb*

Type: Object

Reference Object: */axapi/v3/debug/gslb*

gtp

Description: gtp is a **JSON Block**. Please see below for *gtp*

Type: Object

Reference Object: */axapi/v3/debug/gtp*

h323

Description: h323 is a **JSON Block**. Please see below for *h323*

Type: Object

Reference Object: */axapi/v3/debug/h323*

ha

Description: ha is a **JSON Block**. Please see below for *ha*

Type: Object

Reference Object: */axapi/v3/debug/ha*

hc

Description: hc is a **JSON Block**. Please see below for *hc*

Type: Object

Reference Object: */axapi/v3/debug/hc*

hm

Description: hm is a **JSON Block**. Please see below for *hm*

Type: Object

Reference Object: */axapi/v3/debug/hm*

hm-dplane

Description: hm-dplane is a **JSON Block**. Please see below for *hm-dplane*

Type: Object

Reference Object: */axapi/v3/debug/hm-dplane*

http-proxy

Description: http-proxy is a **JSON Block**. Please see below for *http-proxy*

Type: Object

Reference Object: */axapi/v3/debug/http-proxy*

http2

Description: http2 is a **JSON Block**. Please see below for *http2*

Type: Object

Reference Object: */axapi/v3/debug/http2*

hw-accelerate

Description: hw-accelerate is a **JSON Block**. Please see below for *hw-accelerate*

Type: Object

Reference Object: */axapi/v3/debug/hw-accelerate*

hw-compression

Description: hw-compression is a **JSON Block**. Please see below for *hw-compression*

Type: Object

Reference Object: */axapi/v3/debug/hw-compression*

imap-proxy

Description: imap-proxy is a **JSON Block**. Please see below for *imap-proxy*

Type: Object

Reference Object: */axapi/v3/debug/imap-proxy*

imish

Description: imish is a **JSON Block**. Please see below for *imish*

Type: Object

Reference Object: */axapi/v3/debug/imish*

imish-profile

Description: imish-profile is a **JSON Block**. Please see below for *imish-profile*

Type: Object

Reference Object: */axapi/v3/debug/imish-profile*

ip

Description: ip is a **JSON Block**. Please see below for *ip*

Type: Object

Reference Object: */axapi/v3/debug/ip*

ipv6

Description: ipv6 is a **JSON Block**. Please see below for *ipv6*

Type: Object

Reference Object: */axapi/v3/debug/ipv6*

isis

Description: isis is a **JSON Block**. Please see below for *isis*

Type: Object

Reference Object: */axapi/v3/debug/isis*

l2

Description: l2 is a **JSON Block**. Please see below for *l2*

Type: Object

Reference Object: */axapi/v3/debug/l2*

l2-redirect

Description: l2-redirect is a **JSON Block**. Please see below for *l2-redirect*

Type: Object

Reference Object: */axapi/v3/debug/l2-redirect*

l3

Description: l3 is a **JSON Block**. Please see below for *l3*

Type: Object

Reference Object: */axapi/v3/debug/l3*

l4

Description: l4 is a **JSON Block**. Please see below for *l4*

Type: Object

Reference Object: */axapi/v3/debug/l4*

l7

Description: l7 is a **JSON Block**. Please see below for *l7*

Type: Object

Reference Object: */axapi/v3/debug/l7*

l7session

Description: l7session is a **JSON Block**. Please see below for *l7session*

Type: Object

Reference Object: */axapi/v3/debug/l7session*

lacp

Description: lacp is a **JSON Block**. Please see below for *lacp*

Type: Object

Reference Object: */axapi/v3/debug/lacp*

layer2

Description: layer2 is a **JSON Block**. Please see below for *layer2*

Type: Object

Reference Object: */axapi/v3/debug/layer2*

lb

Description: lb is a **JSON Block**. Please see below for *lb*

Type: Object

Reference Object: */axapi/v3/debug/lb*

link-probe

Description: link-probe is a **JSON Block**. Please see below for *link-probe*

Type: Object

Reference Object: */axapi/v3/debug/link-probe*

list_all_cli

Description: list_all_cli is a **JSON Block**. Please see below for *list_all_cli*

Type: Object

Reference Object: */axapi/v3/debug/list_all_cli*

local-log

Description: local-log is a **JSON Block**. Please see below for *local-log*

Type: Object

Reference Object: */axapi/v3/debug/local-log*

logging

Description: logging is a **JSON Block**. Please see below for *logging*

Type: Object

Reference Object: */axapi/v3/debug/logging*

lsn

Description: lsn is a **JSON Block**. Please see below for *lsn*

Type: Object

Reference Object: */axapi/v3/debug/lsn*

management

Description: management is a **JSON Block**. Please see below for *management*

Type: Object

Reference Object: */axapi/v3/debug/management*

mgcp

Description: mgcp is a **JSON Block**. Please see below for *mgcp*

Type: Object

Reference Object: */axapi/v3/debug/mgcp*

migration

Description: migration is a **JSON Block**. Please see below for *migration*

Type: Object

Reference Object: */axapi/v3/debug/migration*

mlb

Description: mlb is a **JSON Block**. Please see below for *mlb*

Type: Object

Reference Object: */axapi/v3/debug/mlb*

monitor

Description: monitor is a **JSON Block**. Please see below for *monitor*

Type: Object

Reference Object: */axapi/v3/debug/monitor*

mqtt

Description: mqtt is a **JSON Block**. Please see below for *mqtt*

Type: Object

Reference Object: */axapi/v3/debug/mqtt*

msg-proxy

Description: msg-proxy is a **JSON Block**. Please see below for *msg-proxy*

Type: Object

Reference Object: */axapi/v3/debug/msg-proxy*

ospf

Description: ospf is a **JSON Block**. Please see below for *ospf*

Type: Object

Reference Object: */axapi/v3/debug/ospf*

packet

Description: packet is a **JSON Block**. Please see below for *packet*

Type: Object

Reference Object: */axapi/v3/debug/packet*

packet-capture

Description: packet-capture is a **JSON Block**. Please see below for *packet-capture*

Type: Object

Reference Object: */axapi/v3/debug/packet-capture*

polltech-enable

Description: polltech-enable is a **JSON Block**. Please see below for *polltech-enable*

Type: Object

Reference Object: */axapi/v3/debug/polltech-enable*

pop3-proxy

Description: pop3-proxy is a **JSON Block**. Please see below for *pop3-proxy*

Type: Object

Reference Object: */axapi/v3/debug/pop3-proxy*

proxy

Description: proxy is a **JSON Block**. Please see below for *proxy*

Type: Object

Reference Object: */axapi/v3/debug/proxy*

quic

Description: quic is a **JSON Block**. Please see below for *quic*

Type: Object

Reference Object: */axapi/v3/debug/quic*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *rate-limit*

Type: Object

Reference Object: */axapi/v3/debug/rate-limit*

rip

Description: rip is a **JSON Block**. Please see below for *rip*

Type: Object

Reference Object: */axapi/v3/debug/rip*

rt

Description: rt is a **JSON Block**. Please see below for *rt*

Type: Object

Reference Object: */axapi/v3/debug/rt*

scaleout

Description: scaleout is a **JSON Block**. Please see below for *scaleout*

Type: Object

lsn

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vtep-error

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

h323

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

imap-proxy

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cgnv6

Specification	Value
Type	*object*

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vpn

Specification	Value
Type	*object*

ike-gateway

Description Specify IKE gateway name (gateway filter name)

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/vpn/ike-gateway*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

strict

Description Only record the logs that can match Ike-gateway name

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

lb

Specification	Value
Type	*object*

all

Description Load Balancing debug all switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cfg

Description Load Balancing configuration debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clb

Description Cache Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

flow

Description Packet flow debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fwlb

Description Firewall Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

llb

Description Link Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

slb

Description Server Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cli

Specification	Value
Type	*object*

all

Description CLI all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io

Description CLI debug input-output switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parser

Description CLI debug parser switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

bridge-vlan-group

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

fix

Specification	Value
Type	*object*

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cache

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dumpthread

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

gtp

Specification	Value
Type	*object*

level

Description Debug level (Level 1: Errors Level 2: Minimal_info Level 3: Detailed_info)

Type: number

Range: 1-3

Default: 1

packet

Description Debug GTP packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

mqtt

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

imish-profile

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

appcls

Specification	Value
Type	*object*

level

Description '1': Display critical errors only; '2': Display all unusual results; '3': Display all appcls engine information;

Type: string

Supported Values: 1, 2, 3

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

generic-proxy

Specification	Value
Type	*object*

debug-level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-proxy

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

auth

Specification	Value
Type	*object*

authd

Description enable detail authd log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

client-addr

Description Filter SAML logs by client IP address

Type: string

Format: ipv4-address

level

Description '1': Diagnose Problems; '2': Detail packet flow;

Type: string

Supported Values: 1, 2

saml

Description Enable debug SAML authentication logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

saml-sp

Description Filter SAML logs by SAML service provider name (SAML SP name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

username

Description Show the logs of specific username (User name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtual-server

Description Show the logs of specific virtual-server (Virtual-server name)

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

ssl

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

stack

Description Debug TCP stack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

layer2

Specification	Value
Type	*object*

all

Description Layer2 all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

arp

Description Layer2 debug arp switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interface

Description Layer2 debug interface switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

misc

Description Layer2 debug misc switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trace

Description Layer2 debug trace switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlan

Description Layer2 debug vlan switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l7

Specification	Value
Type	*object*

http3

Description: http3 is a **JSON Block**. Please see below for *l7_http3*

Type: Object

Reference Object: */axapi/v3/debug/l7/http3*

l7_http3

Specification	Value
Type	*object*

level

Description Debug level (Level 1-5)

Type: number

Range: 1-5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vector

Specification	Value
Type	*object*

error

Description Debug logs for vector errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description Debug logs for vector packet flow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trace

Description Debug logs for vector callbacks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l2

Specification	Value
Type	*object*

mac

Description Debug mac learned packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l3

Specification	Value
Type	*object*

icmp

Description Debug icmp packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

imish

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

msg-proxy

Specification	Value
Type	*object*

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

backtrace

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet

Specification	Value
Type	*object*

all-ipv4

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-ipv6

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-sctp-ports

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-tcp-ports

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-udp-ports

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

arp

Description ARP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

count

Description Maximum packets to capture. Default is 3000 (Specify maximum packet number. For unlimited, specify 0)

Type: number

Range: 0-65535

detail

Description Print packet content

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ethernet

Description Ethernet interface number

Type: number

Format: interface

icmp

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interface

Description Interface to debug

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4ad

Description IP Address

Type: string

Format: ipv4-address

ipv6

Description IPV6

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6ad

Description IPV6 Address

Type: string

Format: ipv6-address

l3-protocol

Description Layer 3 protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-protocol

Description Layer 4 protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

neighbor

Description IPv6 Neighbor/Router

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-range

Description Port Number

Type: number

Range: 1-65535

sctp

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timestamp

Description Print timestamp instead of jiffies

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ve

Description ve number

Type: number

Range: 2-4094

migration

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

es

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

aflow

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ftp

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rate-limit

Specification	Value
Type	*object*

cpu-id

Description Starting From 0

Type: number

Range: 0-60

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-ip

Description Source Address

Type: string

Format: ipv4-address

life-cycle-log

Description Print entry life cycle info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

metric

Description CPS 0 Uplink 1 Downlink 2 Total 3

Type: number

Range: 0-3

per-pkt-log

Description Print entry info based on code path of each pkt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

raw-log

Description Print entry info per second

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tpl-id

Description Template ID

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l2-redirect

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sctp

Specification	Value
Type	*object*

level

Description Debug level (Level 1: Errors Level 2: Minimal_info Level 3: Detailed_info)

Type: number

Range: 1-3

Default: 1

packet

Description Debug SCTP packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

link-probe

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vtep-packet

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proxy

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rt

Specification	Value
Type	*object*

all

Description Routing all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

check

Description ROUTING debug check switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

command

Description Routing debug command switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor

Specification	Value
Type	*object*

all-slots

Description Display debug output of both Master and Blade

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cpuid

Description CPU id to debug (0,1,...)

Type: number

Range: 0-65535

filename

Description Filename to save debug output

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

filesize

Description maximum file size to save debug messages (MB)

Type: number

Range: 1-300

Default: 1

no-stop

Description Donot spawn another rimacli

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout

Description timeout to stop debug monitor in minutes

Type: number

Range: 1-9999

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

logging

Specification	Value
Type	*object*

all

Description Logging all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

command

Description Logging debug command switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Logging debug error switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hm-dplane

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

bgp

Specification	Value
Type	*object*

all

Description all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bfd

Description Bidirectional Forwarding Detection (BFD)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dampening

Description BGP Dampening

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description BGP events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filters

Description BGP filters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description BGP Finite State Machine

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

in

Description Inbound updates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keepalives

Description BGP keepalives

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nht

Description NHT message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description NSM message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out

Description Outbound updates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

updates

Description BGP updates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-category

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_all

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_ifsm

Specification	Value
Type	*object*

events

Description IFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description IFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description IFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_lsa

Specification	Value
Type	*object*

flooding

Description LSA Flooding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gererate

Description LSA Generation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description LSA Installation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maxage

Description LSA MaxAge processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refresh

Description LSA Refreshment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_route

Specification	Value
Type	*object*

ase

Description External route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ia

Description Inter-Area route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description Route installation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description SPF calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_bfd

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_nfsm

Specification	Value
Type	*object*

events

Description NFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description NFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description NFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_packet

Specification	Value
Type	*object*

dd

Description OSPFv3 Database Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detail information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hello

Description OSPFv3 Hello

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-ack

Description OSPFv3 Link State Acknowledgment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-request

Description OSPFv3 Link State Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-update

Description OSPFv3 Link State Update

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description Packet received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description Packet sent

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_events

Specification	Value
Type	*object*

abr

Description OSPF ABR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

asbr

Description OSPF ASBR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

os

Description OS events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

router

Description Other router events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlink

Description Virtual-Link event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ospf_nsm

Specification	Value
Type	*object*

interface

Description NSM interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

redistribute

Description NSM redistribute

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

diameter

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

table-sync-event

Specification	Value
Type	*object*

all

Description all Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: all,mac, arp, nd6, fibv4, and fibv6 are mutually exclusive

arp

Description ARP Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: arp,all, mac, nd6, fibv4, and fibv6 are mutually exclusive

fibv4

Description IPv4 FIB Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: fibv4,all, mac, arp, nd6, and fibv6 are mutually exclusive

fibv6

Description IPv6 FIB Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: fibv6,all, mac, arp, nd6, and fibv4 are mutually exclusive

mac

Description MAC Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: mac,all, arp, nd6, fibv4, and fibv6 are mutually exclusive

nd6

Description ND6 Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: nd6,all, mac, arp, fibv4, and fibv6 are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

a10support

Specification	Value
Type	*object*

duration

Description Duration in minutes

Type: number

Range: 1-10080

Default: 2

password

Description Password to be set

Type: string

Format: password

Maximum Length: 24 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssli

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

gslb

Specification	Value
Type	*object*

extended

Description Debug for additional info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glname

Description Debug for matched Geo-location

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

group

Description: group is a **JSON Block**. Please see below for *gslb_group*

Type: Object

Reference Object: */axapi/v3/debug/gslb/group*

id

Description Specify ID

Type: number

Range: 0-128

Default: 0

ip-addr

Description Debug for matched IP address

Type: string

Format: ipv4-address

ipv6-addr

Description Debug for matched IPv6 address

Type: string

Format: ipv6-address

memory

Description Debug GSLB memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

one-shot

Description Stop after get 64 states

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol

Description: protocol is a **JSON Block**. Please see below for *gslb_protocol*

Type: Object

Reference Object: */axapi/v3/debug/gslb/protocol*

state

Description Keep GSLB state information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

gslb_group

Specification	Value
Type	*object*

all

Description All trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cache

Description Cache trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description EVENTS trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description FSM trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description Remote IP address of GSLB controller of the group

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipc

Description IPC trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-alive

Description KEEPALIVE trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message

Description Debug GSLB group message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-all

Description All messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-control

Description GMP control messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-group

Description GMP group messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-keepalive

Description GMP keepalive messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-notify

Description GMP notify messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-open

Description GMP open messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-query

Description GMP query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Name of GSLB group

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

normal

Description Normal trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-ipv4

Description Specify remote IPv4 Address

Type: string

Format: ipv4-address

peer-ipv6

Description Specify remote IPv6 Address

Type: string

Format: ipv6-address

timer

Description Timer trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

update

Description Update trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

gslb_protocol

Specification	Value
Type	*object*

active-rdt

Description ARDT trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all

Description All trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cache

Description Cache trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description EVENTS trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description FSM trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description Specify the remote IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipc

Description IPC trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-alive

Description KEEPALIVE trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message

Description Debug GSLB protocol message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-all

Description All messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-ardt-query

Description GMP ardt-query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-ardt-report

Description GMP ardt-report messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-control

Description GMP control messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-keepalive

Description GMP keepalive messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-notify

Description GMP notify messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-open

Description GMP open messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-query

Description GMP query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-update

Description GMP update messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Specify the slb device name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

normal

Description Normal trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-ipv4

Description Specify remote IPv4 Address

Type: string

Format: ipv4-address

peer-ipv6

Description Specify remote IPv6 Address

Type: string

Format: ipv6-address

timer

Description Timer trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

update

Description Update trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hw-compression

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sess

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

management

Specification	Value
Type	*object*

all

Description management all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

system

Description management system debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

waf

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

snmp

Specification	Value
Type	*object*

all

Description SNMP all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description SNMP debug error switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description SNMP debug event switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

system

Specification	Value
Type	*object*

debug_system_enum

Description 'all': System all debug switch; 'aaa': System debug aaa switch; 'import-export': System debug import or export switch; 'ssl': System debug ssl switch;

Type: string

Supported Values: all, aaa, import-export, ssl

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

quic

Specification	Value
Type	*object*

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

level

Description Debug level (Level 1-5)

Type: number

Range: 1-5

tls

Description QUIC TLS

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-level

Description Debug level (Level 1-5)

Type: number

Range: 1-5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6

Specification	Value
Type	*object*

ospf

Description: ospf is a **JSON Block**. Please see below for *ipv6_ospf*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf*

rip

Description: rip is a **JSON Block**. Please see below for *ipv6_rip*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/rip*

ipv6_ospf

Specification	Value
Type	*object*

all

Description: all is a **JSON Block**. Please see below for *ipv6_ospf_all*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/all*

bfd

Description: bfd is a **JSON Block**. Please see below for *ipv6_ospf_bfd*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/bfd*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description: events is a **JSON Block**. Please see below for *ipv6_ospf_events*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/events*

ifsm

Description: ifsm is a **JSON Block**. Please see below for *ipv6_ospf_ifsm*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/ifsm*

lsa

Description: lsa is a **JSON Block**. Please see below for *ipv6_ospf_lsa*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/lsa*

nfsm

Description: nfsm is a **JSON Block**. Please see below for *ipv6_ospf_nfsm*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/nfsm*

nsm

Description: nsm is a **JSON Block**. Please see below for *ipv6_ospf_nsm*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/nsm*

packet

Description: packet is a **JSON Block**. Please see below for *ipv6_ospf_packet*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/packet*

route

Description: route is a **JSON Block**. Please see below for *ipv6_ospf_route*

Type: Object

Reference Object: */axapi/v3/debug/ipv6/ospf/route*

ipv6_ospf_all

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_ospf_ifsm

Specification	Value
Type	*object*

events

Description IFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description IFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description IFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_ospf_lsa

Specification	Value
Type	*object*

flooding

Description LSA Flooding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gererate

Description LSA Generation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description LSA Installation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maxage

Description LSA MaxAge processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refresh

Description LSA Refreshment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_ospf_route

Specification	Value
Type	*object*

ase

Description External route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ia

Description Inter-Area route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description Route installation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description SPF calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_ospf_bfd

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_ospf_nfsm

Specification	Value
Type	*object*

events

Description NFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description NFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description NFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_ospf_packet

Specification	Value
Type	*object*

dd

Description OSPFv3 Database Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detail information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hello

Description OSPFv3 Hello

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-ack

Description OSPFv3 Link State Acknowledgment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-request

