Supported Values: true, false, 1, 0

Default: 0

log_one-to-one-nat

Specification	Value
Type	*object*

one-to-one-merged-style

Description Merge creation and deletion of session logs to one

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

one-to-one-nat-sessions

Description Log all One-to-One NAT sessions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log_map-dhcpv6

Specification	Value
Type	*object*

map-dhcpv6-msg-type

Type: List

map-dhcpv6-prefix-all

Description Log MAP DHCPv6 prefix assignment/renewal/release

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: map-dhcpv6-prefix-all and map-dhcpv6-msg-type are mutually exclusive

log_map-dhcpv6_map-dhcpv6-msg-type

Specification	Value
Type	*list*
Block object keys	

map-dhcpv6-msg-type

Description 'prefix-assignment': Log MAP DHCPv6 prefix assignment; 'prefix-renewal': Log MAP DHCPv6 prefix renewal; 'prefix-release': Log MAP DHCPv6 prefix release;

Type: string

Supported Values: prefix-assignment, prefix-renewal, prefix-release

Mutual Exclusion: map-dhcpv6-msg-type and map-dhcpv6-prefix-all are mutually exclusive

log_fixed-nat

Specification	Value
Type	*object*

fixed-nat-http-requests

Description 'host': Log the HTTP Host Header; 'url': Log the HTTP Request URL;

Type: string

Supported Values: host, url

fixed-nat-merged-style

Description Merge creation and deletion of session logs to one

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fixed-nat-port-mappings

Description 'both': Log creation and deletion of NAT mappings; 'creation': Log creation of NAT mappings;

Type: string

Supported Values: both, creation

fixed-nat-sessions

Description Log all Fixed NAT sessions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-ports

Description: user-ports is a **JSON Block**. Please see below for *log_fixed-nat_user-ports*

Type: Object

log_fixed-nat_user-ports

Specification	Value
Type	*object*

days

Description Specify period in days

Type: number

Range: 1-30

start-time

Description Time when periodic logging starts (Specify start time(hh:mm))

Type: string

Format: time-hhmm

user-ports

Description Log Fixed NAT User Ports Configured

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-receiver

Specification	Value
Type	*object*

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

radius

Description Use RADIUS server for NAT logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-string

Description The RADIUS server's secret

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

include-radius-attribute

Specification	Value
Type	*object*

attr-cfg

Type: List

framed-ipv6-prefix

Description Include radius attributes for the prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insert-if-not-existing

Description Configure what string is to be inserted for custom RADIUS attributes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-quote

Description No quotation marks for RADIUS attributes in logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prefix-length

Description '32': Prefix length 32; '48': Prefix length 48; '64': Prefix length 64; '80': Prefix length 80; '96': Prefix length 96; '112': Prefix length 112;

Type: string

Supported Values: 32, 48, 64, 80, 96, 112

zero-in-custom-attr

Description Insert 0000 for standard and custom attributes in log string

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

include-radius-attribute_attr-cfg

Specification	Value
Type	*list*
Block object keys	

attr

Description 'imei': Include IMEI; 'imsi': Include IMSI; 'msisdn': Include MSISDN; 'custom1': Customized attribute 1; 'custom2': Customized attribute 2; 'custom3': Customized attribute 3; 'custom4': Customized attribute 4; 'custom5': Customized attribute 5; 'custom6': Customized attribute 6;

Type: string

Supported Values: imei, imsi, msisdn, custom1, custom2, custom3, custom4, custom5, custom6

attr-event

Description 'http-requests': Include in HTTP request logs; 'port-mappings': Include in port-mapping logs; 'sessions': Include in session logs; 'user-data': Include in user-data logs;

Type: string

Supported Values: http-requests, port-mappings, sessions, user-data

rule

Specification	Value
Type	*object*

interim-update-interval

Description Log interim update of NAT mappings (Interim update interval in minutes(Interval is floored to a multiple of 5))

Type: number

Range: 15-120

rule-http-requests

Description: rule-http-requests is a **JSON Block**. Please see below for *rule_rule-http-requests*

Type: Object

rule_rule-http-requests

Specification	Value
Type	*object*

dest-port

Type: List

disable-sequence-check

Description Disable http packet sequence check and don't drop out of order packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

include-all-headers

Description Include all configured headers despite of absence in HTTP request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-every-http-request

Description Log every HTTP request in an HTTP 1.1 session (Default: Log the first HTTP request in a session)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-url-len

Description Max length of URL log (Max URL length (Default: 128 char))

Type: number

Range: 100-1000

Default: 128

rule_rule-http-requests_dest-port

Specification	Value
Type	*list*
Block object keys	

dest-port-number

Description

Type: number

Range: 1-65535

include-byte-count

Description Include the byte count of HTTP Request/Response in CGN session deletion logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-log-by-destination

Specification	Value
Type	*object*

icmp

Description Disable logging for icmp traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-list

Type: List

Reference Object: */axapi/v3/cgnv6/template/logging/{name}/disable-log-by-destination/ip/{ipv4-addr}*

ip6-list

Type: List

Reference Object: */axapi/v3/cgnv6/template/logging/{name}/disable-log-by-destination/ip6/{ipv6-addr}*

others

Description Disable logging for other L4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

disable-log-by-destination_ip-list

Specification	Value
Type	*list*
Block object keys	

icmp

Description Disable logging for icmp traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-addr

Description Configure an IP subnet

Type: string

Format: ipv4-cidr

others

Description Disable logging for other L4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

disable-log-by-destination_ip-list_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

disable-log-by-destination_ip-list_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

disable-log-by-destination_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

disable-log-by-destination_ip6-list

Specification	Value
Type	*list*
Block object keys	

icmp

Description Disable logging for icmp traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-addr

Description Configure an IPv6 subnet

Type: string

Format: ipv6-address-plen

others

Description Disable logging for other L4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

disable-log-by-destination_ip6-list_tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

disable-log-by-destination_ip6-list_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

disable-log-by-destination_udp-list

Specification	Value
Type	*list*
Block object keys	

udp-port-end

Description Port Range End

Type: number

udp-port-start

Description Destination Port (Single Destination Port or Port Range Start)

Type: number

rfc-custom

Specification	Value
Type	*object*

header

Description: header is a **JSON Block**. Please see below for *rfc-custom_header*

Type: Object

message

Description: message is a **JSON Block**. Please see below for *rfc-custom_message*

Type: Object

rfc-custom_header

Specification	Value
Type	*object*

use-alternate-timestamp

Description Use alternate non-RFC5424 compliant timestamp. Ex: 1990 Jan 15 12:30:30

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rfc-custom_message

Specification	Value
Type	*object*

dhcpv6-map-prefix-assigned

Description MAP DHCPv6 prefix assigned

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

dhcpv6-map-prefix-released

Description MAP DHCPv6 prefix released

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

dhcpv6-map-prefix-renewed

Description MAP DHCPv6 prefix renewed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

http-request-got

Description HTTP request got (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

ipv6-tech

Type: List

session-created

Description Session created (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

session-deleted

Description Session deleted (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

rfc-custom_message_ipv6-tech

Specification	Value
Type	*list*
Block object keys	

fixed-nat-allocated

Description Fixed-NAT allocated (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

fixed-nat-freed

Description Fixed-NAT freed (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

port-allocated

Description Port allocated (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

port-batch-allocated

Description Port Batch allocated (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

port-batch-freed

Description Port Batch freed (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

port-batch-v2-allocated

Description Port Batch v2 allocated (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

port-batch-v2-freed

Description Port Batch v2 freed (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

port-freed

Description Port freed (Custom message string. Should be in the format of "MSGID [STRUCTURED-DATA] MSG")

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

tech-type

Description 'lsn': LSN; 'nat64': NAT64; 'ds-lite': DS-Lite; 'sixrd-nat64': 6rd-NAT64;

Type: string

Supported Values: lsn, nat64, ds-lite, sixrd-nat64

2.26.377 cgnv6 template logging disable-log-by-destination

Disable logging by destination ip address protocol and port

disable-log-by-destination Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	disable-log-by-destination
Element URI	/axapi/v3/cgnv6/template/logging/{name}/disable-log-by-destination
Element Attributes	disable-log-by-destination_attributes
Partition Visibility	shared
Schema	`disable-log-by-destination schema`

Operations Allowed:

Create Object

POST

/axapi/v3/cgnv6/template/logging/{name}/disable-log-by-destination

disable-log-by-destination attributes

```
POST /axapi/v3/cgnv6/template/logging/a/disable-log-by-destination

ip6 attributes

icmp

Description Disable logging for icmp traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-addr

Description Configure an IPv6 subnet

Type: string

Format: ipv6-address-plen

others

Description Disable logging for other L4 protocols

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-list

Type: List

udp-list

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tcp-list

Specification	Value
Type	*list*
Block object keys	

tcp-port-end

Description Port Range End

Type: number

tcp-port-start

pcp attributes

allow-third-party-from-lan

Description Allow third party request coming from LAN (default is disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-third-party-from-wan

Description Allow third party request coming from WAN (default is disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

announce

Description PCP ANNOUNCE Opcode (default is enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

check-client-nonce

Description To validate NONCE value in PCP request (default: disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-map-filter

Description To disable processing of FILTER options in MAP request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

map

Description PCP MAP Opcode (default is enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maximum

Description To set maximum lifetime of PCP mappings (default 1440 minutes)

Type: number

Range: 2-1440

Default: 1440

minimum

Description To set minimum lifetime of PCP mappings (default 2 minutes)

Type: number

Range: 2-1440

Default: 2

name

Description PCP Template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

pcp-server-port

Description PCP server listening port (default 5351) (PCP UDP destination port)

Type: number

Range: 1024-65535

Default: 5351

peer

Description PCP PEER Opcode (default is enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-ip

Description Specify source IP address for IPv4 ANNOUNCE message

Type: string

Format: ipv4-address

source-ipv6

Description Specify source IPv6 address for IPv6 ANNOUNCE message

Type: string

Format: ipv6-address

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

```

policy-list

policy-list is **JSON List** of *policy attributes*

policy-list : [

{ *policy attributes* },

{ *policy attributes* },

...

]

policy attributes

class-list

Description: class-list is a **JSON Block**. Please see below for *class-list*

Type: Object

Reference Object: */axapi/v3/cgnv6/template/policy/{name}/class-list*

name

Description Policy template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

class-list

Specification	Value
Type	*object*

client-ip-l3-dest

Description Use destination IP as client IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: client-ip-l3-dest and client-ip-l7-header are mutually exclusive

client-ip-l7-header

Description Use extract client IP address from L7 header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: client-ip-l7-header and client-ip-l3-dest are mutually exclusive

header-name

Description Specify L7 header name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

lid-list

Type: List

Reference Object: */axapi/v3/cgnv6/template/policy/{name}/class-list/lid/{lidnum}*

name

Description Class list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

class-list_lid-list

Specification	Value
Type	*list*
Block object keys	

action-value

Description 'forward': Forward the traffic even it exceeds limit; 'reset': Reset the connection when it exceeds limit;

Type: string

Supported Values: forward, reset

conn-limit

Description Connection limit

Type: number

Range: 0-1048575

conn-per

Description Per (Specify interval in number of 100ms)

Type: number

Range: 1-65535

conn-rate-limit

Description Specify connection rate limit

Type: number

Range: 1-2147483647

dns64

Description: dns64 is a **JSON Block**. Please see below for *class-list_lid-list_dns64*

Type: Object

interval

Description Specify log interval in minutes, by default system will log every over limit instance

Type: number

Range: 1-255

lidnum

Description Specify a limit ID

Type: number

Range: 1-31

lockout

Description Don't accept any new connection for certain time (Lockout duration in minutes)

Type: number

Range: 1-1023

log

Description Log a message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over-limit-action

Description Set action when exceeds limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-limit

Description Request limit (Specify request limit)

Type: number

Range: 0-1048575

request-per

Description Per (Specify interval in number of 100ms)

Type: number

Range: 1-65535

request-rate-limit

Description Request rate limit (Specify request rate limit)

Type: number

Range: 1-4294967295

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

class-list_lid-list_dns64

Specification	Value
Type	*object*

disable

Description Disable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exclusive-answer

Description Exclusive Answer in DNS Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prefix

Description IPv6 prefix

Type: string

Format: ipv6-address-plen

2.28 class-list

Objects:

2.28.1 class-list

Configure classification list

class-list Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*name*
Collection Name	*class-list-list*
Collection URI	/axapi/v3/class-list
Element Name	class-list
Element URI	/axapi/v3/class-list/{name}
Element Attributes	class-list_attributes
Partition Visibility	shared
Operational Data URI	/axapi/v3/class-list/{name}/oper
Schema	`class-list schema`

Operations Allowed:

Create Object

POST

/axapi/v3/class-list

class-list attributes

```
POST /axapi/v3/class-list/
Payload:
{
    "class-list": {
        "name": "a",
        "user-tag": "a"
    }
}
```

Create List

POST

/axapi/v3/class-list

class-list attributes

Get Object

GET

/axapi/v3/class-list/{name}

class-list attributes

```
GET /axapi/v3/class-list/a
Reponse:
{
    "class-list": {
        "name": "a",
        "file": 0,
        "uuid": "730e4e40-099f-11f0-837c-5323f81e20fe",
        "user-tag": "a",
        "a10-url": "/axapi/v3/class-list/a"
    }
}
```

Get List

GET

/axapi/v3/class-list

class-list-list

Modify Object

POST

/axapi/v3/class-list/{name}

class-list attributes

Replace Object

PUT

/axapi/v3/class-list/{name}

class-list attributes

```
PUT /axapi/v3/class-list/a
Payload:
{
    "class-list": {
        "name": "a",
        "user-tag": "abcd"
    }
}
```

Replace List

PUT

/axapi/v3/class-list

class-list-list

Delete Object

DELETE

/axapi/v3/class-list/{name}

class-list attributes

```
DELETE /axapi/v3/class-list/a
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Success"
    }
}
```

class-list-list

class-list-list is **JSON List** of *class-list attributes*

class-list-list : [

{ *class-list attributes* },

{ *class-list attributes* },

...

]

class-list attributes

ac-list

Type: List

dns

Type: List

file

Description Create/Edit a class-list stored as a file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

geo-list

Type: List

ipv4-list

Type: List

ipv6-list

Type: List

name

Description Specify name of the class list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

str-list

Type: List

type

Description 'ac': Make class-list type Aho-Corasick; 'dns': Make class-list type DNS; 'ipv4': Make class-list type IPv4; 'ipv6': Make class-list type IPv6; 'string': Make class-list type String; 'string-case-insensitive': Make class-list type String-case-insensitive. Case insensitive is applied to key string;

Type: string

Supported Values: ac, dns, ipv4, ipv6, string, string-case-insensitive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv4-list

Specification	Value
Type	*list*
Block object keys	

age

Description Specify age in minutes

Type: number

Range: 1-2000

glid

Description Use global Limit ID (Specify global LID index)

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Mutual Exclusion: glid,lid, shared-partition-glid, lsn-lid, lsn-radius-profile, and gtp-rate-limit-policy-v4 are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-shared

Description Use global Limit ID

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

gtp-rate-limit-policy-v4

Description GTP Rate Limit Template Name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: gtp-rate-limit-policy-v4,lid, glid, lsn-lid, and lsn-radius-profile are mutually exclusive

Reference Object: */axapi/v3/template/gtp/rate-limit-policy*

ipv4addr

Description Specify IP address

Type: string

Format: ipv4-cidr

lid

Description Use Limit ID defined in template (Specify LID index)

Type: number

Range: 1-1023

Mutual Exclusion: lid,glid-num, glid, lsn-lid, lsn-radius-profile, gtp-rate-limit-policy-v4, v6-glid, and dns-glid are mutually exclusive

lsn-lid

Description LSN Limit ID (LID index)

Type: number

Range: 1-1023

Mutual Exclusion: lsn-lid,lid, glid, lsn-radius-profile, and gtp-rate-limit-policy-v4 are mutually exclusive

lsn-radius-profile

Description LSN RADIUS Profile Index

Type: number

Range: 1-16

Mutual Exclusion: lsn-radius-profile,lid, glid, lsn-lid, and gtp-rate-limit-policy-v4 are mutually exclusive

shared-partition-glid

Description Reference a glid from shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: shared-partition-glid and glid are mutually exclusive

str-list

Specification	Value
Type	*list*
Block object keys	

shared-partition-str-glid

Description Reference a glid from shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: shared-partition-str-glid and str-glid are mutually exclusive

str

Description Specify key string

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

str-glid

Description Global LID index

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Mutual Exclusion: str-glid and shared-partition-str-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

str-glid-dummy

Description Use global Limit ID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: str-glid-dummy and str-lid-dummy are mutually exclusive

str-glid-shared

Description Use global Limit ID

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

str-lid

Description LID index

Type: number

Range: 1-1023

str-lid-dummy

Description Use Limit ID defined in template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: str-lid-dummy and str-glid-dummy are mutually exclusive

value-str

Description Specify value string

Type: string

Format: string-rlx

Maximum Length: 639 characters

Maximum Length: 1 characters

geo-list

Specification	Value
Type	*list*
Block object keys	

geo-location

Description Specify geo-location

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

geo-location-ipv6

Description Specify IPv6 geo-location

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

ac-list

Specification	Value
Type	*list*
Block object keys	

ac-key-string

Description Specify key string

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

ac-match-type

Description 'contains': String contains another string; 'ends-with': String ends with another string; 'equals': String equals another string; 'starts-with': String starts with another string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

ac-value

Description Specify value string

Type: string

Format: string-rlx

Maximum Length: 639 characters

Maximum Length: 1 characters

Mutual Exclusion: ac-value and gtp-rate-limit-policy-str are mutually exclusive

gtp-rate-limit-policy-str

Description GTP Rate Limit Template Name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: gtp-rate-limit-policy-str and ac-value are mutually exclusive

Reference Object: */axapi/v3/template/gtp/rate-limit-policy*

ipv6-list

Specification	Value
Type	*list*
Block object keys	

gtp-rate-limit-policy-v6

Description GTP Rate Limit Template Name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: gtp-rate-limit-policy-v6,v6-lid, v6-glid, v6-lsn-lid, and v6-lsn-radius-profile are mutually exclusive

Reference Object: */axapi/v3/template/gtp/rate-limit-policy*

ipv6-addr

Description Specify IPv6 host or subnet

Type: string

Format: ipv6-address-plen

shared-partition-v6-glid

Description Reference a glid from shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: shared-partition-v6-glid and v6-glid are mutually exclusive

v6-age

Description Specify age in minutes

Type: number

Range: 1-2000

v6-glid

Description Use global Limit ID (Specify global LID index)

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Mutual Exclusion: v6-glid,lid, shared-partition-v6-glid, v6-lsn-lid, v6-lsn-radius-profile, and gtp-rate-limit-policy-v6 are mutually exclusive

Reference Object: */axapi/v3/glid*

v6-glid-shared

Description Use global Limit ID

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

v6-lid

Description Use Limit ID defined in template (Specify LID index)

Type: number

Range: 1-1023

Mutual Exclusion: v6-lid,glid-v6, v6-lsn-lid, v6-lsn-radius-profile, and gtp-rate-limit-policy-v6 are mutually exclusive

v6-lsn-lid

Description LSN Limit ID (LID index)

Type: number

Range: 1-1023

Mutual Exclusion: v6-lsn-lid,v6-lid, v6-glid, v6-lsn-radius-profile, and gtp-rate-limit-policy-v6 are mutually exclusive

v6-lsn-radius-profile

Description LSN RADIUS Profile Index

Type: number

Range: 1-16

Mutual Exclusion: v6-lsn-radius-profile,v6-lid, v6-glid, v6-lsn-lid, and gtp-rate-limit-policy-v6 are mutually exclusive

dns

Specification	Value
Type	*list*
Block object keys	

dns-glid

Description Use global Limit ID (Specify global LID index)

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-glid, lid, and shared-partition-dns-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

dns-glid-shared

Description Use global Limit ID

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

dns-lid

Description Use Limit ID defined in template (Specify LID index)

Type: number

Range: 1-1023

Mutual Exclusion: dns-lid and glid-dns are mutually exclusive

dns-match-string

Description Domain name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

dns-match-type

Description 'contains': Domain contains another string; 'ends-with': Domain ends with another string; 'starts-with': Domain starts-with another string;

Type: string

Supported Values: contains, ends-with, starts-with

shared-partition-dns-glid

Description Reference a glid from shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: shared-partition-dns-glid and dns-glid are mutually exclusive

meta-data

Specification	Value
Type	*object*

action

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

prevent-admin-passwd

Description Prevents admin password from being changed if in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-admin-ssh-key

Description Prevents admin ssh-key from being added if in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-autofill

Description prevents use of meta-data to complete user_data configuration

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-blob

Description Prevents a10_blob from loading in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-cloud-service

Description Prevents cloud-service configuration in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-license

Description Prevents a10_license configuration in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-user-ops

Description Prevents user from being added command is in user-data

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-webservice

Description Prevents a10_license configuration in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

provider

Description 'aws': AWS user-data services; 'openstack': OpenStack user-data services;

Type: string

Supported Values: openstack

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

kafka-server-profile

Specification	Value
Type	*object*

action

Description 'register': Register the device to the cloud; 'deregister': Deregister the device from the cloud;

Type: string

Supported Values: register, deregister

active_ns

Description Set active_ns in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

alias_ns

Description Set active_ns in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

bootstrap_servers

Description Set bootstrap_servers in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

client_id

Description Set client_id in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

client_secret

Description Set client_secret in cloud credentials file

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

primary_ns

Description Set active_ns in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

resource_group

Description Set resource_group in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sasl_mechanisms

Description Set sasl_mechanisms in cloud credentials file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

sasl_password

Description Set sasl_password in cloud credentials file

Type: string

Format: password

Maximum Length: 256 characters

Maximum Length: 1 characters

schema_group_name

Description Set schema_group_name in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

secondary_ns

Description Set active_ns in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

security_protocol

Description Set security_protocol in cloud credentials file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

subscription_id

Description Set subscription_id in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tenant_id

Description Set tenant_id in cloud credentials file

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

metrics

Description: metrics is a **JSON Block**. Please see below for *cloud-provider_azure_metrics*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/azure/metrics*

cloud-provider_azure_metrics

Specification	Value
Type	*object*

action

Description 'enable': Enable Azure Application Insights; 'disable': Disable Azure Application Insights (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

cps

Description 'enable': Enable CPS Metrics; 'disable': Disable CPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

cpu

Description 'enable': Enable CPU Metrics; 'disable': Disable CPU Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ddos

Description: ddos is a **JSON Block**. Please see below for *cloud-provider_azure_metrics_ddos*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/azure/metrics/ddos*

disk

Description 'enable': Enable Disk Metrics; 'disable': Disable Disk Metrics;

Type: string

Supported Values: enable, disable

Default: disable

interfaces

Description 'enable': Enable Interfaces Metrics; 'disable': Disable Interfaces Metrics;

Type: string

Supported Values: enable, disable

Default: disable

memory

Description 'enable': Enable Memory Metrics; 'disable': Disable Memory Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-drop

Description 'enable': Enable Packet Drop Metrics; 'disable': Disable Packet Drop Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-rate

Description 'enable': Enable Packet Rate Metrics; 'disable': Disable Packet Rate Metrics;

Type: string

Supported Values: enable, disable

Default: disable

resource-id

Description Specifies the Azure Application Insights resource ID or Instance Resource ID

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

server-down-count

Description 'enable': Enable Server Down Count Metrics; 'disable': Disable Server Down Count Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-down-percentage

Description 'enable': Enable Server Down Percentage Metrics; 'disable': Disable Server Down Percentage Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-error

Description 'enable': Enable Server Error Metrics; 'disable': Disable Server Error Metrics;

Type: string

Supported Values: enable, disable

Default: disable

sessions

Description 'enable': Enable Sessions Metrics; 'disable': Disable Sessions Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ssl-cert

Description 'enable': Enable SSL Cert Metrics; 'disable': Disable SSL Cert Metrics;

Type: string

Supported Values: enable, disable

Default: disable

throughput

Description 'enable': Enable Throughput Metrics; 'disable': Disable Throughput Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tps

Description 'enable': Enable TPS Metrics; 'disable': Disable TPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cloud-provider_azure_metrics_ddos

Specification	Value
Type	*object*

entry-zone

Description 'enable': Enable All DDoS Entries and Zones Stats; 'disable': Disable All DDoS Entries and Zones Stats;

Type: string

Supported Values: enable, disable

Default: disable

port

Description 'enable': Enable All Port Metrics; 'disable': Disable All Port Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tcp

Description 'enable': Enable All TCP Metrics; 'disable': Disable All TCP Metrics;

Type: string

Supported Values: enable, disable

Default: disable

udp

Description 'enable': Enable All UDP Metrics; 'disable': Disable All UDP Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cloud-provider_azure_log

Specification	Value
Type	*object*

action

Description 'enable': Enable Azure Log Analytics Workspace; 'disable': Disable Azure Log Analytics Workspace (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

resource-id

Description Specifies the compute instance resource ID/Instance on which thunder is deployed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

workspace-id

Description Specifies the Azure Log Analytics Workspace ID

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

cloud-provider_aws

Specification	Value
Type	*object*

log

Description: log is a **JSON Block**. Please see below for *cloud-provider_aws_log*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/aws/log*

metrics

Description: metrics is a **JSON Block**. Please see below for *cloud-provider_aws_metrics*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/aws/metrics*

multi-az-failover

Description: multi-az-failover is a **JSON Block**. Please see below for *cloud-provider_aws_multi-az-failover*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/aws/multi-az-failover*

cloud-provider_aws_metrics

Specification	Value
Type	*object*

action

Description 'enable': Enable AWS CloudWatch; 'disable': Disable AWS CloudWatch (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

cps

Description 'enable': Enable CPS Metrics; 'disable': Disable CPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

cpu

Description 'enable': Enable CPU Metrics; 'disable': Disable CPU Metrics;

Type: string

Supported Values: enable, disable

Default: disable

disk

Description 'enable': Enable Disk Metrics; 'disable': Disable Disk Metrics;

Type: string

Supported Values: enable, disable

Default: disable

interfaces

Description 'enable': Enable Interfaces Metrics; 'disable': Disable Interfaces Metrics;

Type: string

Supported Values: enable, disable

Default: disable

memory

Description 'enable': Enable Memory Metrics; 'disable': Disable Memory Metrics;

Type: string

Supported Values: enable, disable

Default: disable

namespace

Description Specifies the AWS namespace where all the metrics must be published

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-drop

Description 'enable': Enable Packet Drop Metrics; 'disable': Disable Packet Drop Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-rate

Description 'enable': Enable Packet Rate Metrics; 'disable': Disable Packet Rate Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-down-count

Description 'enable': Enable Server Down Count Metrics; 'disable': Disable Server Down Count Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-down-percentage

Description 'enable': Enable Server Down Percentage Metrics; 'disable': Disable Server Down Percentage Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-error

Description 'enable': Enable Server Error Metrics; 'disable': Disable Server Error Metrics;

Type: string

Supported Values: enable, disable

Default: disable

sessions

Description 'enable': Enable Sessions Metrics; 'disable': Disable Sessions Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ssl-cert

Description 'enable': Enable SSL Cert Metrics; 'disable': Disable SSL Cert Metrics;

Type: string

Supported Values: enable, disable

Default: disable

throughput

Description 'enable': Enable Throughput Metrics; 'disable': Disable Throughput Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tps

Description 'enable': Enable TPS Metrics; 'disable': Disable TPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cloud-provider_aws_multi-az-failover

Specification	Value
Type	*object*

vrid-list

Type: List

cloud-provider_aws_multi-az-failover_vrid-list

Specification	Value
Type	*list*
Block object keys	

fip-dest

Description Alien FIP Destination CIDR Block

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

fip-interface-id

Description Data-Out Interface ID

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

route-table-id

Description Specifies the route table id of the interface

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vip-dest

Description Alien VIP Destination CIDR Block

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

vip-interface-id

Description Data-In Interface ID

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

vip-list

Type: List

Reference Object: */axapi/v3/cloud-services/cloud-provider/aws/multi-az-failover/vrid/{vrid-number}/vip/{vip-number}*

vrid-number

Description Specify ha VRRP-A vrid Number

Type: number

Range: 0-31

cloud-provider_aws_multi-az-failover_vrid-list_vip-list

Specification	Value
Type	*list*
Block object keys	

elastic-ip

Description Elastic IP address of VIP

Type: string

Format: ipv4-address

private-ip

Description Private IP address of VIP

Type: string

Format: ipv4-address

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vip-number

Description Specify ha vip Number

Type: number

Range: 0-2147483647

cloud-provider_aws_log

Specification	Value
Type	*object*

action

Description 'enable': Enable AWS CloudWatch; 'disable': Disable AWS CloudWatch (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

log-group-name

Description Specifies the log group name under which all logs are sent to AWS CloudWatch

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cloud-provider_vmware

Specification	Value
Type	*object*

log

Description: log is a **JSON Block**. Please see below for *cloud-provider_vmware_log*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/vmware/log*

metrics

Description: metrics is a **JSON Block**. Please see below for *cloud-provider_vmware_metrics*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/vmware/metrics*

cloud-provider_vmware_metrics

Specification	Value
Type	*object*

action

Description 'enable': Enable VMware vRealize Operations Manager; 'disable': Disable VMware vRealize Operations Manager (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

cps

Description 'enable': Enable CPS Metrics; 'disable': Disable CPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

cpu

Description 'enable': Enable CPU Metrics; 'disable': Disable CPU Metrics;

Type: string

Supported Values: enable, disable

Default: disable

disk

Description 'enable': Enable Disk Metrics; 'disable': Disable Disk Metrics;

Type: string

Supported Values: enable, disable

Default: disable

interfaces

Description 'enable': Enable Interfaces Metrics; 'disable': Disable Interfaces Metrics;

Type: string

Supported Values: enable, disable

Default: disable

memory

Description 'enable': Enable Memory Metrics; 'disable': Disable Memory Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-drop

Description 'enable': Enable Packet Drop Metrics; 'disable': Disable Packet Drop Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-rate

Description 'enable': Enable Packet Rate Metrics; 'disable': Disable Packet Rate Metrics;

Type: string

Supported Values: enable, disable

Default: disable

resource-id

Description Specifies the compute instance resource ID on which thunder is deployed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

server-down-count

Description 'enable': Enable Server Down Count Metrics; 'disable': Disable Server Down Count Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-down-percentage

Description 'enable': Enable Server Down Percentage Metrics; 'disable': Disable Server Down Percentage Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-error

Description 'enable': Enable Server Error Metrics; 'disable': Disable Server Error Metrics;

Type: string

Supported Values: enable, disable

Default: disable

sessions

Description 'enable': Enable Sessions Metrics; 'disable': Disable Sessions Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ssl-cert

Description 'enable': Enable SSL Cert Metrics; 'disable': Disable SSL Cert Metrics;

Type: string

Supported Values: enable, disable

Default: disable

throughput

Description 'enable': Enable Throughput Metrics; 'disable': Disable Throughput Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tps

Description 'enable': Enable TPS Metrics; 'disable': Disable TPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrops-host

Description Specifies the VMware vROps host IP address

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

cloud-provider_vmware_log

Specification	Value
Type	*object*

action

Description 'enable': Enable VMware vRealize Log Insight; 'disable': Disable VMware vRealize Log Insight (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrli-host

Description Specifies the VMware vRLI host IP address

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Description 'enable': Enable CPU Metrics; 'disable': Disable CPU Metrics;

Type: string

Supported Values: enable, disable

Default: disable

disk

Description 'enable': Enable Disk Metrics; 'disable': Disable Disk Metrics;

Type: string

Supported Values: enable, disable

Default: disable

interfaces

Description 'enable': Enable Interfaces Metrics; 'disable': Disable Interfaces Metrics;

Type: string

Supported Values: enable, disable

Default: disable

memory

Description 'enable': Enable Memory Metrics; 'disable': Disable Memory Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-drop

Description 'enable': Enable Packet Drop Metrics; 'disable': Disable Packet Drop Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-rate

Description 'enable': Enable Packet Rate Metrics; 'disable': Disable Packet Rate Metrics;

Type: string

Supported Values: enable, disable

Default: disable

resource-id

Description Specifies the compute instance resource ID on which thunder is deployed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

server-down-count

Description 'enable': Enable Server Down Count Metrics; 'disable': Disable Server Down Count Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-down-percentage

Description 'enable': Enable Server Down Percentage Metrics; 'disable': Disable Server Down Percentage Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-error

Description 'enable': Enable Server Error Metrics; 'disable': Disable Server Error Metrics;

Type: string

Supported Values: enable, disable

Default: disable

sessions

Description 'enable': Enable Sessions Metrics; 'disable': Disable Sessions Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ssl-cert

Description 'enable': Enable SSL Cert Metrics; 'disable': Disable SSL Cert Metrics;

Type: string

Supported Values: enable, disable

Default: disable

throughput

Description 'enable': Enable Throughput Metrics; 'disable': Disable Throughput Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tps

Description 'enable': Enable TPS Metrics; 'disable': Disable TPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrops-host

Description Specifies the VMware vROps host IP address

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

vmware_log

Specification	Value
Type	*object*

action

Description 'enable': Enable VMware vRealize Log Insight; 'disable': Disable VMware vRealize Log Insight (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrli-host

Description Specifies the VMware vRLI host IP address

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

metrics

Specification	Value
Type	*object*

action

Description 'enable': Enable Azure Application Insights; 'disable': Disable Azure Application Insights (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

cps

Description 'enable': Enable CPS Metrics; 'disable': Disable CPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

cpu

Description 'enable': Enable CPU Metrics; 'disable': Disable CPU Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ddos

Description: ddos is a **JSON Block**. Please see below for *metrics_ddos*

Type: Object

Reference Object: */axapi/v3/cloud-services/cloud-provider/azure/metrics/ddos*

disk

Description 'enable': Enable Disk Metrics; 'disable': Disable Disk Metrics;

Type: string

Supported Values: enable, disable

Default: disable

interfaces

Description 'enable': Enable Interfaces Metrics; 'disable': Disable Interfaces Metrics;

Type: string

Supported Values: enable, disable

Default: disable

memory

Description 'enable': Enable Memory Metrics; 'disable': Disable Memory Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-drop

Description 'enable': Enable Packet Drop Metrics; 'disable': Disable Packet Drop Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-rate

Description 'enable': Enable Packet Rate Metrics; 'disable': Disable Packet Rate Metrics;

Type: string

Supported Values: enable, disable

Default: disable

resource-id

Description Specifies the Azure Application Insights resource ID or Instance Resource ID

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

server-down-count

Description 'enable': Enable Server Down Count Metrics; 'disable': Disable Server Down Count Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-down-percentage

Description 'enable': Enable Server Down Percentage Metrics; 'disable': Disable Server Down Percentage Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-error

Description 'enable': Enable Server Error Metrics; 'disable': Disable Server Error Metrics;

Type: string

Supported Values: enable, disable

Default: disable

sessions

Description 'enable': Enable Sessions Metrics; 'disable': Disable Sessions Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ssl-cert

Description 'enable': Enable SSL Cert Metrics; 'disable': Disable SSL Cert Metrics;

Type: string

Supported Values: enable, disable

Default: disable

throughput

Description 'enable': Enable Throughput Metrics; 'disable': Disable Throughput Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tps

Description 'enable': Enable TPS Metrics; 'disable': Disable TPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

metrics_ddos

Specification	Value
Type	*object*

entry-zone

Description 'enable': Enable All DDoS Entries and Zones Stats; 'disable': Disable All DDoS Entries and Zones Stats;

Type: string

Supported Values: enable, disable

Default: disable

port

Description 'enable': Enable All Port Metrics; 'disable': Disable All Port Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tcp

Description 'enable': Enable All TCP Metrics; 'disable': Disable All TCP Metrics;

Type: string

Supported Values: enable, disable

Default: disable

udp

Description 'enable': Enable All UDP Metrics; 'disable': Disable All UDP Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

log

Specification	Value
Type	*object*

action

Description 'enable': Enable Azure Log Analytics Workspace; 'disable': Disable Azure Log Analytics Workspace (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

resource-id

Description Specifies the compute instance resource ID/Instance on which thunder is deployed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

workspace-id

Description Specifies the Azure Log Analytics Workspace ID

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

metrics attributes

action

Description 'enable': Enable VMware vRealize Operations Manager; 'disable': Disable VMware vRealize Operations Manager (default);

Type: string

Supported Values: enable, disable

Default: disable

active-partitions

Description Specifies the thunder active partition name separated by a comma for multiple values

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

cps

Description 'enable': Enable CPS Metrics; 'disable': Disable CPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

cpu

Description 'enable': Enable CPU Metrics; 'disable': Disable CPU Metrics;

Type: string

Supported Values: enable, disable

Default: disable

disk

Description 'enable': Enable Disk Metrics; 'disable': Disable Disk Metrics;

Type: string

Supported Values: enable, disable

Default: disable

interfaces

Description 'enable': Enable Interfaces Metrics; 'disable': Disable Interfaces Metrics;

Type: string

Supported Values: enable, disable

Default: disable

memory

Description 'enable': Enable Memory Metrics; 'disable': Disable Memory Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-drop

Description 'enable': Enable Packet Drop Metrics; 'disable': Disable Packet Drop Metrics;

Type: string

Supported Values: enable, disable

Default: disable

packet-rate

Description 'enable': Enable Packet Rate Metrics; 'disable': Disable Packet Rate Metrics;

Type: string

Supported Values: enable, disable

Default: disable

resource-id

Description Specifies the compute instance resource ID on which thunder is deployed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

server-down-count

Description 'enable': Enable Server Down Count Metrics; 'disable': Disable Server Down Count Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-down-percentage

Description 'enable': Enable Server Down Percentage Metrics; 'disable': Disable Server Down Percentage Metrics;

Type: string

Supported Values: enable, disable

Default: disable

server-error

Description 'enable': Enable Server Error Metrics; 'disable': Disable Server Error Metrics;

Type: string

Supported Values: enable, disable

Default: disable

sessions

Description 'enable': Enable Sessions Metrics; 'disable': Disable Sessions Metrics;

Type: string

Supported Values: enable, disable

Default: disable

ssl-cert

Description 'enable': Enable SSL Cert Metrics; 'disable': Disable SSL Cert Metrics;

Type: string

Supported Values: enable, disable

Default: disable

throughput

Description 'enable': Enable Throughput Metrics; 'disable': Disable Throughput Metrics;

Type: string

Supported Values: enable, disable

Default: disable

tps

Description 'enable': Enable TPS Metrics; 'disable': Disable TPS Metrics;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrops-host