Description OSPFv3 Link State Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-update

Description OSPFv3 Link State Update

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description Packet received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description Packet sent

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_ospf_events

Specification	Value
Type	*object*

abr

Description OSPF ABR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

asbr

Description OSPF ASBR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

os

Description OS events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

router

Description Other router events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlink

Description Virtual-Link event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_ospf_nsm

Specification	Value
Type	*object*

interface

Description NSM interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

redistribute

Description NSM redistribute

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6_rip

Specification	Value
Type	*object*

all

Description Enable all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detailed information display

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description RIPng events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description RIPng and NSM communication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description RIPng packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description RIPng receive packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description RIPng send packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http2

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ftp-proxy

Specification	Value
Type	*object*

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

smtp

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

visibility

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

xflow

Description debug xflow monitoring

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

controller

Specification	Value
Type	*object*

anomaly

Description Dump per-request in anomaly cases only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

app-svc-id

Description Application service id (virtual-server_port_protocol)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

error

Description Debug logs for controller (error)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

logd-audit-export

Description Debug logs for controller (logd-audit-export)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

logd-syslog-export

Description Debug logs for controller (logd-syslog-export)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

metrics

Description Debug logs for controller (metrics)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

object-uuid

Description UUID of the object to filter

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

per-connection

Description Debug logs for controller (per-connection)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

per-request

Description Debug logs for controller (per-request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

registration

Description Debug logs for controller (registration)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uri

Description URI of the object to filter

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

pop3-proxy

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hm

Specification	Value
Type	*object*

level

Description Debug level (Level 1-3)

Type: number

Range: 1-3

method-type

Description 'icmp': ICMP type; 'tcp': TCP type; 'udp': UDP type; 'ftp': FTP type; 'http': HTTP type; 'snmp': SNMP type; 'smtp': SMTP type; 'dns': DNS type; 'dns-tcp': DNS TCP type; 'pop3': POP3 type; 'imap': IMAP type; 'sip': SIP type; 'sip-tcp': SIP TCP type; 'radius': RADIUS type; 'ldap': LDAP type; 'rtsp': RTSP type; 'kerberos-kdc': Kerberos KDC type; 'database': DATABASE type; 'external': EXTERNAL type; 'https': HTTPS type; 'ntp': NTP type; 'compound': Compound type;

Type: string

Supported Values: icmp, tcp, udp, ftp, http, snmp, smtp, dns, dns-tcp, pop3, imap, sip, sip-tcp, radius, ldap, rtsp, kerberos-kdc, database, external, https, ntp, compound

pin-uid

Description Debug Pin Unique Id

Type: number

Range: 1-2000000000

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hc

Specification	Value
Type	*object*

anomaly

Description Dump per-request in anomaly cases only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

app-svc-id

Description Application service id (virtual-server_port_protocol)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

error

Description Debug logs for harmony controller (error)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

logd-audit-export

Description Debug logs for harmony controller (logd-audit-export)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

logd-syslog-export

Description Debug logs for harmony controller (logd-syslog-export)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

metrics

Description Debug logs for harmony controller (metrics)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

object-uuid

Description UUID of the object to filter

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

per-connection

Description Debug logs for harmony controller (per-connection)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

per-request

Description Debug logs for harmony controller (per-request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

registration

Description Debug logs for harmony controller (registration)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uri

Description URI of the object to filter

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

scaleout

Specification	Value
Type	*object*

config

Description Debug logs for scaleout config change

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

debug-level

Description Debug level (Level 1-3)

Type: number

Range: 1-3

event

Description Debug logs for scaleout events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description Debug logs for scaleout packet flow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-sync

Description Debug logs for scaleout session sync events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ha

Specification	Value
Type	*object*

debug-level

Description Debug level (Level 1-7)

Type: number

Range: 1-7

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

mlb

Specification	Value
Type	*object*

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

isis

Specification	Value
Type	*object*

all

Description Enable all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bfd

Description Bidirectional Forwarding Detection (BFD)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description IS-IS Events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ifsm

Description IS-IS Interface Finite State Machine

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lsp

Description IS-IS Link State PDU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nfsm

Description IS-IS Neighbor Finite State Machine

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description IS-IS NSM information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pdu

Description IS-IS Protocol Data Unit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description IS-IS SPF Calculation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

lacp

Specification	Value
Type	*object*

all

Description all - turn on all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cli

Description cli - echo commands to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description detail - echo timer start/stop to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description event - echo events to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha

Description ha - echo High availability events to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description packet - echo packet contents to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sync

Description sync - echo synchronization to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timer

Description timer - echo timer expiry to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hw-accelerate

Specification	Value
Type	*object*

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

smpp

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

threat-intel

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

polltech-enable

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vtep-event

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rip

Specification	Value
Type	*object*

all

Description Enable all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detailed information display

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description RIPng events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description RIPng and NSM communication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description RIPng packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description RIPng receive packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description RIPng send packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ddos

Specification	Value
Type	*object*

control-var

Description Debug DDOS Control Var

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cache

Description Debug DDOS DNS Cache

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description Debug DDOS event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event-filter

Description Set debug DDOS event filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

flow-based-detection

Description Debug flow samples based DDOS detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

progression-tracking-source

Description Debug DDOS Progression Tracking Slow Attacker Identification Event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zbar

Description Debug DDOS zbar event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip

Specification	Value
Type	*object*

ACK

Description Method ACK

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

BYE

Description SIP Method BYE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

CANCEL

Description SIP Method CANCEL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

INFO

Description SIP Method INFO

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

INVITE

Description Method INVITE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

MESSAGE

Description SIP Method MESSAGE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

NOTIFY

Description SIP Method NOTIFY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

OPTIONS

Description SIP Method OPTIONS

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

PRACK

Description SIP Method PRACK

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

PUBLISH

Description SIP Method PUBLISH

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

REFER

Description SIP Method REFER

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

REGISTER

Description SIP Method REGISTER

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

SUBSCRIBE

Description SIP Method SUBSCRIBE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

UPDATE

Description SIP Method UPDATE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

method

Description Set filter with SIP method types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-rrl

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture

Specification	Value
Type	*object*

capture-config

Description Specify capture-config. Default all (Capture config)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

count

Description Maximum packets to capture. Default is 10 (Specify maximum packet number. For unlimited, specify 0)

Type: number

Range: 0-1000

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

conn-reuse

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l7session

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache

Specification	Value
Type	*object*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

fw

Specification	Value
Type	*object*

ddos

Description FW DDoS detection/mitigation logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

local-log

Specification	Value
Type	*object*

group

Description 'query': Debug local log query (axapi).; 'db-mgr': Debug local log database management.; 'db-write': Debug local log insert local log into database.; 'queue': Debug local log generate and inqueue/dequeue.;

Type: string

Supported Values: query, db-mgr, db-write, queue

level

Description Debug level (Level 1-3. 1:error, 2:notice, 3:Info)

Type: number

Range: 1-3

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

list_all_cli

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

mgcp

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cpu

Specification	Value
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.34.2 debug aflex

aFleX Script module parameters

aflex Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	aflex

debug-traffic-capture attributes

enable

Description Enable Debug Traffic Capture

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maximum-file-size

Description Specify pcapng filesize in MB (default 100)

Type: number

Range: 1-150

maximum-history-recordings

Description Number of crashed samples (default 5)

Type: number

Range: 1-10

record-direction-type

Description 'ingress-only': Record all ingress traffic; 'all-direction': Record all ingress and egress traffic;

Type: string

Supported Values: ingress-only, all-direction

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.35.2 debug-traffic-capture oper

Operational Status for the object debug-traffic-capture

debug-traffic-capture Specification

Type	*object*

file-name

Description Guest-File Name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

ng-waf-custom-page

Specification	Value
Type	*object*

page-name

Description Local File Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

cgnv6

Specification	Value
Type	*object*

filename

Description Specify the port-mapping-file to be deleted

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

fixed-nat

Description Delete fixed-nat port-mapping-file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lw-4o6-binding-table-validation-log

Description LW-4O6 Binding Table validation log File

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lw-filename

Description LW-4O6 Binding Table Validation Log File Name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

health-postfile

Specification	Value
Type	*object*

file-name

Description Specify the File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

debug-monitor

Specification	Value
Type	*object*

file-name

Description Local File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

auth-portal-image

Specification	Value
Type	*object*

image-name

Description Local File Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

glm-license

Specification	Value
Type	*object*

a10-ti

Description only remove A10 Threat Intel license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipsec-vpn

Description only remove IPSEC VPN license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ngwaf

Description only remove NGWAF license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

qosmos

Description only remove QOSMOS license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secure-gaming

Description only remove Secure gaming license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threatstop

Description only remove ThreatSTOP license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

webroot

Description only remove Webroot license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

webroot-ti

Description only remove Webroot Threat Intel license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-jwks

Specification	Value
Type	*object*

jwk-name

Description Local File Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

partition

Specification	Value
Type	*object*

id

Description Specify unique Partition id

Type: number

partition-name

Description Object partition name

Type: string

Maximum Length: 14 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/partition*

web-category

Specification	Value
Type	*object*

database

Description Delete web-category database

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threat-intel

Specification	Value
Type	*object*

database

Description 'webroot': Delete webroot module database;

Type: string

Supported Values: webroot

startup-config

Specification	Value
Type	*object*

file-name

Description Local Configuration Profile Name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

service-partition

Specification	Value
Type	*object*

id

Description Specify unique service partition id

Type: number

partition-name

Description Object service partition name

Type: string

Maximum Length: 14 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/service-partition*

auth-saml-idp

Specification	Value
Type	*object*

saml-idp-name

Description Local IDP metadata name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

2.36.2 delete license

Remove softax license

license Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	license
Element URI	/axapi/v3/delete/license
Element Attributes	license_attributes
Partition Visibility	None
Schema	`license schema`

Operations Allowed:

Create Object

POST

/axapi/v3/delete/license

license attributes

Get Object

GET

/axapi/v3/delete/license

license attributes

Modify Object

POST

/axapi/v3/delete/license

license attributes

Delete Object

DELETE

/axapi/v3/delete/license

Description Ethernet port

Type: number

Format: interface

ethernet-start

Description Ethernet port (Ethernet Interface number)

Type: number

Format: interface

ssh

Specification	Value
Type	*object*

management

Description Management port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

https

Specification	Value
Type	*object*

management

Description Management port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.37.3 disable-management service http

HTTP service

http Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	http
Element URI	/axapi/v3/disable-management/service/http
Element Attributes	http_attributes
Partition Visibility	shared
Schema	`http schema`

Operations Allowed:

Create Object

POST

/axapi/v3/disable-management/service/http

http attributes

Get Object

GET

/axapi/v3/disable-management/service/http

http attributes

Modify Object

POST

/axapi/v3/disable-management/service/http

http attributes

Replace Object

PUT

https attributes

Delete Object

DELETE

/axapi/v3/disable-management/service/https

https attributes

https attributes

management

Description Management port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.37.5 disable-management service ntp

NTP service

ntp Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	ntp
Element URI	/axapi/v3/disable-management/service/ntp
Element Attributes	ntp_attributes
Partition Visibility	shared
Schema	`ntp schema`

Operations Allowed:

Create Object

POST

/axapi/v3/disable-management/service/ntp

ntp attributes

```
POST /axapi/v3/disable-management/service/ntp
Payload:
{
    "ntp": {
        "management": 1
    }
}
```

Get Object

GET

/axapi/v3/disable-management/service/ntp

ntp attributes

```
GET /axapi/v3/disable-management/service/ntp
Reponse:
{
    "ntp": {
        "management": 1,

sign-zone-now

Description: sign-zone-now is a **JSON Block**. Please see below for *sign-zone-now*

Type: Object

Reference Object: */axapi/v3/dnssec/sign-zone-now*

standalone

Description Run DNSSEC in standalone mode, in GSLB group mode by default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template-list

Type: List

Reference Object: */axapi/v3/dnssec/template/{dnssec-temp-name}*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

key-rollover

Specification	Value
Type	*object*

dnssec-key-type

Description 'ZSK': Zone Signing Key; 'KSK': Key Signing Key;

Type: string

Supported Values: ZSK, KSK

ds-ready-in-parent-zone

Description DS RR is already ready in the parent zone

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ksk-start

Description start KSK rollover in emergency mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description Specify the name for the DNS zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

zsk-start

Description start ZSK rollover in emergency mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sign-zone-now

Specification	Value
Type	*object*

zone-name

Description Specify the name for the DNS zone, empty means sign all zones

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

dnskey

Specification	Value
Type	*object*

key-delete

Description Delete the DNSKEY file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description DNS zone name of the child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

template-list

Specification	Value
Type	*list*
Block object keys	

algorithm

Description 'RSASHA1': RSASHA1 algorithm; 'RSASHA256': RSASHA256 algorithm; 'RSASHA512': RSASHA512 algorithm;

Type: string

Supported Values: RSASHA1, RSASHA256, RSASHA512

combinations-limit

Description the max number of combinations per RRset (Default value is 31)

Type: number

Range: 1-65535

dnskey-ttl-k

Description The TTL value of DNSKEY RR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnskey-ttl-v

Description in seconds, 14400 seconds by default

Type: number

Range: 1-864000

Default: 14400

dnssec-temp-name

Description DNSSEC Template Name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

dnssec-template-ksk

Description: dnssec-template-ksk is a **JSON Block**. Please see below for *template-list_dnssec-template-ksk*

Type: Object

dnssec-template-zsk

Description: dnssec-template-zsk is a **JSON Block**. Please see below for *template-list_dnssec-template-zsk*

Type: Object

enable-nsec3

Description enable NSEC3 support. disabled by default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hsm

Description specify the HSM template

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/hsm/template*

return-nsec-on-failure

Description return NSEC/NSEC3 or not on failure case. return by default

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

signature-validity-period-k

Description The period that a signature is valid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

signature-validity-period-v

Description in days, 10 days by default

Type: number

Range: 5-30

Default: 10

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_dnssec-template-ksk

Specification	Value
Type	*object*

ksk-keysize-k

Description Specify the number of bits in the DNSSEC KSK keys

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ksk-keysize-v

Description Default size is 2048 and must be an exact multiple of 64

Type: number

Range: 1024-4096

ksk-lifetime-k

Description Set the lifetime for DNSSEC KSK keys in days

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ksk-lifetime-v

Description Default value is 365 days

Type: number

Range: 2-3650

ksk-rollover-time-k

Description Set the rollover time in days

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zsk-rollover-time-v

Description 7 days less than the lifetime by default

Type: number

Range: 1-3650

Default: 358

template-list_dnssec-template-zsk

Specification	Value
Type	*object*

zsk-keysize-k

Description Specify the number of bits in the DNSSEC ZSK keys

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zsk-keysize-v

Description Default size is 2048 and must be an exact multiple of 64

Type: number

Range: 1024-4096

zsk-lifetime-k

Description Set the lifetime for DNSSEC ZSK keys in days

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zsk-lifetime-v

Description Default value is 90 days

Type: number

Range: 2-3650

Default: 90

zsk-rollover-time-k

Description Set the rollover time in days

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zsk-rollover-time-v

Description 7 days less than the lifetime by default

Type: number

Range: 1-3650

Default: 83

ds

Specification	Value
Type	*object*

ds-delete

Description Delete the DS file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description DNS zone name of the child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

template-list

template-list is **JSON List** of *template attributes*

template-list : [

{ *template attributes* },

{ *template attributes* },

...

]

template attributes

algorithm

Description 'RSASHA1': RSASHA1 algorithm; 'RSASHA256': RSASHA256 algorithm; 'RSASHA512': RSASHA512 algorithm;

Type: string

Supported Values: RSASHA1, RSASHA256, RSASHA512

combinations-limit

Description the max number of combinations per RRset (Default value is 31)

Type: number

Range: 1-65535

dnskey-ttl-k

Description The TTL value of DNSKEY RR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnskey-ttl-v

Description in seconds, 14400 seconds by default

Type: number

Range: 1-864000

Default: 14400

dnssec-temp-name

Description DNSSEC Template Name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

dnssec-template-ksk

Type: Object

enable-nsec3

Description enable NSEC3 support. disabled by default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hsm

Description specify the HSM template

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/hsm/template*

return-nsec-on-failure

Description return NSEC/NSEC3 or not on failure case. return by default

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

signature-validity-period-k

Description The period that a signature is valid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

signature-validity-period-v

Description in days, 10 days by default

Type: number

Range: 5-30

Default: 10

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dnssec-template-ksk

Specification	Value
Type	*object*

ksk-keysize-k

Description Specify the number of bits in the DNSSEC KSK keys

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ksk-keysize-v

Description Default size is 2048 and must be an exact multiple of 64

Type: number

Range: 1024-4096

ksk-lifetime-k

Description Set the lifetime for DNSSEC KSK keys in days

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ksk-lifetime-v

Description Default value is 365 days

Type: number

Range: 2-3650

ksk-rollover-time-k

Description Set the rollover time in days

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zsk-rollover-time-v

Description 7 days less than the lifetime by default

Type: number

Range: 1-3650

Default: 358

dnssec-template-zsk

Specification	Value
Type	*object*

zsk-keysize-k

Description Specify the number of bits in the DNSSEC ZSK keys

Type: boolean

}
```

domain-list-list

domain-list-list is **JSON List** of *domain-list attributes*

domain-list-list : [

{ *domain-list attributes* },

{ *domain-list attributes* },

...

]

domain-list attributes

domain-name-list

Type: List

file

Description Create/Edit a domain-list stored as a file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

match-type-axfr

Type: List

match-type-equals

Type: List

match-type-suffix

Type: List

name

Description Specify name of the domain list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

match-type-suffix

Specification	Value
Type	*list*
Block object keys	

suffix

Description Specify suffix matching the Domain Name

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

match-type-equals

Specification	Value
Type	*list*
Block object keys	

equals

Description Specify exact match for the Domain Name

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

match-type-axfr

Specification	Value
Type	*list*
Block object keys	

axfr-domain

Description Import the list of domains via zone-transfer

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

axfr-ip-address

Description IP address of the listening DNS server

Type: string

Format: ipv4-address

axfr-ipv6-address

Description IPv6 address of the listening DNS server

Type: string

Format: ipv6-address

ip-axfr-port-num

Description Port Number

Type: number

Range: 1-65535

Default: 53

ip-refresh-intvl

Description Poll every x minutes to check for an Updated axfr default

Type: number

Range: 30-255

Default: 30

ipv6-axfr-port-num

Description Port Number

Type: number

Range: 1-65535

Default: 53

ipv6-refresh-intvl

Description Poll every x minutes to check for an Updated axfr default

Type: number

Range: 30-255

Default: 30

domain-name-list

Specification	Value
Type	*list*
Block object keys	

domain-name

Description Domain name to be added to this domain list

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

fail-interval

Description Set up the failure interval in second for the DNS resolution. (default is 30-second)

Type: number

Range: 3-600

Default: 30

interval

Description DNS query interval (in minute, default is 10)

Type: number

Range: 1-1440

Default: 10

2.42 domain-list-oper

Objects:

2.42.1 domain-list-oper

Show domain list

domain-list-oper Specification

Parameter	Value
Type	*operational*
Element Name	domain-list-oper
Element URI	/axapi/v3/domain-list-oper

enable-core attributes

```
PUT /axapi/v3/enable-core
Payload:
{
    "enable-core": {
        "core-level": "a10"
    }
}
```

Delete Object

DELETE

/axapi/v3/enable-core

enable-core attributes

```
DELETE /axapi/v3/enable-core
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Enable A10 coredump."
    }
}
```

enable-core attributes

core-level

Description 'a10': Enable A10 core dump, by default; 'system': Enable system coredump;

Type: string

Supported Values: a10, system

Default: a10

Mutual Exclusion: core-level and full are mutually exclusive

full

Description Enable full system core dump

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: full and core-level are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.44 enable-management

Objects:

2.44.1 enable-management

2.44.25 enable-management service ntp acl-v6

IPv6 ACL for NTP service

acl-v6 Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*acl-name*
Collection Name	*acl-v6-list*
Collection URI	/axapi/v3/enable-management/service/ntp/acl-v6
Element Name	acl-v6
Element URI	/axapi/v3/enable-management/service/ntp/acl-v6/{acl-name}
Element Attributes	acl-v6_attributes
Partition Visibility	shared
Schema	`acl-v6 schema`

Operations Allowed:

Create Object

POST

/axapi/v3/enable-management/service/ntp/acl-v6

acl-v6 attributes

```
POST /axapi/v3/enable-management/service/ntp/acl-v6/
Payload:
{
    "acl-v6": {
        "acl-name": "a",
        "user-tag": "a"
    }
}
```

Create List

POST

/axapi/v3/enable-management/service/ntp/acl-v6

acl-v6 attributes

Get Object

GET

/axapi/v3/enable-management/service/ntp/acl-v6/{acl-name}

acl-v6 attributes

```
GET /axapi/v3/enable-management/service/ntp/acl-v6/a
Reponse:
{
```

(continues on next page)

(continued from previous page)

```
    "acl-v6": {
        "acl-name": "a",
        "management": 0,
        "all-data-intf": 0,
        "uuid": "083da1c8-b6c1-11ef-8f5a-ae71681635d0",
        "user-tag": "a",
        "a10-url": "/axapi/v3/enable-management/service/ntp/acl-v6/a"
    }
}
```

Get List

GET

/axapi/v3/enable-management/service/ntp/acl-v6

acl-v6-list

Modify Object

POST

/axapi/v3/enable-management/service/ntp/acl-v6/{acl-name}

acl-v6 attributes

Replace Object

PUT

/axapi/v3/enable-management/service/ntp/acl-v6/{acl-name}

acl-v6 attributes

```
PUT /axapi/v3/enable-management/service/ntp/acl-v6/a
Payload:
{
    "acl-v6": {
        "acl-name": "a",
        "user-tag": "abcd"
    }
}
```

Replace List

PUT

/axapi/v3/enable-management/service/ntp/acl-v6

acl-v6-list

Delete Object

DELETE

/axapi/v3/enable-management/service/ntp/acl-v6/{acl-name}

acl-v6 attributes

```
DELETE /axapi/v3/enable-management/service/ntp/acl-v6/a
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Success"
    }
}
```

acl-v6-list

acl-v6-list is **JSON List** of *acl-v6 attributes*

acl-v6-list : [

{ *acl-v6 attributes* },

{ *acl-v6 attributes* },

...