Description Specifies the VMware vROps host IP address

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

2.30.16 cloud-services kafka-server-profile

```

meta-data attributes

action

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

prevent-admin-passwd

Description Prevents admin password from being changed if in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-admin-ssh-key

Description Prevents admin ssh-key from being added if in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-autofill

Description prevents use of meta-data to complete user_data configuration

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-blob

Description Prevents a10_blob from loading in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-cloud-service

Description Prevents cloud-service configuration in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-license

Description Prevents a10_license configuration in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-user-ops

Description Prevents user from being added command is in user-data

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prevent-webservice

Description Prevents a10_license configuration in YAML config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

provider

Description 'aws': AWS user-data services; 'openstack': OpenStack user-data services;

Type: string

Supported Values: openstack

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel-stats

Description: tunnel-stats is a **JSON Block**. Please see below for *tunnel-stats*

Type: Object

Reference Object: */axapi/v3/controller/tunnel-stats*

profile

Specification	Value
Type	*object*

action

Description 'register': Register the device to the controller; 'deregister': Deregister the device from controller;

Type: string

Supported Values: register, deregister

analytics

Description 'all': Export all the analytics information.; 'system': Export only system level policy for device management.; 'disable': Disable all the exports from the device. This is the default value.;

Type: string

Supported Values: all, system, disable

Default: disable

analytics-data

Description Use data port for analytics information exportation, if not set analytics will follow 'host use-mgmt-port' option

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api-key

Description API key for authentication

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

auto-restart-action

Description 'enable': enable auto analytics bus restart, default behavior is enable; 'disable': disable auto analytics bus restart;

Type: string

Supported Values: enable, disable

Default: enable

availability-zone

Description availablity zone of the thunder-device

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

cluster-id

Description id for the cluster in controller, typically an uuid

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

cluster-name

Description name of cluster in controller that this device is a member of

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

force

Description: force is a **JSON Block**. Please see below for *profile_force*

Type: Object

Reference Object: */axapi/v3/controller/profile/force*

host

Description Set controller host address

Type: string

Format: host

Mutual Exclusion: host and host-ipv6 are mutually exclusive

host-ipv6

Description IPV6 address or FQDN for the host

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: host-ipv6 and host are mutually exclusive

interval

Description auto analytics bus restart time interval in mins, default is 3 mins

Type: number

Range: 1-15

Default: 3

organization

Description organization for the controller

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

password-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

port

Description Set port for remote Controller

Type: number

Range: 1-32767

re-sync

Description: re-sync is a **JSON Block**. Please see below for *profile_re-sync*

Type: Object

Reference Object: */axapi/v3/controller/profile/re-sync*

region

Description region of the thunder-device

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

secret-value

Description Specify the password for the user

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

thunder-mgmt-ip

Description: thunder-mgmt-ip is a **JSON Block**. Please see below for *profile_thunder-mgmt-ip*

Type: Object

Reference Object: */axapi/v3/controller/profile/thunder-mgmt-ip*

tunnel

Description: tunnel is a **JSON Block**. Please see below for *profile_tunnel*

Type: Object

Reference Object: */axapi/v3/controller/profile/tunnel*

use-mgmt-port

Description Use management port for connections

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-name

Description user-name for the tenant

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

profile_force

Specification	Value
Type	*object*

deregister

Description forcefully deregister thunder from harmony controller

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profile_re-sync

Specification	Value
Type	*object*

analytics-bus

Description re-sync analtyics bus connections

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

schema-registry

Description re-sync the schema registry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profile_tunnel

Specification	Value
Type	*object*

action

Description 'enable': Tunnel Enable; 'disable': Tunnel Disable;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

profile_thunder-mgmt-ip

Specification	Value
Type	*object*

ip-address

Description IP address (IPv4 address)

Type: string

Format: ipv4-address

Mutual Exclusion: ip-address and ipv6-addr are mutually exclusive

ipv6-addr

Description IPV6 address for the host

Type: string

Format: ipv6-address

Mutual Exclusion: ipv6-addr and ip-address are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel-stats

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

config-replace

Specification	Value
Type	*object*

status

Description 'enable': enable config replace mode; 'disable': disable config replace mode;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

telemetry

Specification	Value
Type	*object*

log-rate

Description Max number of session logs sent by the partition per second

Type: number

Range: 0-10000

Default: 10

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

partition-tenant-info

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.32.2 controller config-replace

Enable config-replace-mode

action

Description 'register': Register the device to the controller; 'deregister': Deregister the device from controller;

Type: string

Supported Values: register, deregister

analytics

Description 'all': Export all the analytics information.; 'system': Export only system level policy for device management.; 'disable': Disable all the exports from the device. This is the default value.;

Type: string

Supported Values: all, system, disable

Default: disable

analytics-data

Description Use data port for analytics information exportation, if not set analytics will follow 'host use-mgmt-port' option

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api-key

Description API key for authentication

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

auto-restart-action

Description 'enable': enable auto analytics bus restart, default behavior is enable; 'disable': disable auto analytics bus restart;

Type: string

Supported Values: enable, disable

Default: enable

availability-zone

Description availablity zone of the thunder-device

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

cluster-id

Description id for the cluster in controller, typically an uuid

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

cluster-name

Description name of cluster in controller that this device is a member of

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

force

Description: force is a **JSON Block**. Please see below for *force*

Type: Object

Reference Object: */axapi/v3/controller/profile/force*

host

Description Set controller host address

Type: string

Format: host

Mutual Exclusion: host and host-ipv6 are mutually exclusive

host-ipv6

Description IPV6 address or FQDN for the host

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: host-ipv6 and host are mutually exclusive

interval

Description auto analytics bus restart time interval in mins, default is 3 mins

Type: number

Range: 1-15

Default: 3

organization

Description organization for the controller

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

password-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

port

Description Set port for remote Controller

Type: number

Range: 1-32767

re-sync

Description: re-sync is a **JSON Block**. Please see below for *re-sync*

Type: Object

Reference Object: */axapi/v3/controller/profile/re-sync*

region

Description region of the thunder-device

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

secret-value

Description Specify the password for the user

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

thunder-mgmt-ip

Description: thunder-mgmt-ip is a **JSON Block**. Please see below for *thunder-mgmt-ip*

Type: Object

Reference Object: */axapi/v3/controller/profile/thunder-mgmt-ip*

tunnel

Description: tunnel is a **JSON Block**. Please see below for *tunnel*

Type: Object

Reference Object: */axapi/v3/controller/profile/tunnel*

use-mgmt-port

Description Use management port for connections

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-name

Description user-name for the tenant

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

force

Specification	Value
Type	*object*

deregister

Description forcefully deregister thunder from harmony controller

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

re-sync

Specification	Value
Type	*object*

analytics-bus

Description re-sync analtyics bus connections

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

schema-registry

Description re-sync the schema registry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel

Specification	Value
Type	*object*

action

Description 'enable': Tunnel Enable; 'disable': Tunnel Disable;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

thunder-mgmt-ip

Specification	Value
Type	*object*

ip-address

Description IP address (IPv4 address)

Type: string

Format: ipv4-address

Mutual Exclusion: ip-address and ipv6-addr are mutually exclusive

ipv6-addr

Description IPV6 address for the host

Type: string

Format: ipv6-address

Mutual Exclusion: ipv6-addr and ip-address are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

run-time-user-string

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

value

Description Add run time user string

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

pattern-recognition

Specification	Value
Type	*object*

capture-backup

Description Capture Backup

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capturing-timeout

Description Capturing state timeout in seconds

Type: number

Range: 10-60000

cpu

Description: cpu is a **JSON Block**. Please see below for *pattern-recognition_cpu*

Type: Object

Reference Object: */axapi/v3/ddos/pattern-recognition/cpu*

cpu-limit

Description CPU Limit

Type: number

Range: 1-100

dedicated-cpus

Description Configure the number of dedicated cores for Pattern Recognition

Type: number

Range: 0-6

disable-app-payload-all

Description Disable application payload processing for all ports

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-timeout

Description Error state timeout in seconds

Type: number

Range: 10-60000

extracting-timeout

Description Extracting state timeout in seconds

Type: number

Range: 10-60000

hardware-filter

Description 'enable': Enable Pattern Recognition hardware filter; 'disable': Disable Pattern Recognition harware filter;

Type: string

Supported Values: enable, disable

Default: disable

sample-size

Description Sample Size

Type: number

Range: 1-50000

scheduling-timeout

Description Scheduling state timeout in seconds

Type: number

Range: 10-60000

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

sflow-event-periodic-interval

Description Configure the interval in minutes of periodic event (Default: 5 minutes, 0: No periodic updates)

Type: number

Range: 0-120

Default: 5

toggle

Description 'enable': Enable Pattern Recognition; 'disable': Disable Pattern Recognition;

Type: string

Supported Values: enable, disable

Default: disable

Maximum Length: 1 characters

network-ip-entity

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-class-list

Specification	Value
Type	*object*

class-list-name

Description Specify name of the class list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sync

Specification	Value
Type	*object*

enable

Description Enable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

local-ip

Description Local IP address for White list sync

Type: string

Format: ipv4-address

peer-ip-cfg

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sync_peer-ip-cfg

Specification	Value
Type	*list*
Block object keys	

peer-ip

Description IP Address

Type: string

Format: ipv4-address

brief

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection

Specification	Value
Type	*object*

agent-group-list

Type: List

Reference Object: */axapi/v3/ddos/detection/agent-group/{agent-group-name}*

agent-list

Type: List

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}*

ddos-script

Description: ddos-script is a **JSON Block**. Please see below for *detection_ddos-script*

Type: Object

Reference Object: */axapi/v3/ddos/detection/ddos-script*

disable

Description Disable DDoS detection (default: enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-saving

Description: entry-saving is a **JSON Block**. Please see below for *detection_entry-saving*

Type: Object

Reference Object: */axapi/v3/ddos/detection/entry-saving*

resource-usage

Description: resource-usage is a **JSON Block**. Please see below for *detection_resource-usage*

Type: Object

Reference Object: */axapi/v3/ddos/detection/resource-usage*

settings

Description: settings is a **JSON Block**. Please see below for *detection_settings*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings*

statistics

Description: statistics is a **JSON Block**. Please see below for *detection_statistics*

Type: Object

Reference Object: */axapi/v3/ddos/detection/statistics*

trustlist

Description: trustlist is a **JSON Block**. Please see below for *detection_trustlist*

Type: Object

Reference Object: */axapi/v3/ddos/detection/trustlist*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_resource-usage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_trustlist

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v4-class-list

Description IPv4 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

v6-class-list

Description IPv6 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

detection_entry-saving

Specification	Value
Type	*object*

clear-saved-data

Description Clear all saved network-object-based detection entries and learned indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-restore

Description Manually restore network-object-based detection entries and learned indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-save

Description Manually save network-object-based detection entries and learned indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_settings

Specification	Value
Type	*object*

ctrl-cpu-usage

Description Control cpu usage threshold for DDoS detection

Type: number

Range: 1-100

de-escalation-quiet-time

Description Configure de-escalation needed time in minutes from level 1 to 0.(default 1 minutes)

Type: number

Range: 1-60

dedicated-cpus

Description Configure the number of dedicated cores for detection

Type: number

Range: 1-32

detection-window-size

Description Configure detection window size in seconds (DDoS detection window size in seconds(default: 1))

Type: number

Range: 1-60

Default: 1

detector-mode

Description 'standalone': Standalone detector; 'on-box': Mitigator and Detector on the same box; 'auto-svc-discovery': Auto Service discovery using Visibility module (Deprecatd);

Type: string

Supported Values: standalone, on-box, auto-svc-discovery

entry-saving

Description: entry-saving is a **JSON Block**. Please see below for *detection_settings_entry-saving*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/entry-saving*

export-interval

Description Configure Baselining and export interval in seconds (DDoS Baselining and export interval in seconds(default: 20))

Type: number

Range: 20-3000

Default: 20

full-core-enable

Description Enable full core

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

histogram-de-escalate-percentage

Description histogram de-escalate sensitivity for DDoS detection

Type: number

Range: 1-100

histogram-escalate-percentage

Description histogram escalate sensitivity for DDoS detection

Type: number

Range: 1-100

initial-learning-interval

Description Initial learning interval (in hours) before processing

Type: number

Range: 1-168

network-object-flooding-multiple

Description multiplier for flooding detection threshold in network objects (default 2x threshold)

Type: number

Range: 2-10

Default: 2

network-object-subnet-notify-percent

Description Send subnet notification when anomaly children subnet entries over configured percentage.(default 50%)

Type: number

Range: 1-100

network-object-window-size

Description '5': 5 seconds; '10': 10 seconds; '15': 15 seconds; '30': 30 seconds; (DDoS detection window size in seconds(default: 30))

Type: string

Supported Values: 5, 10, 15, 30

Default: 30

notification-debug-log

Description 'enable': Enable detection notification debug log (default: disabled);

Type: string

Supported Values: enable

pkt-sampling

Type: List

standalone-settings

Description: standalone-settings is a **JSON Block**. Please see below for *detection_settings_standalone-settings*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings*

top-k-reset-interval

Description Configure top-k reset interval

Type: number

Range: 1-60

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-notifications

Description: zone-notifications is a **JSON Block**. Please see below for *detection_settings_zone-notifications*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/zone-notifications*

detection_settings_entry-saving

Specification	Value
Type	*object*

disable-bootup-restore

Description Disable auto-restoring when system boots up

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interval

Description Configure periodical auto-saving interval in minutes

Type: number

Range: 1-1440

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_settings_standalone-settings

Specification	Value
Type	*object*

action

Description 'enable': Enable standalone detector; 'disable': Disable standalone detector (default);

Type: string

Supported Values: enable, disable

Default: disable

netflow

Description: netflow is a **JSON Block**. Please see below for *detection_settings_standalone-settings_netflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings/netflow*

sflow

Description: sflow is a **JSON Block**. Please see below for *detection_settings_standalone-settings_sflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings/sflow*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_settings_standalone-settings_netflow

Specification	Value
Type	*object*

distribute-by-duration

Description 'enable': Enable data distribution by flow duration(default); 'disable': Disable data distribution by flow duration;

Type: string

Supported Values: enable, disable

Default: enable

listening-port

Description Netflow port to receive packets (Netflow port number(default 9996))

Type: number

Range: 1-65535

Default: 9996

template-active-timeout

Description Configure active timeout of the netflow templates received in mins (Template active timeout(mins)(default 30mins))

Type: number

Range: 2-300

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_settings_standalone-settings_sflow

Specification	Value
Type	*object*

listening-port

Description sFlow port to receive packets (sFlow port number(default 6343))

Type: number

Range: 1-65535

Default: 6343

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_settings_pkt-sampling

Specification	Value
Type	*list*
Block object keys	

override-rate

Description Sample 1 in X packets (default: X=1)

Type: number

Range: 1-50000000

start-level

Description Configure the start level for dynamic sampling adjustment (Sample 1 in N packets, the larger level the larger value of N (default: 1))

Type: number

Range: 1-10

Default: 1

detection_settings_zone-notifications

Specification	Value
Type	*object*

source-entry

Description 'enable': Enable source entry detection notification; 'disable': Disable source entry detection notification(default);

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_agent-group-list

Specification	Value
Type	*list*
Block object keys	

agent

Type: List

agent-group-name

Description Specify name for the agent-group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_agent-group-list_agent

Specification	Value
Type	*list*
Block object keys	

agent-name

Description detection agent name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/detection/agent*

detection_statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_ddos-script

Specification	Value
Type	*object*

action

Description 'delete': delete;

Type: string

Supported Values: delete

file

Description startup-config local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_agent-list

Specification	Value
Type	*list*
Block object keys	

agent-name

Description Specify name for the agent

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

agent-type

Description 'Cisco': Cisco; 'Juniper': Juniper;

Type: string

Supported Values: Cisco, Juniper

agent-v4-addr

Description Configure agent's IPv4 address

Type: string

Format: ipv4-address

agent-v6-addr

Description Configure agent's IPv6 address

Type: string

Format: ipv6-address

netflow

Description: netflow is a **JSON Block**. Please see below for *detection_agent-list_netflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}/netflow*

sampling-enable

Type: List

sflow

Description: sflow is a **JSON Block**. Please see below for *detection_agent-list_sflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}/sflow*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_agent-list_sflow

Specification	Value
Type	*object*

sflow-pkt-samples-collection

Description 'enable': Enable sflow packet samples collection(default); 'disable': Disable sflow packet samples collection;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_agent-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'sflow-packets-received': sFlow Packets Received; 'sflow-samples-received': sFlow Samples Received; 'sflow-samples-bad-len': sFlow Samples Bad Length; 'sflow-samples-non-std': sFlow Samples Non-standard; 'sflow-samples-skipped': sFlow Samples Skipped; 'sflow-sample-record-bad-len': sFlow Sample Records Bad Length; 'sflow-samples-sent-for-detection': sFlow Samples Processed For Detection; 'sflow-sample-record-invalid-layer2': sFlow Sample Records Unknown Layer-2; 'sflow-sample-ipv6-hdr-parse-fail': sFlow Sample IPv6 Record Header Parse Failures; 'sflow-disabled': sFlow Packet Samples Processing Disabled; 'netflow-disabled': Netflow Flow Samples Processing Disabled; 'netflow-v5-packets-received': Netflow v5 Packets Received; 'netflow-v5-samples-received': Netflow v5 Samples Received; 'netflow-v5-samples-sent-for-detection': Netflow v5 Samples Processed For Detection; 'netflow-v5-sample-records-bad-len': Netflow v5 Sample Records Bad Length; 'netflow-v5-max-records-exceed': Netflow v5 Sample Max Records Error; 'netflow-v9-packets-received': Netflow v9 Packets Received; 'netflow-v9-samples-received': Netflow v9 Samples Received; 'netflow-v9-samples-sent-for-detection': Netflow v9 Samples Processed For Detection; 'netflow-v9-sample-records-bad-len': Netflow v9 Sample Records Bad Length; 'netflow-v9-sample-flowset-bad-padding': Netflow v9 Sample Flowset Bad Padding; 'netflow-v9-max-records-exceed': Netflow v9 Sample Max Records Error; 'netflow-v9-template-not-found': Netflow v9 Template Not Found; 'netflow-v10-packets-received': Netflow v10 Packets Received; 'netflow-v10-samples-received': Netflow v10 Samples Received; 'netflow-v10-samples-sent-for-detection': Netflow v10 Samples Procssed For Detection; 'netflow-v10-sample-records-bad-len': Netflow v10 Sample Records Bad Length; 'netflow-v10-max-records-exceed': Netflow v10 Sample Max records Error; 'netflow-tcp-sample-received': Netflow TCP Samples Received; 'netflow-udp-sample-received': Netflow UDP Samples received; 'netflow-icmp-sample-received': Netflow ICMP Samples Received; 'netflow-other-sample-received': Netflow OTHER Samples Received; 'netflow-record-copy-oom-error': Netflow Data Record Copy Fail, Local MEM size error; 'netflow-record-rse-invalid': Netflow Data Record Reduced Size Invalid; 'netflow-sample-flow-dur-error': Netflow Sample Flow Duration Error; 'flow-dst-entry-miss': DDoS Destination Entry Lookup Failures; 'flow-ip-proto-or-port-miss': DDoS Destination Service Lookup Failures; 'flow-detection-msgq-full': Detection Message Enqueue Failures;

Type: string

Supported Values: all, sflow-packets-received, sflow-samples-received, sflow-samples-bad-len, sflow-samples-non-std, sflow-samples-skipped, sflow-sample-record-bad-len, sflow-samples-sent-for-detection, sflow-sample-record-invalid-layer2, sflow-sample-ipv6-hdr-parse-fail, sflow-disabled, netflow-disabled, netflow-v5-packets-received, netflow-v5-samples-received, netflow-v5-samples-sent-for-detection, netflow-v5-sample-records-bad-len, netflow-v5-max-records-exceed, netflow-v9-packets-received, netflow-v9-samples-received, netflow-v9-samples-sent-for-detection, netflow-v9-sample-records-bad-len, netflow-v9-sample-flowset-bad-padding, netflow-v9-max-records-exceed, netflow-v9-template-not-found, netflow-v10-packets-received, netflow-v10-samples-received, netflow-v10-samples-sent-for-detection, netflow-v10-sample-records-bad-len, netflow-v10-max-records-exceed, netflow-tcp-sample-received, netflow-udp-sample-received, netflow-icmp-sample-received, netflow-other-sample-received, netflow-record-copy-oom-error, netflow-record-rse-invalid, netflow-sample-flow-dur-error, flow-dst-entry-miss, flow-ip-proto-or-port-miss, flow-detection-msgq-full,

flow-network-entry-miss

detection_agent-list_netflow

Specification	Value
Type	*object*

active-timeout

Description Configure agent's flow active timeout (seconds)

Type: number

Range: 10-600

inactive-timeout

Description Configure agent's flow inactive timeout (seconds)

Type: number

Range: 10-600

netflow-samples-collection

Description 'enable': Enable Netflow flow samples collection(default); 'disable': Disable Netflow flow samples collection;

Type: string

Supported Values: enable, disable

Default: enable

netflow-sampling-rate

Description Configure agent's netflow sampling rate

Type: number

Range: 1-65535

Default: 1

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

session

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

long

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

exec-script

Specification	Value
Type	*object*

alert-type

Description 1: UDP Pkt Rate 2: TCP Pkt Rate 3: ICMP Pkt Rate

Type: number

Range: 1-3

exec-script-ip-portocol

Description 'icmp-v4': ip-proto icmp-v4; 'icmp-v6': ip-proto icmp-v6; 'other': ip-proto other; 'gre': ip-proto gre; 'ipv4-encap': ip-proto IPv4 Encapsulation; 'ipv6-encap': ip-proto IPv6 Encapsulation;

Type: string

Supported Values: icmp-v4, icmp-v6, other, gre, ipv4-encap, ipv6-encap

exec-script-port-other-protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

level

Description Current Level

Type: number

Range: 1-4

mock

Description Use mock data

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-num

Description Port Number

Type: number

Range: 1-65535

port-other

Description 'other': other;

Type: string

Supported Values: other

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-tcp': SIP-TCP Port; 'sip-udp': SIP-UDP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-tcp, sip-udp, quic

protocol-num

Description Protocol Number

Type: number

Range: 0-255

script

Description Specify script to execute

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

src-ip

Type: List

src-ipv6

Type: List

threshold

Description Threshold

Type: number

Range: 1-3000

timeout

Description Timeout (Default: 10 seconds, Mock Default: 2 seconds)

Type: number

Range: 1-31

zone

Description DST Zone name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

exec-script_src-ip

Specification	Value
Type	*list*
Block object keys	

ip-addr

Description Specify IP address

Type: string

Format: ipv4-address

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

exec-script_src-ipv6

Specification	Value
Type	*list*
Block object keys	

ip6-addr

Description Specify IPv6 address

Type: string

Format: ipv6-address

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

l4-ssl

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

table

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

east-west-protection

Specification	Value
Type	*object*

deployment-mode

Description 'L2-mode': Enable East-West Protection in Layer 2 mode.; 'L2-with-virtual-wire': Enable East-West Protection in Layer 2 mode with virtual-wire pairs.; 'L3-mode': Enable East-West Protection in Layer 3 mode.; 'disable': Disable East-West Protection.;

Type: string

Supported Values: L2-mode, L2-with-virtual-wire, L3-mode, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

token-authentication

Specification	Value
Type	*object*

authenticated-list

Description: authenticated-list is a **JSON Block**. Please see below for *token-authentication_authenticated-list*

Type: Object

Reference Object: */axapi/v3/ddos/token-authentication/authenticated-list*

player-mode

Description: player-mode is a **JSON Block**. Please see below for *token-authentication_player-mode*

Type: Object

Reference Object: */axapi/v3/ddos/token-authentication/player-mode*

players-list

Type: List

Reference Object: */axapi/v3/ddos/token-authentication/players/{src-ip}+{src-port}+{dst-ip}+{dst-port}*

secret-salt

Description: secret-salt is a **JSON Block**. Please see below for *token-authentication_secret-salt*

Type: Object

Reference Object: */axapi/v3/ddos/token-authentication/secret-salt*

summary

Description: summary is a **JSON Block**. Please see below for *token-authentication_summary*

Type: Object

Reference Object: */axapi/v3/ddos/token-authentication/summary*

token-authentication_authenticated-list

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

token-authentication_player-mode

Specification	Value
Type	*object*

mode

Description 'one-to-one': Only one player talks to one server; 'many-to-one': Many player talk to one server;

Type: string

Supported Values: one-to-one, many-to-one

Default: many-to-one

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

token-authentication_summary

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

token-authentication_secret-salt

Specification	Value
Type	*object*

current-salt

Description Current salt value

Type: number

Range: 0-4294967295

previous-salt

Description Previous salt value

Type: number

Range: 0-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

token-authentication_players-list

Specification	Value
Type	*list*
Block object keys	

dst-ip

Description

Type: string

Format: ipv4-address

dst-port

Description

Type: number

Range: 0-65535

magic-value

Description

Type: number

Range: 0-4294967295

src-ip

Description

Type: string

Format: ipv4-address

src-port

Description

Type: number

Range: 0-65535

dns-cache-mode

Specification	Value
Type	*object*

enable

Description Enable DNS Cache mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-icmp

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly-drop

Specification	Value
Type	*object*

packet-deformity-layer-2

Description: packet-deformity-layer-2 is a **JSON Block**. Please see below for *anomaly-drop_packet-deformity-layer-2*

Type: Object

Reference Object: */axapi/v3/ddos/anomaly-drop/packet-deformity-layer-2*

packet-deformity-layer-3

Description: packet-deformity-layer-3 is a **JSON Block**. Please see below for *anomaly-drop_packet-deformity-layer-3*

Type: Object

Reference Object: */axapi/v3/ddos/anomaly-drop/packet-deformity-layer-3*

packet-deformity-layer-4

Description: packet-deformity-layer-4 is a **JSON Block**. Please see below for *anomaly-drop_packet-deformity-layer-4*

Type: Object

Reference Object: */axapi/v3/ddos/anomaly-drop/packet-deformity-layer-4*

security-attack-layer-3

Description: security-attack-layer-3 is a **JSON Block**. Please see below for *anomaly-drop_security-attack-layer-3*

Type: Object

Reference Object: */axapi/v3/ddos/anomaly-drop/security-attack-layer-3*

security-attack-layer-4-tcp

Description: security-attack-layer-4-tcp is a **JSON Block**. Please see below for *anomaly-drop_security-attack-layer-4-tcp*

Type: Object

Reference Object: */axapi/v3/ddos/anomaly-drop/security-attack-layer-4-tcp*

security-attack-layer-4-udp

Description: security-attack-layer-4-udp is a **JSON Block**. Please see below for *anomaly-drop_security-attack-layer-4-udp*

Type: Object

Reference Object: */axapi/v3/ddos/anomaly-drop/security-attack-layer-4-udp*

anomaly-drop_security-attack-layer-4-udp

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly-drop_security-attack-layer-4-tcp

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly-drop_security-attack-layer-3

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly-drop_packet-deformity-layer-3

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly-drop_packet-deformity-layer-2

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly-drop_packet-deformity-layer-4

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

token-auth

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-other

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst

Specification	Value
Type	*object*

default-list

dst_interface-ip-list

Specification	Value
Type	*list*
Block object keys	

addr

Description IP address of interface

Type: string

Format: ipv4-address

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/l4-type/{protocol}*

log-enable

Description Enable logging of limit exceed drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/port/{port-num}+{protocol}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_interface-ip-list_port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 1-65535

protocol

Description 'tcp': tcp; 'udp': udp; 'http-probe': http port for interface health check;

Type: string

Supported Values: tcp, udp, http-probe

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_interface-ip-list_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description IP protocol number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_interface-ip-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *dst_interface-ip-list_l4-type-list_tunnel-decap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_interface-ip-list_l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

dst_interface-ip-list_l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

dst_interface-ip-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_default-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 5-1023

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-address-type

Description 'ip': ip; 'ipv6': ipv6;

Type: string

Supported Values: ip, ipv6

deny

Description Blacklist and Drop all incoming packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *dst_default-list_exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *dst_default-list_exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic dst entry

Type: number

Range: 0-2147483647

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/port/{port-num}+{protocol}*

template

Description: template is a **JSON Block**. Please see below for *dst_default-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_default-list_port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-tcp': dns-tcp; 'dns-udp': dns-udp; 'http': http; 'tcp': tcp; 'udp': udp; 'ssl-l4': ssl-l4; 'sip-udp': sip-udp; 'sip-tcp': sip-tcp;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

template

Description: template is a **JSON Block**. Please see below for *dst_default-list_port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_default-list_port-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_default-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_default-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-syn-auth

Description Disable TCP SYN Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow. Exceed action set to Drop

Type: number

Range: 1-6

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *dst_default-list_l4-type-list_tunnel-decap*

Type: Object

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list

Specification	Value
Type	*list*
Block object keys	

advertised-enable

Description BGP advertised

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blackhole-on-glid-exceed

Description Blackhole destination entry for X minutes upon glid limit exceeded

Type: number

Range: 1-30

capture-config-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/capture-config/{name}*

description

Description Description for this Destination Entry

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dest-nat-ip

Description Destination NAT IP address

Type: string

Format: ipv4-address

dest-nat-ipv6

Description Destination NAT IPv6 address

Type: string

Format: ipv6-address

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-src-dst-default

Description Drop if no match with src-based-policy class-list, and default is not configured

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-entry-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/dynamic-entry-overflow-policy/{dummy-name}*

enable-top-k

Type: List

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *dst_entry-list_exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *dst_entry-list_exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *dst_entry-list_glid-exceed-action*

Type: Object

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *dst_entry-list_hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/hw-blacklist-blocking*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-addr

Description

Type: string

Format: ipv4-address

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/ip-proto/{port-num}*

ipv6-addr

Description

Type: string

Format: ipv6-address

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational-mode

Description 'protection': Protection mode; 'bypass': Bypass mode;

Type: string

Supported Values: protection, bypass

Default: protection

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

pattern-recognition-hw-filter-enable

Description to enable pattern recognition hardware filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition-sensitivity

Description 'high': High sensitive pattern recognition; 'medium': Medium sensitive pattern recognition; 'low': Low sensitive pattern recognition;

Type: string

Supported Values: high, medium, low

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}*

port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}*

reporting-disabled

Description Disable Reporting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *dst_entry-list_sflow*

Type: Object

source-nat-pool

Description Configure source NAT

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-dst-pair

Description: src-dst-pair is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair*

src-dst-pair-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}*

src-dst-pair-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}*

src-dst-pair-settings-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-settings/{all-types}*

src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-port/{port-num}+{protocol}*

src-port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}*

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_template*

Type: Object

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *dst_entry-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/topk-destinations*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *dst_entry-list_port-list_capture-config*

Type: Object

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cache

Description DNS Cache Instance

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/dns-cache*

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *dst_entry-list_port-list_glid-exceed-action*

Type: Object

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *dst_entry-list_port-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *dst_entry-list_port-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_entry-list_port-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 0-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_entry-list_port-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *dst_entry-list_port-list_sflow*

Type: Object

signature-extraction

Description: signature-extraction is a **JSON Block**. Please see below for *dst_entry-list_port-list_signature-extraction*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/signature-extraction*

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_port-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_entry-list_port-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/topk-sources*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-list_signature-extraction

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

manual-mode

Description Enable manual mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_port-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *dst_entry-list_port-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

dst_entry-list_port-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

dst_entry-list_port-list_pattern-recognition-pu-details

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

polling

Description: polling is a **JSON Block**. Please see below for *dst_entry-list_port-list_sflow_polling*

Type: Object

dst_entry-list_port-list_sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *dst_entry-list_port-list_sflow_polling_sflow-tcp*

Type: Object

dst_entry-list_port-list_sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_port-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_dynamic-entry-overflow-policy-list_l4-type-src-dst-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_dynamic-entry-overflow-policy-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_port-range-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_capture-config*

Type: Object

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_glid-exceed-action*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/port-ind*

port-range-end

Description Port-Range End Port Number

Type: number

Range: 1-65535

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_sflow*

Type: Object

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-sources*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-range-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-range-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_port-range-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

dst_entry-list_port-range-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

dst_entry-list_port-range-list_pattern-recognition-pu-details

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-range-list_port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_port-range-list_port-ind_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max':

TCP Small Window ACK Rate Max; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max

dst_entry-list_port-range-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

dst_entry-list_port-range-list_sflow

Specification	Value
Type	*object*

polling

Description: polling is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_sflow_polling*

Type: Object

dst_entry-list_port-range-list_sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *dst_entry-list_port-range-list_sflow_polling_sflow-tcp*

Type: Object

dst_entry-list_port-range-list_sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_hw-blacklist-blocking

Specification	Value
Type	*object*

dst-enable

Description Enable Dst side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-class-list-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-list

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-class-list-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *dst_entry-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

dst_entry-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

dst_entry-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-syn-auth

Description Disable TCP SYN Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_glid-exceed-action*

Type: Object

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow

Type: number

Range: 1-6

max-rexmit-syn-per-flow-exceed-action

Description 'drop': Drop the packet; 'black-list': Add the source IP into black list;

Type: string

Supported Values: drop, black-list

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/progression-tracking*

protocol

Description 'tcp': L4-Type TCP; 'udp': L4-Type UDP; 'icmp': L4-Type ICMP; 'other': L4-Type OTHER;

Type: string

Supported Values: tcp, udp, icmp, other

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/topk-sources*

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_tunnel-rate-limit*

Type: Object

undefined-port-hit-statistics

Description: undefined-port-hit-statistics is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_undefined-port-hit-statistics*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_l4-type-list_undefined-port-hit-statistics

Specification	Value
Type	*object*

reset-interval

Description Configure port scanning counter reset interval (minutes), Default 60 mins

Type: number

Range: 1-64000

Default: 60

undefined-port-hit-statistics

Description Enable port scanning statistics

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_l4-type-list_template

Specification	Value
Type	*object*

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

dst_entry-list_l4-type-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *dst_entry-list_l4-type-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

dst_entry-list_l4-type-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

dst_entry-list_l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

dst_entry-list_l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

dst_entry-list_l4-type-list_port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_l4-type-list_port-ind_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session

Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max

dst_entry-list_l4-type-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_l4-type-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-settings-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

all-types

Description 'all-types': Settings for all types (default or class-list);

Type: string

Supported Values: all-types

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for DST entry or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-settings/{all-types}/l4-type-src-dst/{protocol}*

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

src-prefix-len

Description Specify src prefix length for IPv6 (default: not set)

Type: number

Range: 32-127

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-settings-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-port-range-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'udp': UDP Port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-port-range-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *dst_entry-list_ip-proto-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

dst_entry-list_ip-proto-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

dst_entry-list_src-port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

outbound-src-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-udp': DNS-UDP Port; 'dns-tcp': DNS-TCP Port; 'udp': UDP Port; 'tcp': TCP Port;

Type: string

Supported Values: dns-udp, dns-tcp, udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-port-list_template*

Maximum Length: 1 characters

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-high-frequency

Description Enable High frequency logging for non-event logs per entry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rate-limit

Description Rate limit per second per entry(Default : 1 per second)

Type: number

Range: 1-1000

Default: 1

dst_entry-list_sflow

Specification	Value
Type	*object*

collector

Type: List

polling

Description: polling is a **JSON Block**. Please see below for *dst_entry-list_sflow_polling*

Type: Object

dst_entry-list_sflow_collector

Specification	Value
Type	*list*
Block object keys	

sflow-name

Description Name of configured custom sFlow collector

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/sflow/collector/custom*

dst_entry-list_sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-layer-4

Description Enable sFlow Layer 4 counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total num

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the tota

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *dst_entry-list_sflow_polling_sflow-tcp*

Type: Object

sflow-undef-port-hit-stats

Description Enable sFlow undefined-port-hit-statistics polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-undef-port-hit-stats-brief

Description Enable sFlow undefined-port-hit-statistics polling in brief mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total n

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the tota

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_src-dst-pair

Specification	Value
Type	*object*

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair/app-type-src-dst/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default

Description Configure default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair/l4-type-src-dst/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair_template*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair_l4-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair_l4-type-src-dst-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_entry-list_src-dst-pair-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Src-based-policy name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/app-type-src-dst/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/l4-type-src-dst/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry under class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow

dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *dst_entry-list_src-dst-pair-policy-list_policy-class-list-list_l4-type-src-dst-list_template*

Supported Values: dst_hw_drop_rule_insert, dst_hw_drop_rule_remove, src_hw_drop_rule_insert, src_hw_drop_rule_remove, prog_first_req_time_exceed, prog_req_resp_time_exceed, prog_request_len_exceed, prog_response_len_exceed, prog_resp_pkt_rate_exceed, prog_resp_req_time_exceed, entry_sync_message_received, entry_sync_message_sent, prog_conn_sent_exceed, prog_conn_rcvd_exceed, prog_conn_time_exceed, prog_conn_rcvd_sent_ratio_exceed, prog_win_sent_exceed, prog_win_rcvd_exceed, prog_win_rcvd_sent_ratio_exceed, prog_exceed_drop, prog_exceed_bl, prog_conn_exceed_drop, prog_conn_exceed_bl, prog_win_exceed_drop, prog_win_exceed_bl, dst_exceed_action_drop, src_hw_drop, dst_tcp_auth_rst, dst_src_learn_overflow, tcp_fwd_sent, udp_fwd_sent, prog_query_exceed, prog_think_exceed, prog_conn_samples, prog_req_samples, prog_win_samples, prog_conn_samples_processed, prog_req_samples_processed, prog_win_samples_processed, tcp_invalid_synack

dst_entry-list_enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-type

Description 'destination': Topk destination IP;

Type: string

Supported Values: destination

dst_entry-list_exceed-log-dep-cfg

Specification	Value
Type	*object*

exceed-log-enable

Description (Deprecated)Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow-dep

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

default-address-type

Description 'ip': ip; 'ipv6': ipv6;

Type: string

Supported Values: ip, ipv6

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port/{port-num}+{protocol}*

src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/src-port/{port-num}+{protocol}*

template

Description: template is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-tcp': dns-tcp; 'dns-udp': dns-udp; 'http': http; 'tcp': tcp; 'udp': udp; 'ssl-l4': ssl-l4; 'sip-udp': sip-udp; 'sip-tcp': sip-tcp;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

template

Description: template is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_port-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Protocol Number

Type: number

Range: 0-255

template

Description: template is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_ip-proto-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_ip-proto-list_template

Specification	Value
Type	*object*

other

Description DDOS other template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

with-sflow-sample

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_dynamic-entry-overflow-policy-list_exceed-log-dep-cfg

Specification	Value
Type	*object*

exceed-log-enable

Description (Deprecated)Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow-dep

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_dynamic-entry-overflow-policy-list_src-port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'udp': udp; 'tcp': tcp;

Type: string

Supported Values: udp, tcp

template

Description: template is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_src-port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_src-port-list_template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow. Exceed action set to Drop

Type: number

Range: 1-6

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *dst_dynamic-entry-overflow-policy-list_l4-type-list_tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_dynamic-entry-overflow-policy-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_dynamic-entry-overflow-policy-list_l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

dst_dynamic-entry-overflow-policy-list_l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

dst_dynamic-entry

Specification	Value
Type	*object*

all-entries

Description: all-entries is a **JSON Block**. Please see below for *dst_dynamic-entry_all-entries*

dst_zone-list

Specification	Value
Type	*list*
Block object keys	

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

advertised-enable

Description BGP advertised

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/capture-config/{name}*

collector

Type: List

continuous-learning

Description Continuous learning of detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

description

Description Description for this Destination Zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dest-nat-ip

Description Destination NAT IP address

Type: string

Format: ipv4-address

dest-nat-ipv6

Description Destination NAT IPv6 address

Type: string

Format: ipv6-address

detection

Description: detection is a **JSON Block**. Please see below for *dst_zone-list_detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection*

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Type: List

force-operational-mode

Description Force configure operational mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *dst_zone-list_hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip

Type: List

ip-proto

Description: ip-proto is a **JSON Block**. Please see below for *dst_zone-list_ip-proto*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto*

ipv6

Type: List

is-from-wizard

Description Is It Created from Onbox GUI Wizard

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-high-frequency

Description Enable High frequency logging for non-event logs per zone

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-restrictive

Description Non-restrictive mode ignores Zero Thresholds Indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational-mode

Description 'idle': Idle mode; 'monitor': Monitor mode; 'learning': Learning mode;

Type: string

Supported Values: idle, monitor, learning

Default: idle

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

outbound-policy

Description: outbound-policy is a **JSON Block**. Please see below for *dst_zone-list_outbound-policy*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/outbound-policy*

packet-anomaly-detection

Description: packet-anomaly-detection is a **JSON Block**. Please see below for *dst_zone-list_packet-anomaly-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/packet-anomaly-detection*

pattern-recognition-hw-filter-enable

Description to enable pattern recognition hardware filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition-sensitivity

Description 'high': High sensitive pattern recognition; 'medium': Medium sensitive pattern recognition; 'low': Low sensitive pattern recognition;

Type: string

Supported Values: high, medium, low

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port

Description: port is a **JSON Block**. Please see below for *dst_zone-list_port*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port*

port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}*

rate-limit

Description Rate limit per second per zone(Default : 1 per second)

Type: number

Range: 1-1000

Default: 1

reporting-disabled

Description Disable Reporting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable sFlow counter polling packets, tcp-basic, tcp-stateful and http. WARNING: Zone level Sflow polling might induce heavy CP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-layer-4, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-layer-4

Description Enable sFlow Layer 4 counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the number of

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-layer-4 and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *dst_zone-list_sflow-tcp*

Type: Object

source-nat-pool

Description Configure source NAT

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-port

Description: src-port is a **JSON Block**. Please see below for *dst_zone-list_src-port*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port*

src-port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}*

src-prefix-len

Description Specify src prefix length for IPv6 (default: not set)

Type: number

Range: 32-127

telemetry-enable

Description Enable from-l3-peer flag for the zone, thus all the ip entries in the zone will be dynamically created/deleted based on the BGP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-sensitivity

Description tune threshold range (default OFF)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Default: OFF

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *dst_zone-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/topk-destinations*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-gui

Description: web-gui is a **JSON Block**. Please see below for *dst_zone-list_web-gui*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui*

zone-migrate-to-opposite

Description Migrate zone to opposite PU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

zone-profile

Description Apply threshold profile

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-profile*

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_zone-template*

Type: Object

dst_zone-list_outbound-policy

Specification	Value
Type	*object*

name

Description Specify name of the outbound policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/outbound-policy*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip

Specification	Value
Type	*list*
Block object keys	

expand-ip-subnet

Description Expand this subnet to individual IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expand-ip-subnet-mode

Description 'default': Default learning mechanism (Default: Dynamic); 'dynamic': Dynamic learning; 'static': Static learning;

Type: string

Supported Values: default, dynamic, static

Default: default

ip-addr

Description Specify IP address

Type: string

Format: ipv4-address

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

dst_zone-list_detection

Specification	Value
Type	*object*

notification

Description: notification is a **JSON Block**. Please see below for *dst_zone-list_detection_notification*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/notification*

outbound-detection

Description: outbound-detection is a **JSON Block**. Please see below for *dst_zone-list_detection_outbound-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection*

packet-anomaly-detection

Description: packet-anomaly-detection is a **JSON Block**. Please see below for *dst_zone-list_detection_packet-anomaly-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/packet-anomaly-detection*

service-discovery

Description: service-discovery is a **JSON Block**. Please see below for *dst_zone-list_detection_service-discovery*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/service-discovery*

settings

Description 'settings': settings;

Type: string

Supported Values: settings

toggle

Description 'enable': Enable detection; 'disable': Disable detection;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

victim-ip-detection

Description: victim-ip-detection is a **JSON Block**. Please see below for *dst_zone-list_detection_victim-ip-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/victim-ip-detection*

dst_zone-list_detection_packet-anomaly-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/packet-anomaly-detection/indicator/{type}*

toggle

Description 'enable': Enable packet anomaly; 'disable': Disable packet anomaly;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_packet-anomaly-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

threshold-num

Description Threshold for each indicator

Type: number

Range: 1-65535

Default: 100

type

Description 'port-zero-pkt-rate': Port Zero Packet Rate (default 100 packet per second);

Type: string

Supported Values: port-zero-pkt-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_victim-ip-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

histogram-toggle

Description 'histogram-enable': Enable histogram statistics of victim IP detection; 'histogram-disable': Disable histogram statistics of victim IP detection;

Type: string

Supported Values: histogram-enable, histogram-disable

Default: histogram-disable

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/victim-ip-detection/indicator/{type}*

toggle

Description 'enable': Enable victim IP detection; 'disable': Disable victim IP detection;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_victim-ip-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

ip-threshold-num

Description Threshold for IP

Type: number

Range: 1-2147483647

type

Description 'pkt-rate': rate of incoming packets; 'reverse-pkt-rate': rate of reverse coming packets; 'fwd-byte-rate': rate of incoming bytes; 'rev-byte-rate': rate of reverse coming bytes;

Type: string

Supported Values: pkt-rate, reverse-pkt-rate, fwd-byte-rate, rev-byte-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_notification

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

notification

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_notification_notification

Specification	Value
Type	*list*
Block object keys	

notification-template-name

Description Specify the notification template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/notification-template*

dst_zone-list_detection_service-discovery

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

pkt-rate-threshold

Description packet rate threshold for discovery (default 10 packets per second)

Type: number

Range: 1-255

Default: 10

toggle

Description 'enable': Enable service discovery; 'disable': Disable service discovery;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_outbound-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

discovery-method

Description 'asn': Autonomous Systems number; 'country': Country;

Type: string

Supported Values: asn, country

discovery-record

Description Maximum number of top locations

Type: number

Range: 1-100

Default: 10

enable-top-k

Type: List

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection/indicator/{type}*

toggle

Description 'enable': Enable outbound detection; 'disable': Disable outbound detection;

Type: string

Supported Values: enable, disable

Default: disable

topk-source-subnet

Description: topk-source-subnet is a **JSON Block**. Please see below for *dst_zone-list_detection_outbound-detection_topk-source-subnet*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection/topk-source-subnet*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_outbound-detection_topk-source-subnet

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_detection_outbound-detection_enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-netmask

Description Subnet mask. The value should be less than or equal to the minimum zone subnet mask + 8 (IPv6 Subnet mask)

Type: number

Range: 1-128

Default: 128

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-type

Description 'source-subnet': Topk source subnet;

Type: string

Supported Values: source-subnet

dst_zone-list_detection_outbound-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

threshold-large-num

Description Threshold for each geo-location

Type: number

Range: 1-10995116277760

threshold-num

Description Threshold for each geo-location

Type: number

Range: 1-2147483647

threshold-str

Description Threshold for each geo-location (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, syn-rate, fin-rate, rst-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_packet-anomaly-detection

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto

Specification	Value
Type	*object*

proto-name-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}*

proto-number-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}*

proto-tcp-udp-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}*

dst_zone-list_ip-proto_proto-number-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

esp-inspect

Description: esp-inspect is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_esp-inspect*

Type: Object

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/progression-tracking*

protocol-num

Description Protocol Number

Type: number

Range: 0-255

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dst_zone-list_ip-proto_proto-number-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

dst_zone-list_ip-proto_proto-number-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_ip-proto_proto-number-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_ip-proto_proto-number-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_manual-mode-list_zone-template*

Type: Object

dst_zone-list_ip-proto_proto-number-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_src-based-policy-list

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid, glid, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

dst_zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

dst_zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

dst_zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_port-ind_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_rate_adaptive_threshold': Pkt Rate Adaptive Threshold; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_pkt_drop_rate_adaptive_threshold': Pkt Drop Rate Adaptive Threshold; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_syn_rate_adaptive_threshold': TCP SYN Rate Adaptive Threshold; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_fin_rate_adaptive_threshold': TCP FIN Rate Adaptive Threshold; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_rst_rate_adaptive_threshold': TCP RST Rate Adaptive Threshold; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_small_window_ack_rate_adaptive_threshold': TCP

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current,

ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

dst_zone-list_ip-proto_proto-number-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_esp-inspect

Specification	Value
Type	*object*

auth-algorithm

Description 'AUTH_NULL': No Integrity Check Value; 'HMAC-SHA-1-96': 96 bit Auth Algo; 'HMAC-SHA-256-96': 96 bit Auth Algo; 'HMAC-SHA-256-128': 128 bit Auth Algo; 'HMAC-SHA-384-192': 192 bit Auth Algo; 'HMAC-SHA-512-256': 256 bit Auth Algo; 'HMAC-MD5-96': 96 bit Auth Algo; 'MAC-RIPEMD-160-96': 96 bit Auth Algo;

Type: string

Supported Values: AUTH_NULL, HMAC-SHA-1-96, HMAC-SHA-256-96, HMAC-SHA-256-128, HMAC-SHA-384-192, HMAC-SHA-512-256, HMAC-MD5-96, MAC-RIPEMD-160-96

encrypt-algorithm

Description 'NULL': Null Encryption Algorithm;

Type: string

Supported Values: NULL

mode

Description 'transport': Transport mode;

Type: string

Supported Values: transport

dst_zone-list_ip-proto_proto-number-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-number-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for ip-proto icmp-v4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/ip-filtering-policy-statistics*

key-cfg

Type: List

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/progression-tracking*

protocol

Description 'icmp-v4': ip-proto icmp-v4; 'icmp-v6': ip-proto icmp-v6; 'other': ip-proto other; 'gre': ip-proto gre; 'ipv4-encap': ip-proto IPv4 Encapsulation; 'ipv6-encap': ip-proto IPv6 Encapsulation;

Type: string

Supported Values: icmp-v4, icmp-v6, other, gre, ipv4-encap, ipv6-encap

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-sources*

tunnel-decap

Description Enable tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-rate-limit

Description Enable DDOS-protection on tunnel traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dst_zone-list_ip-proto_proto-name-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

dst_zone-list_ip-proto_proto-name-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_ip-proto_proto-name-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_ip-proto_proto-name-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_manual-mode-list_zone-template*

Type: Object

dst_zone-list_ip-proto_proto-name-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, icmp-v4, icmp-v6, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_zone-template*

dst_zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

dst_zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v4 and class-list-glid are mutually exclusive

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v6 and class-list-glid are mutually exclusive

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-tcp-udp-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-tcp-udp-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *dst_zone-list_ip-proto_proto-tcp-udp-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}/ip-filtering-policy-statistics*

protocol

Description 'tcp': ip-proto tcp; 'udp': ip-proto udp;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_ip-proto_proto-tcp-udp-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

dst_zone-list_ip-proto_proto-tcp-udp-list_ip-filtering-policy-statistics

Specification	Value

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified under zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/port-ind*

port-range-end

Description Port-Range End Port Number

Type: number

Range: 1-65535

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts*

dst_zone-list_port-range-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload, default 0

Type: number

Range: 0-1500

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dst_zone-list_port-range-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

dst_zone-list_port-range-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_port-range-list_level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_port-range-list_virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enables creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}*

dst_zone-list_port-range-list_virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

dst_zone-list_port-range-list_virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

dst_zone-list_port-range-list_virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

dst_zone-list_port-range-list_virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_manual-mode-list_zone-template*

Type: Object

dst_zone-list_port-range-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_src-based-policy-list

Specification	Value
Type	*list*

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

dst_zone-list_port-range-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

dst_zone-list_port-range-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

dst_zone-list_port-range-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port-range-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

dst_zone-list_port-range-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

dst_zone-list_port-range-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_zone-list_port-range-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_collector

Specification	Value
Type	*list*
Block object keys	

sflow-name

Description Name of configured custom sFlow collector

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/sflow/collector/custom*

dst_zone-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_capture-config-list

Specification	Value
Type	*list*
Block object keys	

mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_zone-template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_zone-list_hw-blacklist-blocking

Specification	Value
Type	*object*

dst-enable

Description Enable Dst side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port

Specification	Value
Type	*object*

zone-service-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}*

zone-service-other-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}*

dst_zone-list_port_zone-service-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts*

dst_zone-list_port_zone-service-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload

Type: number

Range: 0-1500

Default: 0

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dst_zone-list_port_zone-service-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

dst_zone-list_port_zone-service-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

start-signature-extraction

Description Start signature extraction from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_port_zone-service-list_level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_port_zone-service-list_virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enable creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}*

dst_zone-list_port_zone-service-list_virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (AC type Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

servername-no-sni

Description Match when there is no SNI extension found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

dst_zone-list_port_zone-service-list_virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

dst_zone-list_port_zone-service-list_virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

dst_zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

dst_zone-list_port_zone-service-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

dst_zone-list_port_zone-service-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-other-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for this zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/port-ind*

port-other

Description 'other': other;

Type: string

Supported Values: other

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/progression-tracking*

protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-tcp-basic, sflow-tcp-stateful, and sflow-ip-filtering-policy are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-other-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-other-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-other-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dst_zone-list_port_zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-other-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

dst_zone-list_port_zone-service-other-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_port_zone-service-other-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-other-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

dst_zone-list_port_zone-service-other-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_port_zone-service-other-list_manual-mode-list_zone-template*

Type: Object

dst_zone-list_port_zone-service-other-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst_zone-list_port_zone-service-other-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protocol

Description 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_src-port-range-list_zone-template*

Type: Object

dst_zone-list_src-port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_zone-list_src-port-range-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

dst_zone-list_src-port-range-list_zone-template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst_zone-list_src-port-range-list_port-ind

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_src-port-range-list_level-list

Specification	Value
Type	*list*
Block object keys	

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1;

Type: string

Supported Values: 0, 1

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dst_zone-list_src-port-range-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

type

Description 'pkt-rate': rate of incoming packets; 'bit-rate': rate of incoming bits;

Type: string

Supported Values: pkt-rate, bit-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-2147483647

dst_zone-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total nu

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

dst_zone-list_src-port

Specification	Value
Type	*object*

zone-src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}*

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port-other/{port-other}+{protocol}*

dst_zone-list_src-port_zone-src-port-list

Specification	Value
Type	*list*
Block object keys	

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *dst_zone-list_src-port_zone-src-port-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/level/{level-num}*

outbound-src-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

port-ind

Description: port-ind is a **JSON Block**. Please see below for *dst_zone-list_src-port_zone-src-port-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/port-ind*

port-num

Description Source Port Number

Type: number

Range: 1-65535

protocol

Description 'dns-udp': DNS-UDP Port; 'dns-tcp': DNS-TCP Port; 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: dns-udp, dns-tcp, udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dst_zone-list_src-port_zone-src-port-list_zone-template*

dst_zone-list_enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-type

Description 'destination': Topk destination IP;

Type: string

Supported Values: destination

system-default

Specification	Value
Type	*object*

limit-list

Type: List

Reference Object: */axapi/v3/ddos/system-default/limit/{limit-type}*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

system-default_limit-list

Specification	Value
Type	*list*
Block object keys	

default-bit-rate-limit

Description Configure Default Kibit (kibibit / 1024-bit) rate limit

Type: number

Range: 1-16000000

default-conn-limit

Description Configure Default Connection limit

Type: number

Range: 1-16000000

default-conn-rate-limit

Description Configure Default Connection rate limit

Type: number

Range: 1-16000000

default-frag-pkt-rate-limit

Description Configure Default Fragmented packet rate limit

Type: number

Range: 1-16000000

default-over-limit-action

Description: default-over-limit-action is a **JSON Block**. Please see below for *system-default_limit-list_default-over-limit-action*

Type: Object

default-pkt-rate-limit

Description Configure Default Packet rate limit

Type: number

Range: 1-16000000

limit-type

Description 'dst-entry': dst-entry; 'dst-icmp': dst-icmp; 'dst-other': dst-other; 'dst-tcp': dst-tcp; 'dst-udp': dst-udp; 'src-entry': src-entry; 'src-icmp': src-icmp; 'src-other': src-other; 'src-tcp': src-tcp; 'src-udp': src-udp;

Type: string

Supported Values: dst-entry, dst-icmp, dst-other, dst-tcp, dst-udp, src-entry, src-icmp, src-other, src-tcp, src-udp

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

system-default_limit-list_default-over-limit-action

Specification	Value
Type	*object*

drop

Description Silently Drop the new connection / new packet when it exceeds limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

notification-template-common

Specification	Value
Type	*object*

default-template

Type: List

on-box-gui-notification

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

notification-template-common_default-template

Specification	Value
Type	*list*
Block object keys	

default-notification-template

Description Specify the notification template name (Default notification template name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/notification-template*

zone-template

Specification	Value
Type	*object*

dns-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/dns/{name}*

encap-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/encap/{encap-tmpl-name}*

http-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/http/{http-tmpl-name}*

icmp-v4-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}*

icmp-v6-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}*

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/ip-proto/{name}*

logging-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/logging/{logging-tmpl-name}*

quic-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}*

sip-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/sip/{sip-tmpl-name}*

ssl-l4-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/ssl-l4/{ssl-l4-tmpl-name}*

tcp-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}*

udp-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/udp/{name}*

zone-template_logging-list

Specification	Value
Type	*list*
Block object keys	

enable-action-logging

Description Log action taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-cef

Description Log in CEF format

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-custom

Description Customize log format

Type: string

Format: string-rlx

Maximum Length: 512 characters

Maximum Length: 1 characters

logging-tmpl-name

Description DDOS Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: default

use-obj-name

Description Show obj name instead of ip in the log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_tcp-list

Specification	Value
Type	*list*
Block object keys	

ack-authentication

Description: ack-authentication is a **JSON Block**. Please see below for *zone-template_tcp-list_ack-authentication*

Type: Object

ack-authentication-synack-reset

Description Reset client TCP SYN+ACK for authentication (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-ack-rto-retry-count

Description Take action if ack-auth RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-on-syn-rto-retry-count

Description Take action if syn-auth RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

age

Description Session age in minutes

Type: number

Range: 1-63

Default: 2

Mutual Exclusion: age and age-second are mutually exclusive

age-out-reset-server

Description Send TCP reset to server if aging time has passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

age-second

Description Session age in seconds

Type: number

Range: 1-3600

Default: 120

Mutual Exclusion: age-second and age are mutually exclusive

allow-syn-otherflags

Description Treat TCP SYN+PSH as a TCP SYN (DST tcp ports support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-synack-skip-authentications

Description Allow create sessions on SYNACK without syn-auth and ack-auth (ASYM Mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-tcp-tfo

Description Allow TCP Fast Open

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

concurrent

Description Enable concurrent port access for non-matching ports (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn-rate-limit-on-syn-only

Description Only count SYN-initiated connections towards connection-rate tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-conn-on-syn-only

Description Enable connection establishment on SYN only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Description: dst is a **JSON Block**. Please see below for *zone-template_tcp-list_dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/filter/{tcp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

known-resp-src-port-cfg

Description: known-resp-src-port-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_known-resp-src-port-cfg*

Type: Object

max-rexmit-syn-per-flow-cfg

Description: max-rexmit-syn-per-flow-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_max-rexmit-syn-per-flow-cfg*

Type: Object

name

Description DDOS TCP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

out-of-seq-cfg

Description: out-of-seq-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_out-of-seq-cfg*

Type: Object

per-conn-out-of-seq-rate-cfg

Description: per-conn-out-of-seq-rate-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_per-conn-out-of-seq-rate-cfg*

Type: Object

per-conn-pkt-rate-cfg

Description: per-conn-pkt-rate-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_per-conn-pkt-rate-cfg*

Type: Object

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec; '10sec': 10sec;

Type: string

Supported Values: 100ms, 1sec, 10sec

Default: 1sec

per-conn-retransmit-rate-cfg

Description: per-conn-retransmit-rate-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_per-conn-retransmit-rate-cfg*

Type: Object

per-conn-zero-win-rate-cfg

Description: per-conn-zero-win-rate-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_per-conn-zero-win-rate-cfg*

Type: Object

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking*

retransmit-cfg

Description: retransmit-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_retransmit-cfg*

Type: Object

small-win-cfg

Description: small-win-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_small-win-cfg*

Type: Object

src

Description: src is a **JSON Block**. Please see below for *zone-template_tcp-list_src*

Type: Object

syn-authentication

Description: syn-authentication is a **JSON Block**. Please see below for *zone-template_tcp-list_syn-authentication*

Type: Object

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synack-rate-limit

Description Config SYNACK rate limit

Type: number

Range: 1-16000000

Mutual Exclusion: synack-rate-limit and track-together-with-syn are mutually exclusive

tcp-half-open-timeout

Description TCP half-open session age in seconds

Type: number

Range: 1-3600

Default: 120

tcp-half-open-timeout-reset-server

Description Send TCP reset to server if TCP half-open session timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

track-together-with-syn

Description SYNACK will be counted in Dst Syn-rate limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: track-together-with-syn and synack-rate-limit are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zero-win-cfg

Description: zero-win-cfg is a **JSON Block**. Please see below for *zone-template_tcp-list_zero-win-cfg*

Type: Object

zone-template_tcp-list_syn-authentication

Specification	Value
Type	*object*

syn-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Send reset to client (Applicable to retransmit-check only);

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: syn-auth-fail-action and syn-auth-fail-action-list-name are mutually exclusive

syn-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication.

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: syn-auth-fail-action-list-name and syn-auth-fail-action are mutually exclusive

syn-auth-min-delay

Description Minimum delay (in 100ms intervals) between SYN retransmits for retransmit-check to pass

Type: number

Range: 1-80

Mutual Exclusion: syn-auth-min-delay and syn-auth-type are mutually exclusive

syn-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: syn-auth-pass-action and syn-auth-pass-action-list-name are mutually exclusive

syn-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: syn-auth-pass-action-list-name and syn-auth-pass-action are mutually exclusive

syn-auth-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth-timeout

Description syn retransmit timeout in seconds(default timeout: 5 seconds)

Type: number

Range: 1-31

Mutual Exclusion: syn-auth-timeout and syn-auth-type are mutually exclusive

syn-auth-type

Description 'send-rst': Send reset to client after syn cookie check pass; 'force-rst-by-ack': Send client a bad ack after syn cookie check pass; 'force-rst-by-synack': Send client a bad synack after syn cookie check pass;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, send-rst-once, hybrid

Mutual Exclusion: syn-auth-type, syn-auth-timeout, and syn-auth-min-delay are mutually exclusive

zone-template_tcp-list_ack-authentication

Specification	Value
Type	*object*

ack-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Send reset to client;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: ack-auth-fail-action and ack-auth-fail-action-list-name are mutually exclusive

ack-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication.

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ack-auth-fail-action-list-name and ack-auth-fail-action are mutually exclusive

ack-auth-min-delay

Description Minimum delay (in 100ms intervals) between ACK retransmits for retransmit-check to pass

Type: number

Range: 1-80

ack-auth-only

Description Apply retransmit-check only once per source address for authentication purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ack-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: ack-auth-pass-action and ack-auth-pass-action-list-name are mutually exclusive

ack-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ack-auth-pass-action-list-name and ack-auth-pass-action are mutually exclusive

ack-auth-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ack-auth-timeout

Description ack retransmit timeout in seconds(default timeout: 5 seconds)

Type: number

Range: 1-31

zone-template_tcp-list_retransmit-cfg

Specification	Value
Type	*object*

retransmit

Description Take action if retransmit pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: retransmit and per-conn-retransmit-rate-limit are mutually exclusive

retransmit-action

Description 'drop': Drop packets for retrans exceed (Default); 'blacklist-src': help Blacklist-src for retrans exceed; 'ignore': help Ignore retrans exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: retransmit-action and retransmit-action-list-name are mutually exclusive

retransmit-action-list-name

Description Configure action-list to take for retransmit exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: retransmit-action-list-name and retransmit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: tcp-filter-action and tcp-filter-action-list-name are mutually exclusive

tcp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp-filter-action-list-name and tcp-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_tcp-list_max-rexmit-syn-per-flow-cfg

Specification	Value
Type	*object*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow

Type: number

Range: 1-6

max-rexmit-syn-per-flow-action

Description 'drop': Drop SYN packets for max-rexmit-syn-per-flow exceed (Default); 'blacklist-src': help Blacklist-src for max-rexmit-syn-per-flow exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

max-rexmit-syn-per-flow-action-list-name

Description Configure action-list to take for max-rexmit-syn-per-flow exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

zone-template_tcp-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *zone-template_tcp-list_src_rate-limit*

Type: Object

zone-template_tcp-list_src_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *zone-template_tcp-list_src_rate-limit_syn-rate-limit*

Type: Object

zone-template_tcp-list_src_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

src-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'blacklist-src': Blacklist-src for syn-rate exceed; 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: src-syn-rate-action and src-syn-rate-action-list-name are mutually exclusive

src-syn-rate-action-list-name

Description Configure action-list to take for syn-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-syn-rate-action-list-name and src-syn-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-syn-rate-limit

Description

Type: number

Range: 1-16000000

zone-template_tcp-list_progression-tracking

Specification	Value
Type	*object*

ignore-TLS-handshake

Description Ignore TLS handshake, support SSL-L4 port only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mitigation

Description: mitigation is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking_mitigation*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation*

profiling

Description: profiling is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking_profiling*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/profiling*

progression-tracking-enabled

Description 'enable-check': Enable Progression Tracking Check;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_tcp-list_progression-tracking_mitigation

Specification	Value
Type	*object*

connection-tracking

Description: connection-tracking is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking_mitigation_connection-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/connection-tracking*

request-tracking

Description: request-tracking is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking_mitigation_request-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/request-tracking*

slow-attack

Description: slow-attack is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking_mitigation_slow-attack*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/slow-attack*

time-window-tracking

Description: time-window-tracking is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking_mitigation_time-window-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/time-window-tracking*

zone-template_tcp-list_progression-tracking_mitigation_time-window-tracking

Specification	Value
Type	*object*

progression-tracking-win-enabled

Description 'enable-check': Enable Progression Tracking per Time Window;

Type: string

Supported Values: enable-check

Default: enable-check

progression-tracking-windows-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-windows-action and progression-tracking-windows-action-list-name are mutually exclusive

progression-tracking-windows-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-windows-action-list-name and progression-tracking-windows-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

zone-template_tcp-list_progression-tracking_mitigation_slow-attack

Specification	Value
Type	*object*

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

slow-attack

Description 'enable-check': Enter Progression Tracking Tracking Slow Attack;

Type: string

Supported Values: enable-check

Default: enable-check

slow-attacker-identification

Description: slow-attacker-identification is a **JSON Block**. Please see below for *zone-template_tcp-list_progression-tracking_mitigation_slow-attack_slow-attacker-identification*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/tcp/{name}/progression-tracking/mitigation/slow-attack/slow-attacker-identification*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_tcp-list_progression-tracking_mitigation_slow-attack_slow-attacker-identification

Specification	Value
Type	*object*

active-connection

Description Set the minimum tracking active connection to start identifying slow attacker, default value is 3

Type: number

Range: 1-65535

Default: 3

bad-connection

Description Set the maximum percentage of slow connection (per source), default value is 75

Type: number

Range: 1-100

Default: 75

enable-identification

Description Progression tracking will identify slow attacker and blacklist it based on the config value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_tcp-list_progression-tracking_mitigation_connection-tracking

Specification	Value
Type	*object*

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-2147483647

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-2147483647

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of milli-, 0.001)

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-2147483647

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_tcp-list_progression-tracking_mitigation_request-tracking

Specification	Value
Type	*object*

first-request-max-time

Description Set the maximum idle time before the first request (in unit of 100ms)

Type: number

Range: 1-65535

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model (Default); 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

zone-template_tcp-list_progression-tracking_profiling

Specification	Value
Type	*object*

profiling-connection-life-model

Description Enable auto-config progression tracking learning for connection model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-request-response-model

Description Enable auto-config progression tracking learning for request response model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-time-window-model

Description Enable auto-config progression tracking learning for time window model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_tcp-list_known-resp-src-port-cfg

Specification	Value
Type	*object*

exclude-src-resp-port

Description Exclude src port equal to dst port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port

Description Take action if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port-action

Description 'drop': Drop packets from well-known src-port(Default); 'blacklist-src': Blacklist-src from well-known src-port; 'ignore': Ignore well-known src-port;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: known-resp-src-port-action and known-resp-src-port-action-list-name are mutually exclusive

known-resp-src-port-action-list-name

Description Configure action-list to take for well-known src-port

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: known-resp-src-port-action-list-name and known-resp-src-port-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_tcp-list_zero-win-cfg

Specification	Value
Type	*object*

zero-win

Description Take action if zero window pkts exceed configured threshold

Type: number

Range: 1-250

Mutual Exclusion: zero-win and per-conn-zero-win-rate-limit are mutually exclusive

zero-win-action

Description 'drop': Drop packets for zero-win exceed (Default); 'blacklist-src': help Blacklist-src for zero-win exceed; 'ignore': Ignore zero-win exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: zero-win-action and zero-win-action-list-name are mutually exclusive

zero-win-action-list-name

Description Configure action-list to take for zero window exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: zero-win-action-list-name and zero-win-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_tcp-list_per-conn-out-of-seq-rate-cfg

Specification	Value
Type	*object*

per-conn-out-of-seq-rate-action

Description 'drop': Drop packets for out-of-seq rate exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq rate exceed; 'ignore': help Ignore out-of-seq rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-out-of-seq-rate-action and per-conn-out-of-seq-rate-action-list-name are mutually exclusive

per-conn-out-of-seq-rate-action-list-name

Description Configure action-list to take for out-of-seq rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-out-of-seq-rate-action-list-name and per-conn-out-of-seq-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-out-of-seq-rate-limit

Description Take action if out-of-seq pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-out-of-seq-rate-limit and out-of-seq are mutually exclusive

zone-template_tcp-list_out-of-seq-cfg

Specification	Value
Type	*object*

out-of-seq

Description Take action if out-of-seq pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: out-of-seq and per-conn-out-of-seq-rate-limit are mutually exclusive

out-of-seq-action

Description 'drop': Drop packets for out-of-seq exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq exceed; 'ignore': help Ignore out-of-seq exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: out-of-seq-action and out-of-seq-action-list-name are mutually exclusive

out-of-seq-action-list-name

Description Configure action-list to take for out-of-seq exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: out-of-seq-action-list-name and out-of-seq-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_tcp-list_small-win-cfg

Specification	Value
Type	*object*

small-window

Description Smallest allowed window size

Type: number

Range: 1-65535

small-window-action

Description 'drop': Drop packets for small-window exceed (Default); 'blacklist-src': help Blacklist-src for small-window exceed; 'ignore': Ignore small-window exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: small-window-action and small-window-action-list-name are mutually exclusive

small-window-action-list-name

Description Configure action-list to take for small window exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: small-window-action-list-name and small-window-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

small-window-threshold

Description Take action if small window pkts exceed configured threshold

Type: number

Range: 1-250

zone-template_quic-list

Specification	Value
Type	*list*
Block object keys	

action-on-initial

Description: action-on-initial is a **JSON Block**. Please see below for *zone-template_quic-list_action-on-initial*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}/action-on-initial*

create-conn-on-initial-only

Description Create connection on QUIC Initial Packets Only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fixed-bit-check-disable

Description Disable fixed-bit malform check

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-rate-cfg

Description: pkt-rate-cfg is a **JSON Block**. Please see below for *zone-template_quic-list_pkt-rate-cfg*

Type: Object

quic-tmpl-name

Description DDOS QUIC Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

version-supported-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}/version-supported/{version-start}+{version-end}*

zone-template_quic-list_version-supported-list

Specification	Value
Type	*list*
Block object keys	

malformed-check

Description: malformed-check is a **JSON Block**. Please see below for *zone-template_quic-list_version-supported-list_malformed-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/quic/{quic-tmpl-name}/version-supported/{version-start}+{version-end}/malformed-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

version-action

Description 'drop': Drop packets; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: version-action and version-action-list-name are mutually exclusive

version-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: version-action-list-name and version-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

version-end

Description Version supported range end

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

version-start

Description Configure versions supported

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

zone-template_quic-list_version-supported-list_malformed-check

Specification	Value
Type	*object*

malformed-check-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: malformed-check-action and malformed-check-action-list-name are mutually exclusive

malformed-check-action-list-name

Description Configure action-list to take. Overwrites version action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-check-action-list-name and malformed-check-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-enable

Description 'enable': Enable malformed check;

Type: string

Supported Values: enable

Default: enable

max-destination-cid-length

Description Set the maximum destination CID length

Type: number

Range: 0-255

Default: 255

max-source-cid-length

Description Set the maximum source CID length

Type: number

Range: 0-255

Default: 255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_quic-list_pkt-rate-cfg

Specification	Value
Type	*object*

per

Description 'aead-tag': AEAD Tag; 'dcid': Destination Connection ID;

Type: string

Supported Values: aead-tag, dcid

quic-pkt-rate

Description Limiting rate (Range: 5-16000000)

Type: number

Range: 5-16000000

quic-pkt-rate-limit

Description QUIC Packet Rate Limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-template_quic-list_action-on-initial

Specification	Value
Type	*object*

retry-token-authentication-dynamic

Description 'cid-hash': Dynamic retry token based on Destination and Source CID;

Type: string

Supported Values: cid-hash

Mutual Exclusion: retry-token-authentication-dynamic and retry-token-authentication-static are mutually exclusive

retry-token-authentication-static

Description Static retry token (Maximum of 4 bytes)

Type: string

Format: time

Maximum Length: 4294967295 characters

Maximum Length: 1 characters

Mutual Exclusion: retry-token-authentication-static and retry-token-authentication-dynamic are mutually exclusive

retry-unauthenticated-initial-decrypt

Description Decrypt incoming initial packets for unauthenticated clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scid-length

Description Set Max SCID length for SCID generation

Type: number

Range: 8-20

Default: 20

unauth-short-hdr-action

Description 'drop': Drop short header packet;

Type: string

Supported Values: drop

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_ssl-l4-list

Specification	Value
Type	*list*
Block object keys	

allow-non-tls

Description Allow Non-TLS (SSLv3 and lower) traffic (Warning: security may be compromised)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-handshake

Description: auth-handshake is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_auth-handshake*

Type: Object

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Description: dst is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_dst*

Type: Object

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_multi-pu-threshold-distribution*

Type: Object

renegotiation

Description: renegotiation is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_renegotiation*

Type: Object

src

Description: src is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_src*

Type: Object

ssl-handshake-policy

Description: ssl-handshake-policy is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_ssl-handshake-policy*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/ssl-l4/{ssl-l4-tmpl-name}/ssl-handshake-policy*

ssl-l4-tmpl-name

Description DDOS SSL-L4 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-traffic-check

Description: ssl-traffic-check is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_ssl-traffic-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/ssl-l4/{ssl-l4-tmpl-name}/ssl-traffic-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_ssl-l4-list_auth-handshake

Specification	Value
Type	*object*

auth-handshake-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: auth-handshake-fail-action and auth-handshake-fail-action-list-name are mutually exclusive

auth-handshake-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: auth-handshake-fail-action-list-name and auth-handshake-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

auth-handshake-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: auth-handshake-pass-action and auth-handshake-pass-action-list-name are mutually exclusive

auth-handshake-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: auth-handshake-pass-action-list-name and auth-handshake-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

auth-handshake-timeout

Description Connection timeout (default 5 seconds) and trials (default 5 times) (DST support only)

Type: number

Range: 1-31

Default: 5

auth-handshake-trials

Description Number of failed handshakes before entry marked black

Type: number

Range: 0-15

Default: 5

cert-cfg

Description: cert-cfg is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_auth-handshake_cert-cfg*

Type: Object

server-name-list

Type: List

zone-template_ssl-l4-list_auth-handshake_cert-cfg

Specification	Value
Type	*object*

cert

Description SSL certificate

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key

Description SSL key

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

key-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-template_ssl-l4-list_auth-handshake_server-name-list

Specification	Value
Type	*list*
Block object keys	

server-cert

Description Server Certificate associated to SNI (Server Certificate Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

server-key

Description Server Private Key associated to SNI (Server Private Key Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-name

Description Server name indication in Client hello extension (Server name String)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-template_ssl-l4-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_src_rate-limit*

Type: Object

zone-template_ssl-l4-list_src_rate-limit

Specification	Value
Type	*object*

request

Description: request is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_src_rate-limit_request*

Type: Object

zone-template_ssl-l4-list_src_rate-limit_request

Specification	Value
Type	*object*

src-request-rate-limit

Description

Type: number

Range: 1-16000000

src-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, reset

Mutual Exclusion: src-request-rate-limit-action and src-request-rate-limit-action-list-name are mutually exclusive

src-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-request-rate-limit-action-list-name and src-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_ssl-l4-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_dst_rate-limit*

Type: Object

zone-template_ssl-l4-list_dst_rate-limit

Specification	Value
Type	*object*

request

Description: request is a **JSON Block**. Please see below for *zone-template_ssl-l4-list_dst_rate-limit_request*

Type: Object

zone-template_ssl-l4-list_dst_rate-limit_request

Specification	Value
Type	*object*

dst-request-rate-limit

Description

Type: number

Range: 1-16000000

dst-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, reset

Mutual Exclusion: dst-request-rate-limit-action and dst-request-rate-limit-action-list-name are mutually exclusive

dst-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-request-rate-limit-action-list-name and dst-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_ssl-l4-list_ssl-traffic-check

Specification	Value
Type	*object*

check-resumed-connection

Description Apply checks to SSL connections initialized by ACK packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-action

Description 'drop': Drop packets with bad ssl header; 'ignore': Forward packets with bad ssl header;

Type: string

Supported Values: drop, ignore

header-inspection

Description Inspect ssl header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_ssl-l4-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

zone-template_ssl-l4-list_renegotiation

Specification	Value
Type	*object*

num-renegotiation

Description Number of renegotiation allowed

Type: number

Range: 0-7

ssl-l4-reneg-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: ssl-l4-reneg-action and ssl-l4-reneg-action-list-name are mutually exclusive

ssl-l4-reneg-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4-reneg-action-list-name and ssl-l4-reneg-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_ssl-l4-list_ssl-handshake-policy

Specification	Value
Type	*object*

action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist source IP;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: action and ssl-handshake-policy-action-list-name are mutually exclusive

cipher-suites-limit

Description Set cipher suites limit

Type: number

Range: 1-600

client-extensions-limit

Description Set client extensions limit

Type: number

Range: 1-600

clienthello-to-appdata-timeout

Description Set maximum timeout seconds from ClientHello to App-Data

Type: number

Range: 1-600

finished-to-appdata-timeout

Description Set maximum timeout seconds from Handshake finished to App-Data

Type: number

Range: 1-600

src-handshaking-conn-limit

Description Set handshaking connection limit

Type: number

Range: 1-16000000

ssl-handshake-policy-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-handshake-policy-action-list-name and action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/ip-proto/{name}/filter/{other-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

name

Description DDOS Ip-proto Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_ip-proto-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: other-filter-action and other-filter-action-list-name are mutually exclusive

other-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: other-filter-action-list-name and other-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

other-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

other-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

other-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_dns-list

Specification	Value
Type	*list*
Block object keys	

allow-query-class

Description: allow-query-class is a **JSON Block**. Please see below for *zone-template_dns-list_allow-query-class*

Type: Object

allow-record-type

Description: allow-record-type is a **JSON Block**. Please see below for *zone-template_dns-list_allow-record-type*

Type: Object

dns-any-check

Description Drop DNS queries of Type ANY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-any-check-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Default: drop

Mutual Exclusion: dns-any-check-action and dns-any-check-action-list-name are mutually exclusive

dns-any-check-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-any-check-action-list-name and dns-any-check-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-udp-authentication

Description: dns-udp-authentication is a **JSON Block**. Please see below for *zone-template_dns-list_dns-udp-authentication*

Type: Object

domain-group-name

Description Apply a domain-group to the DNS template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dst

Description: dst is a **JSON Block**. Please see below for *zone-template_dns-list_dst*

Type: Object

fqdn-label-count-cfg

Description: fqdn-label-count-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_fqdn-label-count-cfg*

Type: Object

fqdn-label-len-cfg

Type: List

malformed-query-check

Description: malformed-query-check is a **JSON Block**. Please see below for *zone-template_dns-list_malformed-query-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/dns/{name}/malformed-query-check*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *zone-template_dns-list_multi-pu-threshold-distribution*

Type: Object

name

Description DDOS DNS Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

on-no-match

Description 'permit': permit; 'deny': deny (default);

Type: string

Supported Values: permit, deny

Default: deny

src

Description: src is a **JSON Block**. Please see below for *zone-template_dns-list_src*

Type: Object

symtimeout-cfg

Description: symtimeout-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_symtimeout-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_dns-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit*

Type: Object

zone-template_dns-list_src_rate-limit

Specification	Value
Type	*object*

nxdomain

Description: nxdomain is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_nxdomain*

Type: Object

request

Description: request is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request*

Type: Object

zone-template_dns-list_src_rate-limit_request

Specification	Value
Type	*object*

src-dns-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: src-dns-request-rate-limit-action and src-dns-request-rate-limit-action-list-name are mutually exclusive

src-dns-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-dns-request-rate-limit-action-list-name and src-dns-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type

Description: type is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request_type*

Type: Object

zone-template_dns-list_src_rate-limit_request_type

Specification	Value
Type	*object*

A-cfg

Description: A-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request_type_A-cfg*

Type: Object

AAAA-cfg

Description: AAAA-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request_type_AAAA-cfg*

Type: Object

CNAME-cfg

Description: CNAME-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request_type_CNAME-cfg*

Type: Object

MX-cfg

Description: MX-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request_type_MX-cfg*

Type: Object

NS-cfg

Description: NS-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request_type_NS-cfg*

Type: Object

SRV-cfg

Description: SRV-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_src_rate-limit_request_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

zone-template_dns-list_src_rate-limit_request_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

zone-template_dns-list_src_rate-limit_request_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-cname-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_src_rate-limit_request_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

src-dns-request-type

Description Other type value

Type: number

Range: 1-65535

src-dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

zone-template_dns-list_src_rate-limit_request_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-aaaa-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_src_rate-limit_request_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-a-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_src_rate-limit_request_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-mx-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_src_rate-limit_request_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dns-ns-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_src_rate-limit_nxdomain

Specification	Value
Type	*object*

dns-nxdomain-rate

Description Limiting rate

Type: number

Range: 1-16000000

dns-nxdomain-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: dns-nxdomain-rate-limit-action and dns-nxdomain-rate-limit-action-list-name are mutually exclusive

dns-nxdomain-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-nxdomain-rate-limit-action-list-name and dns-nxdomain-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_dns-list_fqdn-label-count-cfg

Specification	Value
Type	*object*

fqdn-label-count-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Send reset to client;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: fqdn-label-count-action and fqdn-label-count-action-list-name are mutually exclusive

fqdn-label-count-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: fqdn-label-count-action-list-name and fqdn-label-count-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

label-count

Description Maximum number of FQDN labels per FQDN

Type: number

Range: 1-10

zone-template_dns-list_malformed-query-check

Specification	Value
Type	*object*

dns-malformed-query-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: dns-malformed-query-action and dns-malformed-query-action-list-name are mutually exclusive

dns-malformed-query-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-malformed-query-action-list-name and dns-malformed-query-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

non-query-opcode-check

Description 'disable': When malform check is enabled, TPS always drops DNS query with non query opcode, this option disables this opcode check;

Type: string

Supported Values: disable

skip-multi-packet-check

Description Bypass DNS fragmented and TCP segmented Queries(Default: dropped)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

validation-type

Description 'basic-header-check': Basic header validation for DNS TCP/UDP queries; 'extended-header-check': Extended header/query validation for DNS TCP/UDP queries; 'disable': Disable Malform query validation for DNS TCP/UDP;

Type: string

Supported Values: basic-header-check, extended-header-check, disable

zone-template_dns-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *zone-template_dns-list_dst_rate-limit*

Type: Object

zone-template_dns-list_dst_rate-limit

Specification	Value
Type	*object*

domain-group-rate-exceed-action

Description 'drop': Drop the query (default); 'tunnel-encap-packet': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: drop, tunnel-encap-packet

Default: drop

domain-group-rate-per-service

Description Enable per service domain rate checking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-template/encap*

fqdn

Description: fqdn is a **JSON Block**. Please see below for *zone-template_dns-list_dst_rate-limit_fqdn*

Type: Object

request

Description: request is a **JSON Block**. Please see below for *zone-template_dns-list_dst_rate-limit_request*

Type: Object

dns-type-cfg

Type: List

zone-template_dns-list_dst_rate-limit_request_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

zone-template_dns-list_dst_rate-limit_request_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cname-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_dst_rate-limit_request_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

dns-request-type

Description Other type value

Type: number

Range: 1-65535

dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