]

acl-v6 attributes

acl-name

Description ACL name

Type: string

Maximum Length: 16 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ipv6/access-list*

all-data-intf

Description All Data Interfaces

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

eth-cfg

Type: List

management

Description Management Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-cfg

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ve-cfg

Type: List

tunnel-cfg

Specification	Value
Type	*list*
Block object keys	

tunnel-end

Description tunnel port

Type: number

tunnel-start

Description tunnel port (tunnel Interface number)

Type: number

ve-cfg

Specification	Value
Type	*list*
Block object keys	

ve-end

Description VE port

Type: number

ve-start

Description VE port (VE Interface number)

Type: number

eth-cfg

Specification	Value
Type	*list*
Block object keys	

ethernet-end

Description Ethernet port

Type: number

Format: interface

ethernet-start

Description Ethernet port (Ethernet Interface number)

Type: number

Format: interface

2.44.26 enable-management service ping

Ping service

ping Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	ping
Element URI	/axapi/v3/enable-management/service/ping
Element Attributes	ping_attributes
Partition Visibility	shared
Schema	`ping schema`

Operations Allowed:

Create Object

POST

/axapi/v3/enable-management/service/ping

ping attributes

Get Object

GET

/axapi/v3/enable-management/service/ping

ping attributes

Modify Object

POST

/axapi/v3/enable-management/service/ping

        "msg": "Success"
    }
}
```

server attributes

host-ipv4

Description Set kafka Broker ip address or hostname

Type: string

Format: host

port

Description Set remote kafka port number (Remote kafka port number 1-32767, default is 9092)

Type: number

Range: 1-32767

Default: 9092

sampling-enable

Type: List

use-mgmt-port

Description Use management port for connections

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description NGWAF HC metrics export

Type: number

Format: counter

ngwaf-hc-metrics-topic-dequeue-err

Description NGWAF HC metrics export failed

Type: number

Format: counter

pc-acos-harmony-topic

Description L4 PC logs sent

Type: number

Format: counter

pc-acos-harmony-topic-dequeue-err

Description L4 PC logs dropped,enq error analytics queues

Type: number

Format: counter

pc-encoding-failed

Description L4 PC logs dropped,encoding error

Type: number

Format: counter

pc-throttle-drop

Description L4 PC logs dropped,throttling

Type: number

Format: counter

pe-acos-harmony-topic

Description L7 PE logs sent

Type: number

Format: counter

pe-acos-harmony-topic-dequeue-err

Description L7 PE dropped,enq error analytics queues

Type: number

Format: counter

pe-acos-harmony-topic-enqueue-err

Description L7 PE dropped,enq error on acos queues

Type: number

Format: counter

pr-acos-harmony-topic

Description L7 PR logs sent

Type: number

Format: counter

pr-acos-harmony-topic-dequeue-err

Description L7 PR dropped,enq error analytics queues

Type: number

Format: counter

pr-acos-harmony-topic-enqueue-err

Description L7 PR dropped,enq error on acos queues

Type: number

Format: counter

pr-be-ttfb-anomaly

Description L7 PR back-end ttfb is negative

Type: number

Format: counter

pr-be-ttlb-anomaly

Description L7 PR back-end ttlb is negative

Type: number

Format: counter

pr-in-latency-anomaly

Description L7 PR on latency negative

Type: number

Format: counter

pr-in-latency-threshold-exceed

Description L7 PR on latency threshold exceeded

Type: number

Format: counter

pr-not-allowed-drop

Description L7 PR dropped, not allowed to be sent

Type: number

Format: counter

pr-out-latency-anomaly

Description L7 PR out latency negative

Type: number

Format: counter

pr-out-latency-threshold-exceed

Description L7 PR out latency threshold exceeded

Type: number

Format: counter

pr-throttle-drop

Description L7 PR dropped,log throttling

Type: number

Format: counter

rule-set-application-metrics-topic

Description AppFW metrics sent

Type: number

Format: counter

rule-set-application-metrics-topic-dequeue-err

Description AppFW metrics dropped,enq error analytics queues

Type: number

Format: counter

slb-client-ssl-counters-metrics-topic

Description Client SSL metrics sent

Type: number

Format: counter

slb-client-ssl-counters-metrics-topic-dequeue-err

Description Cilent SSL metrics dropped,enq error analytics qs

Type: number

Format: counter

slb-server-ssl-counters-metrics-topic

    }
}
```

fail-safe attributes

config

Description: config is a **JSON Block**. Please see below for *config*

Type: Object

Reference Object: */axapi/v3/fail-safe/config*

dataplane-recovery-timeout

Description dataplane hung detection timeout before ACOS is restarted (in seconds)

Type: number

Range: 1-30

Default: 5

disable-failsafe

Description: disable-failsafe is a **JSON Block**. Please see below for *disable-failsafe*

Type: Object

Reference Object: */axapi/v3/fail-safe/disable-failsafe*

fpga-buff-recovery-threshold

Description FPGA buffers recovery threshold (Units of 256 buffers (default 2))

Type: number

Range: 1-10

Default: 2

fpga-monitor-enable

Description FPGA monitor feature enable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fpga-monitor-forced-reboot

Description FPGA monitor forced reboot in error condition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fpga-monitor-interval

Description FPGA monitor packet interval (seconds) (Numbers of seconds between sending packets (default 1))

Type: number

Range: 1-60

Default: 1

fpga-monitor-threshold

Description FPGA monitor packet missed for error condition (Numbers of missed monitor packets before setting error condition (default 30))

Type: number

Range: 2-255

Default: 30

hw-error-monitor

Description 'hw-error-monitor-disable': Disable fail-safe hardware error monitor; 'hw-error-monitor-enable': Enable fail-safe hardware error monitor;

Type: string

Supported Values: hw-error-monitor-disable, hw-error-monitor-enable

Default: hw-error-monitor-enable

hw-error-recovery-timeout

Description Hardware error recovery timeout (minutes) (waiting time of recovery from hardware errors (default 0))

Type: number

Range: 1-1440

hw-ssl-timeout-monitor

Description 'hw-ssl-timeout-monitor-disable': Disable fail-safe hardware SSL timeout monitor; 'hw-ssl-timeout-monitor-enable': Enable fail-safe hardware SSL timeout monitor;

Type: string

Supported Values: hw-ssl-timeout-monitor-disable, hw-ssl-timeout-monitor-enable

Default: hw-ssl-timeout-monitor-enable

kill

Description Stop the traffic and log the event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: kill and log are mutually exclusive

log

Description Log the event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: log and kill are mutually exclusive

session-mem-recovery-threshold

Description Session memory recovery threshold (percentage) (Percentage of available session memory (default 30%))

Type: number

Range: 1-100

Default: 30

sw-error-monitor-enable

Description Enable fail-safe software error monitor

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sw-error-recovery-timeout

Description Software error recovery timeout (minutes) (waiting time of recovery from software errors (default 3))

Type: number

Range: 1-1440

Default: 3

total-memory-size-check

Description Check total memory size of current system (Size of memory (GB))

Type: number

Range: 1-256

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

disable-failsafe

Specification	Value
Type	*object*

action

Description 'all': Disable All; 'io-buffer': Disable I/O Buffer; 'session-memory': Disable Session Memory; 'system-memory': Disable System Memory;

Type: string

Supported Values: all, io-buffer, session-memory, system-memory

Default: all

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

config

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 64 characters

Maximum Length: 1 characters

aws-accesskey

Specification	Value
Type	*object*

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

user

Description user name of the pub key

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tsig

Specification	Value
Type	*object*

action

Description 'import': import; 'export': export; 'check': check; 'delete': delete; 'replace': replace;

Type: string

Supported Values: import, export, check, delete, replace

device

Description Device (Device ID)

Type: number

file

Description TSIG file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

syslog

Specification	Value
Type	*object*

action

Description 'export': export;

Type: string

Supported Values: export

file

Description syslog local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

axdebug-config

Specification	Value
Type	*object*

action

Description 'export': export; 'delete': delete;

Type: string

Supported Values: export, delete

file

Description axdebug local config file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-portal

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description Destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description Authentication portal local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-jwks

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, copy, rename, check, replace, delete

dst-file

Description Destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description JWK local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

aflex

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description aflex local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

skip-backup

Description Skip backup logic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

health-postfile

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 32 characters

Maximum Length: 1 characters

file

Description Specify the File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssh-pubkey

Specification	Value
Type	*object*

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

user

Description user name of the pub key

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-category-license

Specification	Value
Type	*object*

action

Description 'import': import;

Type: string

Supported Values: import

device

Description Device (Device ID)

Type: number

file

Description Web-Category license local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

use-mgmt-port

Description Enable management port for backend

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-backup

Specification	Value
Type	*object*

all

Description all log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

date

Description specify number of days

Type: number

Range: 1-31

day

Description Most recent day

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expedite

Description Expedite the Backup

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

month

Description Most recent month

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

period

Description Specify backup period

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stats-data

Description Backup web statistical data

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

week

Description Most recent week

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

waf

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-crl

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, replace, delete

file

Description ssl crl local file name

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

debug-monitor

Specification	Value
Type	*object*

action

Description 'export': export;

Type: string

Supported Values: export

file

Description debug monitor local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

web-service-cert-key

Specification	Value
Type	*object*

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

axdebug-capture

Specification	Value
Type	*object*

action

Description 'delete': delete;

Type: string

Supported Values: delete

file

Description axdebug local capture file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ssl-cert-poc

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

certificate-type

Description 'pem': pem; 'der': der; 'pfx': pfx; 'p7b': p7b;

Type: string

Supported Values: pem, der, pfx, p7b

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

file

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description public-key

Type: string

Format: string-rlx

Maximum Length: 2048 characters

Maximum Length: 1 characters

pfx-password

Description The password for certificate file (pfx type only)

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

csr

Specification	Value
Type	*object*

action

Description 'export': export;

Type: string

Supported Values: export

file

Description Specify the File Name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-portal-image

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description Destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description Authentication portal image local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

core

Specification	Value
Type	*object*

action

Description 'export': export; 'delete': delete;

Type: string

Supported Values: export, delete

file

Description local core file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

slot

Description specify slot id in chassis

Type: number

Range: 0-1

ng-waf-module

Specification	Value
Type	*object*

action

Description 'import': import; 'replace': replace;

Type: string

Supported Values: import, replace

file

Description NG WAF module local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

act-type

Description Specify ACT package type (i.e. slug/destination name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

app

Description: app is a **JSON Block**. Please see below for *template_app*

Type: Object

Reference Object: */axapi/v3/file/template/app*

dst-file

Description destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description aflex local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_app

Specification	Value
Type	*object*

act-name

Description

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

action

Description

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

version

Description

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

class-list

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description class list local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

glm-license

Specification	Value
Type	*object*

action

Description 'import': import;

Type: string

Supported Values: import

device

Description Device (Device ID)

Type: number

file

Description glm license local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

dnssec-ds

Specification	Value
Type	*object*

action

Description 'import': import; 'export': export;

Type: string

Supported Values: import, export

file

Description dnssec ds local file name

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

local-uri-file

Specification	Value
Type	*object*

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description local uri file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Type: string

Supported Values: match-all, none-of, not-match, match-any

tcp-flags-bitmask

Description Bitmask in Hex

Type: string

Format: time

Maximum Length: 65535 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-list

Specification	Value
Type	*list*
Block object keys	

port-attribute

Description 'eq': Match only packets on a given port; 'gt': Match only packets with a greater port number; 'lt': Match only packets with a lower port number; 'range': match only packets in the range of port numbers;

Type: string

Supported Values: eq, gt, lt, range

port-num

Description Specify the port number

Type: number

Range: 1-65535

port-num-end

Description Specify the port number

Type: number

Range: 2-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dscp-list

Specification	Value
Type	*list*
Block object keys	

dscp-attribute

Description 'eq': Match only packets on a given DSCP; 'gt': Match only packets with a greater DSCP; 'lt': Match only packets with a lower DSCP; 'range': match only packets in the range of DSCPs;

Type: string

Supported Values: eq, gt, lt, range

dscp-val

Description Specify the DSCP value

Type: number

Range: 1-63

dscp-val-end

Description Specify the DSCP value

Type: number

Range: 2-63

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

destination-port-list

Specification	Value
Type	*list*
Block object keys	

port-attribute

Description 'eq': Match only packets on a given destination port; 'gt': Match only packets with a greater port number; 'lt': Match only packets with a lower port number; 'range': match only packets in the range of port numbers;

Type: string

Supported Values: eq, gt, lt, range

port-num

Description Specify the port number

Type: number

Range: 1-65535

port-num-end

Description Specify the port number

Type: number

Range: 2-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

source-port-list

Specification	Value
Type	*list*
Block object keys	

port-attribute

Description 'eq': Match only packets on a given source port; 'gt': Match only packets with a greater port number; 'lt': Match only packets with a lower port number; 'range': match only packets in the range of port numbers;

Type: string

Supported Values: eq, gt, lt, range

port-num

Description Specify the port number

Type: number

Range: 1-65535

port-num-end

Description Specify the port number

Type: number

Range: 2-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-type-list

Specification	Value
Type	*list*
Block object keys	

icmp-type-attribute

Description 'eq': Match only packets on a given ICMP Type; 'gt': Match only packets with a greater ICMP Type; 'lt': Match only packets with a lower ICMP Type; 'range': match only packets in the range of ICMP Types;

Type: string

Supported Values: eq, gt, lt, range

type

Description Specify the ICMP Type

Type: number

Range: 0-255

type-end

Description Specify the ICMP Type

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

fragmentation-option-list

Specification	Value
Type	*list*
Block object keys	

frag-attribute

Description 'is-fragment': Is fragmented packet; 'first-fragment': Is the first fragment packet; 'last-fragment': Is the last fragment; 'dont-fragment': Is DF bit set;

Type: string

Supported Values: is-fragment, first-fragment, last-fragment, dont-fragment

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-length-list

Specification	Value
Type	*list*
Block object keys	

length

Description Specify the Packet Length

Type: number

Range: 1-65535

length-end

Description Specify the Packet Length

Type: number

Range: 2-65535

packet-length-attribute

Description 'eq': Match only packets on a given Packet Length; 'gt': Match only packets with a greater Packet Length; 'lt': Match only packets with a lower Packet Length; 'range': match only packets in the range of Packet Lengths;

Type: string

Supported Values: eq, gt, lt, range

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protocol-list

Specification	Value
Type	*list*
Block object keys	

proto-attribute

Description 'eq': Match only packets on a given protocol; 'gt': Match only packets with a greater protocol number; 'lt': Match only packets with a lower protocol number; 'range': match only packets in the range of protocol numbers;

Type: string

Supported Values: eq, gt, lt, range

proto-num

Description Specify the protocol number(6 for TCP and 17 for UDP)

Type: number

Range: 0-255

proto-num-end

Description Specify the protocol number

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

icmp-code-list

Specification	Value
Type	*list*
Block object keys	

code

Description Specify the ICMP Code

Type: number

Range: 0-255

code-end

Description Specify the ICMP Code

Type: number

Range: 1-255

icmp-code-attribute

Description 'eq': Match only packets on a given ICMP Code; 'gt': Match only packets with a greater ICMP Code; 'lt': Match only packets with a lower ICMP Code; 'range': match only packets in the range of ICMP Codes;

Type: string

Supported Values: eq, gt, lt, range

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational-mode

Specification	Value
Type	*object*

mode

Description 'enabled': Enable the flowspec and send the prefix to BGP; 'disabled': Disable the flowspec and remove the prefix from BGP;

Type: string

Supported Values: enabled, disabled

Default: disabled

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

filtering-action

Specification	Value
Type	*object*

copy-ip-host

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

copy-ip-host-nlri

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

copy-ipv6-host

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

copy-ipv6-host-nlri

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dscp-val

Description Set DSCP value

Type: number

Range: 1-63

ecomm-custom-hex

Description Custom Extended Community in Hex

Type: string

Maximum Length: 48 characters

Maximum Length: 2 characters

ip-host

Description IPv4 host address

Type: string

Format: ipv4-address

ip-host-nlri

Description IPv4 host address

Type: string

Format: ipv4-address

ip-host-rt

Description Type 0x8108 - Route Target IPv4

Type: string

Format: ipv4-address

ipv6-host

Description IPv6 host address

Type: string

Format: ipv6-address

ipv6-host-nlri

Description IPv6 host address

Type: string

Format: ipv6-address

next-hop-nlri-type

Description 'ip': Type 0x0800 - IPv4 Address; 'ipv6': Type 0x0800 - IPv6 Address;

Type: string

Supported Values: ip, ipv6

next-hop-type

Description 'ip': Type 0x0800 - IPv4 Address; 'ipv6': Type 0x0800 - IPv6 Address;

Type: string

Supported Values: ip, ipv6

redirect

Description 'next-hop-nlri': Type 0x0800 - IP encoded in MP_REACH_NLRI Next-hop network; 'next-hop': Type 0x0800 - Extended community Next-hop (Per v2 dated Feb 2015); 'vrf-route-target': Type 0x8008 - Redirect to VRF Route Target;

Type: string

Supported Values: next-hop-nlri, next-hop, vrf-route-target

sample-log

Description Enable traffic sampling and logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

terminal-action

Description Evaluation stops after this rule if not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

traffic-class

Description Set IPv6 Traffic Class value

Type: number

Range: 1-128

traffic-marking

Description 'dscp': IPv4 DSCP; 'ipv6-traffic-class': IPv6 Traffic Class;

Type: string

Supported Values: dscp, ipv6-traffic-class

traffic-rate

Description Type 0x8006 - Apply rate (in Bytes per second) for this class of traffic

Type: number

Range: 0-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

value-ip-host

Description 2-byte decimal value(local-administrator)

Type: number

Range: 1-65535

vrf-target-ip

Description 'ip': Type 0x8108 - Redirect to route-target IP;

Type: string

Supported Values: ip

Mutual Exclusion: vrf-target-ip and vrf-target-string are mutually exclusive

vrf-target-string

Description Type 0x8008(ASN-2:Index), 0x8208(ASN-4:Index) - Route Target AS

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

Mutual Exclusion: vrf-target-string and vrf-target-ip are mutually exclusive

2.52.2 flowspec destination-port

Configure Destination Port for a Flowspec

destination-port Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-attribute, port-num, port-num-end*
Collection Name	*destination-port-list*
Collection URI	/axapi/v3/flowspec/{name}/destination-port
Element Name	destination-port
Element URI	/axapi/v3/flowspec/{name}/destination-port/{port-attribute}+{port-num}+{port-num-end}
Element Attributes	destination-port_attributes
Partition Visibility	shared
Schema	`destination-port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/flowspec/{name}/destination-port

destination-port attributes

Create List

POST

/axapi/v3/flowspec/{name}/destination-port

destination-port attributes

Get Object

GET

/axapi/v3/flowspec/{name}/destination-port/{port-attribute}+{port-num}+{port-num-end}

destination-port attributes

Get List

GET

/axapi/v3/flowspec/{name}/destination-port

destination-port-list

Modify Object

POST

/axapi/v3/flowspec/{name}/destination-port/{port-attribute}+{port-num}+{port-num-end}

destination-port attributes

Replace Object

PUT

/axapi/v3/flowspec/{name}/destination-port/{port-attribute}+{port-num}+{port-num-end}

destination-port attributes

Replace List

PUT

/axapi/v3/flowspec/{name}/destination-port

destination-port-list

Delete Object

DELETE

/axapi/v3/flowspec/{name}/destination-port/{port-attribute}+{port-num}+{port-num-end}

destination-port attributes

destination-port-list

destination-port-list is **JSON List** of *destination-port attributes*

destination-port-list : [

{ *destination-port attributes* },

{ *destination-port attributes* },

...

]

destination-port attributes

port-attribute

Description 'eq': Match only packets on a given destination port; 'gt': Match only packets with a greater port number; 'lt': Match only packets with a lower port number; 'range': match only packets in the range of port numbers;

Type: string

Supported Values: eq, gt, lt, range

port-num

Description Specify the port number

Type: number

Range: 1-65535

port-num-end

Description Specify the port number

Type: number

Range: 2-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.3 flowspec dscp

Configure DSCP for a Flowspec

dscp Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*dscp-attribute, dscp-val, dscp-val-end*
Collection Name	*dscp-list*
Collection URI	/axapi/v3/flowspec/{name}/dscp
Element Name	dscp
Element URI	/axapi/v3/flowspec/{name}/dscp/{dscp-attribute}+{dscp-val}+{dscp-val-end}
Element Attributes	dscp_attributes
Partition Visibility	shared
Schema	`dscp schema`

Operations Allowed:

Create Object

POST

/axapi/v3/flowspec/{name}/dscp

dscp attributes

Create List

POST

/axapi/v3/flowspec/{name}/dscp

dscp attributes

Get Object

GET

/axapi/v3/flowspec/{name}/dscp/{dscp-attribute}+{dscp-val}+{dscp-val-end}

dscp attributes

Get List

GET

/axapi/v3/flowspec/{name}/dscp

dscp-list

Modify Object

POST

/axapi/v3/flowspec/{name}/dscp/{dscp-attribute}+{dscp-val}+{dscp-val-end}

dscp attributes

Replace Object

PUT

/axapi/v3/flowspec/{name}/dscp/{dscp-attribute}+{dscp-val}+{dscp-val-end}

dscp attributes

Replace List

PUT

/axapi/v3/flowspec/{name}/dscp

dscp-list

Delete Object

DELETE

/axapi/v3/flowspec/{name}/dscp/{dscp-attribute}+{dscp-val}+{dscp-val-end}

dscp attributes

dscp-list

dscp-list is **JSON List** of *dscp attributes*

dscp-list : [

{ *dscp attributes* },

{ *dscp attributes* },

...

]

dscp attributes

dscp-attribute

Description 'eq': Match only packets on a given DSCP; 'gt': Match only packets with a greater DSCP; 'lt': Match only packets with a lower DSCP; 'range': match only packets in the range of DSCPs;

Type: string

Supported Values: eq, gt, lt, range

dscp-val

Description Specify the DSCP value

Type: number

Range: 1-63

dscp-val-end

Description Specify the DSCP value

Type: number

Range: 2-63

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.4 flowspec filtering-action

Configure Filtering Actions for a Flowspec

filtering-action Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	filtering-action
Element URI	/axapi/v3/flowspec/{name}/filtering-action
Element Attributes	filtering-action_attributes
Partition Visibility	shared
Schema	`filtering-action schema`

Operations Allowed:

Create Object

POST

/axapi/v3/flowspec/{name}/filtering-action

filtering-action attributes

```
POST /axapi/v3/flowspec/a/filtering-action
Payload:
{
    "filtering-action": {
        "terminal-action": 1
    }
}
```

Get Object

GET

/axapi/v3/flowspec/{name}/filtering-action

filtering-action attributes

```
GET /axapi/v3/flowspec/a/filtering-action
Reponse:
{
    "filtering-action": {
        "terminal-action": 1,
        "sample-log": 0,
        "uuid": "49a1df9e-08fb-11f0-8ff3-bb094934892a",
        "a10-url": "/axapi/v3/flowspec/a/filtering-action"
    }
}
```

Modify Object

POST

/axapi/v3/flowspec/{name}/filtering-action

filtering-action attributes

Replace Object

PUT

/axapi/v3/flowspec/{name}/filtering-action

filtering-action attributes

```
PUT /axapi/v3/flowspec/a/filtering-action
Payload:
{
    "filtering-action": {
        "terminal-action": 0
    }
}
```

Delete Object

DELETE

/axapi/v3/flowspec/{name}/filtering-action

filtering-action attributes

```
DELETE /axapi/v3/flowspec/a/filtering-action
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Success"
    }
}
```

filtering-action attributes

copy-ip-host

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

copy-ip-host-nlri

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

copy-ipv6-host

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

copy-ipv6-host-nlri

Description Copy bit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dscp-val

Description Set DSCP value

Type: number

Range: 1-63

ecomm-custom-hex

Description Custom Extended Community in Hex

Type: string

Maximum Length: 48 characters

Maximum Length: 2 characters

ip-host

Description IPv4 host address

Type: string

Format: ipv4-address

ip-host-nlri

Description IPv4 host address

Type: string

Format: ipv4-address

ip-host-rt

Description Type 0x8108 - Route Target IPv4

Type: string

Format: ipv4-address

ipv6-host

Description IPv6 host address

Type: string

Format: ipv6-address

ipv6-host-nlri

Description IPv6 host address

Type: string

Format: ipv6-address

next-hop-nlri-type

Description 'ip': Type 0x0800 - IPv4 Address; 'ipv6': Type 0x0800 - IPv6 Address;

Type: string

Supported Values: ip, ipv6

next-hop-type

Description 'ip': Type 0x0800 - IPv4 Address; 'ipv6': Type 0x0800 - IPv6 Address;

Type: string

Supported Values: ip, ipv6

redirect

Description 'next-hop-nlri': Type 0x0800 - IP encoded in MP_REACH_NLRI Next-hop network; 'next-hop': Type 0x0800 - Extended community Next-hop (Per v2 dated Feb 2015); 'vrf-route-target': Type 0x8008 - Redirect to VRF Route Target;

Type: string

Supported Values: next-hop-nlri, next-hop, vrf-route-target

sample-log

Description Enable traffic sampling and logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

terminal-action

Description Evaluation stops after this rule if not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

traffic-class

Description Set IPv6 Traffic Class value

Type: number

Range: 1-128

traffic-marking

Description 'dscp': IPv4 DSCP; 'ipv6-traffic-class': IPv6 Traffic Class;

Type: string

Supported Values: dscp, ipv6-traffic-class

traffic-rate

Description Type 0x8006 - Apply rate (in Bytes per second) for this class of traffic

Type: number

Range: 0-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

value-ip-host

Description 2-byte decimal value(local-administrator)

Type: number

Range: 1-65535

vrf-target-ip

Description 'ip': Type 0x8108 - Redirect to route-target IP;

Type: string

Supported Values: ip

Mutual Exclusion: vrf-target-ip and vrf-target-string are mutually exclusive

vrf-target-string

Description Type 0x8008(ASN-2:Index), 0x8208(ASN-4:Index) - Route Target AS

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

Mutual Exclusion: vrf-target-string and vrf-target-ip are mutually exclusive

2.52.5 flowspec fragmentation-option

Configure Fragmentation option for a Flowspec

fragmentation-option Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*frag-attribute*
Collection Name	*fragmentation-option-list*
Collection URI	/axapi/v3/flowspec/{name}/fragmentation-option
Element Name	fragmentation-option
Element URI	/axapi/v3/flowspec/{name}/fragmentation-option/{frag-attribute}
Element Attributes	fragmentation-option_attributes
Partition Visibility	shared
Schema	`fragmentation-option schema`

Operations Allowed:

Create Object

POST

/axapi/v3/flowspec/{name}/fragmentation-option

fragmentation-option attributes

Create List

POST

/axapi/v3/flowspec/{name}/fragmentation-option

fragmentation-option attributes

Get Object

GET

/axapi/v3/flowspec/{name}/fragmentation-option/{frag-attribute}

fragmentation-option attributes

Get List

GET

/axapi/v3/flowspec/{name}/fragmentation-option

fragmentation-option-list

Modify Object

POST

/axapi/v3/flowspec/{name}/fragmentation-option/{frag-attribute}

fragmentation-option attributes

Replace Object

PUT

/axapi/v3/flowspec/{name}/fragmentation-option/{frag-attribute}

fragmentation-option attributes

Replace List

PUT

/axapi/v3/flowspec/{name}/fragmentation-option

fragmentation-option-list

Delete Object

DELETE

/axapi/v3/flowspec/{name}/fragmentation-option/{frag-attribute}

fragmentation-option attributes

fragmentation-option-list

fragmentation-option-list is **JSON List** of *fragmentation-option attributes*

fragmentation-option-list : [

{ *fragmentation-option attributes* },

{ *fragmentation-option attributes* },

...

]

fragmentation-option attributes

frag-attribute

Description 'is-fragment': Is fragmented packet; 'first-fragment': Is the first fragment packet; 'last-fragment': Is the last fragment; 'dont-fragment': Is DF bit set;

Type: string

Supported Values: is-fragment, first-fragment, last-fragment, dont-fragment

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.6 flowspec icmp-code

Configure ICMP Code for a Flowspec

icmp-code Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*icmp-code-attribute, code, code-end*
Collection Name	*icmp-code-list*
Collection URI	/axapi/v3/flowspec/{name}/icmp-code
Element Name	icmp-code
Element URI	/axapi/v3/flowspec/{name}/icmp-code/{icmp-code-attribute}+{code}+{code-end}
Element Attributes	icmp-code_attributes
Partition Visibility	shared
Schema	`icmp-code schema`

Operations Allowed:

Create Object

POST

/axapi/v3/flowspec/{name}/icmp-code

icmp-code attributes

Create List

POST

/axapi/v3/flowspec/{name}/icmp-code

icmp-code attributes

Get Object

GET

/axapi/v3/flowspec/{name}/icmp-code/{icmp-code-attribute}+{code}+{code-end}

icmp-code attributes

Get List

GET

/axapi/v3/flowspec/{name}/icmp-code

icmp-code-list

Modify Object

POST

/axapi/v3/flowspec/{name}/icmp-code/{icmp-code-attribute}+{code}+{code-end}

icmp-code attributes

Replace Object

PUT

/axapi/v3/flowspec/{name}/icmp-code/{icmp-code-attribute}+{code}+{code-end}

icmp-code attributes

Replace List

PUT

/axapi/v3/flowspec/{name}/icmp-code

icmp-code-list

Delete Object

DELETE

/axapi/v3/flowspec/{name}/icmp-code/{icmp-code-attribute}+{code}+{code-end}

icmp-code attributes

icmp-code-list

icmp-code-list is **JSON List** of *icmp-code attributes*

icmp-code-list : [

{ *icmp-code attributes* },

{ *icmp-code attributes* },

...

]

icmp-code attributes

code

Description Specify the ICMP Code

Type: number

Range: 0-255

code-end

Description Specify the ICMP Code

Type: number

Range: 1-255

icmp-code-attribute

Description 'eq': Match only packets on a given ICMP Code; 'gt': Match only packets with a greater ICMP Code; 'lt': Match only packets with a lower ICMP Code; 'range': match only packets in the range of ICMP Codes;

Type: string

Supported Values: eq, gt, lt, range

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.7 flowspec icmp-type

Configure ICMP Type for a Flowspec

icmp-type Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*icmp-type-attribute, type, type-end*
Collection Name	*icmp-type-list*
Collection URI	/axapi/v3/flowspec/{name}/icmp-type
Element Name	icmp-type
Element URI	/axapi/v3/flowspec/{name}/icmp-type/{icmp-type-attribute}+{type}+{type-end}
Element Attributes	icmp-type_attributes
Partition Visibility	shared
Schema	`icmp-type schema`

Operations Allowed:

Create Object

POST

/axapi/v3/flowspec/{name}/icmp-type

icmp-type attributes

Create List

POST

/axapi/v3/flowspec/{name}/icmp-type

icmp-type attributes

Get Object

GET

/axapi/v3/flowspec/{name}/icmp-type/{icmp-type-attribute}+{type}+{type-end}

icmp-type attributes

Get List

GET

/axapi/v3/flowspec/{name}/icmp-type

icmp-type-list

Modify Object

POST

/axapi/v3/flowspec/{name}/icmp-type/{icmp-type-attribute}+{type}+{type-end}

icmp-type attributes

Replace Object

PUT

/axapi/v3/flowspec/{name}/icmp-type/{icmp-type-attribute}+{type}+{type-end}

icmp-type attributes

Replace List

PUT

/axapi/v3/flowspec/{name}/icmp-type

icmp-type-list

Delete Object

DELETE

/axapi/v3/flowspec/{name}/icmp-type/{icmp-type-attribute}+{type}+{type-end}

icmp-type attributes

icmp-type-list

icmp-type-list is **JSON List** of *icmp-type attributes*

icmp-type-list : [

{ *icmp-type attributes* },

{ *icmp-type attributes* },

...

]

icmp-type attributes

icmp-type-attribute

Description 'eq': Match only packets on a given ICMP Type; 'gt': Match only packets with a greater ICMP Type; 'lt': Match only packets with a lower ICMP Type; 'range': match only packets in the range of ICMP Types;

Type: string

Supported Values: eq, gt, lt, range

type

Description Specify the ICMP Type

Type: number

Range: 0-255

type-end

Description Specify the ICMP Type

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.8 flowspec operational-mode

Set the operational mode for the Flowspec

operational-mode Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	operational-mode
Element URI	/axapi/v3/flowspec/{name}/operational-mode
Element Attributes	operational-mode_attributes
Partition Visibility	shared
Schema	`operational-mode schema`

Operations Allowed:

Create Object

POST

/axapi/v3/flowspec/{name}/operational-mode

operational-mode attributes

packet-length-list

packet-length-list is **JSON List** of *packet-length attributes*

```
packet-length-list : [
        { packet-length attributes },
        { packet-length attributes },
        ...
    ]
```

packet-length attributes

length

Description Specify the Packet Length

Type: number

Range: 1-65535

length-end

Description Specify the Packet Length

Type: number

Range: 2-65535

packet-length-attribute

Description 'eq': Match only packets on a given Packet Length; 'gt': Match only packets with a greater Packet Length; 'lt': Match only packets with a lower Packet Length; 'range': match only packets in the range of Packet Lengths;

Type: string

Supported Values: eq, gt, lt, range

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.10 flowspec port

Configure Port for a Flowspec

port Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-attribute, port-num, port-num-end*
Collection Name	*port-list*
Collection URI	/axapi/v3/flowspec/{name}/port
Element Name	port

{ *port attributes* },

{ *port attributes* },

...

]

port attributes

port-attribute

Description 'eq': Match only packets on a given port; 'gt': Match only packets with a greater port number; 'lt': Match only packets with a lower port number; 'range': match only packets in the range of port numbers;

Type: string

Supported Values: eq, gt, lt, range

port-num

Description Specify the port number

Type: number

Range: 1-65535

port-num-end

Description Specify the port number

Type: number

Range: 2-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.11 flowspec protocol

Configure Protocol for a Flowspec

protocol Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*proto-attribute, proto-num, proto-num-end*
Collection Name	*protocol-list*
Collection URI	/axapi/v3/flowspec/{name}/protocol
Element Name	protocol
Element URI	/axapi/v3/flowspec/{name}/protocol/{proto-attribute}+{proto-num}+{proto-num-end}
Element Attributes	protocol_attributes

protocol-list

protocol-list is **JSON List** of *protocol attributes*

```
protocol-list : [
        { protocol attributes },
        { protocol attributes },
        ...
    ]
```

protocol attributes

proto-attribute

Description 'eq': Match only packets on a given protocol; 'gt': Match only packets with a greater protocol number; 'lt': Match only packets with a lower protocol number; 'range': match only packets in the range of protocol numbers;

Type: string

Supported Values: eq, gt, lt, range

proto-num

Description Specify the protocol number(6 for TCP and 17 for UDP)

Type: number

Range: 0-255

proto-num-end

Description Specify the protocol number

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.52.12 flowspec source-port

Configure Source Port for a Flowspec

source-port Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-attribute, port-num, port-num-end*
Collection Name	*source-port-list*
Collection URI	/axapi/v3/flowspec/{name}/source-port
Element Name	source-port
Element URI	/axapi/v3/flowspec/{name}/source-port/{port-attribute}+{port-num}+{port-num-end}

Description 'all': all; 'transport-inserted': Transport Created; 'transport-freed': Transport Freed; 'transport-alloc-failure': Transport Alloc Failure; 'data-session-created': Data Session Created; 'data-session-freed': Data Session Freed; 'ext-creation-failure': Extension Creation Failure; 'transport-add-to-ext': Transport Added to Extension; 'transport-removed-from-ext': Transport Removed from Extension; 'transport-too-many': Too Many Transports for Control Conn; 'transport-already-in-ext': Transport Already in Extension; 'transport-exists': Transport Already Exists; 'transport-link-ext-failure-control': Transport Link to Extension Failure Control; 'transport-link-ext-data': Transport Link to Extension Data; 'transport-link-ext-failure-data': Transport Link to Extension Failure Data; 'transport-inserted-shadow': Transport Inserted Shadow; 'transport-creation-race': Transport Create Race; 'transport-alloc-failure-shadow': Transport Alloc Failure Shadow; 'transport-put-in-del-q': Transport Put in Delete Queue; 'transport-freed-shadow': Transport Freed Shadow; 'transport-acquired-from-control': Transport Acquired Control; 'transport-found-from-prev-control': Transport Found From Prev Control; 'transport-acquire-failure-from-control': Transport Acquire Failure Control; 'transport-released-from-control': Transport Released Control; 'transport-double-release-from-control': Transport Double Release Control; 'transport-acquired-from-data': Transport Acquired Data; 'transport-acquire-failure-from-data': Transport Acquire Failure Data; 'transport-released-from-data': Transport Released Data; 'transport-double-release-from-data': Transport Double Release Data; 'transport-retry-lookup-on-data-free': Transport Retry Lookup Data; 'transport-not-found-on-data-free': Transport Not Found Data; 'data-session-created-shadow': Data Session Created Shadow; 'data-session-freed-shadow': Data Session Freed Shadow; 'ha-control-ext-creation-failure': HA Control Extension Creation Failure; 'ha-control-session-created': HA Control Session Created; 'ha-data-session-created': HA Data Session Created;

Type: string

Supported Values: all, transport-inserted, transport-freed, transport-alloc-failure, data-session-created, data-session-freed, ext-creation-failure, transport-add-to-ext, transport-removed-from-ext, transport-too-many, transport-already-in-ext, transport-exists, transport-link-ext-failure-control, transport-link-ext-data, transport-link-ext-failure-data, transport-inserted-shadow, transport-creation-race, transport-alloc-failure-shadow, transport-put-in-del-q, transport-freed-shadow, transport-acquired-from-control, transport-found-from-prev-control, transport-acquire-failure-from-control, transport-released-from-control, transport-double-release-from-control, transport-acquired-from-data, transport-acquire-failure-from-data, transport-released-from-data, transport-double-release-from-data, transport-retry-lookup-on-data-free, transport-not-found-on-data-free, data-session-created-shadow, data-session-freed-shadow, ha-control-ext-creation-failure, ha-control-session-created, ha-data-session-created

alg_dns

Specification	Value
Type	*object*

default-port-disable

Description 'default-port-disable': Disable DNS ALG default port 53;