zone-template_dns-list_dst_rate-limit_request_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-aaaa-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_dst_rate-limit_request_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-a-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_dst_rate-limit_request_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-mx-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_dst_rate-limit_request_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-ns-rate

Description

Type: number

Range: 1-16000000

zone-template_dns-list_dst_rate-limit_fqdn

Specification	Value
Type	*object*

dns-fqdn-rate-cfg

Type: List

dns-fqdn-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Mutual Exclusion: dns-fqdn-rate-limit-action and dns-fqdn-rate-limit-action-list-name are mutually exclusive

dns-fqdn-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-fqdn-rate-limit-action-list-name and dns-fqdn-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_dns-list_dst_rate-limit_fqdn_dns-fqdn-rate-cfg

Specification	Value
Type	*list*
Block object keys	

dns-fqdn-rate

Description Limiting rate (Range: 5-8000 for FQDN domain based rate limiting, 5-16000000 for FQDN label count based rate limiting)

Type: number

Range: 5-16000000

fqdn-rate-label-count

Description FQDN label count (Range: 1-8)

Type: number

Range: 1-8

fqdn-rate-suffix

Description Suffix count

Type: number

Range: 1-5

per

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'label-count': FQDN label count;

Type: string

Supported Values: domain-name, src-ip, label-count

per-domain-per-src-ip

Description Use both Domain Name and Source IP address for rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-template_dns-list_allow-record-type

Specification	Value
Type	*object*

allow-a-type

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-aaaa-type

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-cname-type

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-mx-type

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-ns-type

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-record-type-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: allow-record-type-action and allow-record-type-action-list-name are mutually exclusive

allow-record-type-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: allow-record-type-action-list-name and allow-record-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

allow-srv-type

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-num-cfg

Type: List

zone-template_dns-list_allow-record-type_record-num-cfg

Specification	Value
Type	*list*
Block object keys	

allow-num-type

Description Other record type value

Type: number

Range: 1-65535

zone-template_dns-list_allow-query-class

Specification	Value
Type	*object*

allow-any-query-class

Description ANY query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-chaos-query-class

Description CHAOS query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-csnet-query-class

Description CSNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-hesiod-query-class

Description HESIOD query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-internet-query-class

Description INTERNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-none-query-class

Description NONE query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-query-class-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: allow-query-class-action and allow-query-class-action-list-name are mutually exclusive

allow-query-class-action-list-name

Description Configure action-list to take when query class doesn't match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: allow-query-class-action-list-name and allow-query-class-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_dns-list_dns-udp-authentication

Specification	Value
Type	*object*

dns-udp-auth-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: dns-udp-auth-fail-action and dns-udp-auth-fail-action-list-name are mutually exclusive

dns-udp-auth-fail-action-list-name

Description Configure action-list to take for failing the authentication. (Applicable to dns-udp retry only)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-udp-auth-fail-action-list-name and dns-udp-auth-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

dns-udp-auth-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: dns-udp-auth-pass-action and dns-udp-auth-pass-action-list-name are mutually exclusive

dns-udp-auth-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns-udp-auth-pass-action-list-name and dns-udp-auth-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

force-tcp-cfg

Description: force-tcp-cfg is a **JSON Block**. Please see below for *zone-template_dns-list_dns-udp-authentication_force-tcp-cfg*

Type: Object

min-delay

Description Optional minimum delay between DNS retransmits for authentication to pass, unit is specified by min-delay-interval

Type: number

Range: 1-80

Mutual Exclusion: min-delay and force-tcp are mutually exclusive

min-delay-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

udp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

Mutual Exclusion: udp-timeout and force-tcp are mutually exclusive

zone-template_dns-list_dns-udp-authentication_force-tcp-cfg

Specification	Value
Type	*object*

force-tcp

Description Force DNS request over TCP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: force-tcp, udp-timeout, and min-delay are mutually exclusive

force-tcp-ignore-client-source-port

Description Allow client to retransmit DNS request using different source port during udp-auth (supported in asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-tcp-min-delay

Description Optional minimum delay (seconds) between DNS retransmits for authentication to pass

Type: number

Range: 1-15

force-tcp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

zone-template_dns-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

zone-template_dns-list_fqdn-label-len-cfg

Specification	Value
Type	*list*
Block object keys	

fqdn-label-length-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: fqdn-label-length-action and fqdn-label-length-action-list-name are mutually exclusive

fqdn-label-length-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: fqdn-label-length-action-list-name and fqdn-label-length-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

fqdn-label-suffix

Description Number of suffixes

Type: number

Range: 1-5

label-length

Description Maximum length of FQDN label

Type: number

Range: 1-63

zone-template_dns-list_symtimeout-cfg

Specification	Value
Type	*object*

sym-timeout

Description Timeout for DNS Symmetric session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sym-timeout-value

Description Session timeout value in seconds

Type: number

Range: 1-31

zone-template_icmp-v4-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}/filter/{icmp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

icmp-tmpl-name

Description DDOS ICMPv4 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *zone-template_icmp-v4-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/icmp-v4/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_icmp-v4-list_type-list

Specification	Value
Type	*list*
Block object keys	

dst-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

dst-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-other-rate-action and dst-code-other-rate-action-list-name are mutually exclusive

dst-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-other-rate-action-list-name and dst-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-type-action

Description 'drop': Reject this ICMP type; 'blacklist-src': Blacklist-src this ICMP type; 'ignore': Ignore this ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-action and icmp-type-action-list-name are mutually exclusive

icmp-type-action-list-name

Description Configure action-list to take for this ICMP type

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-action-list-name and icmp-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

src-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-other-rate-action and src-code-other-rate-action-list-name are mutually exclusive

src-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-other-rate-action-list-name and src-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v4-dst-code-cfg

Type: List

v4-dst-rate-cfg

Description: v4-dst-rate-cfg is a **JSON Block**. Please see below for *zone-template_icmp-v4-list_type-list_v4-dst-rate-cfg*

Type: Object

v4-src-code-cfg

Type: List

v4-src-rate-cfg

Description: v4-src-rate-cfg is a **JSON Block**. Please see below for *zone-template_icmp-v4-list_type-list_v4-src-rate-cfg*

Type: Object

zone-template_icmp-v4-list_type-list_v4-src-rate-cfg

Specification	Value
Type	*object*

src-type-rate

Description Specify the whole src rate for this type

Type: number

Range: 1-16000000

src-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-rate-action and src-type-rate-action-list-name are mutually exclusive

src-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-rate-action-list-name and src-type-rate-action are mutually exclusive

zone-template_icmp-v4-list_type-list_v4-src-code-cfg

Specification	Value
Type	*list*
Block object keys	

src-code-number

Description Specify the ICMP code for this src rate

Type: number

Range: 0-255

src-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

src-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-rate-action and src-code-rate-action-list-name are mutually exclusive

src-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-rate-action-list-name and src-code-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v4-list_type-list_v4-dst-rate-cfg

Specification	Value
Type	*object*

dst-type-rate

Description Specify the whole dst rate for this type

Type: number

Range: 1-16000000

dst-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-rate-action and dst-type-rate-action-list-name are mutually exclusive

dst-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-rate-action-list-name and dst-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v4-list_type-other

Specification	Value
Type	*object*

dst

Description: dst is a **JSON Block**. Please see below for *zone-template_icmp-v4-list_type-other_dst*

Type: Object

icmp-type-other-action

Description 'drop': Reject wildcard ICMP type; 'blacklist-src': Blacklist-src wildcard ICMP type; 'ignore': Ignore wildcard ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-other-action and icmp-type-other-action-list-name are mutually exclusive

icmp-type-other-action-list-name

Description Configure action-list to take for wildcard ICMP match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-other-action-list-name and icmp-type-other-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src

Description: src is a **JSON Block**. Please see below for *zone-template_icmp-v4-list_type-other_src*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_icmp-v4-list_type-other_src

Specification	Value
Type	*object*

src-type-other-rate

Description Specify the whole src rate for wildcard ICMP type

Type: number

Range: 1-16000000

src-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-other-rate-action and src-type-other-rate-action-list-name are mutually exclusive

src-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-other-rate-action-list-name and src-type-other-rate-action are mutually exclusive

Type	*object*

dst-type-other-rate

Description Specify the whole dst rate for wildcard ICMP type

Type: number

Range: 1-16000000

dst-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-other-rate-action and dst-type-other-rate-action-list-name are mutually exclusive

dst-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-other-rate-action-list-name and dst-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v4-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description filter using Berkeley packet filter syntax

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

icmp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, blacklist-src

Default: drop

Mutual Exclusion: icmp-filter-action and icmp-filter-action-list-name are mutually exclusive

icmp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-filter-action-list-name and icmp-filter-action are mutually exclusive

icmp-filter-inverse-match

Description Inverse the result of matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

icmp-filter-seq

Description sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_encap-list

Specification	Value
Type	*list*
Block object keys	

encap-tmpl-name

Description DDOS Tunnel Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

preserve-source-ip

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *zone-template_encap-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_encap-list_tunnel-encap

Specification	Value
Type	*object*

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *zone-template_encap-list_tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *zone-template_encap-list_tunnel-encap_ip-cfg*

Type: Object

zone-template_encap-list_tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *zone-template_encap-list_tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-template_encap-list_tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

zone-template_encap-list_tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *zone-template_encap-list_tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-template_encap-list_tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

zone-template_udp-list

Specification	Value
Type	*list*
Block object keys	

age

Description Configure session age(in minutes) for UDP sessions

Type: number

Range: 1-63

Default: 2

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/udp/{name}/filter/{udp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

known-resp-src-port-cfg

Description: known-resp-src-port-cfg is a **JSON Block**. Please see below for *zone-template_udp-list_known-resp-src-port-cfg*

Type: Object

max-payload-size-cfg

Description: max-payload-size-cfg is a **JSON Block**. Please see below for *zone-template_udp-list_max-payload-size-cfg*

Type: Object

min-payload-size-cfg

Description: min-payload-size-cfg is a **JSON Block**. Please see below for *zone-template_udp-list_min-payload-size-cfg*

Type: Object

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Description: ntp-monlist-cfg is a **JSON Block**. Please see below for *zone-template_udp-list_ntp-monlist-cfg*

Type: Object

per-conn-pkt-rate-cfg

Description: per-conn-pkt-rate-cfg is a **JSON Block**. Please see below for *zone-template_udp-list_per-conn-pkt-rate-cfg*

Type: Object

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

previous-salt-timeout

Description Token-Authentication previous salt-prefix timeout in minutes, default is 1 min

Type: number

Range: 1-10080

Default: 1

public-ipv4-addr

Description IP address

Type: string

Format: ipv4-address

public-ipv6-addr

Description IPV6 address

Type: string

Format: ipv6-address

spoof-detect-fail-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src for spoof-detect fail;

Type: string

Supported Values: drop, blacklist-src

Mutual Exclusion: spoof-detect-fail-action and spoof-detect-fail-action-list-name are mutually exclusive

spoof-detect-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: spoof-detect-fail-action-list-name and spoof-detect-fail-action are mutually exclusive

spoof-detect-min-delay

Description Optional minimum delay between UDP retransmits for authentication to pass, unit is specified by min-delay-interval

Type: number

Range: 1-80

spoof-detect-min-delay-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

spoof-detect-pass-action

Description 'authenticate-src': authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: spoof-detect-pass-action and spoof-detect-pass-action-list-name are mutually exclusive

spoof-detect-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: spoof-detect-pass-action-list-name and spoof-detect-pass-action are mutually exclusive

spoof-detect-retry-timeout

Description Timeout in seconds

Type: number

Range: 1-31

token-authentication

Description Enable Token Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-formula

Description 'md5_Salt-SrcIp-SrcPort-DstIp-DstPort': md5 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'md5_Salt-DstIp-DstPort': md5 of Salt-DstIp-DstPort; 'md5_Salt-SrcIp-DstIp': md5 of Salt-SrcIp-DstIp; 'md5_Salt-SrcPort-DstPort': md5 of Salt-SrcPort-DstPort; 'md5_Salt-UintDstIp-DstPort': Using the uint value of IP for md5 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-SrcPort-DstIp-DstPort': sha1 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'sha1_Salt-DstIp-DstPort':

sha1 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-DstIp': sha1 of Salt-SrcIp-DstIp; 'sha1_Salt-SrcPort-DstPort': sha1 of Salt-SrcPort-DstPort; 'sha1_Salt-UintDstIp-DstPort': Using the uint value of IP for sha1 of Salt-DstIp-DstPort;

Type: string

Supported Values: md5_Salt-SrcIp-SrcPort-DstIp-DstPort, md5_Salt-DstIp-DstPort, md5_Salt-SrcIp-DstIp, md5_Salt-SrcPort-DstPort, md5_Salt-UintDstIp-DstPort, sha1_Salt-SrcIp-SrcPort-DstIp-DstPort, sha1_Salt-DstIp-DstPort, sha1_Salt-SrcIp-DstIp, sha1_Salt-SrcPort-DstPort, sha1_Salt-UintDstIp-DstPort

token-authentication-hw-assist-disable

Description token-authentication disable hardware assistance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-public-address

Description The server public IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix

Description token-authentication salt-prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix-curr

Description

Type: number

Range: 1-4294967295

token-authentication-salt-prefix-prev

Description

Type: number

Range: 1-4294967295

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_udp-list_ntp-monlist-cfg

Specification	Value
Type	*object*

ntp-monlist

Description Take action for ntp monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntp-monlist-action

Description 'drop': Drop packets for ntp-monlist (Default); 'blacklist-src': Blacklist-src for ntp-monlist; 'ignore': Ignore ntp-monlist;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: ntp-monlist-action and ntp-monlist-action-list-name are mutually exclusive

ntp-monlist-action-list-name

Description Configure action-list to take for ntp-monlist

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ntp-monlist-action-list-name and ntp-monlist-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_udp-list_known-resp-src-port-cfg

Specification	Value
Type	*object*

exclude-src-resp-port

Description Exclude src port equal to dst port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port

Description Take action if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

known-resp-src-port-action

Description 'drop': Drop packets from well-known src-port(Default); 'blacklist-src': Blacklist-src from well-known src-port; 'ignore': Ignore well-known src-port;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: known-resp-src-port-action and known-resp-src-port-action-list-name are mutually exclusive

known-resp-src-port-action-list-name

Description Configure action-list to take for well-known src-port

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: known-resp-src-port-action-list-name and known-resp-src-port-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_udp-list_per-conn-pkt-rate-cfg

Specification	Value
Type	*object*

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: per-conn-pkt-rate-action and per-conn-pkt-rate-action-list-name are mutually exclusive

per-conn-pkt-rate-action-list-name

Description Configure action-list to take for per-conn-pkt-rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: per-conn-pkt-rate-action-list-name and per-conn-pkt-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

zone-template_udp-list_min-payload-size-cfg

Specification	Value
Type	*object*

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size-action

Description 'drop': Drop packets for min-payload-size (Default); 'blacklist-src': Blacklist-src for min-payload-size; 'ignore': Do nothing for min-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: min-payload-size-action and min-payload-size-action-list-name are mutually exclusive

min-payload-size-action-list-name

Description Configure action-list to take for min-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: min-payload-size-action-list-name and min-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Default: drop

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_udp-list_max-payload-size-cfg

Specification	Value
Type	*object*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

max-payload-size-action

Description 'drop': Drop packets for max-payload-size exceed (Default); 'blacklist-src': Blacklist-src for max-payload-size exceed; 'ignore': Do nothing for max-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

Mutual Exclusion: max-payload-size-action and max-payload-size-action-list-name are mutually exclusive

max-payload-size-action-list-name

Description Configure action-list to take for max-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: max-payload-size-action-list-name and max-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_http-list

Specification	Value
Type	*list*
Block object keys	

challenge

Description: challenge is a **JSON Block**. Please see below for *zone-template_http-list_challenge*

Type: Object

client-source-ip

Description: client-source-ip is a **JSON Block**. Please see below for *zone-template_http-list_client-source-ip*

Type: Object

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disallow-connect-method

Description Do not allow HTTP Connect method (asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst

Description: dst is a **JSON Block**. Please see below for *zone-template_http-list_dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/http/{http-tmpl-name}/filter/{http-filter-name}*

http-tmpl-name

Description DDOS HTTP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

idle-timeout

Description: idle-timeout is a **JSON Block**. Please see below for *zone-template_http-list_idle-timeout*

Type: Object

malformed-http

Description: malformed-http is a **JSON Block**. Please see below for *zone-template_http-list_malformed-http*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/http/{http-tmpl-name}/malformed-http*

mss-timeout

Description: mss-timeout is a **JSON Block**. Please see below for *zone-template_http-list_mss-timeout*

Type: Object

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *zone-template_http-list_multi-pu-threshold-distribution*

Type: Object

non-http-bypass

Description Bypass non-http traffic instead of dropping

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-queue-size

Description Set the number of packets for the out-of-order HTTP queue (asym mode only)

Type: number

Range: 0-15

Default: 3

out-of-order-queue-timeout

Description Set the timeout value in seconds for out-of-order queue in HTTP (asym mode only)

Type: number

Range: 0-15

Default: 3

request-header

Description: request-header is a **JSON Block**. Please see below for *zone-template_http-list_request-header*

Type: Object

slow-read

Description: slow-read is a **JSON Block**. Please see below for *zone-template_http-list_slow-read*

Type: Object

src

Description: src is a **JSON Block**. Please see below for *zone-template_http-list_src*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_http-list_client-source-ip

Specification	Value
Type	*object*

client-source-ip

Description Mitigate on src ip specified by http header for example X-Forwarded-For header. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-header-name

Description Set the http header name to parse for client ip. Default is X-Forwarded-For

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: X-Forwarded-For

zone-template_http-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *zone-template_http-list_dst_rate-limit*

Type: Object

zone-template_http-list_dst_rate-limit

Specification	Value
Type	*object*

http-post

Description: http-post is a **JSON Block**. Please see below for *zone-template_http-list_dst_rate-limit_http-post*

Type: Object

http-request

Description: http-request is a **JSON Block**. Please see below for *zone-template_http-list_dst_rate-limit_http-request*

Type: Object

response-size

Description: response-size is a **JSON Block**. Please see below for *zone-template_http-list_dst_rate-limit_response-size*

Type: Object

zone-template_http-list_dst_rate-limit_response-size

Specification	Value
Type	*object*

between-cfg

Type: List

greater-cfg

Type: List

less-cfg

Type: List

response-size-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: response-size-action and response-size-action-list-name are mutually exclusive

response-size-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: response-size-action-list-name and response-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_http-list_dst_rate-limit_response-size_between-cfg

Specification	Value
Type	*list*
Block object keys	

obj-between-rate

Description Response rate limit

Type: number

Range: 1-16000000

obj-between1

Description Response size configuration

Type: number

Range: 1-16000000

obj-between2

Description Response size configuration

Type: number

Range: 1-16000000

zone-template_http-list_dst_rate-limit_response-size_greater-cfg

Specification	Value
Type	*list*
Block object keys	

obj-greater

Description Response size configuration

Type: number

Range: 1-16000000

obj-greater-rate

Description Response rate limit

Type: number

Range: 1-16000000

zone-template_http-list_dst_rate-limit_response-size_less-cfg

Specification	Value
Type	*list*
Block object keys	

obj-less

Description Response size configuration

Type: number

Range: 1-16000000

obj-less-rate

Description Response rate limit

Type: number

Range: 1-16000000

zone-template_http-list_dst_rate-limit_http-post

Specification	Value
Type	*object*

dst-post-rate-limit

Description

Type: number

Range: 1-16000000

dst-post-rate-limit-action

Description 'drop': Drop packets(Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Default: drop

Mutual Exclusion: dst-post-rate-limit-action and dst-post-rate-limit-action-list-name are mutually exclusive

dst-post-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-post-rate-limit-action-list-name and dst-post-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_http-list_dst_rate-limit_http-request

Specification	Value
Type	*object*

dst-request-rate

Description

Type: number

Range: 1-16000000

dst-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Default: drop

Mutual Exclusion: dst-request-rate-limit-action and dst-request-rate-limit-action-list-name are mutually exclusive

dst-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-request-rate-limit-action-list-name and dst-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-post

Description: http-post is a **JSON Block**. Please see below for *zone-template_http-list_src_rate-limit_http-post*

Type: Object

http-request

Description: http-request is a **JSON Block**. Please see below for *zone-template_http-list_src_rate-limit_http-request*

Type: Object

zone-template_http-list_src_rate-limit_http-post

Specification	Value
Type	*object*

src-post-rate-limit

Description

Type: number

Range: 1-16000000

src-post-rate-limit-action

Description 'drop': Drop packets(Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Default: drop

Mutual Exclusion: src-post-rate-limit-action and src-post-rate-limit-action-list-name are mutually exclusive

src-post-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-post-rate-limit-action-list-name and src-post-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_http-list_src_rate-limit_http-request

Specification	Value
Type	*object*

src-request-rate

Description

Type: number

Range: 1-16000000

src-request-rate-limit-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, reset, blacklist-src

Default: drop

Mutual Exclusion: src-request-rate-limit-action and src-request-rate-limit-action-list-name are mutually exclusive

src-request-rate-limit-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-request-rate-limit-action-list-name and src-request-rate-limit-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_http-list_challenge

Specification	Value
Type	*object*

challenge-cookie-name

Description Set the cookie name used to send back to client. Default is sto-idd

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: sto-idd

challenge-fail-action

Description 'blacklist-src': Blacklist-src; 'reset': Reset client connection(Default);

Type: string

Supported Values: blacklist-src, reset

Default: reset

Mutual Exclusion: challenge-fail-action and challenge-fail-action-list-name are mutually exclusive

challenge-fail-action-list-name

Description Configure action-list to take for failing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: challenge-fail-action-list-name and challenge-fail-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

challenge-interval

Description Specify the challenge interval. Default is 8 seconds

Type: number

Range: 1-31

Default: 8

challenge-keep-cookie

Description Keep the challenge cookie from client and forward to backend. Default is do not keep

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-pass-action

Description 'authenticate-src': Authenticate-src (Default);

Type: string

Supported Values: authenticate-src

Mutual Exclusion: challenge-pass-action and challenge-pass-action-list-name are mutually exclusive

challenge-pass-action-list-name

Description Configure action-list to take for passing the authentication

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: challenge-pass-action-list-name and challenge-pass-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-template_http-list_idle-timeout

Specification	Value
Type	*object*

idle-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Mutual Exclusion: idle-timeout-action and idle-timeout-action-list-name are mutually exclusive

idle-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: idle-timeout-action-list-name and idle-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

idle-timeout-value

Description Set the the idle timeout value in seconds for HTTP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-template_http-list_slow-read

Specification	Value
Type	*object*

min-window-count

Description Number of packets

Type: number

Range: 1-31

min-window-size

Description minimum window size

Type: number

Range: 1-65535

slow-read-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'ignore': Take no action; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, ignore, reset

Mutual Exclusion: slow-read-action and slow-read-action-list-name are mutually exclusive

slow-read-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: slow-read-action-list-name and slow-read-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_http-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

zone-template_http-list_filter-list

Specification	Value
Type	*list*
Block object keys	

dst

Description: dst is a **JSON Block**. Please see below for *zone-template_http-list_filter-list_dst*

Type: Object

http-agent-cfg

Description: http-agent-cfg is a **JSON Block**. Please see below for *zone-template_http-list_filter-list_http-agent-cfg*

Type: Object

http-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src, reset

Mutual Exclusion: http-filter-action and http-filter-action-list-name are mutually exclusive

http-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http-filter-action-list-name and http-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

http-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http-filter-seq

Description Sequence number

Type: number

Range: 1-200

http-header-cfg

Description: http-header-cfg is a **JSON Block**. Please see below for *zone-template_http-list_filter-list_http-header-cfg*

Type: Object

http-referer-cfg

Description: http-referer-cfg is a **JSON Block**. Please see below for *zone-template_http-list_filter-list_http-referer-cfg*

Type: Object

http-uri-cfg

Description: http-uri-cfg is a **JSON Block**. Please see below for *zone-template_http-list_filter-list_http-uri-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-template_http-list_mss-timeout

Specification	Value
Type	*object*

mss-percent

Description Configure percentage of mss such that if a packet size is below the mss times mss-percent, packet is considered bad.

Type: number

Range: 1-100

mss-timeout-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, ignore, blacklist-src, reset

Mutual Exclusion: mss-timeout-action and mss-timeout-action-list-name are mutually exclusive

mss-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: mss-timeout-action-list-name and mss-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

number-packets

Description Specify percentage of mss. Default is 0, mss-timeout is not enabled.

Type: number

Range: 1-31

zone-template_http-list_malformed-http

Specification	Value
Type	*object*

malformed-http

Description 'check': Configure malformed HTTP parameters;

Type: string

Supported Values: check

Default: check

malformed-http-action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: malformed-http-action and malformed-http-action-list-name are mutually exclusive

malformed-http-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: malformed-http-action-list-name and malformed-http-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

malformed-http-bad-chunk-mon-enabled

Description Enabling bad chunk monitoring. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-max-content-length

Description Set the maxinum content-length header. Default value is 4294967295 bytes

Type: number

Range: 1-4294967295

Default: 4294967295

malformed-http-max-header-name-size

Description Set the maxinum header name length. Default value is 64.

Type: number

Range: 1-64

Default: 64

malformed-http-max-line-size

Description Set the maximum line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

malformed-http-max-num-headers

Description Set the maximum number of headers. Default value is 90

Type: number

Range: 1-90

Default: 90

malformed-http-max-req-line-size

Description Set the maximum request line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_http-list_request-header

Specification	Value
Type	*object*

header-timeout-action

Description 'drop': Drop packets (Default); 'blacklist-src': Blacklist-src; 'reset': Reset client connection;

Type: string

Supported Values: drop, blacklist-src, reset

Default: drop

Mutual Exclusion: header-timeout-action and header-timeout-action-list-name are mutually exclusive

header-timeout-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: header-timeout-action-list-name and header-timeout-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

Reference Object: */axapi/v3/ddos/action-list*

malformed-sip-call-id-max-length

Description Set the maximum call-id length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-check

Description 'enable-check': Enable malformed SIP parameters;

Type: string

Supported Values: enable-check

malformed-sip-max-header-name-length

Description Set the maximum header name length. Default value is 63

Type: number

Range: 1-63

Default: 63

malformed-sip-max-header-value-length

Description Set the maximum header value length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-line-size

Description Set the maximum line size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-uri-length

Description Set the maximum uri size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-sdp-max-length

Description Set the maxinum SDP content length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_sip-list_filter-header-list

Specification	Value
Type	*list*
Block object keys	

sip-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src; 'reset': Reset client connection(for sip-tcp);

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src, reset

Mutual Exclusion: sip-filter-action and sip-filter-action-list-name are mutually exclusive

sip-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip-filter-action-list-name and sip-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

sip-filter-header-seq

Description Sequence number

Type: number

Range: 1-200

sip-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip-header-cfg

Description: sip-header-cfg is a **JSON Block**. Please see below for *zone-template_sip-list_filter-header-list_sip-header-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_sip-list_filter-header-list_sip-header-cfg

Specification	Value
Type	*object*

sip-filter-header-inverse-match

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

zone-template_icmp-v6-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}/filter/{icmp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

icmp-tmpl-name

Description DDOS ICMPv6 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *zone-template_icmp-v6-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/zone-template/icmp-v6/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_icmp-v6-list_type-list

Specification	Value
Type	*list*
Block object keys	

dst-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

dst-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-other-rate-action and dst-code-other-rate-action-list-name are mutually exclusive

dst-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-other-rate-action-list-name and dst-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

icmp-type-action

Description 'drop': Reject this ICMP type; 'blacklist-src': Blacklist-src this ICMP type; 'ignore': Ignore this ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-action and icmp-type-action-list-name are mutually exclusive

icmp-type-action-list-name

Description Configure action-list to take for this ICMP type

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-action-list-name and icmp-type-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src-code-other-rate

Description Specify the rate with other code

Type: number

Range: 1-16000000

src-code-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-other-rate-action and src-code-other-rate-action-list-name are mutually exclusive

src-code-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-other-rate-action-list-name and src-code-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v6-dst-code-cfg

Type: List

v6-dst-rate-cfg

Description: v6-dst-rate-cfg is a **JSON Block**. Please see below for *zone-template_icmp-v6-list_type-list_v6-dst-rate-cfg*

Type: Object

v6-src-code-cfg

Type: List

v6-src-rate-cfg

Description: v6-src-rate-cfg is a **JSON Block**. Please see below for *zone-template_icmp-v6-list_type-list_v6-src-rate-cfg*

Type: Object

zone-template_icmp-v6-list_type-list_v6-dst-rate-cfg

Specification	Value
Type	*object*

dst-type-rate

Description Specify the whole dst rate for this type

Type: number

Range: 1-16000000

dst-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-rate-action and dst-type-rate-action-list-name are mutually exclusive

dst-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-rate-action-list-name and dst-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v6-list_type-list_v6-src-rate-cfg

Specification	Value
Type	*object*

src-type-rate

Description Specify the whole src rate for this type

Type: number

Range: 1-16000000

src-type-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-rate-action and src-type-rate-action-list-name are mutually exclusive

src-type-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-rate-action-list-name and src-type-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v6-list_type-list_v6-src-code-cfg

Specification	Value
Type	*list*
Block object keys	

src-code-number

Description Specify the ICMP code for this src rate

Type: number

Range: 0-255

src-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

src-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-code-rate-action and src-code-rate-action-list-name are mutually exclusive

src-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-code-rate-action-list-name and src-code-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v6-list_type-list_v6-dst-code-cfg

Specification	Value
Type	*list*
Block object keys	

dst-code-number

Description Specify the ICMP code for this dst rate

Type: number

Range: 0-255

dst-code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

dst-code-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-code-rate-action and dst-code-rate-action-list-name are mutually exclusive

dst-code-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-code-rate-action-list-name and dst-code-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v6-list_type-other

Specification	Value
Type	*object*

dst

Description: dst is a **JSON Block**. Please see below for *zone-template_icmp-v6-list_type-other_dst*

Type: Object

icmp-type-other-action

Description 'drop': Reject wildcard ICMP type; 'blacklist-src': Blacklist-src wildcard ICMP type; 'ignore': Ignore wildcard ICMP type;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: icmp-type-other-action and icmp-type-other-action-list-name are mutually exclusive

icmp-type-other-action-list-name

Description Configure action-list to take for wildcard ICMP match

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-type-other-action-list-name and icmp-type-other-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

src

Description: src is a **JSON Block**. Please see below for *zone-template_icmp-v6-list_type-other_src*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template_icmp-v6-list_type-other_src

Specification	Value
Type	*object*

src-type-other-rate

Description Specify the whole src rate for wildcard ICMP type

Type: number

Range: 1-16000000

src-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: src-type-other-rate-action and src-type-other-rate-action-list-name are mutually exclusive

src-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: src-type-other-rate-action-list-name and src-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v6-list_type-other_dst

Specification	Value
Type	*object*

dst-type-other-rate

Description Specify the whole dst rate for wildcard ICMP type

Type: number

Range: 1-16000000

dst-type-other-rate-action

Description 'drop': Drop packets for rate exceed (Default); 'blacklist-src': Blacklist-src for rate exceed; 'ignore': Do nothing for rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: dst-type-other-rate-action and dst-type-other-rate-action-list-name are mutually exclusive

dst-type-other-rate-action-list-name

Description Configure action-list to take for rate exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dst-type-other-rate-action-list-name and dst-type-other-rate-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-template_icmp-v6-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description filter using Berkeley packet filter syntax

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

icmp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src;

Type: string

Supported Values: drop, ignore, blacklist-src

Default: drop

Mutual Exclusion: icmp-filter-action and icmp-filter-action-list-name are mutually exclusive

icmp-filter-action-list-name

Description list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-filter-action-list-name and icmp-filter-action are mutually exclusive

icmp-filter-inverse-match

Description Inverse the result of matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

icmp-filter-seq

Description sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-http-health-check

Specification	Value
Type	*object*

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable

Description 'enable': enable;

Type: string

Supported Values: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-profile-list

Specification	Value
Type	*list*
Block object keys	

ip-proto

Description: ip-proto is a **JSON Block**. Please see below for *zone-profile-list_ip-proto*

Type: Object

Reference Object: */axapi/v3/ddos/zone-profile/{profile-name}/ip-proto*

port-list

Type: List

Reference Object: */axapi/v3/ddos/zone-profile/{profile-name}/port/{port-num}+{port-protocol}*

port-range-list

Type: List

Reference Object: */axapi/v3/ddos/zone-profile/{profile-name}/port-range/{port-range-start}+{port-range-end}+{protocol}*

profile-name

Description Profile for DDoS zone thresholds

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-profile-list_port-list

Specification	Value
Type	*list*
Block object keys	

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/zone-profile/{profile-name}/port/{port-num}+{port-protocol}/indicator/{indicator-name}*

port-num

Description Port Number

Type: number

Range: 1-65535

port-protocol

Description 'dns-tcp': dns-tcp; 'dns-udp': dns-udp; 'sip-tcp': sip-tcp; 'sip-udp': sip-udp; 'http': http; 'tcp': tcp; 'udp': udp; 'ssl-l4': ssl-l4; 'quic': quic;

Type: string

Supported Values: dns-tcp, dns-udp, sip-tcp, sip-udp, http, tcp, udp, ssl-l4, quic

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-profile-list_port-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

indicator-name

Description 'pkt-rate': pkt-rate; 'pkt-drop-rate': pkt-drop-rate; 'bit-rate': bit-rate; 'pkt-drop-ratio': pkt-drop-ratio; 'bytes-to-bytes-from-ratio': bytes-to-bytes-from-ratio; 'concurrent-conns': concurrent-conns; 'conn-miss-rate': conn-miss-rate; 'syn-rate': syn-rate; 'fin-rate': fin-rate; 'rst-rate': rst-rate; 'small-window-ack-rate': small-window-ack-rate; 'empty-ack-rate': empty-ack-rate; 'small-payload-rate': small-payload-rate; 'syn-fin-ratio': syn-fin-ratio; 'cpu-utilization': cpu-utilization; 'interface-utilization': interface-utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

src-threshold-cfg

Description: src-threshold-cfg is a **JSON Block**. Please see below for *zone-profile-list_port-list_indicator-list_src-threshold-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-cfg

Description: zone-threshold-cfg is a **JSON Block**. Please see below for *zone-profile-list_port-list_indicator-list_zone-threshold-cfg*

Type: Object

zone-profile-list_port-list_indicator-list_src-threshold-cfg

Specification	Value
Type	*object*

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-profile-list_port-list_indicator-list_zone-threshold-cfg

Specification	Value
Type	*object*

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-profile-list_ip-proto

Type	*list*
Block object keys	

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/zone-profile/{profile-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/indicator/{indicator-name}*

port-range-end

Description Port-Range End Port Number

Type: number

Range: 2-65535

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-tcp': SIP-TCP Port; 'sip-udp': SIP-UDP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-tcp, sip-udp, quic

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-profile-list_port-range-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

indicator-name

Description 'pkt-rate': pkt-rate; 'pkt-drop-rate': pkt-drop-rate; 'bit-rate': bit-rate; 'pkt-drop-ratio': pkt-drop-ratio; 'bytes-to-bytes-from-ratio': bytes-to-bytes-from-ratio; 'concurrent-conns': concurrent-conns; 'conn-miss-rate': conn-miss-rate; 'syn-rate': syn-rate; 'fin-rate': fin-rate; 'rst-rate': rst-rate; 'small-window-ack-rate': small-window-ack-rate; 'empty-ack-rate': empty-ack-rate; 'small-payload-rate': small-payload-rate; 'syn-fin-ratio': syn-fin-ratio; 'cpu-utilization': cpu-utilization; 'interface-utilization': interface-utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

src-threshold-cfg

Description: src-threshold-cfg is a **JSON Block**. Please see below for *zone-profile-list_port-range-list_indicator-list_src-threshold-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-cfg

Description: zone-threshold-cfg is a **JSON Block**. Please see below for *zone-profile-list_port-range-list_indicator-list_zone-threshold-cfg*

Type: Object

zone-profile-list_port-range-list_indicator-list_src-threshold-cfg

Specification	Value
Type	*object*

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-profile-list_port-range-list_indicator-list_zone-threshold-cfg

Specification	Value
Type	*object*

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

dns-cache-config

Specification	Value
Type	*object*

disable-zone-transfer-in-oper-mode

Description Disable operational refreshing zone transfer

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-zone-transfer-in-warm-up-mode

Description Disable warm up zone transfer

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

edns-udp-size

Description Set the global maximum EDNS UDP message size (Default: 1232)

Type: number

Range: 512-4096

Default: 1232

enable-cache-warm-up-bgp-advertise

Description Enable route injection during cold boot

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-concurrent-zone-transfers

Description: max-concurrent-zone-transfers is a **JSON Block**. Please see below for *dns-cache-config_max-concurrent-zone-transfers*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache-config/max-concurrent-zone-transfers*

minimal-truncation-responses

Description Enable sending an empty DNS message when the response is truncated.

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-config_max-concurrent-zone-transfers

Specification	Value
Type	*object*

operational-mode

Description Number of concurrent zone transfers after boot

Type: number

Range: 1-3120

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

warm-up-mode

Description Number of concurrent zone transfers during cold boot (default 65472)

Type: number

Range: 100-65535

Default: 65472

signature-extraction

Specification	Value
Type	*object*

enable

Description Enable Automatic Signature Extraction

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

dns-list

Type: List

Reference Object: */axapi/v3/ddos/template/dns/{name}*

encap-list

Type: List

Reference Object: */axapi/v3/ddos/template/encap/{encap-tmpl-name}*

http-list

Type: List

Reference Object: */axapi/v3/ddos/template/http/{http-tmpl-name}*

icmp-v4-list

Type: List

Reference Object: */axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}*

icmp-v6-list

Type: List

Reference Object: */axapi/v3/ddos/template/icmp-v6/{icmp-tmpl-name}*

logging-list

Type: List

Reference Object: */axapi/v3/ddos/template/logging/{logging-tmpl-name}*

other-list

Type: List

Reference Object: */axapi/v3/ddos/template/other/{name}*

sip-list

Type: List

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}*

ssl-l4-list

Type: List

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}*

tcp-list

Type: List

Reference Object: */axapi/v3/ddos/template/tcp/{name}*

udp-list

Type: List

Reference Object: */axapi/v3/ddos/template/udp/{name}*

template_logging-list

Specification	Value
Type	*list*
Block object keys	

enable-action-logging

Description Log action taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-cef

Description Log in CEF format

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-format-custom

Description Customize log format

Type: string

Format: string-rlx

Maximum Length: 512 characters

Maximum Length: 1 characters

logging-tmpl-name

Description DDOS Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: default

use-obj-name

Description Show obj name instead of ip in the log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_encap-list

Specification	Value
Type	*list*
Block object keys	

encap-tmpl-name

Description DDOS Tunnel Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

preserve-source-ip

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *template_encap-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_encap-list_tunnel-encap

Specification	Value
Type	*object*

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *template_encap-list_tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *template_encap-list_tunnel-encap_ip-cfg*

Type: Object

template_encap-list_tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *template_encap-list_tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encap for IP packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_encap-list_tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

template_encap-list_tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *template_encap-list_tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encap for GRE packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_encap-list_tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

template_ssl-l4-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': drop; 'reset': reset;

Type: string

Supported Values: drop, reset

Default: drop

allow-non-tls

Description Allow Non-TLS (SSLv3 and lower) traffic (Warning: security may be compromised)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-config-cfg

Description: auth-config-cfg is a **JSON Block**. Please see below for *template_ssl-l4-list_auth-config-cfg*

Type: Object

cert-cfg

Description: cert-cfg is a **JSON Block**. Please see below for *template_ssl-l4-list_cert-cfg*

Type: Object

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *template_ssl-l4-list_multi-pu-threshold-distribution*

Type: Object

renegotiation

Description Configure renegotiation limiting for SSL (Number of renegotiation allowed)

Type: number

Range: 0-7

request-rate-limit

Description Configure rate limiting for SSL

Type: number

Range: 1-16000000

server-name-list

Type: List

ssl-handshake-policy

Description: ssl-handshake-policy is a **JSON Block**. Please see below for *template_ssl-l4-list_ssl-handshake-policy*

Type: Object

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}/ssl-handshake-policy*

ssl-l4-tmpl-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-traffic-check

Description: ssl-traffic-check is a **JSON Block**. Please see below for *template_ssl-l4-list_ssl-traffic-check*

Type: Object

Reference Object: */axapi/v3/ddos/template/ssl-l4/{ssl-l4-tmpl-name}/ssl-traffic-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_ssl-l4-list_cert-cfg

Specification	Value
Type	*object*

cert

Description SSL certificate

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key

Description SSL key

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

key-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

template_ssl-l4-list_auth-config-cfg

Specification	Value
Type	*object*

auth-handshake-fail-action

Description 'blacklist-src': Blacklist-src when auth handshake fails;

Type: string

Supported Values: blacklist-src

timeout

Description Connection timeout

Type: number

Range: 1-31

Default: 5

trials

Description Number of failed handshakes

Type: number

Range: 0-15

Default: 5

template_ssl-l4-list_ssl-traffic-check

Specification	Value
Type	*object*

check-resumed-connection

Description Apply checks to SSL connections initialized by ACK packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-action

Description 'drop': Drop packets with bad ssl header; 'ignore': Forward packets with bad ssl header;

Type: string

Supported Values: drop, ignore

header-inspection

Description Inspect ssl header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_ssl-l4-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

template_ssl-l4-list_ssl-handshake-policy

Specification	Value
Type	*object*

action

Description 'drop': Drop packets (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist source IP;

Type: string

Supported Values: drop, reset, blacklist-src

Mutual Exclusion: action and ssl-handshake-policy-action-list-name are mutually exclusive

cipher-suites-limit

Description Set cipher suites limit

Type: number

Range: 1-600

client-extensions-limit

Description Set client extensions limit

Type: number

Range: 1-600

clienthello-to-appdata-timeout

Description Set maximum timeout seconds from ClientHello to Application-Data

Type: number

Range: 1-600

finished-to-appdata-timeout

Description Set maximum timeout seconds from Handshake finished to Application-Data

Type: number

Range: 1-600

src-handshaking-conn-limit

Description Set handshaking connection limit

Type: number

Range: 1-16000000

ssl-handshake-policy-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-handshake-policy-action-list-name and action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_ssl-l4-list_server-name-list

Specification	Value
Type	*list*
Block object keys	

server-cert

Description Server Certificate associated to SNI (Server Certificate Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED password string)

server-key

Description Server Private Key associated to SNI (Server Private Key Name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-name

Description Server name indication in Client hello extension (Server name String)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-passphrase

Description Password Phrase

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

template_dns-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop packets (Default action); 'reset': Send Client RST for TCP connections;

Type: string

Supported Values: drop, reset

Default: drop

alias-rate-threshold

Description ALIAS(Record Type 65300) Query Forwarding Rate Limit (Only for DNS Cache Mode)

Type: number

Range: 1-16000000

allow-query-class

Description: allow-query-class is a **JSON Block**. Please see below for *template_dns-list_allow-query-class*

Type: Object

allow-record-type

Description: allow-record-type is a **JSON Block**. Please see below for *template_dns-list_allow-record-type*

Type: Object

dns-any-check

Description Drop DNS queries of Type ANY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-auth-cfg

Description: dns-auth-cfg is a **JSON Block**. Please see below for *template_dns-list_dns-auth-cfg*

Type: Object

dns-request-rate-limit

Description: dns-request-rate-limit is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit*

Type: Object

dnssec-wildcard-rate-threshold

Description DNSSEC Wildcard Query Forwarding Rate Limit (only for DNS Cache Mode)

Type: number

Range: 1-16000000

domain-group-name

Description Apply a domain-group to the DNS template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

domain-group-rate-exceed-action

Description 'drop': Drop the query (default); 'tunnel-encap-packet': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: drop, tunnel-encap-packet

Default: drop

domain-group-rate-per-service

Description Enable per service domain rate checking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

fqdn-cfg

Type: List

fqdn-label-count

Description Maximum number of length of FQDN labels

Type: number

Range: 1-10

fqdn-label-len-cfg

Type: List

malformed-query-check

Description: malformed-query-check is a **JSON Block**. Please see below for *template_dns-list_malformed-query-check*

Type: Object

Reference Object: */axapi/v3/ddos/template/dns/{name}/malformed-query-check*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *template_dns-list_multi-pu-threshold-distribution*

Type: Object

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

nxdomain-cfg

Description: nxdomain-cfg is a **JSON Block**. Please see below for *template_dns-list_nxdomain-cfg*

Type: Object

on-no-match

Description 'permit': permit; 'deny': deny (default);

Type: string

Supported Values: permit, deny

Default: deny

query-rate-threshold-for-cache-serving

Description This is for DNS cache mode only, it sets a DNS query rate threshold such that queries under the rate threshold would be forward

Type: number

Range: 1-16000000

symtimeout-cfg

Description: symtimeout-cfg is a **JSON Block**. Please see below for *template_dns-list_symtimeout-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_dns-list_dns-request-rate-limit

Specification	Value
Type	*object*

type

Description: type is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit_type*

Type: Object

template_dns-list_dns-request-rate-limit_type

Specification	Value
Type	*object*

A-cfg

Description: A-cfg is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit_type_A-cfg*

Type: Object

AAAA-cfg

Description: AAAA-cfg is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit_type_AAAA-cfg*

Type: Object

CNAME-cfg

Description: CNAME-cfg is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit_type_CNAME-cfg*

Type: Object

MX-cfg

Description: MX-cfg is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit_type_MX-cfg*

Type: Object

NS-cfg

Description: NS-cfg is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit_type_NS-cfg*

Type: Object

SRV-cfg

Description: SRV-cfg is a **JSON Block**. Please see below for *template_dns-list_dns-request-rate-limit_type_SRV-cfg*

Type: Object

dns-type-cfg

Type: List

template_dns-list_dns-request-rate-limit_type_SRV-cfg

Specification	Value
Type	*object*

SRV

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-srv-rate

Description DNS request rate

Type: number

Range: 1-16000000

template_dns-list_dns-request-rate-limit_type_CNAME-cfg

Specification	Value
Type	*object*