Type: string

Supported Values: default-port-disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

alg_tftp

Specification	Value
Type	*object*

default-port-disable

Description 'default-port-disable': Disable TFTP ALG default port 69;

Type: string

Supported Values: default-port-disable

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

alg_tftp_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'session-created': TFTP Client Sessions Created; 'helper-created': TFTP Helper Sessions created; 'helper-freed': TFTP Helper Sessions freed; 'helper-freed-used': TFTP Helper Sessions freed used; 'helper-freed-unused': TFTP Helper Sessions freed unused; 'helper-already-used': TFTP Helper Session already used; 'helper-in-rml': TFTP Helper Session in Remove List;

Type: string

Supported Values: all, session-created, helper-created, helper-freed, helper-freed-used, helper-freed-unused, helper-already-used, helper-in-rml

alg_icmp

Specification	Value
Type	*object*

disable

Description 'disable': Disable ICMP ALG which allows ICMP errors to pass the firewall;

Type: string

Supported Values: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

alg_sctp

Specification	Value
Type	*object*

action

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

app

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

app_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'dummy': Entry for a10countergen;

Type: string

Supported Values: all, dummy

global

Specification	Value
Type	*object*

alg-processing

Description 'honor-rule-set': Honors firewall rule-sets (Default); 'override-rule-set': Override firewall rule-sets;

Type: string

Supported Values: honor-rule-set, override-rule-set

Default: honor-rule-set

allow-non-syn-session-create

Description Allow TCP non-syn packets to trigger session creation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-app-list

Type: List

disable-application-metrics

Description Disable exporting application protocol/category statistics to Harmony Controller

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-ip-fw-sessions

Description disable create sessions for non TCP/UDP/ICMP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-undetermined-rule-logs

Description disable logs with undetermined rules

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dsr-mode-support

Description 'ipv4': support dsr for ipv4 traffic; 'ipv6': support dsr for ipv6 traffic; 'all': support dsr for both ipv4 and ipv6;

Type: string

Supported Values: ipv4, ipv6, all

extended-matching

Description 'disable': Disable extended matching;

Type: string

Supported Values: disable

inbound-refresh

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

inbound-refresh-full-cone

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

listen-on-port-timeout

Description STUN timeout (default: 2 minutes)

Type: number

Range: 0-60

Default: 2

natip-ddos-protection

Description 'enable': Enable; 'disable': Disable;

Type: string

Supported Values: enable, disable

Default: enable

permit-default-action

Description 'forward': Forward; 'next-service-mode': Service to be applied chosen based on configuration;

Type: string

Supported Values: forward, next-service-mode

respond-to-user-mac

Description Use the user's source MAC for the next hop rather than the routing table (default: off)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global_disable-app-list

Specification	Value
Type	*list*
Block object keys	

disable-application-category

Description 'aaa': Protocol/application used for AAA (Authentification, Authorization and Accounting) purposes.; 'adult-content': Adult content protocol/application.; 'advertising': Advertising networks and applications.; 'application-enforcing-tls': Application known to enforce HSTS and thus use of TLS.; 'analytics-and-statistics': User analytics and statistics protocol/application.; 'anonymizers-and-proxies': Traffic-anonymization protocol/application.; 'audio-chat': Protocol/application used for Audio Chat.; 'basic': Covers all protocols required for basic classification, including most networking protocols as well as standard protocols like HTTP.; 'blog': Blogging platform protocol/application.; 'cdn': Protocol/application used for Content-Delivery Networks.; 'certification-authority': Certification Authority for SSL/TLS certificate.; 'chat': Protocol/application used for Text Chat.; 'classified-ads': Protocol/application used for Classified Advertisements.; 'cloud-based-services': SaaS and/or PaaS cloud based services.; 'crowdfunding': Service for funding a project or venture by raising small amounts of money from a large number of people, typically via the Internet.; 'cryptocurrency': Services for mining cryptocurrencies, for example a Crypto Web Browser (an application that mines crypto currency in the background while its user browses the web).; 'database': Database-specific protocols.; 'disposable-email': Service offering Disposable Email Accounts (DEA). DEA is a technique to share temporary email address between many users.; 'ebook-reader': Services for e-book readers, i.e. connected devices that display electronic books (typically using e-ink displays to reduce glare and eye strain).; 'education': Protocols offering education services and online courses.; 'email': Native email protocol.; 'enterprise': Protocol/application used in an enterprise network.; 'file-management': Protocol/application designed specifically for file management and exchange. This can include bona fide network protocols (like SMB) as well as web/cloud services (like Dropbox).; 'file-transfer': Protocol that offers file transferring as a secondary feature. This typically includes IM, Web-Mail, and other protocols that allow file transfers in addition to their principal function.; 'forum': Online forum protocol/application.; 'gaming': Protocol/application used by games.; 'healthcare': Protocols offering medical services, i.e protocols used in medical environment.; 'instant-messaging-and-multimedia-conferencing': Protocol/application used for Instant Messaging or Multi-Conferencing.; 'internet-of-things': Internet Of Things protocol/application.; 'map-service': Digital Maps service (web site and their related API).; 'mobile': Mobile-specific protocol/application.; 'multimedia-streaming': Protocol/application used for multimedia streaming.; 'networking': Protocol used for (inter) networking purpose.; 'news-portal': Protocol/application used for News Portals.; 'payment-service': Application offering online services for accepting electronic payments by a variety of payment methods (credit card, bank-based payments such as direct debit, bank transfer, etc).; 'peer-to-peer': Protocol/application used for Peer-to-peer purposes.; 'remote-access': Protocol/application used for remote access.; 'scada': SCADA (Supervisory control and data acquisition) protocols, all generations.; 'social-networks': Social networking application.; 'software-update': Auto-update protocol.; 'speedtest': Speedtest application allowing to access quality of Internet connection (upload, download, latency, etc).; 'standards-based': Protocol issued from standardized bodies such as IETF, ITU, IEEE, ETSI, OIF.; 'transportation': Transportation services, for example smartphone applications that allow users to hail a taxi.; 'video-chat': Protocol/application used for Video Chat.; 'voip': Application used for Voice-Over-IP.; 'vpn-tunnels': Protocol/application used for VPN or tunneling purposes.; 'web': Application based on HTTP/HTTPS.; 'web-e-commerce': Protocol/application used for E-commerce websites.; 'web-search-engines': Pro-

tocol/application used for Web search portals.; 'web-websites': Protocol/application used for Company Websites.; 'webmails': Web-based e-mail application.; 'web-ext-adult': Web Extension Adult; 'web-ext-auctions': Web Extension Auctions; 'web-ext-blogs': Web Extension Blogs; 'web-ext-business-and-economy': Web Extension Business and Economy; 'web-ext-cdns': Web Extension CDNs; 'web-ext-collaboration': Web Extension Collaboration; 'web-ext-computer-and-internet-info': Web Extension Computer and Internet Info; 'web-ext-computer-and-internet-security': Web Extension Computer and Internet Security; 'web-ext-dating': Web Extension Dating; 'web-ext-educational-institutions': Web Extension Educational Institutions; 'web-ext-entertainment-and-arts': Web Extension Entertainment and Arts; 'web-ext-fashion-and-beauty': Web Extension Fashion and Beauty; 'web-ext-file-share': Web Extension File Share; 'web-ext-financial-services': Web Extension Financial Services; 'web-ext-gambling': Web Extension Gambling; 'web-ext-games': Web Extension Games; 'web-ext-government': Web Extension Government; 'web-ext-health-and-medicine': Web Extension Health and Medicine; 'web-ext-individual-stock-advice-and-tools': Web Extension Individual Stock Advice and Tools; 'web-ext-internet-portals': Web Extension Internet Portals; 'web-ext-job-search': Web Extension Job Search; 'web-ext-local-information': Web Extension Local Information; 'web-ext-malware': Web Extension Malware; 'web-ext-motor-vehicles': Web Extension Motor Vehicles; 'web-ext-music': Web Extension Music; 'web-ext-news': Web Extension News; 'web-ext-p2p': Web Extension P2P; 'web-ext-parked-sites': Web Extension Parked Sites; 'web-ext-proxy-avoid-and-anonymizers': Web Extension Proxy Avoid and Anonymizers; 'web-ext-real-estate': Web Extension Real Estate; 'web-ext-reference-and-research': Web Extension Reference and Research; 'web-ext-search-engines': Web Extension Search Engines; 'web-ext-shopping': Web Extension Shopping; 'web-ext-social-network': Web Extension Social Network; 'web-ext-society': Web Extension Society; 'web-ext-software': Web Extension Software; 'web-ext-sports': Web Extension Sports; 'web-ext-streaming-media': Web Extension Streaming Media; 'web-ext-training-and-tools': Web Extension Training and Tools; 'web-ext-translation': Web Extension Translation; 'web-ext-travel': Web Extension Travel; 'web-ext-web-advertisements': Web Extension Web Advertisements; 'web-ext-web-based-email': Web Extension Web based Email; 'web-ext-web-hosting': Web Extension Web Hosting; 'web-ext-web-service': Web Extension Web Service;

Type: string

Supported Values: aaa, adult-content, advertising, application-enforcing-tls, analytics-and-statistics, anonymizers-and-proxies, audio-chat, basic, blog, cdn, certification-authority, chat, classified-ads, cloud-based-services, crowdfunding, cryptocurrency, database, disposable-email, ebook-reader, education, email, enterprise, file-management, file-transfer, forum, gaming, healthcare, instant-messaging-and-multimedia-conferencing, internet-of-things, map-service, mobile, multimedia-streaming, networking, news-portal, payment-service, peer-to-peer, remote-access, scada, social-networks, software-update, speedtest, standards-based, transportation, video-chat, voip, vpn-tunnels, web, web-e-commerce, web-search-engines, web-websites, webmails, web-ext-adult, web-ext-auctions, web-ext-blogs, web-ext-business-and-economy, web-ext-cdns, web-ext-collaboration, web-ext-computer-and-internet-info, web-ext-computer-and-internet-security, web-ext-dating, web-ext-educational-institutions, web-ext-entertainment-and-arts, web-ext-fashion-and-beauty, web-ext-file-share, web-ext-financial-services, web-ext-gambling, web-ext-games, web-ext-government, web-ext-health-and-medicine, web-ext-individual-stock-advice-and-tools, web-ext-internet-portals, web-ext-job-search, web-ext-local-information, web-ext-malware, web-ext-motor-vehicles, web-ext-music, web-ext-news, web-ext-p2p, web-ext-parked-sites, web-ext-proxy-avoid-and-anonymizers, web-ext-real-estate, web-ext-reference-and-research, web-ext-search-engines, web-ext-shopping, web-ext-social-network, web-ext-society, web-ext-software, web-ext-sports, web-ext-streaming-media, web-ext-training-and-tools, web-ext-translation, web-ext-travel, web-ext-web-advertisements, web-ext-web-based-email, web-ext-web-hosting, web-ext-web-service

disable-application-protocol

Description Disable specific application protocol

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

801 and 1550; 'rev_ingress_pkt_size_range4': Reverse Ingress Packet size between 1551 and 9000; 'rev_egress_pkt_size_range1': Reverse Egress Packet size between 0 and 200; 'rev_egress_pkt_size_range2': Reverse Egress Packet size between 201 and 800; 'rev_egress_pkt_size_range3': Reverse Egress Packet size between 801 and 1550; 'rev_egress_pkt_size_range4': Reverse Egress Packet size between 1551 and 9000;

Type: string

Supported Values: rev_ingress_packets_others, rev_egress_packets_others, fwd_ingress_bytes_others, fwd_egress_bytes_others, rev_ingress_bytes_others, rev_egress_bytes_others, fwd_ingress_pkt_size_range1, fwd_ingress_pkt_size_range2, fwd_ingress_pkt_size_range3, fwd_ingress_pkt_size_range4, fwd_egress_pkt_size_range1, fwd_egress_pkt_size_range2, fwd_egress_pkt_size_range3, fwd_egress_pkt_size_range4, rev_ingress_pkt_size_range1, rev_ingress_pkt_size_range2, rev_ingress_pkt_size_range3, rev_ingress_pkt_size_range4, rev_egress_pkt_size_range1, rev_egress_pkt_size_range2, rev_egress_pkt_size_range3, rev_egress_pkt_size_range4

tcp-rst-close-immediate

Specification	Value
Type	*object*

status

Description 'enable': Enable TCP RST close immediate (default); 'disable': Disable TCP RST close immediate;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp

Specification	Value
Type	*object*

mss-clamp

Description: mss-clamp is a **JSON Block**. Please see below for *tcp_mss-clamp*

Type: Object

Reference Object: */axapi/v3/fw/tcp/mss-clamp*

reset-on-error

Description: reset-on-error is a **JSON Block**. Please see below for *tcp_reset-on-error*

Type: Object

Reference Object: */axapi/v3/fw/tcp/reset-on-error*

syn-cookie

Description: syn-cookie is a **JSON Block**. Please see below for *tcp_syn-cookie*

Type: Object

Reference Object: */axapi/v3/fw/tcp/syn-cookie*

tcp_mss-clamp

Specification	Value
Type	*object*

min

Description Specify the min value allowed for the TCP MSS (Specify the min value allowed for the TCP MSS (default: ((576 - 60 - 60))))

Type: number

Range: 0-1460

Default: 456

mss-clamp-type

Description 'fixed': Specify a fixed max value for the TCP MSS; 'subtract': Specify the value to subtract from the TCP MSS;

Type: string

Supported Values: fixed, subtract

mss-subtract

Description Specify the value to subtract from the TCP MSS (default: not configured)

Type: number

Range: 0-1460

mss-value

Description The max value allowed for the TCP MSS (default: not configured)}

Type: number

Range: 0-1460

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp_reset-on-error

Specification	Value
Type	*object*

enable

Description Enable send TCP reset on error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound

Description 'enable': Enable send TCP reset on error;

Type: string

Supported Values: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp_syn-cookie

Specification	Value
Type	*object*

sampling-enable

Type: List

syn-cookie-enable

Description Enable Firewall Syn-Cookie Protection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-cookie-on-threshold

Description on-threshold for Syn-cookie (Decimal number)

Type: number

Range: 1-1000000

syn-cookie-on-timeout

Description on-timeout for Syn-cookie (Timeout in seconds, default is 120 seconds (2 minutes))

Type: number

Range: 1-300000

Default: 120

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp_syn-cookie_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'syn_ack_sent': SYN cookie SYN ACK sent; 'verification_passed': SYN cookie verification passed; 'verification_failed': SYN cookie verification failed; 'conn_setup_failed': SYN cookie connection setup failed;

Type: string

Supported Values: all, syn_ack_sent, verification_passed, verification_failed, conn_setup_failed

hw-accelerate

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hw-accelerate_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'entry-create': HW Entries Created; 'entry-create-failure': HW Entry Creation Failed; 'entry-create-fail-server-down': HW Entry Creation Failed - server down; 'entry-create-fail-max-entry': HW Entry Creation Failed - max entries exceeded; 'entry-free': HW Entries Freed; 'entry-free-opp-entry': HW Entries Freed - opposite tuple entry aged-out; 'entry-free-no-hw-prog': HW Entry Freed - no HW prog; 'entry-free-no-conn': HW Entry Freed - no matched conn; 'entry-free-no-sw-entry': HW Entry Freed - no software entry; 'entry-counter': HW Entries Count; 'entry-age-out': HW Entries Aged Out; 'entry-age-out-idle': HW Entries Aged Out - idle timeout; 'entry-age-out-tcp-fin': HW Entries Aged Out - TCP FIN; 'entry-age-out-tcp-rst': HW Entries Aged Out - TCP RST; 'entry-age-out-invalid-dst': HW Entries Aged Out - invalid dst; 'entry-force-hw-invalidate': HW Entries Force HW Invalidate; 'entry-invalidate-server-down': HW Entries Invalidate due to server down; 'tcam-create': TCAM Flows Created; 'tcam-free': TCAM Flows Freed; 'tcam-counter': TCAM Flow Count;

Type: string

Supported Values: all, entry-create, entry-create-failure, entry-create-fail-server-down, entry-create-fail-max-entry, entry-free, entry-free-opp-entry, entry-free-no-hw-prog, entry-free-no-conn, entry-free-no-sw-entry, entry-counter, entry-age-out, entry-age-out-idle, entry-age-out-tcp-fin, entry-age-out-tcp-rst, entry-age-out-invalid-dst, entry-force-hw-invalidate, entry-invalidate-server-down, tcam-create, tcam-free, tcam-counter

radius

Specification	Value
Type	*object*

server

Description: server is a **JSON Block**. Please see below for *radius_server*

Type: Object

Reference Object: */axapi/v3/fw/radius/server*

radius_server

Specification	Value
Type	*object*

accounting-interim-update

Description 'ignore': Ignore (default); 'append-entry': Append the AVPs to existing entry; 'replace-entry': Replace the AVPs of existing entry;

Type: string

Supported Values: ignore, append-entry, replace-entry

Default: ignore

accounting-on

Description 'ignore': Ignore (default); 'delete-entries-using-attribute': Delete entries matching attribute in RADIUS Table;

Type: string

Supported Values: ignore, delete-entries-using-attribute

Default: ignore

accounting-start

Description 'ignore': Ignore; 'append-entry': Append the AVPs to existing entry (default); 'replace-entry': Replace the AVPs of existing entry;

Type: string

Supported Values: ignore, append-entry, replace-entry

Default: append-entry

accounting-stop

Description 'ignore': Ignore; 'delete-entry': Delete the entry (default);

Type: string

Supported Values: ignore, delete-entry

Default: delete-entry

attribute

Type: List

attribute-name

Description 'msisdn': Clear using MSISDN; 'imei': Clear using IMEI; 'imsi': Clear using IMSI;

Type: string

Supported Values: msisdn, imei, imsi

Mutual Exclusion: attribute-name and custom-attribute-name are mutually exclusive

custom-attribute-name

Description Clear using customized attribute

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

Mutual Exclusion: custom-attribute-name and attribute-name are mutually exclusive

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

listen-port

Description Configure the listen port of RADIUS server (Port number)

Type: number

Range: 1024-65535

remote

Description: remote is a **JSON Block**. Please see below for *radius_server_remote*

Type: Object

sampling-enable

Type: List

secret

Description Configure shared secret

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-string

Description The RADIUS secret

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid

Description Join a VRRP-A failover group

Type: number

Range: 1-31

radius_server_remote

Specification	Value
Type	*object*

ip-list

Type: List

radius_server_remote_ip-list

Specification	Value
Type	*list*
Block object keys	

ip-list-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

ip-list-name

Description IP-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-list-secret

Description Configure shared secret

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-list-secret-string

Description The RADIUS secret

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

radius_server_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'msisdn-received': MSISDN Received; 'imei-received': IMEI Received; 'imsi-received': IMSI Received; 'custom-received': Custom attribute Received; 'radius-request-received': RADIUS Request Received; 'radius-request-dropped': RADIUS Request Dropped (Malformed Packet); 'request-bad-secret-dropped': RADIUS Request Bad Secret Dropped; 'request-no-key-vap-dropped': RADIUS Request No Key Attribute Dropped; 'request-malformed-dropped': RADIUS Request Malformed Dropped; 'request-ignored': RADIUS Request Table Full Dropped; 'radius-table-full': RADIUS Request Dropped (Table Full); 'secret-not-configured-dropped': RADIUS Secret Not Configured Dropped; 'ha-standby-dropped': HA Standby Dropped; 'ipv6-prefix-length-mismatch': Framed IPV6 Prefix Length Mismatch; 'invalid-key': Radius Request has Invalid Key Field; 'smp-mem-allocated': RADIUS SMP Memory Allocated; 'smp-mem-alloc-failed': RADIUS SMP Memory Allocation Failed; 'smp-mem-freed': RADIUS SMP Memory Freed; 'smp-created': RADIUS SMP Created; 'smp-in-rml': RADIUS SMP in RML; 'smp-deleted': RADIUS SMP Deleted; 'mem-allocated': RADIUS Memory Allocated; 'mem-alloc-failed': RADIUS Memory Allocation Failed; 'mem-freed': RADIUS Memory Freed; 'ha-sync-create-sent': HA Record Sync Create Sent; 'ha-sync-delete-sent': HA Record Sync Delete Sent; 'ha-sync-create-recv': HA Record Sync Create Received; 'ha-sync-delete-recv': HA Record Sync Delete Received; 'acct-on-filters-full': RADIUS Acct On Request Ignored(Filters Full); 'acct-on-dup-request': Duplicate RADIUS Acct On Request; 'ip-mismatch-delete': Radius Entry IP Mismatch Delete; 'ip-add-race-drop': Radius Entry IP Add Race Drop; 'ha-sync-no-key-vap-dropped': HA Record Sync No key dropped; 'inter-card-msg-fail-drop': Inter-Card Message Fail Drop; 'radius-packets-redirected': RADIUS packets redirected (SO); 'radius-packets-redirect-fail-dropped': RADIUS packets dropped due to redirect failure (SO); 'radius-packets-process-local': RADIUS packets processed locally without redirection (SO); 'radius-packets-dropped-not-lo': RADIUS packets dropped dest not loopback (SO); 'radius-inter-card-dup-redir': RADIUS packet dropped as redirected by other blade (SO);

Type: string

Supported Values: all, msisdn-received, imei-received, imsi-received, custom-received, radius-request-received, radius-request-dropped, request-bad-secret-dropped, request-no-key-vap-dropped, request-malformed-dropped, request-ignored, radius-table-full, secret-not-configured-dropped, ha-standby-dropped, ipv6-prefix-length-mismatch, invalid-key, smp-mem-allocated, smp-mem-alloc-failed, smp-mem-freed, smp-created, smp-in-rml, smp-deleted, mem-allocated, mem-alloc-failed, mem-freed, ha-sync-create-sent, ha-sync-delete-sent, ha-sync-create-recv, ha-sync-delete-recv, acct-on-filters-full, acct-on-dup-request, ip-mismatch-delete, ip-add-race-drop, ha-sync-no-key-vap-dropped, inter-card-msg-fail-drop, radius-packets-redirected, radius-packets-redirect-fail-dropped, radius-packets-process-local, radius-packets-dropped-not-lo, radius-inter-card-dup-redir

radius_server_attribute

Specification	Value
Type	*list*
Block object keys	

attribute-value

Description 'inside-ipv6-prefix': Framed IPv6 Prefix; 'inside-ip': Inside IP address; 'inside-ipv6': Inside IPv6 address; 'imei': International Mobile Equipment Identity (IMEI); 'imsi': International Mobile Subscriber Identity (IMSI); 'msisdn': Mobile Subscriber Integrated Services Digital Network-Number (MSISDN); 'custom1': Customized attribute 1; 'custom2': Customized attribute 2; 'custom3': Customized attribute 3; 'custom4': Customized attribute 4; 'custom5': Customized attribute 5; 'custom6': Customized attribute 6;

Type: string

Supported Values: inside-ipv6-prefix, inside-ip, inside-ipv6, imei, imsi, msisdn, custom1, custom2, custom3, custom4, custom5, custom6

custom-number

Description RADIUS attribute number

Type: number

Range: 1-255

custom-vendor

Description RADIUS vendor attribute information (RADIUS vendor ID)

Type: number

Range: 1-65535

name

Description Customized attribute name

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

number

Description RADIUS attribute number

Type: number

Range: 1-255

prefix-length

Description '32': Prefix length 32; '48': Prefix length 48; '64': Prefix length 64; '80': Prefix length 80; '96': Prefix length 96; '112': Prefix length 112;

Type: string

Supported Values: 32, 48, 64, 80, 96, 112

prefix-number

Description RADIUS attribute number

Type: number

Range: 1-255

prefix-vendor

Description RADIUS vendor attribute information (RADIUS vendor ID)

Type: number

Range: 1-65535

value

Description 'hexadecimal': Type of attribute value is hexadecimal;

Type: string

Supported Values: hexadecimal

vendor

Description RADIUS vendor attribute information (RADIUS vendor ID)

Type: number

Range: 1-65535

clear-session-filter

Specification	Value
Type	*object*

status

Description 'disable': Disable clear L4 session filter for fw (Default: disabled); 'enable': Enable clear L4 session filter for fw;

Type: string

Supported Values: disable, enable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

per-instance

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

prioritize-control-traffic

Specification	Value
Type	*object*

action

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

system-status

Specification	Value

Type: Object

Reference Object: */axapi/v3/fw/template/logging/{name}/enable-log-by-destination*

facility

Description 'kernel': 0: Kernel; 'user': 1: User-level; 'mail': 2: Mail; 'daemon': 3: System daemons; 'security-authorization': 4: Security/authorization; 'syslog': 5: Syslog internal; 'line-printer': 6: Line printer; 'news': 7: Network news; 'uucp': 8: UUCP subsystem; 'cron': 9: Time-related; 'security-authorization-private': 10: Private security/authorization; 'ftp': 11: FTP; 'ntp': 12: NTP; 'audit': 13: Audit; 'alert': 14: Alert; 'clock': 15: Clock-related; 'local0': 16: Local use 0; 'local1': 17: Local use 1; 'local2': 18: Local use 2; 'local3': 19: Local use 3; 'local4': 20: Local use 4; 'local5': 21: Local use 5; 'local6': 22: Local use 6; 'local7': 23: Local use 7;

Type: string

Supported Values: kernel, user, mail, daemon, security-authorization, syslog, line-printer, news, uucp, cron, security-authorization-private, ftp, ntp, audit, alert, clock, local0, local1, local2, local3, local4, local5, local6, local7

Default: local0

format

Description 'ascii': A10 Text logging format (ASCII); 'cef': Common Event Format for logging (default);

Type: string

Supported Values: ascii, cef, custom

Default: cef

include-dest-fqdn

Description Include destination FQDN string

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

include-http

Description: include-http is a **JSON Block**. Please see below for *template_logging-list_include-http*

Type: Object

include-radius-attribute

Description: include-radius-attribute is a **JSON Block**. Please see below for *template_logging-list_include-radius-attribute*

Type: Object

include-year

Description include the 4-digit year in logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log

Description: log is a **JSON Block**. Please see below for *template_logging-list_log*

Type: Object

merged-style

Description Merge creation and deletion of session logs to one

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

resolution

Description 'seconds': Logging timestamp resolution in seconds (default); '10-milliseconds': Logging timestamp resolution in 10s of milli-seconds;

Type: string

Supported Values: seconds, 10-milliseconds

Default: seconds

rule

Description: rule is a **JSON Block**. Please see below for *template_logging-list_rule*

Type: Object

service-group

Description Bind a Service Group to the logging template (Service Group Name)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

session-periodic-log

Description: session-periodic-log is a **JSON Block**. Please see below for *template_logging-list_session-periodic-log*

Type: Object

Reference Object: */axapi/v3/fw/template/logging/{name}/session-periodic-log*

severity

Description 'emergency': 0: Emergency; 'alert': 1: Alert; 'critical': 2: Critical; 'error': 3: Error; 'warning': 4: Warning; 'notice': 5: Notice; 'informational': 6: Informational; 'debug': 7: Debug;

Type: string

Supported Values: emergency, alert, critical, error, warning, notice, informational, debug

Default: informational

source-address

Description: source-address is a **JSON Block**. Please see below for *template_logging-list_source-address*

Type: Object

Reference Object: */axapi/v3/fw/template/logging/{name}/source-address*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_session-periodic-log

Specification	Value
Type	*object*

interval

Description Logging time interval (minutes) for long lived sessions

Type: number

Range: 1-60

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_source-address

Specification	Value
Type	*object*

ip

Description Specify source IP address

Type: string

Format: ipv4-address

ipv6

Description Specify source IPv6 address

Type: string

Format: ipv6-address

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_include-radius-attribute

Specification	Value
Type	*object*

attr-cfg

Type: List

framed-ipv6-prefix

Description Include radius attributes for the prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insert-if-not-existing

Description Configure what string is to be inserted for custom RADIUS attributes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-quote

Description No quotation marks for RADIUS attributes in logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prefix-length

Description '32': Prefix length 32; '48': Prefix length 48; '64': Prefix length 64; '80': Prefix length 80; '96': Prefix length 96; '112': Prefix length 112;

Type: string

Supported Values: 32, 48, 64, 80, 96, 112

zero-in-custom-attr

Description Insert 0000 for standard and custom attributes in log string

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_logging-list_include-radius-attribute_attr-cfg

Specification	Value
Type	*list*
Block object keys	

attr

Description 'imei': Include IMEI; 'imsi': Include IMSI; 'msisdn': Include MSISDN; 'custom1': Customized attribute 1; 'custom2': Customized attribute 2; 'custom3': Customized attribute 3; 'custom4': Customized attribute 4; 'custom5': Customized attribute 5; 'custom6': Customized attribute 6;

Type: string

Supported Values: imei, imsi, msisdn, custom1, custom2, custom3, custom4, custom5, custom6

attr-event

Description 'http-requests': Include in HTTP request logs; 'sessions': Include in session logs; 'limit-policy': Include in limit policy logs;

Type: string

Supported Values: http-requests, sessions, limit-policy

template_logging-list_rule

Specification	Value
Type	*object*

rule-http-requests

Description: rule-http-requests is a **JSON Block**. Please see below for *template_logging-list_rule_rule-http-requests*

Type: Object

template_logging-list_rule_rule-http-requests

Specification	Value
Type	*object*

dest-port

Type: List

disable-sequence-check

Description Disable http packet sequence check and don't drop out of order packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

include-all-headers

Description Include all configured headers despite of absence in HTTP request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-every-http-request

Description Log every HTTP request in an HTTP 1.1 session (Default: Log the first HTTP request in a session)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-url-len

Description Max length of URL log (Max URL length (Default: 128 char))

Type: number

Range: 100-1000

Default: 100

template_logging-list_rule_rule-http-requests_dest-port

Specification	Value
Type	*list*
Block object keys	

dest-port-number

Description

Type: number

Range: 1-65535

include-byte-count

Description Include the byte count of HTTP Request/Response in FW session deletion logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_logging-list_disable-log-by-destination

Specification	Value
Type	*object*

icmp

Description Disable logging for the ICMP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-list

Type: List

Reference Object: */axapi/v3/fw/template/logging/{name}/disable-log-by-destination/ip/{ipv4-addr}*

ip6-list

Type: List

Reference Object: */axapi/v3/fw/template/logging/{name}/disable-log-by-destination/ip6/{ipv6-addr}*

others

Description Disable logging for the other layer-4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_disable-log-by-destination_ip-list

Specification	Value
Type	*list*
Block object keys	

icmp

Description Disable logging for the ICMP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-addr

Description Configure an IP subnet

Type: string

Format: ipv4-cidr

others

Description Disable logging for the other layer-4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_disable-log-by-destination_ip-list_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_disable-log-by-destination_ip-list_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_disable-log-by-destination_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_disable-log-by-destination_ip6-list

Specification	Value
Type	*list*
Block object keys	

icmp

Description Disable logging for the ICMP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-addr

Description Configure an IPv6 subnet

Type: string

Format: ipv6-address-plen

others

Description Disable logging for the other layer-4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_disable-log-by-destination_ip6-list_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_disable-log-by-destination_ip6-list_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_disable-log-by-destination_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_include-http

Specification	Value
Type	*object*

file-extension

Description HTTP file extension

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-cfg

Type: List

l4-session-info

Description Log the L4 session information of the HTTP request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

method

Description Log the HTTP Request Method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-number

Description HTTP Request Number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_logging-list_include-http_header-cfg

Specification	Value
Type	*list*
Block object keys	

custom-header-name

Description Header name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

custom-max-length

Description Max length for a HTTP request log (Max header length (Default: 100 char))

Type: number

Range: 100-1000

Default: 100

http-header

Description 'cookie': Log HTTP Cookie Header; 'referer': Log HTTP Referer Header; 'user-agent': Log HTTP User-Agent Header; 'header1': Log HTTP Header 1; 'header2': Log HTTP Header 2; 'header3': Log HTTP Header 3;

Type: string

Supported Values: cookie, referer, user-agent, header1, header2, header3

max-length

Description Max length for a HTTP request log (Max header length (Default: 100 char))

Type: number

Range: 100-1000

Default: 100

template_logging-list_enable-log-by-destination

Specification	Value
Type	*object*

icmp

Description Enable logging for the ICMP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-list

Type: List

Reference Object: */axapi/v3/fw/template/logging/{name}/enable-log-by-destination/ip/{ipv4-addr}*

ip6-list

Type: List

Reference Object: */axapi/v3/fw/template/logging/{name}/enable-log-by-destination/ip6/{ipv6-addr}*

others

Description Enable logging for the other layer-4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_enable-log-by-destination_ip-list

Specification	Value
Type	*list*
Block object keys	

icmp

Description Enable logging for the ICMP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-addr

Description Configure an IP subnet

Type: string

Format: ipv4-cidr

others

Description Enable logging for the other layer-4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_enable-log-by-destination_ip-list_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_enable-log-by-destination_ip-list_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_enable-log-by-destination_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_enable-log-by-destination_ip6-list

Specification	Value
Type	*list*
Block object keys	

icmp

Description Enable logging for the ICMP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-addr

Description Configure an IPv6 subnet

Type: string

Format: ipv6-address-plen

others

Description Enable logging for the other layer-4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_logging-list_enable-log-by-destination_ip6-list_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_enable-log-by-destination_ip6-list_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_enable-log-by-destination_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

template_logging-list_custom

Specification	Value
Type	*object*

custom-message

Description: custom-message is a **JSON Block**. Please see below for *template_logging-list_custom_custom-message*

Type: Object

template_logging-list_custom_custom-message

Specification	Value
Type	*object*

custom-session-created

Description Session created (Custom message string)

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

custom-session-deleted

Description Session deleted (Custom message string)

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

template_logging-list_log

Specification	Value
Type	*object*

http-requests

Description 'host': Log the HTTP Host Header; 'url': Log the HTTP Request URL;

Type: string

Supported Values: host, url

match

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

status

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

fast-forwarding

Specification	Value
Type	*object*

toggle

Description 'enable': Enable fast forwarding path; 'disable': Disable fast forwarding path;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

full-cone-session

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

urpf

Specification	Value
Type	*object*

status

Description 'loose': Perform loose check; 'strict': Perform strict check; 'disable': Disable check;

Type: string

Supported Values: loose, strict, disable

Default: loose

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tap-monitor

Specification	Value
Type	*object*

status

Description 'enable': Enable tap monitor mode; 'disable': Disable tap monitor mode (Default:Disable);

Type: string

Supported Values: enable, disable

Default: disable

tap-port-cfg

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tap-monitor_tap-port-cfg

Specification	Value
Type	*list*
Block object keys	

tap-eth

Description Ethernet interface number

Type: number

Format: interface

tap-vlan

Description Vlan number

Type: number

Range: 2-4096

local-log

Specification	Value
Type	*object*

local-logging

Description Enable local logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hairpin

Specification	Value
Type	*object*

next-hop-follow

Description: next-hop-follow is a **JSON Block**. Please see below for *hairpin_next-hop-follow*

Type: Object

Reference Object: */axapi/v3/fw/hairpin/next-hop-follow*

hairpin_next-hop-follow

Specification	Value
Type	*object*

disable-local-hairpin

Description Disable local hairpin

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4

Description IPV4 network

Type: string

Format: ipv4-cidr

ipv6

Description IPV6 network

Type: string

Format: ipv6-address-plen

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

resource-usage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

active-rule-set

Specification	Value
Type	*object*

name

Description Rule set name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/rule-set*

override-nat-aging

Description Override NAT idle-timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-aging

Description Session Aging Template

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/fw/session-aging*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

logging

Specification	Value
Type	*object*

cef-label

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

gtp

Description: gtp is a **JSON Block**. Please see below for *logging_gtp*

Type: Object

Reference Object: */axapi/v3/fw/logging/gtp*

name

Description Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/fw/template/logging*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

logging_gtp

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

logging_gtp_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'log_type_gtp_invalid_teid': Log Event Type GTP Invalid TEID; 'log_gtp_type_reserved_ie_present': Log Event Type GTP Reserved IE Present; 'log_type_gtp_mandatory_ie_missing': Log Event Type GTP Mandatory IE Missing; 'log_type_gtp_mandatory_ie_inside_grouped_ie_missing': Log Event Type GTP Mandatory IE Missing Inside Grouped IE; 'log_type_gtp_msisdn_filtering': Log Event Type GTP MSISDN Filtering; 'log_type_gtp_out_of_order_ie': Log Event Type GTP Out of Order IE V1; 'log_type_gtp_out_of_state_ie': Log Event Type GTP Out of State IE; 'log_type_enduser_ip_spoofed': Log Event Type GTP Enduser IP Spoofed; 'log_type_crosslayer_correlation': Log Event GTP Crosslayer Correlation; 'log_type_message_not_supported': Log Event GTP Reserved Message Found; 'log_type_out_of_state': Log Event GTP Out of State Message; 'log_type_max_msg_length': Log Event GTP Message Length Exceeded Max; 'log_type_gtp_message_filtering': Log Event Type GTP Message Filtering; 'log_type_gtp_apn_filtering': Log Event Type GTP Apn Filtering; 'log_type_gtp_rat_type_filtering': Log Event GTP

RAT Type Filtering; 'log_type_country_code_mismatch': Log Event GTP Country Code Mismatch; 'log_type_gtp_in_gtp_filtering': Log Event GTP in GTP Filtering; 'log_type_gtp_node_restart': Log Event GTP SGW/PGW restarted; 'log_type_gtp_seq_num_mismatch': Log Event GTP Response Sequence number Mismatch; 'log_type_gtp_rate_limit_periodic': Log Event GTP Rate Limit Periodic; 'log_type_gtp_rate_limit_periodic': Log Event GTP Invalid message length across layers; 'log_type_gtp_rate_limit_periodic': Log Event GTP Protocol flag in header; 'log_type_gtp_rate_limit_periodic': Log Event GTP invalid spare bits in header; 'log_type_gtp_rate_limit_periodic': Log Event GTP invalid piggyback flag in header; 'log_type_gtp_rate_limit_periodic': Log Event invalid GTP version; 'log_type_gtp_rate_limit_periodic': Log Event mismatch of GTP message and ports;

Type: string

Supported Values: all, log_type_gtp_invalid_teid, log_gtp_type_reserved_ie_present, log_type_gtp_mandatory_ie_missing, log_type_gtp_mandatory_ie_inside_grouped_ie_missing, log_type_gtp_msisdn_filtering, log_type_gtp_out_of_order_ie, log_type_gtp_out_of_state_ie, log_type_enduser_ip_spoofed, log_type_crosslayer_correlation, log_type_message_not_supported, log_type_out_of_state, log_type_max_msg_length, log_type_gtp_message_filtering, log_type_gtp_apn_filtering, log_type_gtp_rat_type_filtering, log_type_country_code_mismatch, log_type_gtp_in_gtp_filtering, log_type_gtp_node_restart, log_type_gtp_seq_num_mismatch, log_type_gtp_rate_limit_periodic, log_type_gtp_invalid_message_length, log_type_gtp_hdr_invalid_protocol_flag, log_type_gtp_hdr_invalid_spare_bits, log_type_gtp_hdr_invalid_piggy_flag, log_type_gtp_invalid_version, log_type_gtp_invalid_ports

logging_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'log_message_sent': Log Packet Sent; 'log_type_reset': Log Event Type Reset; 'log_type_deny': Log Event Type Deny; 'log_type_session_closed': Log Event Type Session Close; 'log_type_session_opened': Log Event Type Session Open; 'rule_not_logged': Firewall Rule Not Logged; 'log-dropped': Log Packets Dropped; 'tcp-session-created': TCP Session Created; 'tcp-session-deleted': TCP Session Deleted; 'udp-session-created': UDP Session Created; 'udp-session-deleted': UDP Session Deleted; 'icmp-session-deleted': ICMP Session Deleted; 'icmp-session-created': ICMP Session Created; 'icmpv6-session-deleted': ICMPV6 Session Deleted; 'icmpv6-session-created': ICMPV6 Session Created; 'other-session-deleted': Other Session Deleted; 'other-session-created': Other Session Created; 'http-request-logged': HTTP Request Logged; 'http-logging-invalid-format': HTTP Logging Invalid Format Error; 'dcmsg_permit': Dcmsg Permit; 'alg_override_permit': Alg Override Permit; 'template_error': Template Error; 'ipv4-frag-applied': IPv4 Fragmentation Applied; 'ipv4-frag-failed': IPv4 Fragmentation Failed; 'ipv6-frag-applied': IPv6 Fragmentation Applied; 'ipv6-frag-failed': IPv6 Fragmentation Failed; 'out-of-buffers': Out of Buffers; 'add-msg-failed': Add Message to Buffer Failed; 'tcp-logging-conn-established': TCP Logging Conn Established; 'tcp-logging-conn-create-failed': TCP Logging Conn Create Failed; 'tcp-logging-conn-dropped': TCP Logging Conn Dropped; 'log-message-too-long': Log message

member-list

Type: List

Reference Object: */axapi/v3/fw/service-group/{name}/member/{name}+{port}*

name

Description FW Service Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

packet-capture-template

Description Name of the packet capture template to be bind with this object

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/object-templates/fw-service-group-tmpl*

protocol

Description 'tcp': TCP LB service; 'udp': UDP LB service;