CNAME

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cname-rate

Description

Type: number

Range: 1-16000000

template_dns-list_dns-request-rate-limit_type_dns-type-cfg

Specification	Value
Type	*list*
Block object keys	

dns-request-type

Description Other type value

Type: number

Range: 1-65535

dns-request-type-rate

Description request rate limit

Type: number

Range: 1-16000000

template_dns-list_dns-request-rate-limit_type_AAAA-cfg

Specification	Value
Type	*object*

AAAA

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-aaaa-rate

Description

Type: number

Range: 1-16000000

template_dns-list_dns-request-rate-limit_type_A-cfg

Specification	Value
Type	*object*

A

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-a-rate

Description

Type: number

Range: 1-16000000

template_dns-list_dns-request-rate-limit_type_MX-cfg

Specification	Value
Type	*object*

MX

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-mx-rate

Description

Type: number

Range: 1-16000000

template_dns-list_dns-request-rate-limit_type_NS-cfg

Specification	Value
Type	*object*

NS

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-ns-rate

Description

Type: number

Range: 1-16000000

template_dns-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

template_dns-list_nxdomain-cfg

Specification	Value
Type	*object*

dns-nxdomain-rate

Description Limiting rate

Type: number

Range: 1-16000000

dns-nxdomain-rate-limit

Description DNS NXDOMAIN Rate Limiting (SRC support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-nxdomain-rate-limit-action

Description 'drop': Drop queries if rate is exceeded; 'black-list': Black-List source if rate is exceeded;

Type: string

Supported Values: drop, black-list

template_dns-list_fqdn-cfg

Specification	Value
Type	*list*
Block object keys	

by

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'both': Use both Domain Name and Source IP address for rate-limiting;

Type: string

Supported Values: domain-name, src-ip, both

Mutual Exclusion: by and per are mutually exclusive

dns-fqdn-rate

Description Limiting rate (Range: 5-8000 for FQDN domain based rate limiting, 5-16000000 for FQDN label count based rate limiting)

Type: number

Range: 5-16000000

dns-fqdn-rate-limit

Description DNS Rate limiting on the basis of FQDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fqdn-rate-label-count

Description FQDN label count (Range: 1-8)

Type: number

Range: 1-8

fqdn-rate-suffix

Description Suffix count

Type: number

Range: 1-5

fqdn-rate-suffix-by

Description Number of suffixes

Type: number

Range: 1-5

per

Description 'domain-name': Domain Name; 'src-ip': Source IP address; 'label-count': FQDN label count;

Type: string

Supported Values: domain-name, src-ip, label-count

Mutual Exclusion: per and by are mutually exclusive

per-domain-per-src-ip

Description Use both Domain Name and Source IP address for rate-limiting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_dns-list_dns-auth-cfg

Specification	Value
Type	*object*

dns-auth

Description DNS authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-auth-type

Description 'udp': Drop DNS request and monitor client retry; 'force-tcp': Force DNS request over TCP;

Type: string

Supported Values: udp, force-tcp

force-tcp-ignore-client-source-port

Description Allow client to retransmit DNS request using different source port during udp-auth (supported in asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-tcp-min-retry-gap

Description Minimum sec gap in between 2 dns-udp packets for auth to pass

Type: number

Range: 1-15

force-tcp-timeout

Description TCP authentication timeout in seconds

Type: number

Range: 1-16

min-retry-gap

Description Optional minimum sec gap in between 2 dns-udp packets for auth to pass, unit is specified by min-retry-gap-interval

Type: number

Range: 1-80

min-retry-gap-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

udp-timeout

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

udp-timeout-val-only

Description UDP authentication timeout in seconds

Type: number

Range: 1-16

with-udp-auth

Description Monitor client retry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_dns-list_symtimeout-cfg

Specification	Value
Type	*object*

sym-timeout

Description Timeout for DNS Symmetric session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sym-timeout-value

Description Session timeout value in seconds

Type: number

Range: 1-31

template_dns-list_allow-query-class

Specification	Value
Type	*object*

allow-any-query-class

Description ANY query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-chaos-query-class

Description CHAOS query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-csnet-query-class

Description CSNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-hesiod-query-class

Description HESIOD query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-internet-query-class

Description INTERNET query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-none-query-class

Description NONE query class

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_dns-list_fqdn-label-len-cfg

Specification	Value
Type	*list*
Block object keys	

fqdn-label-length

Description Maximum FQDN label length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fqdn-label-suffix

Description Number of suffixes

Type: number

Range: 1-5

label-length

Description Maximum length of FQDN label

Type: number

Range: 1-63

template_dns-list_allow-record-type

Specification	Value
Type	*object*

allow-a-type

Description Address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-aaaa-type

Description IPv6 address record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-cname-type

Description Canonical name record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-mx-type

Description Mail exchange record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-ns-type

Description Name server record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-srv-type

Description Service locator

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-num-cfg

Type: List

template_dns-list_allow-record-type_record-num-cfg

Specification	Value
Type	*list*
Block object keys	

allow-num-type

Description Other record type value

Type: number

Range: 1-65535

template_dns-list_malformed-query-check

Specification	Value
Type	*object*

non-query-opcode-check

Description 'disable': When malform check is enabled, TPS always drops DNS query with non query opcode, this option disables this opcode check;

Type: string

Supported Values: disable

skip-multi-packet-check

Description Bypass DNS fragmented and TCP segmented Queries(Default: dropped)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

validation-type

Description 'basic-header-check': Basic header validation for DNS TCP/UDP queries; 'extended-header-check': Extended header/query validation for DNS TCP/UDP queries; 'disable': Disable Malform query validation for DNS TCP/UDP;

Type: string

Supported Values: basic-header-check, extended-header-check, disable

template_icmp-v4-list

Specification	Value
Type	*list*
Block object keys	

icmp-tmpl-name

Description DDOS ICMPv4 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *template_icmp-v4-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/template/icmp-v4/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_icmp-v4-list_type-other

Specification	Value
Type	*object*

type-other-deny

Description Deny all other type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-other-deny and type-other-rate are mutually exclusive

type-other-rate

Description Specify rate with other type

Type: number

Range: 1-16000000

Mutual Exclusion: type-other-rate and type-other-deny are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_icmp-v4-list_type-list

Specification	Value
Type	*list*
Block object keys	

code

Type: List

code-other

Description: code-other is a **JSON Block**. Please see below for *template_icmp-v4-list_type-list_code-other*

Type: Object

type-deny

Description Reject this ICMP type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-deny, type-rate, and code-other-rate are mutually exclusive

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

type-rate

Description Specify the whole rate with this type

Type: number

Range: 1-16000000

Mutual Exclusion: type-rate and type-deny are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_icmp-v4-list_type-list_code

Specification	Value
Type	*list*
Block object keys	

code-number

Description Specify the ICMP code

Type: number

Range: 0-255

code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

template_icmp-v4-list_type-list_code-other

Specification	Value
Type	*object*

code-other-rate

Description Specify rate with other code

Type: number

Range: 1-16000000

Mutual Exclusion: code-other-rate and type-deny are mutually exclusive

template_tcp-list

Specification	Value
Type	*list*
Block object keys	

ack-authentication-synack-reset

Description Enable Reset client TCP SYN+ACK for authentication (DST support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-cfg

Description: action-cfg is a **JSON Block**. Please see below for *template_tcp-list_action-cfg*

Type: Object

action-on-ack-rto-retry-count

Description Take action if action-on-ack RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-on-syn-rto-retry-count

Description Take action if action-on-syn RTO-authentication fail over retry time(default:5)

Type: number

Range: 2-10

action-syn-cfg

Description: action-syn-cfg is a **JSON Block**. Please see below for *template_tcp-list_action-syn-cfg*

Type: Object

age

Description Session age in minutes

Type: number

Range: 1-63

allow-syn-otherflags

Description Treat TCP SYN+PSH as a TCP SYN (DST tcp ports support only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-synack-skip-authentications

Description Allow create sessions on SYNACK without syn-auth and ack-auth (ASYM Mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allow-tcp-tfo

Description Allow TCP Fast Open

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

black-list-out-of-seq

Description Black list Src IP if out of seq pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: black-list-out-of-seq and per-conn-out-of-seq-rate-limit are mutually exclusive

black-list-retransmit

Description Black list Src IP if retransmit pkts exceed configured threshold

Type: number

Range: 1-64000

Mutual Exclusion: black-list-retransmit and per-conn-retransmit-rate-limit are mutually exclusive

black-list-zero-win

Description Black list Src IP if zero window pkts exceed configured threshold

Type: number

Range: 1-250

Mutual Exclusion: black-list-zero-win and per-conn-zero-win-rate-limit are mutually exclusive

conn-rate-limit-on-syn-only

Description Only count SYN-initiated connections towards connection-rate tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-conn-on-syn-only

Description Enable connection establishment on SYN only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-known-resp-src-port-cfg

Description: drop-known-resp-src-port-cfg is a **JSON Block**. Please see below for *template_tcp-list_drop-known-resp-src-port-cfg*

Type: Object

dst

Description: dst is a **JSON Block**. Please see below for *template_tcp-list_dst*

Type: Object

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/tcp/{name}/filter/{tcp-filter-seq}*

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

per-conn-out-of-seq-rate-action

Description 'drop': Drop packets for out-of-seq rate exceed (Default); 'blacklist-src': help Blacklist-src for out-of-seq rate exceed; 'ignore': help Ignore out-of-seq rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-out-of-seq-rate-limit

Description Take action if out-of-seq pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-out-of-seq-rate-limit and black-list-out-of-seq are mutually exclusive

per-conn-pkt-rate-action

Description 'drop': Drop packets for per-conn-pkt-rate exceed (Default); 'blacklist-src': help Blacklist-src for per-conn-pkt-rate exceed; 'ignore': Ignore per-conn-pkt-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec; '10sec': 10sec;

Type: string

Supported Values: 100ms, 1sec, 10sec

Default: 1sec

per-conn-retransmit-rate-action

Description 'drop': Drop packets for retransmit rate exceed (Default); 'blacklist-src': help Blacklist-src for retransmit rate exceed; 'ignore': help Ignore retransmit rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-retransmit-rate-limit

Description Take action if retransmit pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-retransmit-rate-limit and black-list-retransmit are mutually exclusive

per-conn-zero-win-rate-action

Description 'drop': Drop packets for zero-win rate exceed (Default); 'blacklist-src': help Blacklist-src for zero-win rate exceed; 'ignore': help Ignore zero-win rate exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

per-conn-zero-win-rate-limit

Description Take action if zero window pkt rate exceed configured threshold

Type: number

Range: 1-16000000

Mutual Exclusion: per-conn-zero-win-rate-limit and black-list-zero-win are mutually exclusive

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *template_tcp-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking*

src

Description: src is a **JSON Block**. Please see below for *template_tcp-list_src*

Type: Object

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable, send-rst-once

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synack-rate-limit

Description Config SYNACK rate limit

Type: number

Range: 1-16000000

Mutual Exclusion: synack-rate-limit and track-together-with-syn are mutually exclusive

track-together-with-syn

Description SYNACK will be counted in Dst Syn-rate limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: track-together-with-syn and synack-rate-limit are mutually exclusive

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *template_tcp-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_tcp-list_tunnel-encap

Specification	Value
Type	*object*

gre-cfg

Description: gre-cfg is a **JSON Block**. Please see below for *template_tcp-list_tunnel-encap_gre-cfg*

Type: Object

ip-cfg

Description: ip-cfg is a **JSON Block**. Please see below for *template_tcp-list_tunnel-encap_ip-cfg*

Type: Object

template_tcp-list_tunnel-encap_ip-cfg

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *template_tcp-list_tunnel-encap_ip-cfg_always*

Type: Object

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_tcp-list_tunnel-encap_ip-cfg_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

preserve-src-ipv4

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_tcp-list_tunnel-encap_gre-cfg

Specification	Value
Type	*object*

gre-always

Description: gre-always is a **JSON Block**. Please see below for *template_tcp-list_tunnel-encap_gre-cfg_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_tcp-list_tunnel-encap_gre-cfg_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

preserve-src-ipv4-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_tcp-list_dst

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *template_tcp-list_dst_rate-limit*

Type: Object

template_tcp-list_dst_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *template_tcp-list_dst_rate-limit_syn-rate-limit*

Type: Object

template_tcp-list_dst_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

dst-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, ignore

Default: drop

dst-syn-rate-limit

Description

Type: number

Range: 1-16000000

template_tcp-list_action-cfg

Specification	Value
Type	*object*

action-on-ack

Description Monitor tcp ack for age-out session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authenticate-only

Description Apply action-on-ack once per source address for authentication purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

min-retry-gap

Description Min gap between 2 ACKs for action-on-ack pass in 100ms interval

Type: number

Range: 1-80

reset

Description Send RST to client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rto-authentication

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout

Description ACK retry timeout in sec

Type: number

Range: 1-31

template_tcp-list_progression-tracking

Specification	Value
Type	*object*

ignore-TLS-handshake

Description Ignore TLS handshake, support SSL-L4 port only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mitigation

Description: mitigation is a **JSON Block**. Please see below for *template_tcp-list_progression-tracking_mitigation*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation*

profiling

Description: profiling is a **JSON Block**. Please see below for *template_tcp-list_progression-tracking_profiling*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/profiling*

progression-tracking-enabled

Description 'enable-check': Enable Progression Tracking Check;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_tcp-list_progression-tracking_mitigation

Specification	Value
Type	*object*

connection-tracking

Description: connection-tracking is a **JSON Block**. Please see below for *template_tcp-list_progression-tracking_mitigation_connection-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/connection-tracking*

request-tracking

Description: request-tracking is a **JSON Block**. Please see below for *template_tcp-list_progression-tracking_mitigation_request-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/request-tracking*

slow-attack

Description: slow-attack is a **JSON Block**. Please see below for *template_tcp-list_progression-tracking_mitigation_slow-attack*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/slow-attack*

time-window-tracking

Description: time-window-tracking is a **JSON Block**. Please see below for *template_tcp-list_progression-tracking_mitigation_time-window-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/template/tcp/{name}/progression-tracking/mitigation/time-window-tracking*

template_tcp-list_progression-tracking_mitigation_time-window-tracking

Specification	Value
Type	*object*

progression-tracking-win-enabled

Description 'enable-check': Enable Progression Tracking per Time Window;

Type: string

Supported Values: enable-check

Default: enable-check

progression-tracking-windows-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-windows-action and progression-tracking-windows-action-list-name are mutually exclusive

progression-tracking-windows-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-windows-action-list-name and progression-tracking-windows-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

window-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

window-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

window-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

window-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

window-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

window-violation

Description Set the violation threshold

Type: number

Range: 1-255

template_tcp-list_progression-tracking_mitigation_slow-attack

Specification	Value
Type	*object*

init-request-max-time

Description Set client query time (in unit of 100ms). Suggested value larger than 30 secs

Type: number

Range: 2-6000

init-response-max-time

Description Set server think time (in unit of 100ms). Suggested value larger than 45 secs

Type: number

Range: 2-6000

progression-tracking-slow-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'reset': Reset client connection; 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, reset, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-slow-action and progression-tracking-slow-action-list-name are mutually exclusive

progression-tracking-slow-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-slow-action-list-name and progression-tracking-slow-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

response-pkt-rate-max

Description Set the transferred packets per response

Type: number

Range: 1-255

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_tcp-list_progression-tracking_mitigation_connection-tracking

Specification	Value
Type	*object*

conn-duration-max

Description Set the maximum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-duration-min

Description Set the minimum duration time (in unit of 100ms, up to 24 hours)

Type: number

Range: 1-864000

conn-rcvd-max

Description Set the maximum total received byte

Type: number

Range: 1-65535

conn-rcvd-min

Description Set the minimum total received byte

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-max

Description Set the maximum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-rcvd-sent-ratio-min

Description Set the minimum received to sent ratio (in unit of 0.1% [1:1000])

Type: number

Range: 1-65535

conn-sent-max

Description Set the maximum total sent byte

Type: number

Range: 1-65535

conn-sent-min

Description Set the minimum total sent byte

Type: number

Range: 1-65535

conn-violation

Description Set the violation threshold

Type: number

Range: 1-255

progression-tracking-conn-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-conn-action and progression-tracking-conn-action-list-name are mutually exclusive

progression-tracking-conn-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-conn-action-list-name and progression-tracking-conn-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-conn-enabled

Description 'enable-check': Enable General Progression Tracking per Connection;

Type: string

Supported Values: enable-check

Default: enable-check

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_tcp-list_progression-tracking_mitigation_request-tracking

Specification	Value
Type	*object*

first-request-max-time

Description Set the maximum idle time before the first request (in unit of 100ms)

Type: number

Range: 1-65535

progression-tracking-req-action

Description 'drop': Drop packets for progression tracking violation exceed (Default); 'blacklist-src': Blacklist-src for progression tracking violation exceed;

Type: string

Supported Values: drop, blacklist-src

Default: drop

Mutual Exclusion: progression-tracking-req-action and progression-tracking-req-action-list-name are mutually exclusive

progression-tracking-req-action-list-name

Description Configure action-list to take when progression tracking violation exceed

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: progression-tracking-req-action-list-name and progression-tracking-req-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

progression-tracking-req-enabled

Description 'enable-check': Enable General Progression Tracking per Request Response;

Type: string

Supported Values: enable-check

Default: enable-check

request-length-max

Description Set the maximum request length

Type: number

Range: 1-65535

request-length-min

Description Set the minimum request length

Type: number

Range: 1-65535

request-response-model

Description 'enable': Enable Request Response Model (Default); 'disable': Disable Request Response Model;

Type: string

Supported Values: enable, disable

Default: enable

request-to-response-max-time

Description Set the maximum request to response time (in unit of 100ms)

Type: number

Range: 1-65535

response-length-max

Description Set the maximum response length

Type: number

Range: 1-4294967295

response-length-min

Description Set the minimum response length

Type: number

Range: 1-65535

response-to-request-max-time

Description Set the maximum response to request time (in unit of 100ms)

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation

Description Set the violation threshold

Type: number

Range: 1-255

template_tcp-list_progression-tracking_profiling

Specification	Value
Type	*object*

profiling-connection-life-model

Description Enable auto-config progression tracking learning for connection model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-request-response-model

Description Enable auto-config progression tracking learning for request response model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profiling-time-window-model

Description Enable auto-config progression tracking learning for time window model

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_tcp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-5

tcp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_tcp-list_src

Specification	Value
Type	*object*

rate-limit

Description: rate-limit is a **JSON Block**. Please see below for *template_tcp-list_src_rate-limit*

Type: Object

template_tcp-list_src_rate-limit

Specification	Value
Type	*object*

syn-rate-limit

Description: syn-rate-limit is a **JSON Block**. Please see below for *template_tcp-list_src_rate-limit_syn-rate-limit*

Type: Object

template_tcp-list_src_rate-limit_syn-rate-limit

Specification	Value
Type	*object*

src-syn-rate-action

Description 'drop': Drop packets for syn-rate exceed (Default); 'blacklist-src': Blacklist-src for syn-rate exceed; 'ignore': Ignore syn-rate-exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Default: drop

src-syn-rate-limit

Description

Type: number

Range: 1-16000000

template_tcp-list_action-syn-cfg

Specification	Value
Type	*object*

action-on-syn

Description Monitor tcp syn for age-out session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-gap

Description Min gap between 2 SYNs for action-on-syn pass in 100ms interval

Type: number

Range: 1-80

action-on-syn-reset

Description Send RST to client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-rto

Description Estimate the RTO and apply the exponential back-off for authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

action-on-syn-timeout

Description SYN retry timeout in sec

Type: number

Range: 1-31

template_tcp-list_drop-known-resp-src-port-cfg

Specification	Value
Type	*object*

drop-known-resp-src-port

Description Drop well-known if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exclude-src-resp-port

Description excluding src port equal destination port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_other-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/other/{name}/filter/{other-filter-seq}*

name

Description DDOS OTHER Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_other-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

other-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

other-filter-seq

Description Sequence number

Type: number

Range: 1-5

other-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_udp-list

Specification	Value
Type	*list*
Block object keys	

age

Description Configure session age(in minutes) for UDP sessions

Type: number

Range: 1-63

drop-known-resp-src-port-cfg

Description: drop-known-resp-src-port-cfg is a **JSON Block**. Please see below for *template_udp-list_drop-known-resp-src-port-cfg*

Type: Object

drop-ntp-monlist

Description Drop NTP monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-list

Type: List

Reference Object: */axapi/v3/ddos/template/udp/{name}/filter/{udp-filter-seq}*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

per-conn-pkt-rate-limit

Description Packet rate limit per connection per rate-interval

Type: number

Range: 1-16000000

per-conn-rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

previous-salt-timeout

Description Token-Authentication previous salt-prefix timeout in minutes, default is 1 min

Type: number

Range: 1-10080

Default: 1

public-ipv4-addr

Description IP address

Type: string

Format: ipv4-address

public-ipv6-addr

Description IPV6 address

Type: string

Format: ipv6-address

spoof-detect-cfg

Description: spoof-detect-cfg is a **JSON Block**. Please see below for *template_udp-list_spoof-detect-cfg*

Type: Object

token-authentication

Description Enable Token Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-formula

Description 'md5_Salt-SrcIp-SrcPort-DstIp-DstPort': md5 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'md5_Salt-DstIp-DstPort': md5 of Salt-DstIp-DstPort; 'md5_Salt-SrcIp-DstIp': md5 of Salt-SrcIp-DstIp; 'md5_Salt-SrcPort-DstPort': md5 of Salt-SrcPort-DstPort; 'md5_Salt-UintDstIp-DstPort': Using the uint value of IP for md5 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-SrcPort-DstIp-DstPort': sha1 of Salt-SrcIp-SrcPort-DstIp-DstPort; 'sha1_Salt-DstIp-DstPort': sha1 of Salt-DstIp-DstPort; 'sha1_Salt-SrcIp-DstIp': sha1 of Salt-SrcIp-DstIp; 'sha1_Salt-SrcPort-DstPort': sha1 of Salt-SrcPort-DstPort; 'sha1_Salt-UintDstIp-DstPort': Using the uint value of IP for sha1 of Salt-DstIp-DstPort;

Type: string

Supported Values: md5_Salt-SrcIp-SrcPort-DstIp-DstPort, md5_Salt-DstIp-DstPort, md5_Salt-SrcIp-DstIp, md5_Salt-SrcPort-DstPort, md5_Salt-UintDstIp-DstPort, sha1_Salt-SrcIp-SrcPort-DstIp-DstPort, sha1_Salt-DstIp-DstPort, sha1_Salt-SrcIp-DstIp, sha1_Salt-SrcPort-DstPort, sha1_Salt-UintDstIp-DstPort

token-authentication-hw-assist-disable

Description token-authentication disable hardware assistance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-public-address

Description The server public IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix

Description token-authentication salt-prefix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

token-authentication-salt-prefix-curr

Description

Type: number

Range: 1-4294967295

token-authentication-salt-prefix-prev

Description

Type: number

Range: 1-4294967295

tunnel-encap

Description: tunnel-encap is a **JSON Block**. Please see below for *template_udp-list_tunnel-encap*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_udp-list_tunnel-encap

Specification	Value
Type	*object*

always

Description: always is a **JSON Block**. Please see below for *template_udp-list_tunnel-encap_always*

Type: Object

gre-always

Description: gre-always is a **JSON Block**. Please see below for *template_udp-list_tunnel-encap_gre-always*

Type: Object

gre-encap

Description Enable Tunnel encapsulation using GRE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: gre-encap and ip-encap are mutually exclusive

ip-encap

Description Enable Tunnel encapsulation using IP in IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: ip-encap and gre-encap are mutually exclusive

template_udp-list_tunnel-encap_gre-always

Specification	Value
Type	*object*

gre-ipv4

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

gre-ipv6

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

key-ipv4

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

key-ipv6

Description Encapsulate with key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

preserve-src-ipv4-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6-gre

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_udp-list_tunnel-encap_always

Specification	Value
Type	*object*

ipv4-addr

Description IPv4 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv4-address

ipv6-addr

Description IPv6 address (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: ipv6-address

preserve-src-ipv4

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-src-ipv6

Description Use original source ip for encapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_udp-list_spoof-detect-cfg

Specification	Value
Type	*object*

min-retry-gap

Description Optional minimum gap between 2 UDP packets for spoof-detect pass, unit is specified by min-retry-gap-interval

Type: number

Range: 1-80

min-retry-gap-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 1sec

spoof-detect

Description Force client to retry on udp

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spoof-detect-retry-timeout

Description timeout in seconds

Type: number

Range: 1-31

Default: 5

Mutual Exclusion: spoof-detect-retry-timeout and spoof-detect-retry-timeout-val-only are mutually exclusive

spoof-detect-retry-timeout-val-only

Description timeout in seconds

Type: number

Range: 1-31

Default: 5

Mutual Exclusion: spoof-detect-retry-timeout-val-only and spoof-detect-retry-timeout are mutually exclusive

template_udp-list_drop-known-resp-src-port-cfg

Specification	Value
Type	*object*

drop-known-resp-src-port

Description Drop well-known if src-port is less than 1024

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exclude-src-resp-port

Description excluding src port equal destination port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-5

udp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_http-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop packets for the connection; 'reset': Send RST for the connection;

Type: string

Supported Values: drop, reset

Default: drop

agent-filter

Description: agent-filter is a **JSON Block**. Please see below for *template_http-list_agent-filter*

Type: Object

challenge-cookie-name

Description Set the cookie name used to send back to client. Default is sto-idd

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: sto-idd

challenge-interval

Description Specify the challenge interval. Default is 8 seconds

Type: number

Range: 1-31

Default: 8

challenge-keep-cookie

Description Keep the challenge cookie from client and forward to backend. Default is do not keep

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-method

Description 'http-redirect': http-redirect; 'javascript': javascript;

Type: string

Supported Values: http-redirect, javascript

challenge-redirect-code

Description '302': 302 Found; '307': 307 Temporary Redirect;

Type: string

Supported Values: 302, 307

Default: 302

challenge-uri-encode

Description Encode the challenge phrase in uri instead of in http cookie. Default encoded in http cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable this template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disallow-connect-method

Description Do not allow HTTP Connect method (asymmetric mode only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-header-list

Type: List

Reference Object: */axapi/v3/ddos/template/http/{http-tmpl-name}/filter-header/{http-filter-header-seq}*

http-tmpl-name

Description DDOS HTTP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

idle-timeout

Description Set the the idle timeout value in seconds for HTTP connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http

Description: malformed-http is a **JSON Block**. Please see below for *template_http-list_malformed-http*

Type: Object

mss-cfg

Description: mss-cfg is a **JSON Block**. Please see below for *template_http-list_mss-cfg*

Type: Object

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *template_http-list_multi-pu-threshold-distribution*

Type: Object

non-http-bypass

Description Bypass non-http traffic instead of dropping

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-queue-size

Description Set the number of packets for the out-of-order HTTP queue (asym mode only)

Type: number

Range: 0-15

Default: 3

out-of-order-queue-timeout

Description Set the timeout value in seconds for out-of-order queue in HTTP (asym mode only)

Type: number

Range: 0-15

Default: 3

post-rate-limit

Description Configure rate limiting for HTTP POST request

Type: number

Range: 1-16000000

referer-filter

Description: referer-filter is a **JSON Block**. Please see below for *template_http-list_referer-filter*

Type: Object

request-header

Description: request-header is a **JSON Block**. Please see below for *template_http-list_request-header*

Type: Object

request-rate-limit

Description: request-rate-limit is a **JSON Block**. Please see below for *template_http-list_request-rate-limit*

Type: Object

response-rate-limit

Description: response-rate-limit is a **JSON Block**. Please see below for *template_http-list_response-rate-limit*

Type: Object

slow-read-drop

Description: slow-read-drop is a **JSON Block**. Please see below for *template_http-list_slow-read-drop*

Type: Object

use-hdr-ip-cfg

Description: use-hdr-ip-cfg is a **JSON Block**. Please see below for *template_http-list_use-hdr-ip-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_http-list_request-rate-limit

Specification	Value
Type	*object*

request-rate

Description HTTP request rate limit

Type: number

Range: 1-16000000

uri

Type: List

template_http-list_request-rate-limit_uri

Specification	Value
Type	*list*
Block object keys	

contains-cfg

Description: contains-cfg is a **JSON Block**. Please see below for *template_http-list_request-rate-limit_uri_contains-cfg*

Type: Object

ends-cfg

Description: ends-cfg is a **JSON Block**. Please see below for *template_http-list_request-rate-limit_uri_ends-cfg*

Type: Object

equal-cfg

Description: equal-cfg is a **JSON Block**. Please see below for *template_http-list_request-rate-limit_uri_equal-cfg*

Type: Object

starts-cfg

Description: starts-cfg is a **JSON Block**. Please see below for *template_http-list_request-rate-limit_uri_starts-cfg*

Type: Object

template_http-list_request-rate-limit_uri_equal-cfg

Specification	Value
Type	*object*

url-equals

Description Request rate-limit HTTP URI matching a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-equals-rate

Description Request rate limit

Type: number

Range: 1-16000000

template_http-list_request-rate-limit_uri_starts-cfg

Specification	Value
Type	*object*

url-starts-with

Description Request rate-limit HTTP URI strting with a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-starts-with-rate

Description Request rate limit

Type: number

Range: 1-16000000

template_http-list_request-rate-limit_uri_contains-cfg

Specification	Value
Type	*object*

url-contains

Description Request rate-limit HTTP URI containing a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-contains-rate

Description Request rate limit

Type: number

Range: 1-16000000

template_http-list_request-rate-limit_uri_ends-cfg

Specification	Value
Type	*object*

url-ends-with

Description Request rate-limit HTTP URI ending with a specified pattern

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

url-ends-with-rate

Description Request rate limit

Type: number

Range: 1-16000000

template_http-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

template_http-list_malformed-http

Specification	Value
Type	*object*

malformed-http-bad-chunk-mon-enabled

Description Enabling bad chunk monitoring. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-enabled

Description Enabling ddos malformed http protection. Default value is disabled.

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-http-max-content-length

Description Set the maximum content-length header. Default value is 4294967295 bytes

Type: number

Range: 1-4294967295

Default: 4294967295

malformed-http-max-header-name-size

Description Set the maxinum header name length. Default value is 64.

Type: number

Range: 1-64

Default: 64

malformed-http-max-line-size

Description Set the maximum line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

malformed-http-max-num-headers

Description Set the maximum number of headers. Default value is 90

Type: number

Range: 1-90

Default: 90

malformed-http-max-req-line-size

Description Set the maximum request line size. Default value is 32512

Type: number

Range: 1-65280

Default: 32512

template_http-list_request-header

Specification	Value
Type	*object*

timeout

Description

Type: number

Range: 1-63

template_http-list_agent-filter

Specification	Value
Type	*object*

agent-contains-cfg

Type: List

agent-ends-cfg

Type: List

agent-equals-cfg

Type: List

agent-filter-blacklist

Description Blacklist the source if the user-agent matches

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

agent-starts-cfg

Type: List

template_http-list_agent-filter_agent-contains-cfg

Specification	Value
Type	*list*
Block object keys	

agent-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_agent-filter_agent-ends-cfg

Specification	Value
Type	*list*
Block object keys	

agent-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_agent-filter_agent-equals-cfg

Specification	Value
Type	*list*
Block object keys	

agent-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_agent-filter_agent-starts-cfg

Specification	Value
Type	*list*
Block object keys	

agent-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_filter-header-list

Specification	Value
Type	*list*
Block object keys	

http-filter-header-blacklist

Description Also blacklist the source when action is taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-count-only

Description Take no action and continue processing the next filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

http-filter-header-seq

Description Sequence number

Type: number

Range: 1-5

http-filter-header-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-filter-header-whitelist

Description Whitelist the source after filter passes, packets are dropped until then

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_http-list_response-rate-limit

Specification	Value
Type	*object*

obj-size

Description: obj-size is a **JSON Block**. Please see below for *template_http-list_response-rate-limit_obj-size*

Type: Object

template_http-list_response-rate-limit_obj-size

Specification	Value
Type	*object*

between-cfg

Type: List

greater-cfg

Type: List

less-cfg

Type: List

template_http-list_response-rate-limit_obj-size_between-cfg

Specification	Value
Type	*list*
Block object keys	

obj-between-rate

Description Response rate limit

Type: number

Range: 1-16000000

obj-between1

Description Response size configuration

Type: number

Range: 1-16000000

obj-between2

Description Response size configuration

Type: number

Range: 1-16000000

template_http-list_response-rate-limit_obj-size_greater-cfg

Specification	Value
Type	*list*
Block object keys	

obj-greater

Description Response size configuration

Type: number

Range: 1-16000000

obj-greater-rate

Description Response rate limit

Type: number

Range: 1-16000000

template_http-list_response-rate-limit_obj-size_less-cfg

Specification	Value
Type	*list*
Block object keys	

obj-less

Description Response size configuration

Type: number

Range: 1-16000000

obj-less-rate

Description Response rate limit

Type: number

Range: 1-16000000

template_http-list_mss-cfg

Specification	Value
Type	*object*

mss-percent

Description Configure percentage of mss such that if a packet size is below the mss times mss-percent, packet is considered bad.

Type: number

Range: 1-100

mss-timeout

Description Configure DDOS detection based on mss and packet size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

number-packets

Description Specify percentage of mss. Default is 0, mss-timeout is not enabled.

Type: number

Range: 1-31

template_http-list_referer-filter

Specification	Value
Type	*object*

ref-filter-blacklist

Description Blacklist the source if the referer matches

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-contains-cfg

Type: List

referer-ends-cfg

Type: List

referer-equals-cfg

Type: List

referer-starts-cfg

Type: List

template_http-list_referer-filter_referer-equals-cfg

Specification	Value
Type	*list*
Block object keys	

referer-equals

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_referer-filter_referer-starts-cfg

Specification	Value
Type	*list*
Block object keys	

referer-starts-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_referer-filter_referer-contains-cfg

Specification	Value
Type	*list*
Block object keys	

referer-contains

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_referer-filter_referer-ends-cfg

Specification	Value
Type	*list*
Block object keys	

referer-ends-with

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

template_http-list_slow-read-drop

Specification	Value
Type	*object*

min-window-count

Description Number of packets

Type: number

Range: 1-31

min-window-size

Description minimum window size

Type: number

Range: 1-65535

template_http-list_use-hdr-ip-cfg

Specification	Value
Type	*object*

l7-hdr-name

Description Set the http header name to parse for client ip. Default is X-Forwarded-For

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: X-Forwarded-For

use-hdr-ip-as-source

Description Mitigate on src ip specified by http header for example X-Forwarded-For header. Default is disabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template_sip-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop packets for sip connection; 'reset': Send RST for sip-tcp connection;

Type: string

Supported Values: drop, reset

Default: drop

dst

Description: dst is a **JSON Block**. Please see below for *template_sip-list_dst*

Type: Object

filter-header-list

Type: List

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}/filter-header/{sip-filter-header-seq}*

idle-timeout

Description Set the the idle timeout value for sip-tcp connections

Type: number

Range: 1-63

ignore-zero-payload

Description Don't reset idle timer on packets with zero payload length from clients

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-sip

Description: malformed-sip is a **JSON Block**. Please see below for *template_sip-list_malformed-sip*

Type: Object

Reference Object: */axapi/v3/ddos/template/sip/{sip-tmpl-name}/malformed-sip*

multi-pu-threshold-distribution

Description: multi-pu-threshold-distribution is a **JSON Block**. Please see below for *template_sip-list_multi-pu-threshold-distribution*

Type: Object

sip-tmpl-name

Description DDOS SIP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src

Description: src is a **JSON Block**. Please see below for *template_sip-list_src*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_sip-list_src

Specification	Value
Type	*object*

sip-request-rate-limit

Description: sip-request-rate-limit is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit*

Type: Object

template_sip-list_src_sip-request-rate-limit

Specification	Value
Type	*object*

method

Description: method is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method*

Type: Object

template_sip-list_src_sip-request-rate-limit_method

Specification	Value
Type	*object*

bye-cfg

Description: bye-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_bye-cfg*

Type: Object

invite-cfg

Description: invite-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_invite-cfg*

Type: Object

message-cfg

Description: message-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_message-cfg*

Type: Object

notify-cfg

Description: notify-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_notify-cfg*

Type: Object

options-cfg

Description: options-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_options-cfg*

Type: Object

refer-cfg

Description: refer-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_refer-cfg*

Type: Object

register-cfg

Description: register-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_register-cfg*

Type: Object

subscribe-cfg

Description: subscribe-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_subscribe-cfg*

Type: Object

update-cfg

Description: update-cfg is a **JSON Block**. Please see below for *template_sip-list_src_sip-request-rate-limit_method_update-cfg*

Type: Object

template_sip-list_src_sip-request-rate-limit_method_options-cfg

Specification	Value
Type	*object*

src-sip-options-cfg-flag

Description OPTIONS method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-options-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_refer-cfg

Specification	Value
Type	*object*

src-sip-refer-cfg-flag

Description REFER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-refer-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_bye-cfg

Specification	Value
Type	*object*

src-sip-bye-cfg-flag

Description BYE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-bye-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_subscribe-cfg

Specification	Value
Type	*object*

src-sip-subscribe-cfg-flag

Description SUBSCRIBE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-subscribe-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_register-cfg

Specification	Value
Type	*object*

src-sip-register-cfg-flag

Description REGISTER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-register-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_invite-cfg

Specification	Value
Type	*object*

src-sip-invite-cfg-flag

Description INVITE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-invite-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_message-cfg

Specification	Value
Type	*object*

src-sip-message-cfg-flag

Description MESSAGE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-message-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_update-cfg

Specification	Value
Type	*object*

src-sip-update-cfg-flag

Description UPDATE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-update-rate

Description

Type: number

Range: 1-16000000

template_sip-list_src_sip-request-rate-limit_method_notify-cfg

Specification	Value
Type	*object*

src-sip-notify-cfg-flag

Description NOTIFY method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-sip-notify-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst

Specification	Value
Type	*object*

sip-request-rate-limit

Description: sip-request-rate-limit is a **JSON Block**. Please see below for *template_sip-list_dst_sip-request-rate-limit*

Type: Object

template_sip-list_dst_sip-request-rate-limit

Specification	Value
Type	*object*

method

Description: method is a **JSON Block**. Please see below for *template_sip-list_dst_sip-request-rate-limit_method*

Type: Object

template_sip-list_dst_sip-request-rate-limit_method

Specification	Value
Type	*object*

bye-cfg

Description: bye-cfg is a **JSON Block**. Please see below for *template_sip-list_dst_sip-request-rate-limit_method_bye-cfg*

Type: Object

invite-cfg

Description: invite-cfg is a **JSON Block**. Please see below for *template_sip-list_dst_sip-request-rate-limit_method_invite-cfg*

update-cfg

Description: update-cfg is a **JSON Block**. Please see below for *template_sip-list_dst_sip-request-rate-limit_method_update-cfg*

Type: Object

template_sip-list_dst_sip-request-rate-limit_method_options-cfg

Specification	Value
Type	*object*

dst-sip-options-cfg-flag

Description OPTIONS method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-options-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_refer-cfg

Specification	Value
Type	*object*

dst-sip-refer-cfg-flag

Description REFER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-refer-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_bye-cfg

Specification	Value
Type	*object*

dst-sip-bye-cfg-flag

Description BYE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-bye-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_subscribe-cfg

Specification	Value
Type	*object*

dst-sip-subscribe-cfg-flag

Description SUBSCRIBE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-subscribe-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_register-cfg

Specification	Value
Type	*object*

dst-sip-register-cfg-flag

Description REGISTER method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-register-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_invite-cfg

Specification	Value

dst-sip-invite-cfg-flag

Description INVITE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-invite-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_message-cfg

Specification	Value
Type	*object*

dst-sip-message-cfg-flag

Description MESSAGE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-message-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_update-cfg

Specification	Value
Type	*object*

dst-sip-update-cfg-flag

Description UPDATE method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-update-rate

Description

Type: number

Range: 1-16000000

template_sip-list_dst_sip-request-rate-limit_method_notify-cfg

Specification	Value
Type	*object*

dst-sip-notify-cfg-flag

Description NOTIFY method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-sip-notify-rate

Description

Type: number

Range: 1-16000000

template_sip-list_multi-pu-threshold-distribution

Specification	Value
Type	*object*

multi-pu-threshold-distribution-disable

Description 'disable': Destination side rate limit only. Default: Enable;

Type: string

Supported Values: disable

Mutual Exclusion: multi-pu-threshold-distribution-disable and multi-pu-threshold-distribution-value are mutually exclusive

multi-pu-threshold-distribution-value

Description Destination side rate limit only. Default: 0

Type: number

Range: 1-16000000

Mutual Exclusion: multi-pu-threshold-distribution-value and multi-pu-threshold-distribution-disable are mutually exclusive

template_sip-list_malformed-sip

Specification	Value
Type	*object*

malformed-sip-call-id-max-length

Description Set the maximum call-id length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-check

Description 'enable-check': Enable malformed SIP parameters;

Type: string

Supported Values: enable-check

malformed-sip-max-header-name-length

Description Set the maximum header name length. Default value is 63

Type: number

Range: 1-63

Default: 63

malformed-sip-max-header-value-length

Description Set the maximum header value length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-line-size

Description Set the maximum line size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-max-uri-length

Description Set the maximum uri size. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

malformed-sip-sdp-max-length

Description Set the maxinum SDP content length. Default value is 32511

Type: number

Range: 1-32511

Default: 32511

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_sip-list_filter-header-list

Specification	Value
Type	*list*
Block object keys	

sip-filter-header-blacklist

Description Also blacklist the source when action is taken

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-count-only

Description Take no action and continue processing the next filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

sip-filter-header-seq

Description Sequence number

Type: number

Range: 1-5

sip-filter-header-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip-filter-header-whitelist

Description Whitelist the source after filter passes, packets are dropped until then

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_icmp-v6-list

Specification	Value
Type	*list*
Block object keys	

icmp-tmpl-name

Description DDOS ICMPv6 Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

type-list

Type: List

Reference Object: */axapi/v3/ddos/template/icmp-v6/{icmp-tmpl-name}/type/{type-number}*

type-other

Description: type-other is a **JSON Block**. Please see below for *template_icmp-v6-list_type-other*

Type: Object

Reference Object: */axapi/v3/ddos/template/icmp-v6/{icmp-tmpl-name}/type-other*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_icmp-v6-list_type-other

Specification	Value
Type	*object*

type-other-deny

Description Deny all other type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-other-deny and type-other-rate are mutually exclusive

type-other-rate

Description Specify rate with other type

Type: number

Range: 1-16000000

Mutual Exclusion: type-other-rate and type-other-deny are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_icmp-v6-list_type-list

Specification	Value
Type	*list*
Block object keys	

code

Type: List

code-other

Description: code-other is a **JSON Block**. Please see below for *template_icmp-v6-list_type-list_code-other*

Type: Object

type-deny

Description Reject this ICMP type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: type-deny, type-rate, and code-other-rate are mutually exclusive

type-number

Description Specify ICMP type number

Type: number

Range: 0-255

type-rate

Description Specify the whole rate with this type

Type: number

Range: 1-16000000

Mutual Exclusion: type-rate and type-deny are mutually exclusive

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_icmp-v6-list_type-list_code

Specification	Value
Type	*list*
Block object keys	

code-number

Description Specify the ICMP code

Type: number

Range: 0-255

code-rate

Description Specify the rate with the code

Type: number

Range: 1-16000000

template_icmp-v6-list_type-list_code-other

Specification	Value
Type	*object*

code-other-rate

Description Specify rate with other code

Type: number

Range: 1-16000000

Mutual Exclusion: code-other-rate and type-deny are mutually exclusive

l4-sync

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

outbound-policy-list

Specification	Value
Type	*list*
Block object keys	

asn-based-tracking

Description: asn-based-tracking is a **JSON Block**. Please see below for *outbound-policy-list_asn-based-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/outbound-policy/{name}/asn-based-tracking*

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

configuration

Description Default class-list configuration

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

outbound-policy-list_asn-based-tracking

Specification	Value
Type	*object*

configuration

Description 'configuration': Configure asn based tracking;

Type: string

Supported Values: configuration

packet-rate-triggered

Description Triggered by 1/2 packet rate limitation in per-asn-glid.

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

per-asn-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

outbound-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

class-list-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/class-list*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

geo-location

Specification	Value
Type	*object*

db

Description: db is a **JSON Block**. Please see below for *geo-location_db*

Type: Object

Reference Object: */axapi/v3/ddos/geo-location/db*

file

Description: file is a **JSON Block**. Please see below for *geo-location_file*

Type: Object

Reference Object: */axapi/v3/ddos/geo-location/file*

geo-location_db

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

geo-location_file

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-template

Specification	Value
Type	*object*

dns-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/dns/{name}*

tcp-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/tcp/{name}*

udp-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/udp/{name}*

src-port-template_udp-list

Specification	Value
Type	*list*
Block object keys	

drop-ntp-monlist

Description Drop NTP monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filter-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/udp/{name}/filter/{udp-filter-seq}*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-template_udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-5

udp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-template_dns-list

Specification	Value
Type	*list*
Block object keys	

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

query-resolution-check

Description: query-resolution-check is a **JSON Block**. Please see below for *src-port-template_dns-list_query-resolution-check*

Type: Object

Reference Object: */axapi/v3/ddos/src-port-template/dns/{name}/query-resolution-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-template_dns-list_query-resolution-check

Specification	Value
Type	*object*

big-response-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

big-response-size

Description Max DNS response size (in Bytes)

Type: number

Range: 1-4096

domain-lockup-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

session-timeout-value

Description max session timeout (secs) between DNS external server and Protected object

Type: number

Range: 1-30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-template_tcp-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/src-port-template/tcp/{name}/filter/{tcp-filter-seq}*

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-template_tcp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter Expression using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'blacklist-src': Also blacklist the source when action is taken; 'whitelist-src': Whitelist the source after filter passes, packets are dropped until then; 'count-only': Take no action and continue processing the next filter;

Type: string

Supported Values: blacklist-src, whitelist-src, count-only

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-5

tcp-filter-unmatched

Description action taken when it does not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

local-address

Specification	Value
Type	*object*

ip-list

Type: List

Reference Object: */axapi/v3/ddos/local-address/ip/{ip-addr}*

ipv6-list

Type: List

Reference Object: */axapi/v3/ddos/local-address/ipv6/{ipv6-addr}*

local-address_ip-list

Specification	Value
Type	*list*
Block object keys	

ip-addr

Description DDoS IPv4 Address for syn cookie usage

Type: string

Format: ipv4-address

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

local-address_ipv6-list

Specification	Value
Type	*list*
Block object keys	

ipv6-addr

Description DDoS IPv6 Address for syn cookie usage

Type: string

Format: ipv6-address

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-tcp

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

reporting

Specification	Value
Type	*object*

toggle

Description 'disable-on-limit-reached': Disable reporting on DST/Port entry when the max reporting count is reached; 'reject-on-limit-reached': Reject the configuration when the max reporting count is reached;

Type: string

Supported Values: disable-on-limit-reached, reject-on-limit-reached