Type: string

Supported Values: tcp, udp

sampling-enable

Type: List

traffic-replication-mirror-ip-repl

Description Replaces IP with server-IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

service-group-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'server_selection_fail_drop': Service selection fail drop; 'server_selection_fail_reset': Service selection fail reset; 'service_peak_conn': Service peak connection;

Type: string

Supported Values: all, server_selection_fail_drop, server_selection_fail_reset, service_peak_conn

service-group-list_member-list

Specification	Value
Type	*list*
Block object keys	

name

Description Member name

Type: string

Format: comp-string

Maximum Length: 127 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/fw/server*

packet-capture-template

Description Name of the packet capture template to be bind with this object

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/object-templates/fw-service-group-mem-tmpl*

port

Description Port number

Type: number

Range: 1-65534

Reference Object: */axapi/v3/fw/server/port*

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

service-group-list_member-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'curr_conn': Current connections; 'total_fwd_bytes': Total forward bytes; 'total_fwd_pkts': Total forward packets; 'total_rev_bytes': Total reverse bytes; 'total_rev_pkts': Total reverse packets; 'total_conn': Total connections; 'total_rev_pkts_inspected': Total reverse packets inspected; 'total_rev_pkts_inspected_status_code_2xx': Total reverse packets inspected status code 2xx; 'total_rev_pkts_inspected_status_code_non_5xx': Total reverse packets inspected status code non 5xx; 'curr_req': Current requests; 'total_req': Total requests; 'total_req_succ': Total requests success; 'peak_conn': Peak connections; 'response_time': Response time; 'fastest_rsp_time': Fastest response time; 'slowest_rsp_time': Slowest response time; 'curr_ssl_conn': Current SSL connections; 'total_ssl_conn': Total SSL connections; 'curr_conn_overflow': Current connection counter overflow count; 'state_flaps': State flaps count;

Type: string

Supported Values: all, curr_conn, total_fwd_bytes, total_fwd_pkts, total_rev_bytes, total_rev_pkts, total_conn, total_rev_pkts_inspected, total_rev_pkts_inspected_status_code_2xx, total_rev_pkts_inspected_status_code_non_5xx, curr_req, total_req, total_req_succ, peak_conn, response_time, fastest_rsp_time, slowest_rsp_time, curr_ssl_conn, total_ssl_conn, curr_conn_overflow, state_flaps

helper-sessions

Specification	Value
Type	*object*

idle-timeout

Description helper-sessions idle-timeout time (Idle-timeout in minutes (default: 1 minute))

Type: number

Range: 1-255

Default: 1

limit

Description Limit number of helper-sessions (Limit helper-sessions number)

Type: number

mode

Description 'disable': Disable helper-sessions;

Type: string

Supported Values: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

server-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'enable': Enable this Real Server; 'disable': Disable this Real Server;

Type: string

Supported Values: enable, disable

Default: enable

fqdn-name

Description Server hostname

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

health-check

Description Health Check Monitor (Health monitor name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: health-check and health-check-disable are mutually exclusive

Reference Object: */axapi/v3/health/monitor*

health-check-disable

Description Disable configured health check configuration

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: health-check-disable and health-check are mutually exclusive

host

Description IP Address

Type: string

Format: ipv4-address

name

Description Server Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

port-list

Type: List

Reference Object: */axapi/v3/fw/server/{name}/port/{port-number}+{protocol}*

resolve-as

Description 'resolve-to-ipv4': Use A Query only to resolve FQDN; 'resolve-to-ipv6': Use AAAA Query only to resolve FQDN; 'resolve-to-ipv4-and-ipv6': Use A as well as AAAA Query to resolve FQDN;

Type: string

Supported Values: resolve-to-ipv4, resolve-to-ipv6, resolve-to-ipv4-and-ipv6

Default: resolve-to-ipv4

sampling-enable

Type: List

server-ipv6-addr

Description IPV6 address

Type: string

Format: ipv6-address

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

server-list_port-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

health-check

Description Health Check (Monitor Name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: health-check and health-check-disable are mutually exclusive

Reference Object: */axapi/v3/health/monitor*

health-check-disable

Description Disable health check

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: health-check-disable and health-check are mutually exclusive

packet-capture-template

Description Name of the packet capture template to be bind with this object

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/object-templates/fw-server-port-tmpl*

port-number

Description Port Number

Type: number

Range: 1-65534

protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

server-list_port-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'curr_conn': Current connections; 'curr_req': Current requests; 'total_req': Total requests; 'total_req_succ': Total request success; 'total_fwd_bytes': Forward bytes; 'total_fwd_pkts': Forward packets; 'total_rev_bytes': Reverse bytes; 'total_rev_pkts': Reverse packets; 'total_conn': Total connections; 'last_total_conn': Last total connections; 'peak_conn': Peak connections; 'es_resp_200': Response status 200; 'es_resp_300': Response status 300; 'es_resp_400': Response status 400; 'es_resp_500': Response status 500; 'es_resp_other': Response status other; 'es_req_count': Total proxy request; 'es_resp_count': Total proxy Response; 'es_resp_invalid_http': Total non-http response; 'total_rev_pkts_inspected': Total reverse packets inspected; 'total_rev_pkts_inspected_good_status_code': Total reverse packets with good status code inspected; 'response_time': Response time; 'fastest_rsp_time': Fastest response time; 'slowest_rsp_time': Slowest response time;

Type: string

Supported Values: all, curr_conn, curr_req, total_req, total_req_succ, total_fwd_bytes, total_fwd_pkts, total_rev_bytes, total_rev_pkts, total_conn, last_total_conn, peak_conn, es_resp_200, es_resp_300, es_resp_400, es_resp_500, es_resp_other, es_req_count, es_resp_count, es_resp_invalid_http, total_rev_pkts_inspected, total_rev_pkts_inspected_good_status_code, response_time, fastest_rsp_time, slowest_rsp_time

server-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'curr-conn': Current connections; 'total-conn': Total connections; 'fwd-pkt': Forward packets; 'rev-pkt': Reverse Packets; 'peak-conn': Peak connections;

Type: string

Supported Values: all, curr-conn, total-conn, fwd-pkt, rev-pkt, peak-conn

session-aging-list

Specification	Value
Type	*list*
Block object keys	

icmp-idle-timeout

Description Idle Timeout time (default 2 seconds) (Second, default 2)

Type: number

Range: 2-15000

Default: 2

ip-idle-timeout

Description Idle Timeout time(sec), default is 30 (Second)

Type: number

Range: 1-2097151

Default: 30

name

Description session-aging Template (session-aging Template name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description: tcp is a **JSON Block**. Please see below for *session-aging-list_tcp*

Type: Object

Reference Object: */axapi/v3/fw/session-aging/{name}/tcp*

udp

Description: udp is a **JSON Block**. Please see below for *session-aging-list_udp*

Type: Object

Reference Object: */axapi/v3/fw/session-aging/{name}/udp*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

session-aging-list_udp

Specification	Value
Type	*object*

port-cfg

Type: List

udp-idle-timeout

Description Idle Timeout (sec), default is 120 (number)

Type: number

Range: 1-2097151

Default: 120

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

session-aging-list_udp_port-cfg

Specification	Value
Type	*list*
Block object keys	

udp-idle-timeout

Description Idle Timeout (sec), default is 120 (number)

Type: number

Range: 1-2097151

Default: 120

udp-port

Description

Type: number

Range: 1-65535

session-aging-list_tcp

Specification	Value
Type	*object*

force-delete-timeout

Description The maximum time that a session can stay in the system before being deleted, default is off (number (second))

Type: number

Range: 1-31

Mutual Exclusion: force-delete-timeout and force-delete-timeout-100ms are mutually exclusive

force-delete-timeout-100ms

Description The maximum time that a session can stay in the system before being deleted, default is off (number in 100ms)

Type: number

Range: 1-31

Mutual Exclusion: force-delete-timeout-100ms and force-delete-timeout are mutually exclusive

half-close-idle-timeout

Description TCP Half Close Idle Timeout (sec), default is off (number)

Type: number

Range: 1-120

half-open-idle-timeout

Description TCP Half Open Idle Timeout (sec), default is off (number)

Type: number

Range: 1-60

port-cfg

Type: List

tcp-idle-timeout

Description Idle Timeout (sec), default is 600 (number)

Type: number

Range: 1-2097151

Default: 600

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

session-aging-list_tcp_port-cfg

Specification	Value
Type	*list*
Block object keys	

force-delete-timeout

Description The maximum time that a session can stay in the system before being deleted, default is off (number (second))

Type: number

Range: 1-31

Mutual Exclusion: force-delete-timeout and force-delete-timeout-100ms are mutually exclusive

force-delete-timeout-100ms

Description The maximum time that a session can stay in the system before being deleted, default is off (number in 100ms)

Type: number

Range: 1-31

Mutual Exclusion: force-delete-timeout-100ms and force-delete-timeout are mutually exclusive

half-close-idle-timeout

Description TCP Half Close Idle Timeout (sec), default is off (number)

Type: number

Range: 1-120

half-open-idle-timeout

Description TCP Half Open Idle Timeout (sec), default is off (number)

Type: number

Range: 1-60

tcp-idle-timeout

Description Idle Timeout (sec), default is 600 (number)

Type: number

Range: 1-2097151

tcp-port

Description

Type: number

Range: 1-65535

client

Specification	Value
Type	*object*

name

Description Class List (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type

Description 'ipv4': Make class-list type IPv4; 'ipv6': Make class-list type IPv6;

Type: string

Supported Values: ipv4, ipv6

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ddos-protection

Specification	Value
Type	*object*

action

Description: action is a **JSON Block**. Please see below for *ddos-protection_action*

Type: Object

dynamic-blacklist

Description: dynamic-blacklist is a **JSON Block**. Please see below for *ddos-protection_dynamic-blacklist*

Type: Object

logging

Description: logging is a **JSON Block**. Please see below for *ddos-protection_logging*

Type: Object

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ddos-protection_action

Specification	Value
Type	*object*

action-type

Description 'drop': Log, and drop all packets (default); 'redistribute-route': Log, Drop, and Notify upstream router to reroute the packets;

Type: string

Supported Values: drop, redistribute-route

Default: drop

expiration

Description To specify time in minutes to revert the action (Expiration time, in minutes (default is 5 mins))

Type: number

Range: 2-144000

Default: 5

expiration-route

Description To specify time in minutes to revert the action (Expiration time, in minutes (default is 60 mins))

Type: number

Range: 2-144000

Default: 60

forward

Description Forward traffic with rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-wait-timer

Description Max time to wait before removing IP from blackhole (Max value in seconds (default 300))

Type: number

Range: 0-300

Default: 300

route-map

Description Route map name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

timer-multiply-max

Description To specify max value of timer multiplier for attacks lasted long time (Max value of timer multiplier (default is 6))

Type: number

Range: 1-100

Default: 6

ddos-protection_logging

Specification	Value
Type	*object*

enable-action

Description 'local': Enable local logs only; 'remote': Enable logging to remote server & IP-FIX; 'both': Enable both local & remote logs;

Type: string

Supported Values: local, remote, both

Default: local

logging-action

Description 'enable': enable FW DDoS protection logging; 'disable': Disable both local & remote FW DDoS protection logging;

Type: string

Supported Values: enable, disable

Default: enable

ddos-protection_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ddos_entries_too_many': Too many DDOS entries; 'ddos_entry_added': DDOS entry added; 'ddos_entry_removed': DDOS entry removed; 'ddos_entry_added_to_bgp': DDoS Entry added to BGP; 'ddos_entry_removed_from_bgp': DDoS Entry Removed from BGP; 'ddos_entry_add_to_bgp_failure': DDoS Entry BGP add failures; 'ddos_entry_remove_from_bgp_failure': DDOS entry BGP remove failures; 'ddos_packet_dropped': DDOS Packet Drop;

Type: string

Supported Values: all, ddos_entries_too_many, ddos_entry_added, ddos_entry_removed, ddos_entry_added_to_bgp, ddos_entry_removed_from_bgp, ddos_entry_add_to_bgp_failure, ddos_entry_remove_from_bgp_failure, ddos_packet_dropped

ddos-protection_dynamic-blacklist

Specification	Value
Type	*object*

cpu-threshold

Description Core-level CPU usage threshold for dynamic blacklist creation (Core-level CPU usage threshold for dynamic blacklist creation (default is 60))

Type: number

Range: 0-80

Default: 60

dir

Description 'inbound': enable in inbound direction; 'outbound': enable in outbound direction; 'both': enable in both directions;

Type: string

Supported Values: inbound, outbound, both

Default: both

dynamic-blacklist-action

Description 'enable': Enable protection against volumetric attacks using dynamic blacklist; 'disable': Disable protection against volumetric attacks using dynamic blacklist;

Type: string

Supported Values: enable, disable

Default: disable

timeout

Description Timeout value (in seconds) for dynamic blacklist (Timeout value (in seconds) for dynamic blacklist(default is 5 seconds))

Type: number

Range: 1-30

Default: 5

top-k-rules

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.53.2 fw active-rule-set

Active firewall policy

active-rule-set Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	active-rule-set

action

Description: action is a **JSON Block**. Please see below for *action*

Type: Object

dynamic-blacklist

Description: dynamic-blacklist is a **JSON Block**. Please see below for *dynamic-blacklist*

Type: Object

logging

Description: logging is a **JSON Block**. Please see below for *logging*

Type: Object

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

action

Specification	Value
Type	*object*

action-type

Description 'drop': Log, and drop all packets (default); 'redistribute-route': Log, Drop, and Notify upstream router to reroute the packets;

Type: string

Supported Values: drop, redistribute-route

Default: drop

expiration

Description To specify time in minutes to revert the action (Expiration time, in minutes (default is 5 mins))

Type: number

Range: 2-144000

Default: 5

expiration-route

Description To specify time in minutes to revert the action (Expiration time, in minutes (default is 60 mins))

Type: number

Range: 2-144000

Default: 60

forward

Description Forward traffic with rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-wait-timer

Description Max time to wait before removing IP from blackhole (Max value in seconds (default 300))

Type: number

Range: 0-300

Default: 300

route-map

Description Route map name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

timer-multiply-max

Description To specify max value of timer multiplier for attacks lasted long time (Max value of timer multiplier (default is 6))

Type: number

Range: 1-100

Default: 6

logging

Specification	Value
Type	*object*

enable-action

Description 'local': Enable local logs only; 'remote': Enable logging to remote server & IP-FIX; 'both': Enable both local & remote logs;

Type: string

Supported Values: local, remote, both

Default: local

logging-action

Description 'enable': enable FW DDoS protection logging; 'disable': Disable both local & remote FW DDoS protection logging;

Type: string

Supported Values: enable, disable

Default: enable

sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ddos_entries_too_many': Too many DDOS entries; 'ddos_entry_added': DDOS entry added; 'ddos_entry_removed': DDOS entry removed; 'ddos_entry_added_to_bgp': DDoS Entry added to BGP; 'ddos_entry_removed_from_bgp': DDoS Entry Removed from BGP; 'ddos_entry_add_to_bgp_failure': DDoS Entry BGP add failures; 'ddos_entry_remove_from_bgp_failure': DDOS entry BGP remove failures; 'ddos_packet_dropped': DDOS Packet Drop;

Type: string

Supported Values: all, ddos_entries_too_many, ddos_entry_added, ddos_entry_removed, ddos_entry_added_to_bgp, ddos_entry_removed_from_bgp, ddos_entry_add_to_bgp_failure, ddos_entry_remove_from_bgp_failure, ddos_packet_dropped

dynamic-blacklist

Specification	Value
Type	*object*

cpu-threshold

Description Core-level CPU usage threshold for dynamic blacklist creation (Core-level CPU usage threshold for dynamic blacklist creation (default is 60))

Type: number

Range: 0-80

Default: 60

dir

Description 'inbound': enable in inbound direction; 'outbound': enable in outbound direction; 'both': enable in both directions;

Type: string

Supported Values: inbound, outbound, both

Default: both

dynamic-blacklist-action

Description 'enable': Enable protection against volumetric attacks using dynamic blacklist; 'disable': Disable protection against volumetric attacks using dynamic blacklist;

Type: string

Supported Values: enable, disable

Default: disable

timeout

Description Timeout value (in seconds) for dynamic blacklist (Timeout value (in seconds) for dynamic blacklist(default is 5 seconds))

Type: number

Range: 1-30

Default: 5

2.53.25 fw ddos-protection oper

global attributes

alg-processing

Description 'honor-rule-set': Honors firewall rule-sets (Default); 'override-rule-set': Override firewall rule-sets;

Type: string

Supported Values: honor-rule-set, override-rule-set

Default: honor-rule-set

allow-non-syn-session-create

Description Allow TCP non-syn packets to trigger session creation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-app-list

Type: List

disable-application-metrics

Description Disable exporting application protocol/category statistics to Harmony Controller

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-ip-fw-sessions

Description disable create sessions for non TCP/UDP/ICMP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-undetermined-rule-logs

Description disable logs with undetermined rules

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dsr-mode-support

Description 'ipv4': support dsr for ipv4 traffic; 'ipv6': support dsr for ipv6 traffic; 'all': support dsr for both ipv4 and ipv6;

Type: string

Supported Values: ipv4, ipv6, all

extended-matching

Description 'disable': Disable extended matching;

Type: string

Supported Values: disable

inbound-refresh

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

inbound-refresh-full-cone

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

listen-on-port-timeout

Description STUN timeout (default: 2 minutes)

Type: number

Range: 0-60

Default: 2

natip-ddos-protection

Description 'enable': Enable; 'disable': Disable;

Type: string

Supported Values: enable, disable

Default: enable

permit-default-action

Description 'forward': Forward; 'next-service-mode': Service to be applied chosen based on configuration;

Type: string

Supported Values: forward, next-service-mode

respond-to-user-mac

Description Use the user's source MAC for the next hop rather than the routing table (default: off)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

disable-app-list

Specification	Value
Type	*list*
Block object keys	

disable-application-category

Description 'aaa': Protocol/application used for AAA (Authentification, Authorization and Accounting) purposes.; 'adult-content': Adult content protocol/application.; 'advertising': Advertising networks and applications.; 'application-enforcing-tls': Application known to enforce HSTS and thus use of TLS.; 'analytics-and-statistics': User analytics and statistics protocol/application.; 'anonymizers-and-proxies': Traffic-anonymization protocol/application.; 'audio-chat': Protocol/application used for Audio Chat.; 'basic': Covers all protocols required for basic classification, including most networking protocols as well as standard protocols like HTTP.; 'blog': Blogging platform protocol/application.; 'cdn': Protocol/application used for Content-Delivery Networks.; 'certification-authority': Certification Authority for SSL/TLS certificate.; 'chat': Protocol/application used for Text Chat.; 'classified-ads': Protocol/application used for Classified Advertisements.; 'cloud-based-services': SaaS and/or PaaS cloud based services.; 'crowdfunding': Service for funding a project or venture by raising small amounts of money from a large number of people, typically via the Internet.; 'cryptocurrency': Services for mining cryptocurrencies, for example a Crypto Web Browser (an application that mines crypto currency in the background while its user browses the web).; 'database':

Database-specific protocols.; 'disposable-email': Service offering Disposable Email Accounts (DEA). DEA is a technique to share temporary email address between many users.; 'ebook-reader': Services for e-book readers, i.e. connected devices that display electronic books (typically using e-ink displays to reduce glare and eye strain).; 'education': Protocols offering education services and online courses.; 'email': Native email protocol.; 'enterprise': Protocol/application used in an enterprise network.; 'file-management': Protocol/application designed specifically for file management and exchange. This can include bona fide network protocols (like SMB) as well as web/cloud services (like Dropbox).; 'file-transfer': Protocol that offers file transferring as a secondary feature. This typically includes IM, Web-Mail, and other protocols that allow file transfers in addition to their principal function.; 'forum': Online forum protocol/application.; 'gaming': Protocol/application used by games.; 'healthcare': Protocols offering medical services, i.e protocols used in medical environment.; 'instant-messaging-and-multimedia-conferencing': Protocol/application used for Instant Messaging or Multi-Conferencing.; 'internet-of-things': Internet Of Things protocol/application.; 'map-service': Digital Maps service (web site and their related API).; 'mobile': Mobile-specific protocol/application.; 'multimedia-streaming': Protocol/application used for multimedia streaming.; 'networking': Protocol used for (inter) networking purpose.; 'news-portal': Protocol/application used for News Portals.; 'payment-service': Application offering online services for accepting electronic payments by a variety of payment methods (credit card, bank-based payments such as direct debit, bank transfer, etc).; 'peer-to-peer': Protocol/application used for Peer-to-peer purposes.; 'remote-access': Protocol/application used for remote access.; 'scada': SCADA (Supervisory control and data acquisition) protocols, all generations.; 'social-networks': Social networking application.; 'software-update': Auto-update protocol.; 'speedtest': Speedtest application allowing to access quality of Internet connection (upload, download, latency, etc).; 'standards-based': Protocol issued from standardized bodies such as IETF, ITU, IEEE, ETSI, OIF.; 'transportation': Transportation services, for example smartphone applications that allow users to hail a taxi.; 'video-chat': Protocol/application used for Video Chat.; 'voip': Application used for Voice-Over-IP.; 'vpn-tunnels': Protocol/application used for VPN or tunneling purposes.; 'web': Application based on HTTP/HTTPS.; 'web-e-commerce': Protocol/application used for E-commerce websites.; 'web-search-engines': Protocol/application used for Web search portals.; 'web-websites': Protocol/application used for Company Websites.; 'webmails': Web-based e-mail application.; 'web-ext-adult': Web Extension Adult; 'web-ext-auctions': Web Extension Auctions; 'web-ext-blogs': Web Extension Blogs; 'web-ext-business-and-economy': Web Extension Business and Economy; 'web-ext-cdns': Web Extension CDNs; 'web-ext-collaboration': Web Extension Collaboration; 'web-ext-computer-and-internet-info': Web Extension Computer and Internet Info; 'web-ext-computer-and-internet-security': Web Extension Computer and Internet Security; 'web-ext-dating': Web Extension Dating; 'web-ext-educational-institutions': Web Extension Educational Institutions; 'web-ext-entertainment-and-arts': Web Extension Entertainment and Arts; 'web-ext-fashion-and-beauty': Web Extension Fashion and Beauty; 'web-ext-file-share': Web Extension File Share; 'web-ext-financial-services': Web Extension Financial Services; 'web-ext-gambling': Web Extension Gambling; 'web-ext-games': Web Extension Games; 'web-ext-government': Web Extension Government; 'web-ext-health-and-medicine': Web Extension Health and Medicine; 'web-ext-individual-stock-advice-and-tools': Web Extension Individual Stock Advice and Tools; 'web-ext-internet-portals': Web Extension Internet Portals; 'web-ext-job-search': Web Extension Job Search; 'web-ext-local-information': Web Extension Local Information; 'web-ext-malware': Web Extension Malware; 'web-ext-motor-vehicles': Web Extension Motor Vehicles; 'web-ext-music': Web Extension Music; 'web-ext-news': Web Extension News; 'web-ext-p2p': Web Extension P2P; 'web-ext-parked-sites': Web Extension Parked Sites; 'web-ext-proxy-avoid-and-anonymizers': Web Extension Proxy Avoid and Anonymizers; 'web-ext-real-estate': Web Extension Real Estate; 'web-ext-reference-and-research': Web Extension Reference and Research; 'web-ext-search-engines': Web Extension Search Engines; 'web-ext-shopping': Web Extension Shopping; 'web-ext-social-network': Web Extension Social Network; 'web-ext-society': Web Extension Society; 'web-ext-software': Web Extension

Software; 'web-ext-sports': Web Extension Sports; 'web-ext-streaming-media': Web Extension Streaming Media; 'web-ext-training-and-tools': Web Extension Training and Tools; 'web-ext-translation': Web Extension Translation; 'web-ext-travel': Web Extension Travel; 'web-ext-web-advertisements': Web Extension Web Advertisements; 'web-ext-web-based-email': Web Extension Web based Email; 'web-ext-web-hosting': Web Extension Web Hosting; 'web-ext-web-service': Web Extension Web Service;

Supported Values: enable

insertion-mode

Description 'monitor': Enable inline view-only mode; 'skip-state-checks': Enable skip stateful checks mode;

Type: string

Supported Values: monitor, skip-state-checks

ne-v4-log-periodicity

Description Periodic Logging Frequency(In Minutes)

Type: number

Range: 1-30

ne-v6-log-periodicity

Description Periodic Logging Frequency(In Minutes)

Type: number

Range: 1-30

network-element

Description: network-element is a **JSON Block**. Please see below for *network-element*

Type: Object

Reference Object: */axapi/v3/fw/gtp/network-element*

network-element-list-v4

Description Class List (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

network-element-list-v6

Description Class List (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

path-mgmt-logging

Description 'enable-log': Enable Log for Path Management;

Type: string

Supported Values: enable-log

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

network-element

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

apn-prefix

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Type: number

Format: counter

gtp-node-restart-gtp-c

Description GTP Node Restoration due to Recovery IE in GTP-C Message

Type: number

Format: counter

gtp-path-management-message

Description GTP Path Management Messages Received

Type: number

Format: counter

gtp-u-tunnel-created

Description GTP-U Tunnel Created

Type: number

Format: counter

gtp-u-tunnel-deleted

Description GTP-U Tunnel Deleted

Type: number

Format: counter

gtp-v0-c-create-pdp-resp-unsuccess

Description GTPv0-C Create PDP Context Response Unsuccessful

Type: number

Format: counter

gtp-v0-c-half-open-tunnel-closed

Description GTPv0-C Half open tunnel closed

Type: number

Format: counter

gtp-v0-c-message-skipped-apn-filtering-no-imsi

Description GTPv0-C APN/IMSI Filtering Skipped (No IMSI)

Type: number

Format: counter

gtp-v0-c-message-skipped-msisdn-filtering-no-msisdn

Description GTPv0-C MSISDN Filtering Skipped (No MSISDN)

Type: number

Format: counter

gtp-v0-c-packet-dummy-msisdn

Description GTPv0-C Packet With Dummy MSISDN Forwarded

Type: number

Format: counter

gtp-v0-c-pdu-notification-reject-request-forward

Description GTPv0-C PDU Notification Reject Request Forward

Type: number

Format: counter

gtp-v0-c-pdu-notification-request-forward

Description GTPv0-C PDU Notification Request Forward

Type: number

Format: counter

gtp-v0-c-reserved-message-allow

Description GTPv0-C Reserved Message Allow

Type: number

Format: counter

gtp-v0-c-tunnel-closed

Description GTPv0-C Tunnel Marked Deleted

Type: number

Format: counter

gtp-v0-c-tunnel-created

Description GTPv0-C Tunnel Created

Type: number

Format: counter

gtp-v0-c-tunnel-deleted

Description GTPv0-C Tunnel Deleted

Type: number

Format: counter

gtp-v0-c-tunnel-deleted-restart

Description GTPv0-C Tunnel Deleted with Restart/failure

Type: number

Format: counter

gtp-v0-c-tunnel-half-closed

Description GTPv0-C Tunnel Delete Request

Type: number

Format: counter

gtp-v0-c-tunnel-half-open

Description GTPv0-C Half open tunnel created

Type: number

Format: counter

gtp-v0-c-update-pdp-resp-unsuccess

Description GTPv0-C Update PDP Context Response Unsuccessful

Type: number

Format: counter

gtp-v1-c-create-pdp-resp-unsuccess

Description GTPv1-C Create PDP Context Response Unsuccessful

Type: number

Format: counter

gtp-v1-c-half-open-tunnel-closed

Description GTPv1-C Half open tunnel closed

Type: number

Format: counter

gtp-v1-c-message-skipped-apn-filtering-no-imsi

Description GTPv1-C APN/IMSI Filtering Skipped (No IMSI)

Type: number

Format: counter

gtp-v1-c-message-skipped-msisdn-filtering-no-msisdn

Description GTPv1-C MSISDN Filtering Skipped (No MSISDN)

Type: number

Format: counter

gtp-v1-c-packet-dummy-msisdn

Description GTPv0-C Packet With Dummy MSISDN Forwarded

Type: number

Format: counter

gtp-v1-c-pdu-notification-reject-request-forward

Description GTPv1-C PDU Notification Reject Request Forward

Type: number

Format: counter

gtp-v1-c-pdu-notification-request-forward

Description GTPv1-C PDU Notification Request Forward

Type: number

Format: counter

gtp-v1-c-reserved-message-allow

Description GTPv1-C Reserved Message Allow

Type: number

Format: counter

gtp-v1-c-tunnel-closed

Description GTPv1-C Tunnel Marked Deleted

Type: number

Format: counter

gtp-v1-c-tunnel-created

Description GTPv1-C Tunnel Created

Type: number

Format: counter

gtp-v1-c-tunnel-deleted

Description GTPv1-C Tunnel Deleted

Type: number

Format: counter

gtp-v1-c-tunnel-deleted-restart

Description GTPv1-C Tunnel Deleted with Restart/failure

Type: number

Format: counter

gtp-v1-c-tunnel-half-closed

Description GTPv1-C Tunnel Delete Request

Type: number

Format: counter

gtp-v1-c-tunnel-half-open

Description GTPv1-C Half open tunnel created

Type: number

Format: counter

gtp-v1-c-update-pdp-resp-unsuccess

Description GTPv1-C Update PDP Context Response Unsuccessful

Type: number

Format: counter

gtp-v2-c-create-sess-resp-unsuccess

Description GTPv2-C Create Session Response Unsuccessful

Type: number

Format: counter

gtp-v2-c-half-open-tunnel-closed

Description GTPv2-C Half open tunnel closed

Type: number

Format: counter

gtp-v2-c-message-skipped-apn-filtering-no-imsi

Description GTPv2-C APN/IMSI Filtering Skipped (No IMSI)

Type: number

Format: counter

gtp-v2-c-message-skipped-msisdn-filtering-no-msisdn

Description GTPv2-C MSISDN Filtering Skipped (No MSISDN)

Type: number

Format: counter

gtp-v2-c-mod_bearer-resp-unsuccess

Description GTPv2-C Modify Bearer Response Unsuccessful

Type: number

Format: counter

gtp-v2-c-packet-dummy-msisdn

Description GTPv0-C Packet With Dummy MSISDN Forwarded

Type: number

Format: counter

gtp-v2-c-piggyback-message

Description GTPv2-C Piggyback Messages

Type: number

Format: counter

gtp-v2-c-reserved-message-allow

Description GTPv2-C Reserved Message Allow

Type: number

Format: counter

gtp-v2-c-tunnel-closed

Description GTPv2-C Tunnel Marked Deleted

Type: number

Format: counter

gtp-v2-c-tunnel-created

Description GTPv2-C Tunnel Created

Type: number

Format: counter

gtp-v2-c-tunnel-deleted

Description GTPv2-C Tunnel Deleted

Type: number

Format: counter

gtp-v2-c-tunnel-deleted-restart

Description GTPv2-C Tunnel Deleted with Restart/failure

Type: number

Format: counter

gtp-v2-c-tunnel-half-closed

Description GTPv2-C Tunnel Delete Request

Type: number

Format: counter

gtp-v2-c-tunnel-half-open

Description GTPv2-C Half open tunnel created

Type: number

Format: counter

key-name

Description

Type: string

Format: counter

key-type

Description

Type: string

Format: counter

msisdn-flt-message-monitor

Description GTP-C Message forwarded via monitor mode at Msisdn filtering policy

Type: number

Format: counter

rat-flt-message-monitor

Description GTP-C Message forwarded via monitor mode at rat filtering policy

Type: number

Format: counter

rl-message-monitor

Description GTP Message forwarded via monitor mode at rate-limit policy

Type: number

Format: counter

u-downlink-bytes

Description Downlink Bytes

Type: number

Format: counter

u-downlink-pkts

Description GTP-U Downlink Packets

Type: number

Format: counter

u-uplink-bytes

Description Uplink Bytes

Type: number

Format: counter

u-uplink-pkts

Description Uplink Packets

Type: number

Format: counter

uplink-bytes

Description Uplink Bytes

Type: number

Format: counter

uplink-pkts

Description Uplink Packets

Type: number

Format: counter

vld-message-monitor

Description GTP Message forwarded via monitor mode at validation policy

Type: number

Format: counter

blade-gtp-c-smp-sig-check-failed

Description GTP-C SMP signature check Failed on PU2

Type: number

Format: counter

blade-gtp-info-ext-not-found

Description GTP-Info ext not found while freeing C-smp on PU2

Type: number

Format: counter

blade-gtp-rate-limit-entry-create-failure

Description GTP Rate Limit Entry Create Failure on PU2

Type: number

Format: counter

blade-gtp-rate-limit-smp-create-failure

Description GTP Rate Limit SMP Create Failure on PU2

Type: number

Format: counter

blade-gtp-rate-limit-t3-ctr-create-failure

Description GTP Rate Limit Dynamic Counters Create Failure on PU2

Type: number

Format: counter

blade-gtp-smp-c-check-failed

Description GTP-C SMP check Failed on PU2

Type: number

Format: counter

blade-gtp-smp-dec-sess-count-check-failed

Description GTP-U session count is 0 in GTP-C SMP on PU2

Type: number

Format: counter

blade-gtp-smp-path-check-failed

Description GTP SMP PATH check Failed on PU2

Type: number

Format: counter

blade-gtp-smp-session-count-check-failed

Description GTP-U session count is not in range of 0-11 in GTP-C SMP on PU2

Type: number

Format: counter

blade-gtp-smp-sig-check-failed

Description GTP SMP signature check Failed on PU2

Type: number

Format: counter

blade-gtp-u-smp-check-failed

Description GTP U-SMP check Failed on PU2

Type: number

Format: counter

blade-gtp-u-smp-sig-check-failed

Description GTP-U SMP signature check Failed on PU2

Type: number

Format: counter

blade-no-fwd-route

Description No Forward Route on PU2

Type: number

Format: counter

blade-no-rev-route

Description No Reverse Route on PU2

Type: number

Format: counter

blade-out-of-session-memory

Description Out of Tunnel Memory on PU2

Type: number

Format: counter

drop-gtp-bearer-not-found-in-resp

Description GTP Bearer not found in response

Type: number

Format: counter

drop-gtp-frag-or-jumbo-pkt

Description GTP Fragmented or JUMBO packet Drop

Type: number

Format: counter

drop-gtp-missing-cond-ie-bearer-ctx

Description Missing conditional IE in bearer context Drop

Type: number

Format: counter

drop-vld-gtp-echo-ie-len-exceed-msg-len

Description GTP Echo IE Length Exceeds Message Length

Type: number

Format: counter

drop-vld-gtp-echo-out-of-state-

Description GTP Echo Out of State Drop

Type: number

Format: counter

drop-vld-gtp-u-echo-out-of-state-

Description GTP-U Echo Out of State Drop

Type: number

Format: counter

gtp-c-conn-create-pkt-drop

Description GTP-C conn creation drop

Type: number

Format: counter

gtp-c-echo-path-failure

Description GTP-C Path Failure due to Echo

Type: number

Format: counter

gtp-c-fail-conn-create-slow

Description GTP-C packet failed creating L4-session in slowpath

Type: number

Format: counter

gtp-c-frag-or-jumbo-pkt-processed

Description GTP-C Fragmented or Jumbo packet processed

Type: number

Format: counter

gtp-c-frag-pkt-received

Description GTP-C Fragmented packet received

Type: number

Format: counter

gtp-c-handover-in-progress-with-conn

Description GTP-C mesg matching conn with HO In Progress

Type: number

Format: counter

gtp-c-handover-request-out-of-state-drop

Description GTP-C Handover Request Out of state Drop

Type: number

Format: counter

gtp-c-smp-sig-check-failed

Description GTP-C SMP signature check Failed

Type: number

Format: counter

gtp-create-session-request-retx-drop

Description GTP-C Retransmitted Create Session Request dropped

Type: number

Format: counter

gtp-echo-frag-or-jumbo-pkt-processed

Description GTP-Echo Fragmented or Jumbo packet processed

Type: number

Format: counter

gtp-echo-stateless-forward

Description GTP-echo Stateless Forward

Type: number

Format: counter

gtp-ext_hdr-incorrect-length

Description GTP Extension header incorrect length

Type: number

Format: counter

gtp-info-ext-not-found

Description GTP-Info ext not found while freeing C-smp

Type: number

Format: counter

gtp-monitor-forward

Description GTP messages forwarded via monitor mode

Type: number

Format: counter

gtp-node-restart-echo

Description GTP Node Restoration due to Recovery IE in Echo

Type: number

Format: counter

gtp-path-message-length-mismatch

Description GTP-Path Message Length Mismatch Across Layers

Type: number

Format: counter

gtp-pathm-fail-conn-create-slow

Description GTP path packet failed while creating L4-session in slowpath

Type: number

Format: counter

gtp-rate-limit-entry-create-failure

Description GTP Rate Limit Entry Create Failure

Type: number

Format: counter

gtp-rate-limit-smp-create-failure

Description GTP Rate Limit SMP Create Failure

Type: number

Format: counter

gtp-rate-limit-t3-ctr-create-failure

Description GTP Rate Limit Dynamic Counters Create Failure

Type: number

Format: counter

gtp-rr-message-drop

Description GTP Message Dropped in RR Mode

Type: number

Format: counter

gtp-smp-c-check-failed

Description GTP-C SMP check Failed

Type: number

Format: counter

gtp-smp-dec-sess-count-check-failed

Description GTP-U session count is 0 in GTP-C SMP

Type: number

Format: counter

gtp-smp-path-check-failed

Description GTP SMP PATH check Failed

Type: number

Format: counter

gtp-smp-sig-check-failed

Description GTP SMP signature check Failed

Type: number

Format: counter

gtp-stateless-forward

Description GTP Stateless Forward

Type: number

Format: counter

gtp-sync-tx-fw-drop-session-create

Description Conn Sync FW gtp Create Session Sent dropped

Type: number

Format: counter

gtp-tunnel-rate-limit-entry-create-failure

Description GTP Tunnel Level Rate Limit Entry Create Failure

Type: number

Format: counter

gtp-u-downlink-egress-bytes

Description GTP-U Downlink Egress Bytes

Type: number

Format: counter

gtp-u-downlink-egress-packets

Description GTP-U Downlink Egress Packets

Type: number

Format: counter

gtp-u-downlink-ingress-bytes

Description GTP-U Downlink Ingress Bytes

Type: number

Format: counter

gtp-u-downlink-ingress-packets

Description GTP-U Downlink Ingress Packets

Type: number

Format: counter

gtp-u-fail-conn-create-slow

Description GTP-U packet failed while creating L4-session in slowpath

Type: number

Format: counter

gtp-u-frag-pkt-processed

Description GTP-U Fragmented packet processed

Type: number

Format: counter

gtp-u-frag-pkt-received

Description GTP-U Fragmented packet received

Type: number

Format: counter

gtp-u-message-length-mismatch

Description GTP-U Message Length Mismatch Across Layers

Type: number

Format: counter

gtp-u-monitor-forward

Description GTP-U messages forwarded via monitor mode

Type: number

Format: counter

gtp-u-out-of-state-drop