Default: reject-on-limit-reached

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-filtering-policy-list

Specification	Value
Type	*list*
Block object keys	

name

Description DDOS ip-filtering-policy name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

no-rule-match-action

Description 'drop': Drop all the packets not meet any rule; 'permit': Forward all the packets not meet any rule (Default);

Type: string

Supported Values: drop, permit

Default: permit

rule-list

Type: List

Reference Object: */axapi/v3/ddos/ip-filtering-policy/{name}/rule/{seq}*

rule-statistics

Description 'enable': Enable;

Type: string

Supported Values: enable

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-filtering-policy-list_rule-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'drop': Drop the packet (default); 'permit': Skip afterword rules and continue other ddos process; 'blacklist': Blacklist source hosts with glid; 'bypass': Bypass all other ddos process rules and forward;

Type: string

Supported Values: drop, permit, blacklist, bypass

Default: drop

dst-ip

Description IPv4 Subnet address

Type: string

Format: ipv4-cidr

Mutual Exclusion: dst-ip, src-ipv6, and dst-ipv6 are mutually exclusive

dst-ipv6

Description IPv6 Subnet address

Type: string

Format: ipv6-address-plen

Mutual Exclusion: dst-ipv6, src-ip, and dst-ip are mutually exclusive

dst-port

Description Match only packets with the port number

Type: number

Range: 1-65535

Mutual Exclusion: dst-port and dst-port-start are mutually exclusive

dst-port-end

Description Ending Port Number

Type: number

Range: 1-65535

dst-port-start

Description Match only packets in the range of port numbers (Starting Port Number)

Type: number

Range: 1-65535

Mutual Exclusion: dst-port-start and dst-port are mutually exclusive

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

icmp-code

Description ICMP code

Type: number

Range: 0-255

icmp-type

Description ICMP message type

Type: number

Range: 0-255

proto-num

Description IP proto number

Type: number

Range: 0-255

protocol

Description 'tcp': TCP; 'udp': UDP; 'icmp-v4': ICMP; 'icmp-v6': ICMPv6; 'number': Specify IP protocol number;

Type: string

Supported Values: tcp, udp, icmp-v4, icmp-v6, number

seq

Description Sequence number

Type: number

Range: 1-200

src-ip

Description IPv4 Subnet address

Type: string

Format: ipv4-cidr

Mutual Exclusion: src-ip, src-ipv6, and dst-ipv6 are mutually exclusive

src-ipv6

Description IPv6 Subnet address

Type: string

Format: ipv6-address-plen

Mutual Exclusion: src-ipv6, src-ip, and dst-ip are mutually exclusive

src-port

Description Match only packets with the port number

Type: number

Range: 1-65535

Mutual Exclusion: src-port and src-port-start are mutually exclusive

src-port-end

Description Ending Port Number

Type: number

Range: 1-65535

src-port-start

Description Match only packets in the range of port numbers (Starting Port Number)

Type: number

Range: 1-65535

Mutual Exclusion: src-port-start and src-port are mutually exclusive

tcp-flag

Description 'match-all': not = 0 match = 1; 'none-of': not = 1 match = 0; 'match-any': not = 0 match = 0;

Type: string

Supported Values: match-all, none-of, match-any

tcp-flags-bitmask

Description Bitmask in Hex

Type: string

Format: time

Maximum Length: 255 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation-actions-list

Specification	Value
Type	*list*
Block object keys	

blackhole

Description Blackhole the zone (in minute, 0 means infinite)

Type: number

Range: 0-30

blacklist-src

Description Blacklist-src (in min) (applied only for source action)

Type: number

Range: 1-30

execute-script

Description Specify DDOS script to run (applied only for zone action)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

execute-script-timeout

Description Timeout for script execution (in seconds) (applied only for zone action)

Type: number

Range: 5-20

name

Description DDOS violation-actions name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

notification

Type: List

send-notification-only

Description Forces TPS to only send out notification for the violation-action

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation-actions-list_notification

Specification	Value
Type	*list*
Block object keys	

notification-template

Description Specify the notification template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/notification-template*

protection

Specification	Value
Type	*object*

blacklist-reason-tracking

Description Enable blacklist reason tracking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sess-for-unauth-src-without-rst

Description When closing unauthenticated sessions, don't send TCP RST for established TCP sessions. (Default disabled / sending TCP RST for

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-advanced-core-analysis

Description Disable advanced context info in coredump file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-delay-dynamic-src-learning

Description Disable delay dynamic src entry learning

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-on-reboot

Description Disable DDoS protection upon reboot/reload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disallow-rst-ack-in-syn-auth

Description Disallow RST-ACK passing syn-auth

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-now

Description Override disable-on-reboot to enable runtime DDOS protection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fast-aging

Description: fast-aging is a **JSON Block**. Please see below for *protection_fast-aging*

Type: Object

fast-path-disable

Description Disable fast path in SLB processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-routing-on-transp

Description Force use of routing in transparent mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force-traffic-to-same-blade-disable

Description Allow traffic to be distributed among blades on Chassis

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-blocking-enable

Description Enable hardware blacklist blocking for src or dst default entries (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-blocking-threshold-limit

Description Threshold to initiate hardware blocking (default 10000)

Type: number

Range: 1-16000000

Default: 10000

ipv6-src-hash-mask-bits

Description: ipv6-src-hash-mask-bits is a **JSON Block**. Please see below for *protection_ipv6-src-hash-mask-bits*

Type: Object

Reference Object: */axapi/v3/ddos/protection/ipv6-src-hash-mask-bits*

mpls

Description Enable MPLS packet inspection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multi-pu-zone-distribution

Description: multi-pu-zone-distribution is a **JSON Block**. Please see below for *protection_multi-pu-zone-distribution*

Type: Object

Reference Object: */axapi/v3/ddos/protection/multi-pu-zone-distribution*

non-zero-win-size-syncookie

Description Send syn-cookie with fix TCP window size if SYN packet has zero window size (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

per-service-szp-entry-limit

Description: per-service-szp-entry-limit is a **JSON Block**. Please see below for *protection_per-service-szp-entry-limit*

Type: Object

Reference Object: */axapi/v3/ddos/protection/per-service-szp-entry-limit*

pkt-rate-limit-on-reassemble

Description 'enable': enable; 'disable': disable (Default);

Type: string

Supported Values: enable, disable

Default: disable

progression-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

rate-interval

Description '100ms': 100ms; '1sec': 1sec;

Type: string

Supported Values: 100ms, 1sec

Default: 100ms

rate-limit-sync-interval

Description Multi-PU rate limit syncing interval (default 3)

Type: number

Range: 1-5

Default: 3

rexmit-syn-log

Description Enable ddos per flow rexmit syn exceeded log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dst-entry-limit

Description '8M': 8 Million; '16M': 16 Million; 'unlimited': Unlimited; 'platform-default': Half of platform maximum;

Type: string

Supported Values: 8M, 16M, unlimited, platform-default

Default: 16M

src-hash-function

Description 'v1': v1; 'v2': v2;

Type: string

Supported Values: v1, v2

Default: v1

src-ip-hash-bit

Description Configure which bit hashed on

Type: number

Range: 0-31

Default: 2

src-ipv6-hash-bit

Description Configure which bit hashed on

Type: number

Range: 0-127

Default: 2

src-zone-port-entry-limit

Description '8M': 8 Million; '16M': 16 Million; 'unlimited': Unlimited; 'platform-default': Half of platform maximum;

Type: string

Supported Values: 8M, 16M, unlimited, platform-default

Default: 16M

szp-clist-warn-threshold

Description Set threshold percentage of “max-src-dst-entry” for generating warning logs. Including start and end.

Type: number

Range: 1-100

szp-warn-exceed-enable

Description Send logs if src-zone-port count exceeds “max-src-dst-entry”

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

szp-warn-threshold

Description Set threshold percentage of “max-src-dst-entry” for generating warning logs. Including start and end.

Type: number

Range: 1-100

toggle

Description ‘enable’: enable; ‘disable’: disable;

Type: string

Supported Values: enable, disable

Default: disable

use-route

Description Use route table, default use receive hop for device initiated traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan-outbound-check

Description ‘enable’: enable; ‘disable’: disable;

Type: string

Supported Values: enable, disable

Default: disable

protection_fast-aging

Specification	Value
Type	*object*

half-open-conn-ratio

Description Minimum half-open session to total session ratio before session fast aging will take effect (default 25)

Type: number

Range: 1-99

Default: 25

half-open-conn-threshold

Description Minimum half-open session (percentage) before session fast aging will take effect (default 1)

Type: number

Range: 1-99

Default: 1

protection_per-service-szp-entry-limit

Specification	Value
Type	*object*

dns-tcp-limit

Description Szp limit for port / port-range dns-tcp

Type: number

Range: 0-2147483647

dns-udp-limit

Description Szp limit for port / port-range dns-udp

Type: number

Range: 0-2147483647

http-limit

Description Szp limit for port / port-range http

Type: number

Range: 0-2147483647

ip-proto-custom-limit

Description Szp limit for custom ip-proto

Type: number

Range: 0-2147483647

ip-proto-gre-limit

Description Szp limit for ip-proto gre

Type: number

Range: 0-2147483647

ip-proto-icmp-v4-limit

Description Szp limit for ip-proto icmp-v4

Type: number

Range: 0-2147483647

ip-proto-icmp-v6-limit

Description Szp limit for ip-proto icmp-v6

Type: number

Range: 0-2147483647

ip-proto-ipv4-encap-limit

Description Szp limit for ip-proto ipv4-encap

Type: number

Range: 0-2147483647

ip-proto-ipv6-encap-limit

Description Szp limit for ip-proto ipv6-encap

Type: number

Range: 0-2147483647

ip-proto-other-limit

Description Szp limit for ip-proto other

Type: number

Range: 0-2147483647

quic-limit

Description Szp limit for port / port-range quic

Type: number

Range: 0-2147483647

sip-tcp-limit

Description Szp limit for port / port-range sip-tcp

Type: number

Range: 0-2147483647

sip-udp-limit

Description Szp limit for port / port-range sip-udp

Type: number

Range: 0-2147483647

ssl-l4-limit

Description Szp limit for port / port-range ssl-l4

Type: number

Range: 0-2147483647

tcp-limit

Description Szp limit for port / port-range tcp

Type: number

Range: 0-2147483647

udp-limit

Description Szp limit for port / port-range udp

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protection_ipv6-src-hash-mask-bits

Specification	Value
Type	*object*

mask-bit-offset-1

Description Configure mask bits

Type: number

Range: 0-127

mask-bit-offset-2

Description Configure mask bits

Type: number

Range: 0-127

mask-bit-offset-3

Description Configure mask bits

Type: number

Range: 0-127

mask-bit-offset-4

Description Configure mask bits

Type: number

Range: 0-127

mask-bit-offset-5

Description Configure mask bits

Type: number

Range: 0-127

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protection_multi-pu-zone-distribution

Specification	Value
Type	*object*

regular-rebalance

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

notification-template-list

Specification	Value
Type	*list*
Block object keys	

api

Description: api is a **JSON Block**. Please see below for *notification-template-list_api*

Type: Object

Reference Object: */axapi/v3/ddos/notification-template/{name}/api*

debug-mode

Description Enable debug mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable the notification template (Disable notification temaplate)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description DDOS nofitication template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

test-connectivity

Description Test connectivity to notification receiver

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

verbose

Description Dump zone IPs to the payload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

notification-template-list_api

Specification	Value
Type	*object*

authentication

Description: authentication is a **JSON Block**. Please see below for *notification-template-list_api_authentication*

Type: Object

Reference Object: */axapi/v3/ddos/notification-template/{name}/api/authentication*

disable-authentication

Description Disable authentication to communicate to the host

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

host-ipv4-address

Description Configure the host IPv4 address to send notification (IPv4 address of the host)

Type: string

Format: ipv4-address

Mutual Exclusion: host-ipv4-address, host-ipv6-address, and hostname are mutually exclusive

host-ipv6-address

Description Configure the host IPv6 address to send notification (IPv6 address of the host)

Type: string

Format: ipv6-address

Mutual Exclusion: host-ipv6-address, host-ipv4-address, and hostname are mutually exclusive

hostname

Description host name(e.g www.a10networks.com)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Mutual Exclusion: hostname, host-ipv4-address, and host-ipv6-address are mutually exclusive

http-port

Description Configure the http port to use(default 80) (http port(default 80))

Type: number

Range: 1-65535

Default: 80

http-protocol

Description 'http': Use http protocol; 'https': Use https protocol(default); (http protocol)

Type: string

Supported Values: http, https

Default: https

https-port

Description Configure the https port to use(default 443) (https port(default 443))

Type: number

Range: 1-65535

Default: 443

relative-uri

Description Configure the relative uri for the api(e.g /example , default /) (api relative uri)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Default: /

timeout

Description Configure the api execution timeout(default 10secs) (api timeout)

Type: number

Range: 5-60

Default: 10

use-mgmt-port

Description Use management port to send out notification

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

notification-template-list_api_authentication

Specification	Value
Type	*object*

api-key

Description Configure api-key as a mode of authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api-key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

api-key-string

Description Configure api-key as a mode of authentication

Type: string

Format: password

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-password

Description Configure the authentication user password (Authentication password)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-password-val

Description Configure the authentication user password (Authentication password)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-username

Description Configure the authentication user name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

relative-login-uri

Description Configure the authentication login uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

relative-logoff-uri

Description Configure the authentication logoff uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

notification-template-debug-log

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

logging

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l7-sip

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

resource-usage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src

Specification	Value
Type	*object*

default-list

Type: List

Reference Object: */axapi/v3/ddos/src/default/{default-address-type}*

dynamic-entries-resource-usage

Description: dynamic-entries-resource-usage is a **JSON Block**. Please see below for *src_dynamic-entries-resource-usage*

Type: Object

Reference Object: */axapi/v3/ddos/src/dynamic-entries-resource-usage*

dynamic-entry

Description: dynamic-entry is a **JSON Block**. Please see below for *src_dynamic-entry*

Type: Object

Reference Object: */axapi/v3/ddos/src/dynamic-entry*

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/src/dynamic-entry-overflow-policy/{default-address-type}*

entry-list

Type: List

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}*

geo-location-list

Type: List

Reference Object: */axapi/v3/ddos/src/geo-location/{geolocation-name}*

src_default-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

app-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/default/{default-address-type}/app-type/{protocol}*

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-address-type

Description 'ip': ip; 'ipv6': ipv6;

Type: string

Supported Values: ip, ipv6

disable

Description Disable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *src_default-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/default/{default-address-type}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src entry

Type: number

Range: 0-2147483647

template

Description: template is a **JSON Block**. Please see below for *src_default-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_default-list_app-type-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *src_default-list_app-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_default-list_app-type-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src_default-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src_default-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *src_default-list_l4-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_default-list_l4-type-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src_default-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src_dynamic-entries-resource-usage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_entry-list

Specification	Value
Type	*list*
Block object keys	

app-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}/app-type/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

description

Description Description for this Source Entry

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *src_entry-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *src_entry-list_hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}/hw-blacklist-blocking*

ip-addr

Description

Type: string

Format: ipv4-address

ipv6-addr

Description

Type: string

Format: ipv6-address

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/src/entry/{src-entry-name}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-entry-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

template

Description: template is a **JSON Block**. Please see below for *src_entry-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_entry-list_app-type-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *src_entry-list_app-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_entry-list_app-type-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src_entry-list_hw-blacklist-blocking

Specification	Value
Type	*object*

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_entry-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'permit': Whitelist incoming packets for protocol; 'deny': Blacklist incoming packets for protocol;

Type: string

Supported Values: permit, deny

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *src_entry-list_l4-type-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src_entry-list_l4-type-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src_entry-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src_entry-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

cpu

Description: cpu is a **JSON Block**. Please see below for *resource-tracking_cpu*

Type: Object

Reference Object: */axapi/v3/ddos/resource-tracking/cpu*

resource-tracking_cpu

Specification	Value
Type	*object*

enable

Description Enable CPU usage tracking per dst object (default: disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

network-object-list

Specification	Value
Type	*list*
Block object keys	

anomaly-detection-trigger

Description 'all': Use both learned and static thresholds (static thresholds take precedence); 'static-threshold-only': Use static thresholds only;

Type: string

Supported Values: all, static-threshold-only

Default: all

enable-top-k

Type: List

flooding-multiplier

Description multiplier for flooding detection threshold in network objects (default 2x threshold)

Type: number

Range: 2-10

Default: 2

histogram-mode

Description 'off': histogram feature disabled; 'monitor': histogram feature enabled with anomaly escalation; 'observe': histogram feature enabled and observe only;

Type: string

Supported Values: off, monitor, observe

Default: observe

host-anomaly-threshold

Description: host-anomaly-threshold is a **JSON Block**. Please see below for *network-object-list_host-anomaly-threshold*

Type: Object

host-sport-discovery

Description 'enable': Enable source port discovery.; 'disable': Disable source port discovery.;

Type: string

Supported Values: enable, disable

indicators-to-monitor

Description: indicators-to-monitor is a **JSON Block**. Please see below for *network-object-list_indicators-to-monitor*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/indicators-to-monitor*

ip-list

Type: List

Reference Object: */axapi/v3/ddos/network-object/{object-name}/ip/{subnet-ip-addr}*

ipv6-list

Type: List

Reference Object: */axapi/v3/ddos/network-object/{object-name}/ipv6/{subnet-ipv6-addr}*

network-object-anomaly-threshold

Description: network-object-anomaly-threshold is a **JSON Block**. Please see below for *network-object-list_network-object-anomaly-threshold*

Type: Object

notification

Description: notification is a **JSON Block**. Please see below for *network-object-list_notification*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/notification*

object-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

operational-mode

Description 'monitor': Monitor mode; 'learning': Learning mode;

Type: string

Supported Values: monitor, learning

Default: learning

relative-auto-break-down-threshold

Description: relative-auto-break-down-threshold is a **JSON Block**. Please see below for *network-object-list_relative-auto-break-down-threshold*

Type: Object

sampling-enable

Type: List

service-break-down-threshold-local

Description: service-break-down-threshold-local is a **JSON Block**. Please see below for *network-object-list_service-break-down-threshold-local*

Type: Object

service-discovery

Description 'disable': Disable service discovery for hosts (default: enabled);

Type: string

Supported Values: disable

sport-anomaly-detection

Description 'disable': Disable source port anomaly detection (default: enabled);

Type: string

Supported Values: disable

sport-anomaly-threshold

Description: sport-anomaly-threshold is a **JSON Block**. Please see below for *network-object-list_sport-anomaly-threshold*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/sport-anomaly-threshold*

sport-discovery-threshold

Description: sport-discovery-threshold is a **JSON Block**. Please see below for *network-object-list_sport-discovery-threshold*

Type: Object

sport-list

Type: List

Reference Object: */axapi/v3/ddos/network-object/{object-name}/sport/{port-num}+{protocol}*

static-auto-break-down-threshold

Description: static-auto-break-down-threshold is a **JSON Block**. Please see below for *network-object-list_static-auto-break-down-threshold*

Type: Object

sub-network

Description: sub-network is a **JSON Block**. Please see below for *network-object-list_sub-network*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/sub-network*

threshold-sensitivity

Description tune threshold ranges with levels LOW/MEDIUM/HIGH/OFF(default) or multiplier of threshold value (available options are LOW=5x/MEDIUM=3x/HIGH=1.5x/OFF=1x, or float value between 1.0-10.0)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Default: OFF

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *network-object-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/topk-destinations*

trustlist

Description: trustlist is a **JSON Block**. Please see below for *network-object-list_trustlist*

Type: Object

Reference Object: */axapi/v3/ddos/network-object/{object-name}/trustlist*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

network-object-list_service-break-down-threshold-local

Specification	Value
Type	*object*

svc-percentage

Description percentage of parent ip node

Type: number

Range: 5-99

network-object-list_network-object-anomaly-threshold

Specification	Value
Type	*object*

network-object-bit-rate

Description Bit rate of the network-object

Type: number

Range: 800-87960930222080

network-object-pkt-rate

Description Packet rate of the network-object

Type: number

Range: 1-10995116277760

network-object-list_indicators-to-monitor

Specification	Value
Type	*object*

enable

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-bit-rate

Description Forward bit rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-fin-rate

Description FIN packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-flow-count

Description Flow count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-icmp-pkt-rate

Description ICMP packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-pkt-rate

Description Forward packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-rev-bit-rate

Description Reverse bit rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-rev-pkt-rate

Description Reverse packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-rst-rate

Description RST packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-syn-rate

Description SYN packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-tcp-pkt-rate

Description TCP packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-udp-pkt-rate

Description UDP packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-undiscovered-pkt-rate

Description Undiscovered forward packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

network-object-list_trustlist

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v4-class-list

Description IPv4 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

v6-class-list

Description IPv6 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

network-object-list_relative-auto-break-down-threshold

Specification	Value
Type	*object*

network-percentage

Description percentage of parent node

Type: number

Range: 1-99

permil

Description permil of root node

Type: number

Range: 1-999

network-object-list_host-anomaly-threshold

Specification	Value
Type	*object*

host-bit-rate

Description Forward bit rate of per host

Type: number

Range: 800-34359738360

host-fin-rate

Description FIN packet rate of per host

Type: number

Range: 1-2147483647

host-flow-count

Description Flow count of per host

Type: number

Range: 1-2147483647

host-icmp-pkt-rate

Description ICMP packet rate of per host

Type: number

Range: 1-2147483647

host-pkt-rate

Description Forward packet rate of per host

Type: number

Range: 1-2147483647

host-rev-bit-rate

Description Reverse bit rate of per host

Type: number

Range: 800-34359738360

host-rev-pkt-rate

Description Reverse packet rate of per host

Type: number

Range: 1-2147483647

host-rst-rate

Description RST packet rate of per host

Type: number

Range: 1-2147483647

host-syn-rate

Description SYN packet rate of per host

Type: number

Range: 1-2147483647

host-tcp-pkt-rate

Description Tcp packet rate of per host

Type: number

Range: 1-2147483647

host-udp-pkt-rate

Description Udp packet rate of per host

Type: number

Range: 1-2147483647

host-undiscovered-host-bit-rate

Description Forward bit rate of per undiscovered host

Type: number

Range: 800-34359738360

host-undiscovered-host-pkt-rate

Description forward packet rate of per undiscovered host

Type: number

Range: 1-2147483647

host-undiscovered-pkt-rate

Description Undiscovered forward packet rate of per host

Type: number

Range: 1-2147483647

network-object-list_sub-network

Specification	Value
Type	*object*

Description Percentage of source port entry's parent entry

Type: number

Range: 1-99

ip-sport-packet-rate-percentage-str

Description 'packet-rate-percentage': Percentage of source port entry's parent entry;

Type: string

Supported Values: packet-rate-percentage

ip-sport-packet-rate-str

Description 'packet-rate': Packet rate of a source port entry;

Type: string

Supported Values: packet-rate

packet-rate

Description Packet rate of a source port entry

Type: number

Range: 1-2147483647

packet-rate-percentage

Description Percentage of source port entry's parent entry

Type: number

Range: 1-99

packet-rate-percentage-str

Description 'packet-rate-percentage': Percentage of source port entry's parent entry;

Type: string

Supported Values: packet-rate-percentage

packet-rate-str

Description 'packet-rate': Packet rate of a source port entry;

Type: string

Supported Values: packet-rate

protocol

Description 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

sport-num

Description Source port number

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

network-object-list_sport-anomaly-threshold_ipv6-list

Specification	Value
Type	*list*
Block object keys	

bit-rate

Description Bit rate of a source port entry

Type: number

Range: 800-34359738360

bit-rate-percentage

Description Percentage of source port entry's parent entry

Type: number

Range: 1-99

bit-rate-percentage-str

Description 'bit-rate-percentage': Percentage of source port entry's parent entry;

Type: string

Supported Values: bit-rate-percentage

bit-rate-str

Description 'bit-rate': Bit rate of a source port entry;

Type: string

Supported Values: bit-rate

ip-addr

Description Override threshold

Type: string

Format: ipv6-address-plen

ip-sport-bit-rate

Description Bit rate of a source port entry

Type: number

Range: 800-34359738360

ip-sport-bit-rate-percentage

Description Percentage of source port entry's parent entry

Type: number

Range: 1-99

ip-sport-bit-rate-percentage-str

Description 'bit-rate-percentage': Percentage of source port entry's parent entry;

Type: string

Supported Values: bit-rate-percentage

ip-sport-bit-rate-str

Description 'bit-rate': Bit rate of a source port entry;

Type: string

Supported Values: bit-rate

ip-sport-packet-rate

Description Packet rate of a source port entry

Type: number

Range: 1-2147483647

ip-sport-packet-rate-percentage

Description Percentage of source port entry's parent entry

Type: number

Range: 1-99

ip-sport-packet-rate-percentage-str

Description 'packet-rate-percentage': Percentage of source port entry's parent entry;

Type: string

Supported Values: packet-rate-percentage

ip-sport-packet-rate-str

Description 'packet-rate': Packet rate of a source port entry;

Type: string

Supported Values: packet-rate

packet-rate

Description Packet rate of a source port entry

Type: number

Range: 1-2147483647

packet-rate-percentage

Description Percentage of source port entry's parent entry

Type: number

Range: 1-99

packet-rate-percentage-str

Description 'packet-rate-percentage': Percentage of source port entry's parent entry;

Type: string

Supported Values: packet-rate-percentage

packet-rate-str

Description 'packet-rate': Packet rate of a source port entry;

Type: string

Supported Values: packet-rate

protocol

Description 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

sport-num

Description Source port number

Type: number

Range: 1-65535

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

network-object-list_sport-anomaly-threshold_packet-rate

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

value

Description Packet rate of a source port entry

Type: number

Range: 1-2147483647

network-object-list_sport-anomaly-threshold_packet-rate-percentage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

value

Description Percentage of source port entry's parent entry

Type: number

Range: 1-99

network-object-list_static-auto-break-down-threshold

Specification	Value
Type	*object*

network-pkt-rate

Description packet rate of current node

Type: number

Range: 100-2000000

network-object-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'subnet_learned': Subnet Entry Learned; 'subnet_aged': Subnet Entry Aged; 'subnet_create_fail': Subnet Entry Create Failures; 'ip_learned': IP Entry Learned; 'ip_aged': IP Entry Aged; 'ip_create_fail': IP Entry Create Failures; 'service_learned': Service Entry Learned; 'service_aged': Service Entry Aged; 'service_create_fail': Service Entry Create Failures; 'packet_rate': PPS; 'bit_rate': B(bits)PS; 'topk_allocate_fail': Topk Allocate Failures; 'sport_learned': Source Port Entry Learned; 'sport_aged': Source Port Entry Aged; 'sport_create_fail': Source Port Entry Create Failures; 'agent_group_learned': Agent Group Entry Learned; 'agent_group_aged': Agent Group Entry Aged; 'agent_group_create_fail': Agent Group Entry Create Failures; 'duplicate_sample_pkt_rcv': Duplicate Sample Packet Received;

Type: string

Supported Values: all, subnet_learned, subnet_aged, subnet_create_fail, ip_learned, ip_aged, ip_create_fail, service_learned, service_aged, service_create_fail, packet_rate, bit_rate, topk_allocate_fail, sport_learned, sport_aged, sport_create_fail, agent_group_learned, agent_group_aged, agent_group_create_fail, duplicate_sample_pkt_rcv

network-object-list_enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'average': window average; 'max-peak': max peak;

Type: string

Supported Values: average, max-peak

Default: average

topk-type

Description 'destination': Topk destination IP;

Type: string

Supported Values: destination

network-object-list_ipv6-list

Specification	Value
Type	*list*
Block object keys	

prefix-anomaly-threshold

Description: prefix-anomaly-threshold is a **JSON Block**. Please see below for *network-object-list_ipv6-list_prefix-anomaly-threshold*

Type: Object

sampling-enable

Type: List

subnet-ipv6-addr

Description IPV6 Subnet, supported prefix range is from 40 to 64

Type: string

Format: ipv6-address-plen

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

network-object-list_ipv6-list_prefix-anomaly-threshold

Specification	Value
Type	*object*

prefix-bit-rate

Description Bit rate of the prefix subnet

Type: number

Range: 800-34359738360

prefix-pkt-rate

Description Packet rate of the prefix subnet

Type: number

Range: 1-2147483647

network-object-list_ipv6-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_rate': PPS; 'bit_rate': B(bits)PS;

Type: string

Supported Values: all, packet_rate, bit_rate

l7-quic

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l7-quic_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'quic_packet_received': QUIC Packet Received; 'quic_initial_received': QUIC Initial Packet Received; 'quic_version_negotiation_received': QUIC Version Negotiation Received; 'quic_retry_received': QUIC Retry Received; 'quic_0rtt_recevied': QUIC 0RTT Received; 'quic_handshake_received': QUIC Handshake Received; 'quic_version_match_action_taken': QUIC Version Match Action Taken; 'quic_version_match_action_drop': QUIC Version Match Action Drop; 'quic_version_match_action_blacklist': QUIC Version Match Action Blacklist; 'quic_malformed_action_taken': QUIC Malformed Action Taken; 'quic_malformed_action_drop': QUIC Malformed Action Drop; 'quic_malformed_action_blacklist': QUIC Malformed Action Blacklist; 'quic_malformed_dcid_len_max_exceed': QUIC Malformed DCID Len Max Exceed; 'quic_malformed_scid_len_max_exceed': QUIC Malformed SCID Len Max Exceed; 'quic_fixed_bit_not_set': QUIC Fixed Bit Not Set; 'quic_retry_auth_sent': QUIC Retry Auth Sent; 'quic_retry_auth_pass': QUIC Retry Auth Pass; 'quic_retry_auth_fail': QUIC Retry Auth Fail; 'quic_connection_close_sent': QUIC Connection Close Sent; 'quic_invalid_retry_token': QUIC Invalid Retry Token; 'quic_short_header_received': QUIC Short Header Received; 'quic_short_headr_action_drop': QUIC Short Header Drop; 'quic_encrypt_fail': QUIC Encrypt Fail; 'quic_decrypt_fail': QUIC Decrypt Fail; 'quic_encrypt_success': QUIC Encrypt Success; 'quic_decrypt_success': QUIC Decrypt Success; 'quic_0rtt_drop': QUIC 0RTT Drop; 'quic_aead_pkt_rate_exceed': QUIC AEAD Packet Rate Exceed; 'quic_dcid_pkt_rate_exceed': QUIC DCID Packet Rate Exceed; 'quic_create_conn_init_only': QUIC Create Connection on Initial Only;

Type: string

Supported Values: all, quic_packet_received, quic_initial_received, quic_version_negotiation_received, quic_retry_received, quic_0rtt_recevied, quic_handshake_received, quic_version_match_action_taken,

quic_version_match_action_drop, quic_version_match_action_blacklist, quic_malformed_action_taken, quic_malformed_action_drop, quic_malformed_action_blacklist, quic_malformed_dcid_len_max_exceed, quic_malformed_scid_len_max_exceed, quic_fixed_bit_not_set, quic_retry_auth_sent, quic_retry_auth_pass, quic_retry_auth_fail, quic_connection_close_sent, quic_invalid_retry_token, quic_short_header_received, quic_short_headr_action_drop, quic_encrypt_fail, quic_decrypt_fail, quic_encrypt_success, quic_decrypt_success, quic_0rtt_drop, quic_aead_pkt_rate_exceed, quic_dcid_pkt_rate_exceed, quic_create_conn_init_only

dns-logging-list

Specification	Value
Type	*list*
Block object keys	

disable

Description Disable DNS Logging template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-logging-protocol

Description 'both': Log DNS over tcp and udp; 'tcp': Log DNS over tcp; 'udp': Log DNS over udp;

Type: string

Supported Values: both, tcp, udp

dns-logging-request-section

Description 'all': Log DNS header and question section; 'header': Log DNS header information; 'question': Log DNS question section;

Type: string

Supported Values: all, header, question

dns-logging-type

Description 'query': DNS Query Logging;

Type: string

Supported Values: query

name

Description DNS Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l7-dns

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

use-default-route

Specification	Value
Type	*object*

ethernet-start-cfg

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

use-default-route_ethernet-start-cfg

Specification	Value
Type	*list*
Block object keys	

ethernet-end

Description

Type: number

Format: interface

ethernet-start

Description Traffic receive from the ethernet port will use default route

Type: number

Format: interface

event-filter-list

Specification	Value
Type	*list*
Block object keys	

black-list

Description: black-list is a **JSON Block**. Please see below for *event-filter-list_black-list*

Type: Object

drop

Description: drop is a **JSON Block**. Please see below for *event-filter-list_drop*

Type: Object

filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/event-filter/{filter-name}/l4-type/{protocol}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

white-list

Description: white-list is a **JSON Block**. Please see below for *event-filter-list_white-list*

Type: Object

event-filter-list_black-list

Specification	Value
Type	*object*

black-list-dst

Description Dst entry/port is black-listed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

black-list-src

Description Src entry/port is black-listed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event-filter-list_drop

Specification	Value
Type	*object*

drop-black-list

Description Packet is dropped because of black-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-dst

Description Packet is dropped because of dst

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-src

Description Packet is dropped because of src

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event-filter-list_white-list

Specification	Value
Type	*object*

white-list-dst

Description Dst entry/port is white-listed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

white-list-src

Description Src entry/port is white-listed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event-filter-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

out-of-seq

Description TCP out-of-seq pkts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol

Description 'tcp': tcp; 'udp': udp;

Type: string

Supported Values: tcp, udp

retrans-syn-cfg

Description: retrans-syn-cfg is a **JSON Block**. Please see below for *event-filter-list_l4-type-list_retrans-syn-cfg*

Type: Object

tcp-auth

Description: tcp-auth is a **JSON Block**. Please see below for *event-filter-list_l4-type-list_tcp-auth*

Type: Object

udp-auth

Description: udp-auth is a **JSON Block**. Please see below for *event-filter-list_l4-type-list_udp-auth*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zero-window

Description TCP zero window pkts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event-filter-list_l4-type-list_tcp-auth

Specification	Value
Type	*object*

tcp-auth-fail

Description Packet that fails syn-auth/action-on-ack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-auth-init

Description Packet that inits syn-auth/action-on-ack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-auth-pass

Description Packet that passes syn-auth/action-on-ack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event-filter-list_l4-type-list_udp-auth

Specification	Value
Type	*object*

udp-auth-init

Description Packet that inits spoof-detect

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-auth-pass

Description Packet that passes spoof-detect

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event-filter-list_l4-type-list_retrans-syn-cfg

Specification	Value
Type	*object*

retrans-syn

Description TCP SYN retransmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

retrans-syn-exceed

Description TCP SYN retransmission exceed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cache-server

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

switch

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l7-http

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

action-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description: action is a **JSON Block**. Please see below for *action-list-list_action*

Type: Object

capture-config

Description capture-config name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

name

Description DDOS action-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *action-list-list_zone-template*

Type: Object

action-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-template/encap*

logging

Description DDOS logging zone-template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-template/logging*

action-list-list_action

Specification	Value
Type	*object*

action

Description 'drop': Drop Packet (Default); 'ignore': Continue processing the packet; 'reset': Reset the connection; 'authenticate-src': Authenticate the source IP; 'blacklist-src': Black-list the source IP; 'tunnel-encap-packet': Encapsulate packet for tunneling. encap template need to be bound;

Type: string

Supported Values: drop, ignore, reset, authenticate-src, blacklist-src, tunnel-encap-packet

blacklist-src-value

Description blacklist duration in minutes

Type: number

Range: 1-30

scrub-packet

Description allow packets to go through other DDoS checks before sent out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stateless

Description encapsulate all packests

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-src-port-template

Specification	Value
Type	*object*

dns-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/dns/{name}*

tcp-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/tcp/{name}*

udp-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/udp/{name}*

zone-src-port-template_udp-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/udp/{name}/filter/{udp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

max-payload-size-cfg

Description: max-payload-size-cfg is a **JSON Block**. Please see below for *zone-src-port-template_udp-list_max-payload-size-cfg*

Type: Object

min-payload-size-cfg

Description: min-payload-size-cfg is a **JSON Block**. Please see below for *zone-src-port-template_udp-list_min-payload-size-cfg*

Type: Object

name

Description DDOS UDP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ntp-monlist-cfg

Description: ntp-monlist-cfg is a **JSON Block**. Please see below for *zone-src-port-template_udp-list_ntp-monlist-cfg*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-src-port-template_udp-list_ntp-monlist-cfg

Specification	Value
Type	*object*

ntp-monlist

Description Take action for ntp monlist request/response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntp-monlist-action

Description 'drop': Drop packets for ntp-monlist (Default); 'blacklist-src': Blacklist-src for ntp-monlist; 'ignore': Ignore ntp-monlist;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: ntp-monlist-action and ntp-monlist-action-list-name are mutually exclusive

ntp-monlist-action-list-name

Description Configure action-list to take for ntp-monlist

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ntp-monlist-action-list-name and ntp-monlist-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-src-port-template_udp-list_max-payload-size-cfg

Specification	Value
Type	*object*

max-payload-size

Description Maximum UDP payload size for each single packet

Type: number

Range: 1-1470

max-payload-size-action

Description 'drop': Drop packets for max-payload-size exceed (Default); 'blacklist-src': Blacklist-src for max-payload-size exceed; 'ignore': Do nothing for max-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: max-payload-size-action and max-payload-size-action-list-name are mutually exclusive

max-payload-size-action-list-name

Description Configure action-list to take for max-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: max-payload-size-action-list-name and max-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-src-port-template_udp-list_min-payload-size-cfg

Specification	Value
Type	*object*

min-payload-size

Description Minimum UDP payload size for each single packet

Type: number

Range: 1-1470

min-payload-size-action

Description 'drop': Drop packets for min-payload-size (Default); 'blacklist-src': Blacklist-src for min-payload-size; 'ignore': Do nothing for min-payload-size exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

Mutual Exclusion: min-payload-size-action and min-payload-size-action-list-name are mutually exclusive

min-payload-size-action-list-name

Description Configure action-list to take for min-payload-size exceed

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

Mutual Exclusion: min-payload-size-action-list-name and min-payload-size-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

zone-src-port-template_udp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: udp-filter-action and udp-filter-action-list-name are mutually exclusive

udp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp-filter-action-list-name and udp-filter-action are mutually exclusive

udp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

udp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-src-port-template_dns-list

Specification	Value
Type	*list*
Block object keys	

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

query-resolution-check

Description: query-resolution-check is a **JSON Block**. Please see below for *zone-src-port-template_dns-list_query-resolution-check*

Type: Object

Reference Object: */axapi/v3/ddos/zone-src-port-template/dns/{name}/query-resolution-check*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-src-port-template_dns-list_query-resolution-check

Specification	Value
Type	*object*

big-response-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

big-response-size

Description Max DNS response size (in Bytes)

Type: number

Range: 1-4096

domain-lockup-action

Description 'default': Default, No action for future connections; 'blacklist-src': Blacklist the external server for future connections;

Type: string

Supported Values: default, blacklist-src

Default: default

session-timeout-value

Description max session timeout (secs) between DNS external server and Protected object

Type: number

Range: 1-30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-src-port-template_tcp-list

Specification	Value
Type	*list*
Block object keys	

filter-list

Type: List

Reference Object: */axapi/v3/ddos/zone-src-port-template/tcp/{name}/filter/{tcp-filter-name}*

filter-match-type

Description 'default': Stop matching on drop/blacklist action; 'stop-on-first-match': Stop matching on first match;

Type: string

Supported Values: default, stop-on-first-match

Default: default

name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-src-port-template_tcp-list_filter-list

Specification	Value
Type	*list*
Block object keys	

byte-offset-filter

Description Filter using Berkeley Packet Filter syntax

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-action

Description 'drop': Drop packets (Default); 'ignore': Take no action; 'blacklist-src': Blacklist-src; 'authenticate-src': Authenticate-src;

Type: string

Supported Values: drop, ignore, blacklist-src, authenticate-src

Mutual Exclusion: tcp-filter-action and tcp-filter-action-list-name are mutually exclusive

tcp-filter-action-list-name

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp-filter-action-list-name and tcp-filter-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

tcp-filter-inverse-match

Description Inverse the result of the matching

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-filter-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp-filter-regex

Description Regex Expression

Type: string

Format: string-rlx

Maximum Length: 1275 characters

Maximum Length: 1 characters

tcp-filter-seq

Description Sequence number

Type: number

Range: 1-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

multi-pu-traffic-stats

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-udp

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list

Specification	Value
Type	*list*
Block object keys	

any-query-action-str

Description 'respond-refuse': Send refuse response (default); 'respond-empty': Send empty response; 'drop': Drop the request;

Type: string

Supported Values: respond-refuse, respond-empty, drop

Default: respond-refuse

default-serving-action

Description 'serve-from-cache': Serve DNS records; 'forward': Forward to DNS server; 'drop': Drop the request;

Type: string

Supported Values: serve-from-cache, forward, drop

Default: serve-from-cache

dns-logging

Description DNS logging template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

domain-group

Description: domain-group is a **JSON Block**. Please see below for *dns-cache-list_domain-group*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group*

edns-udp-size

Description Set the maximum EDNS UDP message size

Type: number

Range: 512-4096

fqdn-manual-override-action-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/fqdn-manual-override-action/{fqdn-name}*

name

Description DNS Cache Instance Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

neg-cache-action-follow-q-rate

Description Negative cached response queries counted toward query-rate-threshold

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-authoritative-zone-query-action-str

Description 'default': Default action: respond-refuse; 'forward': Forward to DNS server; 'respond-refuse': Send refuse response; 'drop': Drop the request;

Type: string

Supported Values: default, forward, respond-refuse, drop

Default: respond-refuse

respond-servfail

Description Respond with SERVFAIL for expired zones and zones failing to cache

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

sharded-domain-group-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-domain-lookup-miss-action

Description 'respond-nxdomain': Send NxDomain response; 'drop': Drop the request;

Type: string

Supported Values: respond-nxdomain, drop

Default: respond-nxdomain

zone-manual-override-action-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/zone-manual-override-action/{zone-name}*

zone-transfer

Description: zone-transfer is a **JSON Block**. Please see below for *dns-cache-list_zone-transfer*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/zone-transfer*

dns-cache-list_domain-group

Specification	Value
Type	*object*

domain-list-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group/domain-list-policy/{name}*

name

Description DNS domain group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list_domain-group_domain-list-policy-list

Specification	Value
Type	*list*
Block object keys	

cache-all-records

Description cache all fqdn records including uncommon types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: cache-all-records and cache-dnssec-records are mutually exclusive

cache-dnssec-records

Description cache all DNSSEC FQDN records types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: cache-dnssec-records and cache-all-records are mutually exclusive

client-ipv4

Description Client ipv4 address

Type: string

Format: ipv4-address

client-ipv6

Description Client ipv6 address

Type: string

Format: ipv6-address

dns-notify-enable-ipv4

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-notify-enable-ipv6

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force

Description Force update even the serial is the same

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-refresh

Description Manually refresh the particular zone

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

name

Description DNS domain list policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

oversize-answer-response

Description 'set-truncate-bit': Set the TC bit for oversize answer(default); 'disable-truncate-bit': Do not set TC bit for oversize answer;

Type: string

Supported Values: set-truncate-bit, disable-truncate-bit

Default: set-truncate-bit

packet-capturing

Description: packet-capturing is a **JSON Block**. Please see below for *dns-cache-list_domain-group_domain-list-policy-list_packet-capturing*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group/domain-list-policy/{name}/packet-capturing*

refresh-interval-hours

Description Zone transfer refresh rate in hours (Default 4). 0 means no refresh

Type: number

Range: 0-24

Default: 4

resolve-cname-record

Description Always try to resolve domain in CNAME record answer section

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

respond-with-authority

Description Respond with authority section for all requests under this list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server-ipv4

Description Master ipv4 address

Type: string

Format: ipv4-address

server-ipv6

Description Master ipv6 address

Type: string

Format: ipv6-address

server-v4-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

server-v6-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

ttl-override

Description Override the TTL value for zone transfer

Type: number

Range: 1-2147483647

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list_domain-group_domain-list-policy-list_packet-capturing

Specification	Value
Type	*object*

root-zone-list

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list_domain-group_domain-list-policy-list_packet-capturing_root-zone-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

capture-mode

Description 'regular': Capture packet anyway; 'capture-on-failure': Capture packet if last XFR was failed;

Type: string

Supported Values: regular, capture-on-failure

root-zone

Description Specify root zone to be captured

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

dns-cache-list_fqdn-manual-override-action-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'default': Default; 'forward': Forward to DNS server; 'drop': Drop the request; 'serve-from-cache': Serve DNS records;

Type: string

Supported Values: default, forward, drop, serve-from-cache

fqdn-name

Description Specify fqdn name

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

dns-cache-list_zone-transfer

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'total-cached-fqdn': total-cached-fqdn; 'total-cached-records': total-cached-records; 'fqdn-a': fqdn-a; 'fqdn-aaaa': fqdn-aaaa; 'fqdn-cname': fqdn-cname; 'fqdn-ns': fqdn-ns; 'fqdn-mx': fqdn-mx; 'fqdn-soa': fqdn-soa; 'fqdn-srv': fqdn-srv; 'fqdn-txt': fqdn-txt; 'fqdn-ptr': fqdn-ptr; 'fqdn-other': fqdn-other; 'fqdn-wildcard': fqdn-wildcard; 'fqdn-delegation': fqdn-delegation; 'shard-size': shard-size; 'resp-ext-size': resp-ext-size; 'a-record': a-record; 'aaaa-record': aaaa-record; 'cname-record': cname-record; 'ns-record': ns-record; 'mx-record': mx-record; 'soa-record': soa-record; 'srv-record': srv-record; 'txt-record': txt-record; 'ptr-record': ptr-record; 'other-record': other-record; 'fqdn-in-shard-filter': fqdn-in-shard-filter;

Type: string

Supported Values: all, total-cached-fqdn, total-cached-records, fqdn-a, fqdn-aaaa, fqdn-cname, fqdn-ns, fqdn-mx, fqdn-soa, fqdn-srv, fqdn-txt, fqdn-ptr, fqdn-ta, fqdn-ds, fqdn-rrsig, fqdn-nsec, fqdn-dnskey, fqdn-nsec3, fqdn-nsec3param, fqdn-cds, fqdn-cdnskey, fqdn-other, fqdn-wildcard, fqdn-delegation, shard-size, resp-ext-size, a-record, aaaa-record, cname-record, ns-record, mx-record, soa-record, srv-record, txt-record, ptr-record, ta-record, ds-record, rrsig-record, nsec-record, dnskey-record, nsec3-record, nsec3param-record, cds-record, cdnskey-record, other-record, fqdn-in-shard-filter, alias-record, fqdn-alias

dns-cache-list_zone-manual-override-action-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'default': Default; 'forward': Forward to DNS server; 'drop': Drop the request; 'serve-from-cache': Serve DNS records;

Type: string

Supported Values: default, forward, drop, serve-from-cache

zone-name

Description Specify zone name

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

dns-cache-list_sharded-domain-group-list

Specification	Value
Type	*list*
Block object keys	

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

match-action

Description 'forward': Forward query to server (default); 'tunnel-encap': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: forward, tunnel-encap

Default: forward

name

Description DNS sharded domain group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sharded-domain-list-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}/sharded-domain-list-policy/{name}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list_sharded-domain-group-list_sharded-domain-list-policy-list

Specification	Value
Type	*list*
Block object keys	

client-ipv4

Description Client ipv4 address

Type: string

Format: ipv4-address

client-ipv6

Description Client ipv6 address

Type: string

Format: ipv6-address

dns-notify-enable-ipv4

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-notify-enable-ipv6

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force

Description Force update even the serial is the same

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-refresh

Description Manually refresh the particular zone

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

name

Description DNS sharded domain list policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

packet-capturing

Description: packet-capturing is a **JSON Block**. Please see below for *dns-cache-list_sharded-domain-group-list_sharded-domain-list-policy-list_packet-capturing*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}/sharded-domain-list-policy/{name}/packet-capturing*

refresh-interval-hours

Description Zone transfer refresh rate in hours (Default 4). 0 means no refresh

Type: number

Range: 0-24

Default: 4

server-ipv4

Description Master ipv4 address

Type: string

Format: ipv4-address

server-ipv6

Description Master ipv6 address

Type: string

Format: ipv6-address

server-v4-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

server-v6-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list_sharded-domain-group-list_sharded-domain-list-policy-list_packet-capturing

Specification	Value
Type	*object*

root-zone-list

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns-cache-list_sharded-domain-group-list_sharded-domain-list-policy-list_packet-capturing_root-zone-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

capture-mode

Description 'regular': Capture packet anyway; 'capture-on-failure': Capture packet if last XFR was failed;

Type: string

Supported Values: regular, capture-on-failure

root-zone

Description Specify root zone to be captured

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

2.33.2 ddos action-list

Action List Configuration

action-list Specification

Parameter	Value

        "msg": "Success"
    }
}
```

action-list-list

action-list-list is **JSON List** of *action-list attributes*

action-list-list : [

{ *action-list attributes* },

{ *action-list attributes* },

...

]

action-list attributes

action

Description: action is a **JSON Block**. Please see below for *action*

Type: Object

capture-config

Description capture-config name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

name

Description DDOS action-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-template/encap*

logging

Description DDOS logging zone-template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-template/logging*

action

Specification	Value
Type	*object*

action

Description 'drop': Drop Packet (Default); 'ignore': Continue processing the packet; 'reset': Reset the connection; 'authenticate-src': Authenticate the source IP; 'blacklist-src': Black-list the source IP; 'tunnel-encap-packet': Encapsulate packet for tunneling. encap template need to be bound;

Type: string

Supported Values: drop, ignore, reset, authenticate-src, blacklist-src, tunnel-encap-packet

blacklist-src-value

Description blacklist duration in minutes

Type: number

Range: 1-30

scrub-packet

Description allow packets to go through other DDoS checks before sent out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stateless

Description encapsulate all packests

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.33.3 ddos anomaly

anomaly counters

anomaly Specification

security-attack-layer-3

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-deformity-layer-3

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-deformity-layer-2

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-deformity-layer-4

Specification	Value
Type	*object*

capture-config

Description capture-config name (Can only configure when drop-disabled)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

log

Description Log the anomaly event (Can only configure when drop-disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

toggle

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description ICMP Src Packets Dropped

Type: number

Format: counter

icmp_src_dst_drop

Description ICMP SrcDst Packets Dropped

Type: number

Format: counter

icmp_total_bytes_drop

Description ICMP Total Bytes Dropped

Type: number

Format: counter

icmp_total_bytes_rcv

Description ICMP Total Bytes Received

Type: number

Format: counter

icmp_total_drop

Description ICMP Total Packets Dropped

Type: number

Format: counter

inicmp

Description ICMP Total Packets Received

Type: number

Format: counter

inother

Description OTHER Total Packets Received

Type: number

Format: counter

instateless

Description Stateless Packets Received

Type: number

Format: counter

intcp

Description TCP Total Packets Received

Type: number

Format: counter

inudp

Description UDP Total Packets Received

Type: number

Format: counter

ip_rcv

Description IPv4 Received

Type: number

Format: counter

ip_sent

Description IPv4 Sent

Type: number

Format: counter

ipv6_rcv

Description IPv6 Received

Type: number

Format: counter

ipv6_sent

Description IPv6 Sent

Type: number

Format: counter

not_for_ddos

Description Not For DDOS

Type: number

Format: counter

other_any_exceed

Description OTHER Exceeded

Type: number

Format: counter

other_drop_bl

Description OTHER Blacklisted Packets Dropped

Type: number

Format: counter

other_dst_drop

Description OTHER Dst Packets Dropped

Type: number

Format: counter

other_src_drop

Description OTHER Src Packets Dropped

Type: number

Format: counter

other_src_dst_drop

Description OTHER SrcDst Packets Dropped

Type: number

Format: counter

other_total_bytes_drop

Description OTHER Total Bytes Dropped

Type: number

Format: counter

other_total_bytes_rcv

Description OTHER Total Bytes Received

Type: number

Format: counter

other_total_drop

Description OTHER Total Packets Dropped

Type: number

Format: counter

out_no_route

Description IPv4/v6 Out No Route

Type: number

Format: counter

sess_aged_out

Description Session Aged Out

Type: number

Format: counter

src_hw_drop_rule_inserted

Description Src Default Hardware Drop Rules Inserted

Type: number

Format: counter

src_hw_drop_rule_removed

Description Src Default Hardware Drop Rules Removed

Type: number

Format: counter

src_ip_bypass

Description Src IP Bypass

Type: number

Format: counter

tcp_any_exceed

Description TCP Exceeded

Type: number

Format: counter

tcp_drop_bl

Description TCP Blacklist Packets Dropped

Type: number

Format: counter

tcp_dst_drop

Description TCP Dst Packets Dropped

Type: number

Format: counter

tcp_sess_create

Description TCP Sessions Created

Type: number

Format: counter

tcp_src_drop

Description TCP Src Packets Dropped

Type: number

Format: counter

tcp_src_dst_drop

Description TCP SrcDst Packets Dropped

Type: number

Format: counter

tcp_total_bytes_drop

Description TCP Total Bytes Dropped

Type: number

Format: counter

tcp_total_bytes_rcv

Description TCP Total Bytes Received

Type: number

Format: counter

tcp_total_drop

Description TCP Total Packets Dropped

Type: number

Format: counter

udp_any_exceed

Description UDP Exceeded

Type: number

Format: counter

udp_drop_bl

Description UDP Blacklist Packets Dropped

Type: number

Format: counter

udp_dst_drop

Description UDP Dst Packets Dropped

Type: number

Format: counter

udp_sess_create

Description UDP Sessions Created

Type: number

Format: counter

udp_src_drop

Description UDP Src Packets Dropped

Type: number

Format: counter

udp_src_dst_drop

Description UDP SrcDst Packets Dropped

Type: number

Format: counter

udp_total_bytes_drop

Description UDP Total Bytes Dropped

Type: number

Format: counter

udp_total_bytes_rcv

Description UDP Total Bytes Received

Type: number

Format: counter

udp_total_drop

Description UDP Total Packets Dropped

Type: number

Format: counter

v4_sess_create

Description IPv4 Session Created

Type: number

Format: counter

v6_sess_create

Description IPv6 Session Created

Type: number

Format: counter

2.33.14 ddos detection

DDoS Detection Commands

detection Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	detection
Element URI	/axapi/v3/ddos/detection
Element Attributes	detection_attributes
Partition Visibility	shared
Schema	`detection schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/detection

detection attributes

```
POST /axapi/v3/ddos/detection
Payload:
{
    "detection": {
        "disable": 1
    }
}
```

Get Object

GET

/axapi/v3/ddos/detection

detection attributes

```
GET /axapi/v3/ddos/detection
Reponse:
{
    "detection": {
        "disable": 1,
        "uuid": "cb1e88bc-bb97-11ef-a72a-63c0c17412b6",
        "statistics": {
            "uuid": "cb1e8b50-bb97-11ef-a72a-63c0c17412b6",
            "a10-url": "/axapi/v3/ddos/detection/statistics"
        },
        "a10-url": "/axapi/v3/ddos/detection"
    }
}
```

Modify Object

POST

/axapi/v3/ddos/detection

detection attributes

Replace Object

PUT

/axapi/v3/ddos/detection

detection attributes

```
PUT /axapi/v3/ddos/detection
Payload:
{
    "detection": {
        "disable": 1
    }
}
```

Delete Object

DELETE

/axapi/v3/ddos/detection

detection attributes

```
DELETE /axapi/v3/ddos/detection
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Success"
    }
}
```

detection attributes

agent-group-list

Type: List

Reference Object: */axapi/v3/ddos/detection/agent-group/{agent-group-name}*

agent-list

Type: List

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}*

ddos-script

Description: ddos-script is a **JSON Block**. Please see below for *ddos-script*

Type: Object

Reference Object: */axapi/v3/ddos/detection/ddos-script*

disable

Description Disable DDoS detection (default: enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-saving

Description: entry-saving is a **JSON Block**. Please see below for *entry-saving*

Type: Object

Reference Object: */axapi/v3/ddos/detection/entry-saving*

resource-usage

Description: resource-usage is a **JSON Block**. Please see below for *resource-usage*

Type: Object

Reference Object: */axapi/v3/ddos/detection/resource-usage*

settings

Description: settings is a **JSON Block**. Please see below for *settings*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings*

statistics

Description: statistics is a **JSON Block**. Please see below for *statistics*

Type: Object

Reference Object: */axapi/v3/ddos/detection/statistics*

trustlist

Description: trustlist is a **JSON Block**. Please see below for *trustlist*

Type: Object

Reference Object: */axapi/v3/ddos/detection/trustlist*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

resource-usage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trustlist

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v4-class-list

Description IPv4 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

v6-class-list

Description IPv6 Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

entry-saving

Specification	Value
Type	*object*

clear-saved-data

Description Clear all saved network-object-based detection entries and learned indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-restore

Description Manually restore network-object-based detection entries and learned indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-save

Description Manually save network-object-based detection entries and learned indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

settings

Specification	Value
Type	*object*

ctrl-cpu-usage

Description Control cpu usage threshold for DDoS detection

Type: number

Range: 1-100

de-escalation-quiet-time

Description Configure de-escalation needed time in minutes from level 1 to 0.(default 1 minutes)

Type: number

Range: 1-60

dedicated-cpus

Description Configure the number of dedicated cores for detection

Type: number

Range: 1-32

detection-window-size

Description Configure detection window size in seconds (DDoS detection window size in seconds(default: 1))

Type: number

Range: 1-60

Default: 1

detector-mode

Description 'standalone': Standalone detector; 'on-box': Mitigator and Detector on the same box; 'auto-svc-discovery': Auto Service discovery using Visibility module (Deprecatd);

Type: string

Supported Values: standalone, on-box, auto-svc-discovery

entry-saving

Description: entry-saving is a **JSON Block**. Please see below for *settings_entry-saving*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/entry-saving*

export-interval

Description Configure Baselining and export interval in seconds (DDoS Baselining and export interval in seconds(default: 20))

Type: number

Range: 20-3000

Default: 20

full-core-enable

Description Enable full core

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

histogram-de-escalate-percentage

Description histogram de-escalate sensitivity for DDoS detection

Type: number

Range: 1-100

histogram-escalate-percentage

Description histogram escalate sensitivity for DDoS detection

Type: number

Range: 1-100

initial-learning-interval

Description Initial learning interval (in hours) before processing

Type: number

Range: 1-168

network-object-flooding-multiple

Description multiplier for flooding detection threshold in network objects (default 2x threshold)

Type: number

Range: 2-10

Default: 2

network-object-subnet-notify-percent

Description Send subnet notification when anomaly children subnet entries over configured percentage.(default 50%)

Type: number

Range: 1-100

network-object-window-size

Description '5': 5 seconds; '10': 10 seconds; '15': 15 seconds; '30': 30 seconds; (DDoS detection window size in seconds(default: 30))

Type: string

Supported Values: 5, 10, 15, 30

Default: 30

notification-debug-log

Description 'enable': Enable detection notification debug log (default: disabled);

Type: string

Supported Values: enable

pkt-sampling

Type: List

standalone-settings

Description: standalone-settings is a **JSON Block**. Please see below for *settings_standalone-settings*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings*

top-k-reset-interval

Description Configure top-k reset interval

Type: number

Range: 1-60

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-notifications

Description: zone-notifications is a **JSON Block**. Please see below for *settings_zone-notifications*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/zone-notifications*

settings_entry-saving

Specification	Value
Type	*object*

disable-bootup-restore

Description Disable auto-restoring when system boots up

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interval

Description Configure periodical auto-saving interval in minutes

Type: number

Range: 1-1440

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

settings_standalone-settings

Specification	Value
Type	*object*

action

Description 'enable': Enable standalone detector; 'disable': Disable standalone detector (default);

Type: string

Supported Values: enable, disable

Default: disable

netflow

Description: netflow is a **JSON Block**. Please see below for *settings_standalone-settings_netflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings/netflow*

sflow

Description: sflow is a **JSON Block**. Please see below for *settings_standalone-settings_sflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings/sflow*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

settings_standalone-settings_netflow

Specification	Value
Type	*object*

distribute-by-duration

Description 'enable': Enable data distribution by flow duration(default); 'disable': Disable data distribution by flow duration;

Type: string

Supported Values: enable, disable

Default: enable

listening-port

Description Netflow port to receive packets (Netflow port number(default 9996))

Type: number

Range: 1-65535

Default: 9996

template-active-timeout

Description Configure active timeout of the netflow templates received in mins (Template active timeout(mins)(default 30mins))

Type: number

Range: 2-300

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

settings_standalone-settings_sflow

Specification	Value
Type	*object*

listening-port

Description sFlow port to receive packets (sFlow port number(default 6343))

Type: number

Range: 1-65535

Default: 6343

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

settings_pkt-sampling

Specification	Value
Type	*list*
Block object keys	

override-rate

Description Sample 1 in X packets (default: X=1)

Type: number

Range: 1-50000000

start-level

Description Configure the start level for dynamic sampling adjustment (Sample 1 in N packets, the larger level the larger value of N (default: 1))

Type: number

Range: 1-10

Default: 1

settings_zone-notifications

Specification	Value
Type	*object*

source-entry

Description 'enable': Enable source entry detection notification; 'disable': Disable source entry detection notification(default);

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

agent-group-list

Specification	Value
Type	*list*
Block object keys	

agent

Type: List

agent-group-name

Description Specify name for the agent-group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

agent-group-list_agent

Specification	Value
Type	*list*
Block object keys	

agent-name

Description detection agent name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/detection/agent*

statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ddos-script

Specification	Value
Type	*object*

action

Description 'delete': delete;

Type: string

Supported Values: delete

file

Description startup-config local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

agent-list

Specification	Value
Type	*list*
Block object keys	

agent-name

Description Specify name for the agent

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

agent-type

Description 'Cisco': Cisco; 'Juniper': Juniper;

Type: string

Supported Values: Cisco, Juniper

agent-v4-addr

Description Configure agent's IPv4 address

Type: string

Format: ipv4-address

agent-v6-addr

Description Configure agent's IPv6 address

Type: string

Format: ipv6-address

netflow

Description: netflow is a **JSON Block**. Please see below for *agent-list_netflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}/netflow*

sampling-enable

Type: List

sflow

Description: sflow is a **JSON Block**. Please see below for *agent-list_sflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}/sflow*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

agent-list_sflow

Specification	Value
Type	*object*

sflow-pkt-samples-collection

Description 'enable': Enable sflow packet samples collection(default); 'disable': Disable sflow packet samples collection;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

agent-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'sflow-packets-received': sFlow Packets Received; 'sflow-samples-received': sFlow Samples Received; 'sflow-samples-bad-len': sFlow Samples Bad Length; 'sflow-samples-non-std': sFlow Samples Non-standard; 'sflow-samples-skipped': sFlow Samples Skipped; 'sflow-sample-record-bad-len': sFlow Sample Records Bad Length; 'sflow-samples-sent-for-detection': sFlow Samples Processed For Detection; 'sflow-sample-record-invalid-layer2': sFlow Sample Records Unknown Layer-2; 'sflow-sample-ipv6-hdr-parse-fail': sFlow Sample IPv6 Record Header Parse Failures; 'sflow-disabled': sFlow Packet Samples Processing Disabled; 'netflow-disabled': Netflow Flow Samples Processing Disabled; 'netflow-v5-packets-received': Netflow v5 Packets Received; 'netflow-v5-samples-received': Netflow v5 Samples Received; 'netflow-v5-samples-sent-for-detection': Netflow v5 Samples Processed For Detection; 'netflow-v5-sample-records-bad-len': Netflow v5 Sample Records Bad Length; 'netflow-v5-max-records-exceed': Netflow v5 Sample Max Records Error; 'netflow-v9-packets-received': Netflow v9 Packets Received; 'netflow-v9-samples-received': Netflow v9 Samples Received; 'netflow-v9-samples-sent-for-detection': Netflow v9 Samples Processed

For Detection; 'netflow-v9-sample-records-bad-len': Netflow v9 Sample Records Bad Length; 'netflow-v9-sample-flowset-bad-padding': Netflow v9 Sample Flowset Bad Padding; 'netflow-v9-max-records-exceed': Netflow v9 Sample Max Records Error; 'netflow-v9-template-not-found': Netflow v9 Template Not Found; 'netflow-v10-packets-received': Netflow v10 Packets Received; 'netflow-v10-samples-received': Netflow v10 Samples Received; 'netflow-v10-samples-sent-for-detection': Netflow v10 Samples Procssed For Detection; 'netflow-v10-sample-records-bad-len': Netflow v10 Sample Records Bad Length; 'netflow-v10-max-records-exceed': Netflow v10 Sample Max records Error; 'netflow-tcp-sample-received': Netflow TCP Samples Received; 'netflow-udp-sample-received': Netflow UDP Samples received; 'netflow-icmp-sample-received': Netflow ICMP Samples Received; 'netflow-other-sample-received': Netflow OTHER Samples Received; 'netflow-record-copy-oom-error': Netflow Data Record Copy Fail, Local MEM size error; 'netflow-record-rse-invalid': Netflow Data Record Reduced Size Invalid; 'netflow-sample-flow-dur-error': Netflow Sample Flow Duration Error; 'flow-dst-entry-miss': DDoS Destination Entry Lookup Failures; 'flow-ip-proto-or-port-miss': DDoS Destination Service Lookup Failures; 'flow-detection-msgq-full': Detection Message Enqueue Failures;

Type: string

Supported Values: all, sflow-packets-received, sflow-samples-received, sflow-samples-bad-len, sflow-samples-non-std, sflow-samples-skipped, sflow-sample-record-bad-len, sflow-samples-sent-for-detection, sflow-sample-record-invalid-layer2, sflow-sample-ipv6-hdr-parse-fail, sflow-disabled, netflow-disabled, netflow-v5-packets-received, netflow-v5-samples-received, netflow-v5-samples-sent-for-detection, netflow-v5-sample-records-bad-len, netflow-v5-max-records-exceed, netflow-v9-packets-received, netflow-v9-samples-received, netflow-v9-samples-sent-for-detection, netflow-v9-sample-records-bad-len, netflow-v9-sample-flowset-bad-padding, netflow-v9-max-records-exceed, netflow-v9-template-not-found, netflow-v10-packets-received, netflow-v10-samples-received, netflow-v10-samples-sent-for-detection, netflow-v10-sample-records-bad-len, netflow-v10-max-records-exceed, netflow-tcp-sample-received, netflow-udp-sample-received, netflow-icmp-sample-received, netflow-other-sample-received, netflow-record-copy-oom-error, netflow-record-rse-invalid, netflow-sample-flow-dur-error, flow-dst-entry-miss, flow-ip-proto-or-port-miss, flow-detection-msgq-full, flow-network-entry-miss

agent-list_netflow

Specification	Value
Type	*object*

active-timeout

Description Configure agent's flow active timeout (seconds)

Type: number

Range: 10-600

inactive-timeout

Description Configure agent's flow inactive timeout (seconds)

Type: number

Range: 10-600

netflow-samples-collection

Description 'enable': Enable Netflow flow samples collection(default); 'disable': Disable Netflow flow samples collection;

Type: string

Supported Values: enable, disable

Default: enable

netflow-sampling-rate

Description Configure agent's netflow sampling rate

Type: number

Range: 1-65535

Default: 1

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.15 ddos detection agent

Configure DDoS detection agent

agent Specification

Parameter	Value

```

agent-list

agent-list is **JSON List** of *agent attributes*

agent-list : [

{ *agent attributes* },

{ *agent attributes* },

...

]

agent attributes

agent-name

Description Specify name for the agent

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

agent-type

Description 'Cisco': Cisco; 'Juniper': Juniper;

Type: string

Supported Values: Cisco, Juniper

agent-v4-addr

Description Configure agent's IPv4 address

Type: string

Format: ipv4-address

agent-v6-addr

Description Configure agent's IPv6 address

Type: string

Format: ipv6-address

netflow

Description: netflow is a **JSON Block**. Please see below for *netflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}/netflow*

sampling-enable

Type: List

sflow

Description: sflow is a **JSON Block**. Please see below for *sflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/agent/{agent-name}/sflow*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sflow

Specification	Value
Type	*object*

sflow-pkt-samples-collection

Description 'enable': Enable sflow packet samples collection(default); 'disable': Disable sflow packet samples collection;

Type: string

Supported Values: enable, disable

Default: enable

Type: string

2.33.24 ddos detection settings

Configure ddos detection settings

settings Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	settings
Element URI	/axapi/v3/ddos/detection/settings
Element Attributes	settings_attributes
Partition Visibility	shared
Schema	`settings schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/detection/settings

settings attributes

```
POST /axapi/v3/ddos/detection/settings
Payload:
{
    "settings": {
        "detector-mode": "standalone",
        "entry-saving": {
            "disable-bootup-restore": 1
        }
    }
}
```

Get Object

GET

/axapi/v3/ddos/detection/settings

settings attributes

```
GET /axapi/v3/ddos/detection/settings
Reponse:
{
    "settings": {
        "detector-mode": "standalone",
        "detection-window-size": 1,
        "network-object-window-size": "30",
        "network-object-flooding-multiple": 2,
        "uuid": "21d90e22-0858-11f0-86c6-001fa04507c0",
        "entry-saving": {
            "disable-bootup-restore": 1,
            "uuid": "21d91a5c-0858-11f0-86c6-001fa04507c0",
            "a10-url": "/axapi/v3/ddos/detection/settings/entry-saving"
        },
        "a10-url": "/axapi/v3/ddos/detection/settings"
```

(continues on next page)

(continued from previous page)

```
    }
}
```

Modify Object

POST

/axapi/v3/ddos/detection/settings

settings attributes

Replace Object

PUT

/axapi/v3/ddos/detection/settings

settings attributes

```
PUT /axapi/v3/ddos/detection/settings
Payload:
{
    "settings": {
        "detector-mode": "on-box",
        "entry-saving": {
            "interval": 2
        }
    }
}
```

Delete Object

DELETE

/axapi/v3/ddos/detection/settings

settings attributes

```
DELETE /axapi/v3/ddos/detection/settings
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Please save your configuration and reload/reboot for the configuration␣
↪to take effect"
    }
}
```

settings attributes

ctrl-cpu-usage

Description Control cpu usage threshold for DDoS detection

Type: number

Range: 1-100

de-escalation-quiet-time

Description Configure de-escalation needed time in minutes from level 1 to 0.(default 1 minutes)

Type: number

Range: 1-60

dedicated-cpus

Description Configure the number of dedicated cores for detection

Type: number

Range: 1-32

detection-window-size

Description Configure detection window size in seconds (DDoS detection window size in seconds(default: 1))

Type: number

Range: 1-60

Default: 1

detector-mode

Description 'standalone': Standalone detector; 'on-box': Mitigator and Detector on the same box; 'auto-svc-discovery': Auto Service discovery using Visibility module (Deprecatd);

Type: string

Supported Values: standalone, on-box, auto-svc-discovery

entry-saving

Description: entry-saving is a **JSON Block**. Please see below for *entry-saving*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/entry-saving*

export-interval

Description Configure Baselining and export interval in seconds (DDoS Baselining and export interval in seconds(default: 20))

Type: number

Range: 20-3000

Default: 20

full-core-enable

Description Enable full core

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

histogram-de-escalate-percentage

Description histogram de-escalate sensitivity for DDoS detection

Type: number

Range: 1-100

histogram-escalate-percentage

Description histogram escalate sensitivity for DDoS detection

Type: number

Range: 1-100

initial-learning-interval

Description Initial learning interval (in hours) before processing

Type: number

Range: 1-168

network-object-flooding-multiple

Description multiplier for flooding detection threshold in network objects (default 2x threshold)

Type: number

Range: 2-10

Default: 2

network-object-subnet-notify-percent

Description Send subnet notification when anomaly children subnet entries over configured percentage.(default 50%)

Type: number

Range: 1-100

network-object-window-size

Description '5': 5 seconds; '10': 10 seconds; '15': 15 seconds; '30': 30 seconds; (DDoS detection window size in seconds(default: 30))

Type: string

Supported Values: 5, 10, 15, 30

Default: 30

notification-debug-log

Description 'enable': Enable detection notification debug log (default: disabled);

Type: string

Supported Values: enable

pkt-sampling

Type: List

standalone-settings

Description: standalone-settings is a **JSON Block**. Please see below for *standalone-settings*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings*

top-k-reset-interval

Description Configure top-k reset interval

Type: number

Range: 1-60

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-notifications

Description: zone-notifications is a **JSON Block**. Please see below for *zone-notifications*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/zone-notifications*

entry-saving

Specification	Value
Type	*object*

disable-bootup-restore

Description Disable auto-restoring when system boots up

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interval

Description Configure periodical auto-saving interval in minutes

Type: number

Range: 1-1440

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

standalone-settings

Specification	Value
Type	*object*

action

Description 'enable': Enable standalone detector; 'disable': Disable standalone detector (default);

Type: string

Supported Values: enable, disable

Default: disable

netflow

Description: netflow is a **JSON Block**. Please see below for *standalone-settings_netflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings/netflow*

sflow

Description: sflow is a **JSON Block**. Please see below for *standalone-settings_sflow*

Type: Object

Reference Object: */axapi/v3/ddos/detection/settings/standalone-settings/sflow*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

standalone-settings_netflow

Specification	Value
Type	*object*

distribute-by-duration

Description 'enable': Enable data distribution by flow duration(default); 'disable': Disable data distribution by flow duration;

Type: string

Supported Values: enable, disable

Default: enable

listening-port

Description Netflow port to receive packets (Netflow port number(default 9996))

Type: number

Range: 1-65535

Default: 9996

template-active-timeout

Description Configure active timeout of the netflow templates received in mins (Template active timeout(mins)(default 30mins))

Type: number

Range: 2-300

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

standalone-settings_sflow

Specification	Value
Type	*object*

listening-port

Description sFlow port to receive packets (sFlow port number(default 6343))

Type: number

Range: 1-65535

Default: 6343

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

pkt-sampling

Specification	Value
Type	*list*
Block object keys	

override-rate

Description Sample 1 in X packets (default: X=1)

Type: number

Range: 1-50000000

start-level

Description Configure the start level for dynamic sampling adjustment (Sample 1 in N packets, the larger level the larger value of N (default: 1))

Type: number

Range: 1-10

Default: 1

zone-notifications

Specification	Value
Type	*object*

source-entry

Description 'enable': Enable source entry detection notification; 'disable': Disable source entry detection notification(default);

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.25 ddos detection settings entry-saving

Detection entries and indicators saving configuration

entry-saving Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	entry-saving
Element URI	/axapi/v3/ddos/detection/settings/entry-saving
Element Attributes	entry-saving_attributes
Partition Visibility	shared
Schema	`entry-saving schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/detection/settings/entry-saving

entry-saving attributes

```
POST /axapi/v3/ddos/detection/settings/entry-saving
Payload:
{
    "entry-saving": {
        "disable-bootup-restore": 1
    }
}
```

Get Object

GET

/axapi/v3/ddos/detection/settings/entry-saving

entry-saving attributes

```
GET /axapi/v3/ddos/detection/settings/entry-saving
Reponse:
{
    "entry-saving": {
        "disable-bootup-restore": 1,
        "uuid": "75df3fd2-0858-11f0-86c6-001fa04507c0",
        "a10-url": "/axapi/v3/ddos/detection/settings/entry-saving"
    }
}
```

Modify Object

POST

/axapi/v3/ddos/detection/settings/entry-saving

entry-saving attributes

Replace Object

PUT

/axapi/v3/ddos/detection/settings/entry-saving

entry-saving attributes

```
PUT /axapi/v3/ddos/detection/settings/entry-saving
Payload:
{
    "entry-saving": {
        "disable-bootup-restore": 0
    }
}
```

Delete Object

DELETE

/axapi/v3/ddos/detection/settings/entry-saving

entry-saving attributes

```
DELETE /axapi/v3/ddos/detection/settings/entry-saving
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Success"
    }
}
```

entry-saving attributes

disable-bootup-restore

Description Disable auto-restoring when system boots up

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interval

Description Configure periodical auto-saving interval in minutes

Type: number

Range: 1-1440

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.26 ddos detection settings standalone-settings

Configure ddos standalone detection settings

standalone-settings Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	standalone-settings
Element URI	/axapi/v3/ddos/detection/settings/standalone-settings
Element Attributes	standalone-settings_attributes
Partition Visibility	shared
Schema	`standalone-settings schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/detection/settings/standalone-settings

standalone-settings attributes

```
POST /axapi/v3/ddos/detection/settings/standalone-settings
Payload:
{
    "standalone-settings": {
        "sflow": {
            "listening-port": 1
        }
    }
}
```

Get Object

GET

/axapi/v3/ddos/detection/settings/standalone-settings

standalone-settings attributes

```
GET /axapi/v3/ddos/detection/settings/standalone-settings
Reponse:
{
    "standalone-settings": {
```

(continues on next page)

(continued from previous page)

        "status": "OK",
        "msg": "Success"
    }
}
```

netflow attributes

distribute-by-duration

Description 'enable': Enable data distribution by flow duration(default); 'disable': Disable data distribution by flow duration;

Type: string

Supported Values: enable, disable

Default: enable

listening-port

Description Netflow port to receive packets (Netflow port number(default 9996))

Type: number

Range: 1-65535

Default: 9996

template-active-timeout

Description Configure active timeout of the netflow templates received in mins (Template active timeout(mins)(default 30mins))

Type: number

Range: 2-300

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.28 ddos detection settings standalone-settings sflow

Configure sFlow parameters for flow based detection

sflow Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	sflow
Element URI	/axapi/v3/ddos/detection/settings/standalone-settings/sflow
Element Attributes	sflow_attributes
Partition Visibility	shared
Schema	`sflow schema`

Operations Allowed:

Create Object

Type: number

Format: counter

db-n-svc-table-purge-failure

Description Entry-Saving Network Service Entry Storage Purge Failure

Type: number

Format: counter

db-open-failure

Description Entry-Saving Storage Open Failure

Type: number

Format: counter

db-oper-failure

Description Entry-Saving Storage Operation Failure

Type: number

Format: counter

db-unexpected-error

Description Entry-Saving Unexpected Error

Type: number

Format: counter

db-worker-enq-failure

Description Entry-Saving Periodic Saving Routine Schedule Failure

Type: number

Format: counter

dst-age

Description Dst Entry Aged

Type: number

Format: counter

dst-hit

Description Dst Entry Hit

Type: number

Format: counter

dst-ip-age

Description Dst IP Entry Aged

Type: number

Format: counter

dst-ip-learn

Description Dst IP Entry Learned

Type: number

Format: counter

dst-learn

Description Dst Entry Learned

Type: number

Format: counter

dst-miss

Description Dst Entry Missed

Type: number

Format: counter

dst-service-age

Description Dst Service Entry Aged

Type: number

Format: counter

dst-service-hit

Description Dst Service Entry Hit

Type: number

Format: counter

dst-service-learn

Description Dst Service Entry Learned

Type: number

Format: counter

dst-service-miss

Description Dst Service Entry Missed

Type: number

Format: counter

entry-alloc-fail

Description Entry Allocate Failure

Type: number

Format: counter

frag_rcvd

Description Fragment Received

Type: number

Format: counter

geo-age

Description Geolocation Entry Aged

Type: number

Format: counter

geo-learn

Description Geolocation Entry Learned

Type: number

Format: counter

invalid-event

Description Invalid Event in Notification

Type: number

Format: counter

invalid-proto

Description Invalid Proto in Notification

Type: number

Format: counter

ip_rcvd

Description IPv4 Received

Type: number

Format: counter

ipv6_rcvd

Description IPv6 Received

Type: number

Format: counter

n-ip-aged

Description IP Entry of Network-object Aged

Type: number

Format: counter

n-ip-create-fail

Description IP Entry of Network-object Create Failed

Type: number

Format: counter

n-ip-learned

Description IP Entry of Network-object Learned

Type: number

Format: counter

n-service-aged

Description Service Entry of Network-object Aged

Type: number

Format: counter

n-service-create-fail

Description Service Entry of Network-object Create Failed

Type: number

Format: counter

n-service-learned

Description Service Entry of Network-object Learned

Type: number

Format: counter

n-service-not-found

Description Service Entry of Network-object Not Found

Type: number

Format: counter

n-sport-aged

Description Source Port Entry of Network-object Aged

Type: number

Format: counter

n-sport-create-fail

Description Source Port Entry of Network-object Create Failed

Type: number

Format: counter

n-sport-learned

Description Source Port Entry of Network-object Learned

Type: number

Format: counter

n-sport-not-found

Description Source Port Entry of Network-object Not Found

Type: number

Format: counter

n-subnet-aged

Description Subnet Entry of Network-object Aged

Type: number

Format: counter

n-subnet-create-fail

Description Subnet Entry of Network-object Create Failed

Type: number

Format: counter

n-subnet-learned

Description Subnet Entry of Network-object learned

Type: number

Format: counter

netflow-pkts-received

Description Netflow Packets Received

Type: number

Format: counter

network-match-miss

Description Network-object Match Missed

Type: number

Format: counter

not-supported-sflow-ver

Description sFlow Packets Version Not Supported

Type: number

Format: counter

not-supproted-nflow-ver

Description Netflow Packets Version Not Supported

Type: number

Format: counter

object-alloc-oom

Description Object Allocate Failure Out of Memory

Type: number

Format: counter

pkt-drop

Description Flow Packets Dropped

Type: number

Format: counter

report-alloc-fail

Description Report Allocate Failure

Type: number

Format: counter

report-enqueue-fail

Description Report Enqueue Failure

Type: number

Format: counter

rtbh-start-fail

Description RTBH Start Notification Sent Failed

Type: number

Format: counter

rtbh-start-sent

Description RTBH Start Notification Sent

Type: number

Format: counter

rtbh-stop-fail

Description RTBH Stop Notification Sent Failed

Type: number

Format: counter

rtbh-stop-sent

Description RTBH Stop Notification Sent

Type: number

Format: counter

sample-procssed

Description Sample Processed

Type: number

Format: counter

session-aged

Description Session Aged

Type: number

Format: counter

session-allocate-fail

Description Session Allocate Failed

Type: number

Format: counter

session-learned

Description Session Learned

Type: number

Format: counter

session-match-miss

Description Session Match Missed

Type: number

Format: counter

sflow-packets-received

Description sFlow Packets Received

Type: number

Format: counter

src-age

Description Src Entry Aged

Type: number

Format: counter

src-hit

Description Src Entry Hit

Type: number

Format: counter

src-learn

Description Src Entry Learned

Type: number

Format: counter

src-miss

Description Src Entry Missed

Type: number

Format: counter

src-port-age

Description Src Port Entry Aged

Type: number

Format: counter

src-port-hit

Description Src Port Entry Hit

Type: number

Format: counter

src-port-learn

Description Src Port Entry Learned

Type: number

Format: counter

src-port-miss

Description Src Port Entry Missed

Type: number

Format: counter

trusted-sample-processed

Description Samples with Source IP in Trustlist Processed

Type: number

Format: counter

unmatch-entry-port-zero

Description Unmatched Entry Port-zero Packet

Type: number

Format: counter

2.33.32 ddos detection trustlist

Configure trusted IPv4/IPv6 classlists

trustlist Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	trustlist

dns-cache attributes

dns-cache-list

dns-cache-list is **JSON List** of *dns-cache attributes*

dns-cache-list : [

{ *dns-cache attributes* },

{ *dns-cache attributes* },

...

]

dns-cache attributes

any-query-action-str

Description 'respond-refuse': Send refuse response (default); 'respond-empty': Send empty response; 'drop': Drop the request;

Type: string

Supported Values: respond-refuse, respond-empty, drop

Default: respond-refuse

default-serving-action

Description 'serve-from-cache': Serve DNS records; 'forward': Forward to DNS server; 'drop': Drop the request;

Type: string

Supported Values: serve-from-cache, forward, drop

Default: serve-from-cache

dns-logging

Description DNS logging template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

domain-group

Description: domain-group is a **JSON Block**. Please see below for *domain-group*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group*

edns-udp-size

Description Set the maximum EDNS UDP message size

Type: number

Range: 512-4096

fqdn-manual-override-action-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/fqdn-manual-override-action/{fqdn-name}*

name

Description DNS Cache Instance Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

neg-cache-action-follow-q-rate

Description Negative cached response queries counted toward query-rate-threshold

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-authoritative-zone-query-action-str

Description 'default': Default action: respond-refuse; 'forward': Forward to DNS server; 'respond-refuse': Send refuse response; 'drop': Drop the request;

Type: string

Supported Values: default, forward, respond-refuse, drop

Default: respond-refuse

respond-servfail

Description Respond with SERVFAIL for expired zones and zones failing to cache

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

sharded-domain-group-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-domain-lookup-miss-action

Description 'respond-nxdomain': Send NxDomain response; 'drop': Drop the request;

Type: string

Supported Values: respond-nxdomain, drop

Default: respond-nxdomain

zone-manual-override-action-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/zone-manual-override-action/{zone-name}*

zone-transfer

Description: zone-transfer is a **JSON Block**. Please see below for *zone-transfer*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/zone-transfer*

domain-group

Specification	Value
Type	*object*

domain-list-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group/domain-list-policy/{name}*

name

Description DNS domain group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

domain-group_domain-list-policy-list

Specification	Value
Type	*list*
Block object keys	

cache-all-records

Description cache all fqdn records including uncommon types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: cache-all-records and cache-dnssec-records are mutually exclusive

cache-dnssec-records

Description cache all DNSSEC FQDN records types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: cache-dnssec-records and cache-all-records are mutually exclusive

client-ipv4

Description Client ipv4 address

Type: string

Format: ipv4-address

client-ipv6

Description Client ipv6 address

Type: string

Format: ipv6-address

dns-notify-enable-ipv4

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-notify-enable-ipv6

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force

Description Force update even the serial is the same

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-refresh

Description Manually refresh the particular zone

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

name

Description DNS domain list policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

oversize-answer-response

Description 'set-truncate-bit': Set the TC bit for oversize answer(default); 'disable-truncate-bit': Do not set TC bit for oversize answer;

Type: string

Supported Values: set-truncate-bit, disable-truncate-bit

Default: set-truncate-bit

packet-capturing

Description: packet-capturing is a **JSON Block**. Please see below for *domain-group_domain-list-policy-list_packet-capturing*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group/domain-list-policy/{name}/packet-capturing*

refresh-interval-hours

Description Zone transfer refresh rate in hours (Default 4). 0 means no refresh

Type: number

Range: 0-24

Default: 4

resolve-cname-record

Description Always try to resolve domain in CNAME record answer section

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

respond-with-authority

Description Respond with authority section for all requests under this list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server-ipv4

Description Master ipv4 address

Type: string

Format: ipv4-address

server-ipv6

Description Master ipv6 address

Type: string

Format: ipv6-address

server-v4-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

server-v6-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

ttl-override

Description Override the TTL value for zone transfer

Type: number

Range: 1-2147483647

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

domain-group_domain-list-policy-list_packet-capturing

Specification	Value
Type	*object*

root-zone-list

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

domain-group_domain-list-policy-list_packet-capturing_root-zone-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

capture-mode

Description 'regular': Capture packet anyway; 'capture-on-failure': Capture packet if last XFR was failed;

Type: string

Supported Values: regular, capture-on-failure

root-zone

Description Specify root zone to be captured

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

fqdn-manual-override-action-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'default': Default; 'forward': Forward to DNS server; 'drop': Drop the request; 'serve-from-cache': Serve DNS records;

Type: string

Supported Values: default, forward, drop, serve-from-cache

fqdn-name

Description Specify fqdn name

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

zone-transfer

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'total-cached-fqdn': total-cached-fqdn; 'total-cached-records': total-cached-records; 'fqdn-a': fqdn-a; 'fqdn-aaaa': fqdn-aaaa; 'fqdn-cname': fqdn-cname; 'fqdn-ns': fqdn-ns; 'fqdn-mx': fqdn-mx; 'fqdn-soa': fqdn-soa; 'fqdn-srv': fqdn-srv; 'fqdn-txt': fqdn-txt; 'fqdn-ptr': fqdn-ptr; 'fqdn-other': fqdn-other; 'fqdn-wildcard': fqdn-wildcard; 'fqdn-delegation': fqdn-delegation; 'shard-size': shard-size; 'resp-ext-size': resp-ext-size; 'a-record': a-record; 'aaaa-record': aaaa-record; 'cname-record': cname-record; 'ns-record': ns-record; 'mx-record': mx-record; 'soa-record': soa-record; 'srv-record': srv-record; 'txt-record': txt-record; 'ptr-record': ptr-record; 'other-record': other-record; 'fqdn-in-shard-filter': fqdn-in-shard-filter;

Type: string

Supported Values: all, total-cached-fqdn, total-cached-records, fqdn-a, fqdn-aaaa, fqdn-cname, fqdn-ns, fqdn-mx, fqdn-soa, fqdn-srv, fqdn-txt, fqdn-ptr, fqdn-ta, fqdn-ds, fqdn-rrsig, fqdn-nsec, fqdn-dnskey, fqdn-nsec3, fqdn-nsec3param, fqdn-cds, fqdn-cdnskey, fqdn-other, fqdn-wildcard, fqdn-delegation, shard-size, resp-ext-size, a-record, aaaa-record, cname-record, ns-record, mx-record, soa-record, srv-record, txt-record, ptr-record, ta-record, ds-record, rrsig-record, nsec-record, dnskey-record, nsec3-record, nsec3param-record, cds-record, cdnskey-record, other-record, fqdn-in-shard-filter, alias-record, fqdn-alias

zone-manual-override-action-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'default': Default; 'forward': Forward to DNS server; 'drop': Drop the request; 'serve-from-cache': Serve DNS records;

Type: string

Supported Values: default, forward, drop, serve-from-cache

zone-name

Description Specify zone name

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

sharded-domain-group-list

Specification	Value
Type	*list*
Block object keys	

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

match-action

Description 'forward': Forward query to server (default); 'tunnel-encap': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: forward, tunnel-encap

Default: forward

name

Description DNS sharded domain group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sharded-domain-list-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}/sharded-domain-list-policy/{name}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sharded-domain-group-list_sharded-domain-list-policy-list

Specification	Value
Type	*list*
Block object keys	

client-ipv4

Description Client ipv4 address

Type: string

Format: ipv4-address

client-ipv6

Description Client ipv6 address

Type: string

Format: ipv6-address

dns-notify-enable-ipv4

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-notify-enable-ipv6

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force

Description Force update even the serial is the same

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-refresh

Description Manually refresh the particular zone

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

name

Description DNS sharded domain list policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

packet-capturing

Description: packet-capturing is a **JSON Block**. Please see below for *sharded-domain-group-list_sharded-domain-list-policy-list_packet-capturing*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}/sharded-domain-list-policy/{name}/packet-capturing*

refresh-interval-hours

Description Zone transfer refresh rate in hours (Default 4). 0 means no refresh

Type: number

Range: 0-24

Default: 4

server-ipv4

Description Master ipv4 address

Type: string

Format: ipv4-address

server-ipv6

Description Master ipv6 address

Type: string

Format: ipv6-address

server-v4-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

server-v6-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sharded-domain-group-list_sharded-domain-list-policy-list_packet-capturing

Specification	Value
Type	*object*

root-zone-list

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sharded-domain-group-list_sharded-domain-list-policy-list_packet-capturing_root-zone-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

capture-mode

Description 'regular': Capture packet anyway; 'capture-on-failure': Capture packet if last XFR was failed;

Type: string

Supported Values: regular, capture-on-failure

root-zone

Description Specify root zone to be captured

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

disable-zone-transfer-in-oper-mode

Description Disable operational refreshing zone transfer

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-zone-transfer-in-warm-up-mode

Description Disable warm up zone transfer

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

edns-udp-size

Description Set the global maximum EDNS UDP message size (Default: 1232)

Type: number

Range: 512-4096

Default: 1232

enable-cache-warm-up-bgp-advertise

Description Enable route injection during cold boot

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-concurrent-zone-transfers

Description: max-concurrent-zone-transfers is a **JSON Block**. Please see below for *max-concurrent-zone-transfers*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache-config/max-concurrent-zone-transfers*

minimal-truncation-responses

Description Enable sending an empty DNS message when the response is truncated.

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

max-concurrent-zone-transfers

Specification	Value
Type	*object*

operational-mode

Description Number of concurrent zone transfers after boot

Type: number

Range: 1-3120

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

warm-up-mode

Description Number of concurrent zone transfers during cold boot (default 65472)

Type: number

Range: 100-65535

Default: 65472

2.33.35 ddos dns-cache-config max-concurrent-zone-transfers

Cold-Boot configuration

max-concurrent-zone-transfers Specification

Parameter	Value

domain-group attributes

domain-list-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group/domain-list-policy/{name}*

name

Description DNS domain group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

domain-list-policy-list

Specification	Value
Type	*list*
Block object keys	

cache-all-records

Description cache all fqdn records including uncommon types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: cache-all-records and cache-dnssec-records are mutually exclusive

cache-dnssec-records

Description cache all DNSSEC FQDN records types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: cache-dnssec-records and cache-all-records are mutually exclusive

client-ipv4

Description Client ipv4 address

Type: string

Format: ipv4-address

client-ipv6

Description Client ipv6 address

Type: string

Format: ipv6-address

dns-notify-enable-ipv4

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-notify-enable-ipv6

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force

Description Force update even the serial is the same

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-refresh

Description Manually refresh the particular zone

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

name

Description DNS domain list policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

oversize-answer-response

Description 'set-truncate-bit': Set the TC bit for oversize answer(default); 'disable-truncate-bit': Do not set TC bit for oversize answer;

Type: string

Supported Values: set-truncate-bit, disable-truncate-bit

Default: set-truncate-bit

packet-capturing

Description: packet-capturing is a **JSON Block**. Please see below for *domain-list-policy-list_packet-capturing*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/domain-group/domain-list-policy/{name}/packet-capturing*

refresh-interval-hours

Description Zone transfer refresh rate in hours (Default 4). 0 means no refresh

Type: number

Range: 0-24

Default: 4

resolve-cname-record

Description Always try to resolve domain in CNAME record answer section

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

respond-with-authority

Description Respond with authority section for all requests under this list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server-ipv4

Description Master ipv4 address

Type: string

Format: ipv4-address

server-ipv6

Description Master ipv6 address

Type: string

Format: ipv6-address

server-v4-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

server-v6-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

ttl-override

Description Override the TTL value for zone transfer

Type: number

Range: 1-2147483647

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

domain-list-policy-list_packet-capturing

Specification	Value
Type	*object*

root-zone-list

Type: List

insert_suffix_fqdn_node_fail

Description Insert Suffix FQDN Node Fail

Type: number

Format: counter

insert_total

Description Insert Total

Type: number

Format: counter

lookup_any_type_query_action_drop

Description Lookup DNS ANY Type Query Action Drop

Type: number

Format: counter

lookup_any_type_query_action_refused

Description Lookup DNS ANY Type Query Action Refused

Type: number

Format: counter

lookup_any_type_query_action_resp_empty

Description Lookup DNS ANY Type Query Action Response Empty

Type: number

Format: counter

lookup_default_action_drop

Description Lookup DNS Default Action Drop

Type: number

Format: counter

lookup_default_action_forward

Description Lookup DNS Default Action Forward

Type: number

Format: counter

lookup_deleg_resp

Description Lookup Delegation Response

Type: number

Format: counter

lookup_dnstcp_rcvd

Description Lookup DNS-TCP Request Received

Type: number

Format: counter

lookup_dnsudp_rcvd

Description Lookup DNS-UDP Request Received

Type: number

Format: counter

lookup_edns_bad_version_resp

Description Lookup EDNS Bad Version Response

Type: number

Format: counter

lookup_empty_resp

Description Lookup Empty Response

Type: number

Format: counter

lookup_full_matched

Description Lookup Fully Matched

Type: number

Format: counter

lookup_fwd_server

Description Lookup Forwarded to Server

Type: number

Format: counter

lookup_fwd_shard

Description Lookup Forwarded to Sharding DNS Cache

Type: number

Format: counter

lookup_incomp_zone

Description Lookup Incomplete Zone

Type: number

Format: counter

lookup_invalid_domain

Description Lookup Invalid Domain

Type: number

Format: counter

lookup_manual_override_action_drop

Description Lookup DNS Manual Override Action Drop

Type: number

Format: counter

lookup_manual_override_action_forward

Description Lookup DNS Manual Override Action Forward

Type: number

Format: counter

lookup_manual_override_action_serve

Description Lookup DNS Manual Override Action Serve

Type: number

Format: counter

lookup_non_auth_zone_query_action_drop

Description Lookup DNS Non-Authoritative Zone Query Action Drop

Type: number

Format: counter

lookup_non_auth_zone_query_action_forward

Description Lookup DNS Non-Authoritative Zone Query Action Forward

Type: number

Format: counter

lookup_non_auth_zone_query_action_resp_refused

Description Lookup DNS Non-Authoritative Zone Query Action Refused

Type: number

Format: counter

lookup_nxdomain_resp

Description Lookup Nxdomain Response

Type: number

Format: counter

lookup_opcode_notimpl_resp

Description Lookup Opcode Not Implemented Response

Type: number

Format: counter

lookup_refuse_resp

Description Lookup Refuse Response

Type: number

Format: counter

lookup_servfail_resp

Description Lookup Server Fail Response

Type: number

Format: counter

lookup_undefined_rtype

Description Lookup Undefined Record Type

Type: number

Format: counter

lookup_unexp_err

Description Lookup Unexpected Error

Type: number

Format: counter

shard_filter_match

Description Lookup Shard Filter Matched

Type: number

Format: counter

suffix_table_trylock_fail

Description DNS Cache Suffix Table Trylock Fail

Type: number

Format: counter

zone_apex_suffix_node_insert_fail

Description Zone Apex Suffix Node Insert Fail

Type: number

Format: counter

zt_axfr_attempts

Description Zone Transfer AXFR Started

Type: number

Format: counter

zt_completed_no_update

Description Zone Transfer Completed No Update

Type: number

Format: counter

zt_completed_ok

Description Zone Transfer Completed

Type: number

Format: counter

zt_dns_process_err

Description Zone Transfer DNS Processing Errors

Type: number

Format: counter

zt_msg_rcode_notauth

Description Zone Transfer Server Not Auth Fail

Type: number

Format: counter

zt_ongoing_tasks

Description Zone Transfer Ongoing tasks

Type: number

Format: counter

zt_records_processed

Description Zone Transfer Records Processed

Type: number

Format: counter

zt_serial_num_check_attempts

Description Zone Transfer Serial Number Check Started

Type: number

Format: counter

zt_task_no_route_retry

Description Zone Transfer Task No Route Fail

Type: number

Format: counter

zt_tcp_conn_connect_server_fail

Description Zone Transfer TCP Connect Server Fail

Type: number

Format: counter

zt_tcp_conn_rst

Description Zone Transfer TCP RST / FIN Received

Type: number

Format: counter

zt_total_fail

Description Zone Transfer Total Failure

Type: number

Format: counter

2.33.43 ddos dns-cache sharded-domain-group

DNS Sharded Domain Group

sharded-domain-group Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*name*
Collection Name	*sharded-domain-group-list*
Collection URI	/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group
Element Name	sharded-domain-group
Element URI	/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}
Element Attributes	sharded-domain-group_attributes
Partition Visibility	shared
Schema	`sharded-domain-group schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group

sharded-domain-group attributes

Create List

POST

/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group

sharded-domain-group attributes

Get Object

GET

/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}

sharded-domain-group attributes

Get List

GET

/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group

sharded-domain-group-list

Modify Object

POST

/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}

sharded-domain-group attributes

Replace Object

PUT

/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}

Delete Object

DELETE

/axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}

sharded-domain-group attributes

sharded-domain-group-list

sharded-domain-group-list is **JSON List** of *sharded-domain-group attributes*

sharded-domain-group-list : [

{ *sharded-domain-group attributes* },

{ *sharded-domain-group attributes* },

...

]

sharded-domain-group attributes

encap-template

Description DDOS encap template to sepcify the tunnel endpoint

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

match-action

Description 'forward': Forward query to server (default); 'tunnel-encap': Encapsulate the query and send on a tunnel;

Type: string

Supported Values: forward, tunnel-encap

Default: forward

name

Description DNS sharded domain group

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sharded-domain-list-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}/sharded-domain-list-policy/{name}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sharded-domain-list-policy-list

Specification	Value
Type	*list*
Block object keys	

client-ipv4

Description Client ipv4 address

Type: string

Format: ipv4-address

client-ipv6

Description Client ipv6 address

Type: string

Format: ipv6-address

dns-notify-enable-ipv4

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-notify-enable-ipv6

Description DNS notify enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

force

Description Force update even the serial is the same

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-refresh

Description Manually refresh the particular zone

Type: string

Format: string-rlx

Maximum Length: 253 characters

Maximum Length: 1 characters

name

Description DNS sharded domain list policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

packet-capturing

Description: packet-capturing is a **JSON Block**. Please see below for *sharded-domain-list-policy-list_packet-capturing*

Type: Object

Reference Object: */axapi/v3/ddos/dns-cache/{name}/sharded-domain-group/{name}/sharded-domain-list-policy/{name}/packet-capturing*

refresh-interval-hours

Description Zone transfer refresh rate in hours (Default 4). 0 means no refresh

Type: number

Range: 0-24

Default: 4

server-ipv4

Description Master ipv4 address

Type: string

Format: ipv4-address

server-ipv6

Description Master ipv6 address

Type: string

Format: ipv6-address

server-v4-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

server-v6-port

Description Port number (default 53)

Type: number

Range: 1-65535

Default: 53

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sharded-domain-list-policy-list_packet-capturing

Specification	Value
Type	*object*

root-zone-list

Type: List

2.33.49 ddos dns-logging

DNS Logging template

dns-logging Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*name*
Collection Name	*dns-logging-list*
Collection URI	/axapi/v3/ddos/dns-logging
Element Name	dns-logging
Element URI	/axapi/v3/ddos/dns-logging/{name}
Element Attributes	dns-logging_attributes
Partition Visibility	shared
Schema	`dns-logging schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dns-logging

dns-logging attributes

```
POST /axapi/v3/ddos/dns-logging/
Payload:
{
```

(continues on next page)

(continued from previous page)

```
    "dns-logging": {
        "name": "a",
        "user-tag": "a"
    }
}
```

Create List

POST

/axapi/v3/ddos/dns-logging

dns-logging attributes

Get Object

GET

/axapi/v3/ddos/dns-logging/{name}

dns-logging attributes

```
GET /axapi/v3/ddos/dns-logging/a
Reponse:
{
    "dns-logging": {
        "name": "a",
        "disable": 0,
        "uuid": "08d94046-085c-11f0-bc03-3dc8e3bd18dc",
        "user-tag": "a",
        "a10-url": "/axapi/v3/ddos/dns-logging/a"
    }
}
```

Get List

GET

/axapi/v3/ddos/dns-logging

dns-logging-list

Modify Object

POST

/axapi/v3/ddos/dns-logging/{name}

dns-logging attributes

Replace Object

PUT

/axapi/v3/ddos/dns-logging/{name}

dns-logging attributes

```
PUT /axapi/v3/ddos/dns-logging/a
```

(continues on next page)

(continued from previous page)

```
Payload:

    "dns-logging": {
        "name": "a",
        "user-tag": "abcd"
    }
}
```

Replace List

PUT

/axapi/v3/ddos/dns-logging

dns-logging-list

Delete Object

DELETE

/axapi/v3/ddos/dns-logging/{name}

dns-logging attributes

```
DELETE /axapi/v3/ddos/dns-logging/a
Reponse:
{
    "response": {
        "http-status": 200,
        "status": "OK",
        "msg": "Success"
    }
}
```

dns-logging-list

dns-logging-list is **JSON List** of *dns-logging attributes*

dns-logging-list : [

{ *dns-logging attributes* },

{ *dns-logging attributes* },

...

]

dns-logging attributes

disable

Description Disable DNS Logging template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-logging-protocol

Description 'both': Log DNS over tcp and udp; 'tcp': Log DNS over tcp; 'udp': Log DNS over udp;

Type: string

Supported Values: both, tcp, udp

dns-logging-request-section

Description 'all': Log DNS header and question section; 'header': Log DNS header information; 'question': Log DNS question section;

Type: string

Supported Values: all, header, question

dns-logging-type

Description 'query': DNS Query Logging;

Type: string

Supported Values: query

name

Description DNS Logging Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.50 ddos dns-tcp-port stats

Statistics for the object dns-tcp-port

dns-tcp-port Specification

Parameter	Value

Description: stats is a **JSON Block**. Please see below for *stats*

Type: Object

stats

Specification	Value
Type	*object*

ack_auth_fail

Description ACK Retry Dropped

Type: number

Format: counter

ack_retry_blacklist

Description ACK Retry Timeout Blacklisted

Type: number

Format: counter

ack_retry_gap_drop

Description ACK Retry Retry-Gap Dropped

Type: number

Format: counter

ack_retry_init

Description ACK Retry Init

Type: number

Format: counter

ack_retry_pass

Description ACK Retry Passed

Type: number

Format: counter

ack_retry_reset

Description ACK Retry Timeout Reset

Type: number

Format: counter

ack_retry_rto_fail

Description ACK Retry RTO Dropped

Type: number

Format: counter

ack_retry_rto_pass

Description ACK Retry RTO Passed

Type: number

Format: counter

ack_retry_rto_progress

Description ACK Retry RTO Progress

Type: number

Format: counter

ack_retry_timeout

Description ACK Retry Timeout

Type: number

Format: counter

alias_forward_rate_exceed

Description ALIAS Forward Rate Exceed

Type: number

Format: counter

bl

Description Dst Blacklisted

Type: number

Format: counter

conn_close

Description Connections Closed

Type: number

Format: counter

conn_close_half_open

Description Half Open Connections Closed

Type: number

Format: counter

conn_close_w_fin

Description FIN Connections Closed

Type: number

Format: counter

conn_close_w_idle

Description Idle Connections Closed

Type: number

Format: counter

conn_close_w_rst

Description RST Connections Closed

Type: number

Format: counter

conn_create_from_ack

Description Connections Created From ACK

Type: number

Format: counter

conn_create_from_syn

Description Connections Created From SYN

Type: number

Format: counter

conn_create_from_synack

Description Connections Created From SYNACK

Type: number

Format: counter

conn_ofo_rate_excd

Description TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

conn_prate_excd

Description TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

conn_rexmit_rate_excd

Description TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

conn_zwindow_rate_excd

Description TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

create_conn_non_syn_dropped

Description Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

dg_action_default

Description Domain Group Action Default

Type: number

Format: counter

dg_action_deny

Description Domain Group Action Deny

Type: number

Format: counter

dg_action_permit

Description Domain Group Action Permit

Type: number

Format: counter

dg_rate_exceed

Description Domain Group Domain Query Rate Exceeded

Type: number

Format: counter

dg_request_check_fail

Description Domain Group Request Check Fail

Type: number

Format: counter

dns_fqdn_label_len_exceed

Description FQDN Label Length Exceeded

Type: number

Format: counter

dns_fqdn_stage_2_rate_exceed

Description FQDN Rate Exceeded

Type: number

Format: counter

dns_malform

Description Malform Query

Type: number

Format: counter

dns_malform_drop

Description Malform Query Dropped

Type: number

Format: counter

dns_query_class_any

Description Query Class ANY

Type: number

Format: counter

dns_query_class_chaos

Description Query Class CHAOS

Type: number

Format: counter

dns_query_class_csnet

Description Query Class CSNET

Type: number

Format: counter

dns_query_class_hs

Description Query Class HESIOD

Type: number

Format: counter

dns_query_class_in

Description Query Class INTERNET

Type: number

Format: counter

dns_query_class_none

Description Query Class NONE

Type: number

Format: counter

dns_query_class_whitelist_miss

Description Query Class Whitelist Miss

Type: number

Format: counter

dnssec_wildcard_forward_rate_exceed

Description DNSSEC Wildcard Forward Rate Exceed

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action WL

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

force_tcp_auth_pass

Description Auth Force-TCP Passed

Type: number

Format: counter

fqdn_label_count_exceed

Description FQDN Label Count Exceeded

Type: number

Format: counter

fqdn_rate_by_label_count_check

Description FQDN Rate by Label Count Checked

Type: number

Format: counter

fqdn_rate_by_label_count_exceed

Description FQDN Rate by Label Count Exceeded

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

Format: counter

hybrid_auth_auth_no_match_rst_rcv

Description SYN Auth Hybrid Auth No Match Drop: RST Received

Type: number

Format: counter

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

is_nxdomain

Description NXDOMAIN Response

Type: number

Format: counter

non_query_opcode_pass_through

Description Non Query Opcode Pass Through

Type: number

Format: counter

nxdomain_bl_drop

Description NXDOMAIN Response Blacklisted

Type: number

Format: counter

nxdomain_drop

Description NXDOMAIN Response Dropped

Type: number

Format: counter

nxdomain_rate_exceed

Description NXDOMAIN Response Rate Exceeded

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Description Src Out-Of-Seq Exceeded

Type: number

Format: counter

src_policy_drop

Description Src Policy Dropped

Type: number

Format: counter

src_query_type_any_drop

Description Src Query Type ANY Dropped

Type: number

Format: counter

src_rate_limit_type0

Description Src Request Rate 1 Exceeded

Type: number

Format: counter

src_rate_limit_type1

Description Src Request Rate 2 Exceeded

Type: number

Format: counter

src_rate_limit_type2

Description Src Request Rate 3 Exceeded

Type: number

Format: counter

src_rate_limit_type3

Description Src Request Rate 4 Exceeded

Type: number

Format: counter

src_rate_limit_type4

Description Src Request Rate 5 Exceeded

Type: number

Format: counter

src_retransmit_excd

Description Src Retransmit Exceeded

Type: number

Format: counter

src_rst_cookie_fail

Description Src RST Cookie Failed

Type: number

Format: counter

src_small_window_excd

Description Src Small-Window Exceeded

Type: number

Format: counter

src_syn_auth_fail

Description Src SYN Auth Failed

Type: number

Format: counter

src_syn_cookie_fail

Description Src SYN Cookie Failed

Type: number

Format: counter

src_syn_cookie_sent

Description Src SYN Cookie Sent

Type: number

Format: counter

src_syn_rate_exceed

Description Src TCP SYN Rate Exceeded

Type: number

Format: counter

src_syn_retry_blacklist

Description Src SYN Retry Timeout Blacklisted

Type: number

Format: counter

src_syn_retry_failed

Description Src SYN Retry Dropped

Type: number

Format: counter

src_syn_retry_gap_drop

Description Src SYN Retry-Gap Dropped

Type: number

Format: counter

src_syn_retry_init

Description Src SYN Retry Init

Type: number

Format: counter

src_syn_retry_reset

Description Src SYN Retry Timeout Reset

Type: number

Format: counter

src_syn_retry_rto_fail

Description Src SYN Retry RTO Dropped

Type: number

Format: counter

src_syn_retry_rto_pass

Description Src SYN Retry RTO Passed

Type: number

Format: counter

src_syn_retry_rto_progress

Description Src SYN Retry RTO Progress

Type: number

Format: counter

src_syn_retry_timeout

Description Src SYN Retry Timeout

Type: number

Format: counter

src_tcp_auth_rst

Description Src TCP Auth Reset

Type: number

Format: counter

src_unauth_drop

Description Src TCP Unauth Dropped

Type: number

Format: counter

src_well_known_port

Description Src TCP SrcPort Wellknown

Type: number

Format: counter

src_zero_window_excd

Description Src Zero-Window Exceeded

Type: number

Format: counter

syn_auth_fail

Description SYN Auth Failed

Type: number

Format: counter

syn_auth_pass

Description SYN Auth Passed

Type: number

Format: counter

syn_auth_rst_ack_drop

Description SYN Auth RST-ACK Dropped

Type: number

Format: counter

syn_cookie_fail

Description SYN Cookie Failed

Type: number

Format: counter

syn_cookie_sent

Description SYN Cookie Sent

Type: number

Format: counter

syn_drop

Description SYN Dropped

Type: number

Format: counter

syn_retry_blacklist

Description SYN Retry Timeout Blacklisted

Type: number

Format: counter

syn_retry_failed

Description SYN Retry Dropped

Type: number

Format: counter

syn_retry_gap_drop

Description SYN Retry-Gap Dropped

Type: number

Format: counter

syn_retry_init

Description SYN Retry Init

Type: number

Format: counter

syn_retry_pass

Description SYN Retry Passed

Type: number

Format: counter

syn_retry_reset

Description SYN Retry Timeout Reset

Type: number

Format: counter

syn_retry_rto_fail

Description SYN Retry RTO Dropped

Type: number

Format: counter

syn_retry_rto_pass

Description SYN Retry RTO Passed

Type: number

Format: counter

syn_retry_rto_progress

Description SYN Retry RTO Progress

Type: number

Format: counter

syn_retry_timeout

Description SYN Retry Timeout

Type: number

Format: counter

syn_tfo_rcv

Description SYN TFO Received

Type: number

Format: counter

synack_multiple_attempts_per_ip_detected

Description SYNACK Multiple Attempts Per IP Detected

Type: number

Format: counter

synack_reset_sent

Description SYNACK Reset Sent

Type: number

Format: counter

tcp_ack_data_drop

Description TCP ACK with Data Dropped

Type: number

Format: counter

tcp_ack_data_fwd

Description TCP ACK with Data Forward

Type: number

Format: counter

tcp_ack_data_rcvd

Description TCP ACK with Data Received

Type: number

Format: counter

tcp_ack_drop

Description TCP ACK Dropped

Type: number

Format: counter

tcp_ack_fwd

Description TCP ACK Forward

Type: number

Format: counter

tcp_ack_rcvd

Description TCP ACK Received

Type: number

Format: counter

tcp_auth_drop

Description TCP Auth Dropped

Type: number

Format: counter

tcp_auth_drop_ack

Description TCP Auth Dropped: ACK

Type: number

Format: counter

tcp_auth_drop_ack_fail_auth

Description TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

tcp_auth_drop_ack_pass_auth

Description TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

tcp_auth_drop_ack_xmit

Description TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

tcp_auth_drop_rst

Description TCP Auth Dropped: RST

Type: number

Format: counter

tcp_auth_drop_rst_fail_auth

Description TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

tcp_auth_drop_rst_pass_auth

Description TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

tcp_auth_drop_rst_xmit

Description TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

tcp_auth_drop_syn

Description TCP Auth Dropped: SYN

Type: number

Format: counter

tcp_auth_resp

Description TCP Auth Responded

Type: number

Format: counter

tcp_auth_rst

Description TCP Auth Reset

Type: number

Format: counter

tcp_cwr_drop

Description TCP CWR Dropped

Type: number

Format: counter

tcp_cwr_fwd

Description TCP CWR Forward

Type: number

Format: counter

tcp_cwr_rcvd

Description TCP CWR Received

Type: number

Format: counter

tcp_ece_drop

Description TCP ECE Dropped

Type: number

Format: counter

tcp_ece_fwd

Description TCP ECE Forward

Type: number

Format: counter

tcp_ece_rcvd

Description TCP ECE Received

Type: number

Format: counter

tcp_empty_ack_drop

Description TCP Empty ACK Dropped

Type: number

Format: counter

tcp_empty_ack_fwd

Description TCP Empty ACK Forward

Type: number

Format: counter

tcp_empty_ack_rcvd

Description TCP Empty ACK Received

Type: number

Format: counter

tcp_fin_ack_drop

Description TCP FIN ACK Dropped

Type: number

Format: counter

tcp_fin_ack_fwd

Description TCP FIN ACK Forward

Type: number

Format: counter

tcp_fin_ack_rcvd

Description TCP FIN ACK Received

Type: number

Format: counter

tcp_fin_drop

Description TCP FIN Dropped

Type: number

Format: counter

tcp_fin_fwd

Description TCP FIN Forward

Type: number

Format: counter

tcp_fin_psh_ack_drop

Description TCP FIN PSH ACK Drop

Type: number

Format: counter

tcp_fin_psh_ack_fwd

Description TCP FIN PSH ACK Forward

Type: number

Format: counter

tcp_fin_psh_ack_rcvd

Description TCP FIN PSH ACK Received

Type: number

Format: counter

tcp_fin_rcvd

Description TCP FIN Received

Type: number

Format: counter

tcp_psh_ack_drop

Description TCP PSH ACK Dropped

Type: number

Format: counter

tcp_psh_ack_fwd

Description TCP PSH ACK Forward

Type: number

Format: counter

tcp_psh_ack_rcvd

Description TCP PSH ACK Received

Type: number

Format: counter

tcp_psh_drop

Description TCP PSH Dropped

Type: number

Format: counter

tcp_psh_fwd

Description TCP PSH Forward

Type: number

Format: counter

tcp_psh_rcvd

Description TCP PSH Received

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP SYN Retransmit Exceeded Blacklist

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP SYN Retransmit Exceeded Drop

Type: number

Format: counter

tcp_rst_ack_drop

Description TCP RST ACK Dropped

Type: number

Format: counter

tcp_rst_ack_fwd

Description TCP RST ACK Forward

Type: number

Format: counter

tcp_rst_ack_rcvd

Description TCP RST ACK Received

Type: number

Format: counter

tcp_rst_drop

Description TCP RST Dropped

Type: number

Format: counter

tcp_rst_fwd

Description TCP RST Forward

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Type: number

Format: counter

tcp_syn_ack_drop

Description TCP SYN ACK Dropped

Type: number

Format: counter

tcp_syn_ack_fwd

Description TCP SYN ACK Forward

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_fwd

Description SYN Forward

Type: number

Format: counter

tcp_syn_rcvd

Description TCP Inbound SYN Received

Type: number

Format: counter

tcp_urg_drop

Description TCP URG Dropped

Type: number

Format: counter

tcp_urg_fwd

Description TCP URG Forward

Type: number

Format: counter

tcp_urg_rcvd

Description TCP URG Received

Type: number

Format: counter

unauth_drop

Description TCP Unauth Dropped

Type: number

Format: counter

wellknown_sport_drop

Description TCP SrcPort Wellknown

Type: number

Format: counter

zero_window_excd

Description Zero-Window Exceeded

Type: number

Format: counter

2.33.51 ddos dns-tcp-zone-port stats

Statistics for the object dns-tcp-zone-port

dns-tcp-zone-port Specification

Parameter	Value
Type	*Collection*
Collection Name	*dns-tcp-zone-port-list*
Collection URI	/axapi/v3/ddos/dns-tcp-zone-port
Element Name	dns-tcp-zone-port
Element URI	/axapi/v3/ddos/dns-tcp-zone-port/stats
Element Attributes	dns-tcp-zone-port_attributes
Partition Visibility	None
Schema	`dns-tcp-zone-port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dns-tcp-zone-port

dns-tcp-zone-port attributes

Create List

POST

/axapi/v3/ddos/dns-tcp-zone-port

dns-tcp-zone-port attributes

Get Object

GET

/axapi/v3/ddos/dns-tcp-zone-port/stats

dns-tcp-zone-port attributes

Get List

GET

/axapi/v3/ddos/dns-tcp-zone-port

dns-tcp-zone-port-list

Modify Object

POST

/axapi/v3/ddos/dns-tcp-zone-port/stats

dns-tcp-zone-port attributes

Replace Object

PUT

/axapi/v3/ddos/dns-tcp-zone-port/stats

dns-tcp-zone-port attributes

Replace List

PUT

/axapi/v3/ddos/dns-tcp-zone-port

dns-tcp-zone-port-list

Delete Object

DELETE

/axapi/v3/ddos/dns-tcp-zone-port/stats

dns-tcp-zone-port attributes

dns-tcp-zone-port-list

dns-tcp-zone-port-list is **JSON List** of *dns-tcp-zone-port attributes*

```
dns-tcp-zone-port-list : [
        { dns-tcp-zone-port attributes },
        { dns-tcp-zone-port attributes },
        ...
    ]
```

dns-tcp-zone-port attributes

Type	*object*

ack_auth_fail

Description ACK Retry Dropped

Type: number

Format: counter

ack_retry_blacklist

Description ACK Retry Timeout Blacklisted

Type: number

Format: counter

ack_retry_gap_drop

Description ACK Retry Retry-Gap Dropped

Type: number

Format: counter

ack_retry_init

Description ACK Retry Init

Type: number

Format: counter

ack_retry_pass

Description ACK Retry Passed

Type: number

Format: counter

ack_retry_reset

Description ACK Retry Timeout Reset

Type: number

Format: counter

ack_retry_rto_fail

Description ACK Retry RTO Dropped

Type: number

Format: counter

ack_retry_rto_pass

Description ACK Retry RTO Passed

Type: number

Format: counter

ack_retry_rto_progress

Description ACK Retry RTO Progress

Type: number

Format: counter

ack_retry_timeout

Description ACK Retry Timeout

Type: number

Format: counter

alias_forward_rate_exceed

Description ALIAS Forward Rate Exceed

Type: number

Format: counter

all_src_session_reset

Description Session Reset for All Src Upon Level Escalation

Type: number

Format: counter

bl

Description Dst Blacklisted

Type: number

Format: counter

clear_session_upon_deescalation

Description Clear Session Upon De-escalation to Level 0

Type: number

Format: counter

conn_close

Description Connections Closed

Type: number

Format: counter

conn_close_half_open

Description Half Open Connections Closed

Type: number

Format: counter

conn_close_w_fin

Description FIN Connections Closed

Type: number

Format: counter

conn_close_w_idle

Description Idle Connections Closed

Type: number

Format: counter

conn_close_w_rst

Description RST Connections Closed

Type: number

Format: counter

conn_create_from_ack

Description Connections Created From ACK

Type: number

Format: counter

conn_create_from_syn

Description Connections Created From SYN

Type: number

Format: counter

conn_create_from_synack

Description Connections Created From SYNACK

Type: number

Format: counter

conn_ofo_rate_excd

Description TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

conn_prate_excd

Description TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

conn_rexmit_rate_excd

Description TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

conn_zwindow_rate_excd

Description TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

create_conn_non_syn_dropped

Description Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

current_es_level

Description Current Escalation Level

Type: number

Format: counter

dg_action_default

Description Domain Group Action Default

Type: number

Format: counter

dg_action_deny

Description Domain Group Action Deny

Type: number

Format: counter

dg_action_permit

Description Domain Group Action Permit

Type: number

Format: counter

dg_rate_exceed

Description Domain Group Domain Query Rate Exceeded

Type: number

Format: counter

dg_request_check_fail

Description Domain Group Request Check Fail

Type: number

Format: counter

dns_malform

Description Malform Query

Type: number

Format: counter

dns_query_class_any

Description Query Class ANY

Type: number

Format: counter

dns_query_class_chaos

Description Query Class CHAOS

Type: number

Format: counter

dns_query_class_csnet

Description Query Class CSNET

Type: number

Format: counter

dns_query_class_hs

Description Query Class HESIOD

Type: number

Format: counter

dns_query_class_in

Description Query Class INTERNET

Type: number

Format: counter

dns_query_class_none

Description Query Class NONE

Type: number

Format: counter

dns_query_class_whitelist_miss

Description Query Class Whitelist Miss

Type: number

Format: counter

dnssec_wildcard_forward_rate_exceed

Description DNSSEC Wildcard Forward Rate Exceed

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

dst_hw_drop_inserted

Description Dst Hardware Drop Rules Inserted

Type: number

Format: counter

dst_hw_drop_removed

Description Dst Hardware Drop Rules Removed

Type: number

Format: counter

dst_tcp_conn_half_open_timeout

Description Half Open Connections Timeout

Type: number

Format: counter

dst_tcp_conn_half_open_timeout_rst_sent

Description Half Open Connections Timeout RST Sent

Type: number

Format: counter

dst_tcp_sess_aged_rst_sent

Description Sessions Aged Out RST Sent

Type: number

Format: counter

dynamic_count_warn

Description dynamic-entry-count warning send

Type: number

Format: counter

ew_inbound_port_byte_drop

Description East-West Inbound Bytes Dropped

Type: number

Format: counter

ew_inbound_port_byte_rcv

Description East-West Inbound Bytes Recevied

Type: number

Format: counter

ew_inbound_port_byte_sent

Description East-West Inbound Bytes Forwarded

Type: number

Format: counter

ew_inbound_port_drop

Description East-West Inbound Packets Dropped

Type: number

Format: counter

ew_inbound_port_rcv

Description East-West Inbound Packets Received

Type: number

Format: counter

ew_inbound_port_sent

Description East-West Inbound Packets Forwarded

Type: number

Format: counter

ew_outbound_port_byte_drop

Description East-West Outbound Bytes Forwarded

Type: number

Format: counter

ew_outbound_port_byte_rcv

Description East-West Outbound Bytes Recevied

Type: number

Format: counter

ew_outbound_port_byte_sent

Description East-West Outbound Bytes Dropped

Type: number

Format: counter

ew_outbound_port_drop

Description East-West Outbound Packets Dropped

Type: number

Format: counter

ew_outbound_port_rcv

Description East-West Outbound Packets Received

Type: number

Format: counter

ew_outbound_port_sent

Description East-West Outbound Packets Forwarded

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action WL

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

force_tcp_auth_pass

Description Auth Force-TCP Passed

Type: number

Format: counter

fqdn_label_count_exceed

Description FQDN Label Count Exceeded

Type: number

Format: counter

fqdn_label_len_exceed

Description FQDN Label Length Exceeded

Type: number

Format: counter

fqdn_rate_by_label_count_check

Description FQDN Rate by Label Count Checked

Type: number

Format: counter

fqdn_rate_by_label_count_exceed

Description FQDN Rate by Label Count Exceeded

Type: number

Format: counter

fqdn_stage_2_rate_exceed

Description FQDN Rate Exceeded

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

Format: counter

hybrid_auth_auth_no_match_rst_rcv

Description SYN Auth Hybrid Auth No Match Drop: RST Received

Type: number

Format: counter

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

ip_filtering_bl

Description IP Filtering Policy: Blacklisted

Type: number

Format: counter

ip_filtering_drop

Description IP Filtering Policy: Dropped

Type: number

Format: counter

is_nxdomain

Description NXDOMAIN Response

Type: number

Format: counter

malform_drop

Description Malform Query Dropped

Type: number

Format: counter

no_policy_class_list_match

Description No Policy Class-list Match

Type: number

Format: counter

no_route_drop

Description No Route Dropped

Type: number

Format: counter

non_query_opcode_pass_through

Description Non Query Opcode Pass Through

Type: number

Format: counter

nxdomain_bl_drop

Description NXDOMAIN Response Blacklisted

Type: number

Format: counter

nxdomain_drop

Description NXDOMAIN Response Dropped

Type: number

Format: counter

nxdomain_rate_exceed

Description NXDOMAIN Response Rate Exceeded

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

policy_drop

Description Policy Dropped

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_src_escalation

Description Src Escalation

Type: number

Format: counter

port_syn_rate_exceed

Description TCP SYN Rate Exceeded

Type: number

Format: counter

port_synack_rate_exceed

Description TCP SYNACK Rate Exceeded

Type: number

Format: counter

prog_conn_exceed_bl

Description Connection: Violation Exceed Blacklisted

Type: number

Format: counter

prog_conn_exceed_drop

Description Connection: Violation Exceed Dropped

Type: number

Format: counter

prog_conn_exceed_reset

Description Connection: Violation Exceed Reset

Type: number

Format: counter

prog_conn_rcvd_exceed

Description Connection: Received Exceed

Type: number

Format: counter

prog_conn_rcvd_sent_ratio_exceed

Description Connection: Reveived to Sent Ratio Exceed

Type: number

Format: counter

prog_conn_samples

Description Sample Collected: Connection

Type: number

Format: counter

prog_conn_samples_processed

Description Sample Processed: Connnection

Type: number

Format: counter

prog_conn_sent_exceed

Description Connection: Sent Exceed

Type: number

Format: counter

prog_conn_time_exceed

Description Connection: Time Exceed

Type: number

Format: counter

prog_exceed_bl

Description Req-Resp: Violation Exceed Blacklisted

Type: number

Format: counter

prog_exceed_drop

Description Req-Resp: Violation Exceed Dropped

Type: number

Format: counter

prog_exceed_reset

Description Req-Resp: Violation Exceed Reset

Type: number

Format: counter

prog_first_req_time_exceed

Description Req-Resp: First Request Time Exceed

Type: number

Format: counter

prog_query_exceed

Description Req-Resp: Client Query Time Exceed

Type: number

Format: counter

prog_req_resp_time_exceed

Description Req-Resp: Request to Response Time Exceed

Format: counter

prog_resp_pkt_rate_exceed

Description Req-Resp: Response Packet Rate Exceed

Type: number

Format: counter

prog_resp_req_time_exceed

Description Req-Resp: Response to Request Time Exceed

Type: number

Format: counter

prog_response_len_exceed

Description Req-Resp: Response Length Exceed

Type: number

Format: counter

prog_think_exceed

Description Req-Resp: Server Think Time Exceed

Type: number

Format: counter

prog_win_exceed_bl

Description Time Window: Violation Exceed Blacklisted

Type: number

Format: counter

prog_win_exceed_drop

Description Time Window: Violation Exceed Dropped

Type: number

Format: counter

prog_win_exceed_reset

Description Time Window: Violation Exceed Reset

Type: number

Format: counter

prog_win_rcvd_exceed

Description Time Window: Received Exceed

Type: number

Format: counter

prog_win_rcvd_sent_ratio_exceed

Description Time Window: Received to Sent Exceed

Type: number

Format: counter

prog_win_samples

Description Sample Collected: Time Window

Type: number

Format: counter

prog_win_samples_processed

Description Sample Processed: Time Window

Type: number

Format: counter

prog_win_sent_exceed

Description Time Window: Sent Exceed

Type: number

Format: counter

query_forward_rate_exceed

Description Query Foward Rate Exceed

Type: number

Format: counter

query_type_a

Description Query Type A

Type: number

Format: counter

query_type_aaaa

Description Query Type AAAA

Type: number

Format: counter

query_type_any

Description Query Type ANY

Type: number

Format: counter

query_type_any_drop

Description Query Type ANY Dropped

Type: number

Format: counter

query_type_cname

Description Query Type CNAME

Type: number

Format: counter

query_type_mx

Description Query Type MX

Type: number

Format: counter

query_type_ns

Description Query Type NS

Type: number

Format: counter

query_type_opt

Description Query Type OPT

Type: number

Format: counter

query_type_soa

Description Query Type SOA

Type: number

Format: counter

query_type_srv

Description Query Type SRV

Type: number

Format: counter

rate_limit_type0

Description Dst Request Rate 1 Exceeded

Type: number

Format: counter

rate_limit_type1

Description Dst Request Rate 2 Exceeded

Type: number

Format: counter

rate_limit_type2

Description Dst Request Rate 3 Exceeded

Type: number

Format: counter

rate_limit_type3

Description Dst Request Rate 4 Exceeded

Type: number

Format: counter

rate_limit_type4

Description Dst Request Rate 5 Exceeded

Type: number

Format: counter

req_retrans

Description Request Retransmit

Type: number

Format: counter

req_sent

Description DNS Requests Forwarded

Type: number

Format: counter

req_size_exceed

Description Request Size Exceeded

Type: number

Format: counter

retransmit_excd

Description Retransmit Exceeded

Type: number

Format: counter

rrsig_expire_drop

Description RRSIG Expire: Drop

Type: number

Format: counter

rrtype_drop

Description Record Type Dropped

Type: number

Format: counter

rst_cookie_fail

Description RST Cookie Failed

Type: number

Format: counter

same_sport_dport_drop

Description Same Source and Destination Port Drop

Type: number

Format: counter

secondary_port_conn_limm_exceed

Description Per Addr-Port Conn Limit Exceeded

Type: number

Format: counter

secondary_port_conn_rate_exceed

Description Per Addr-Port Conn Rate Exceeded

Type: number

Format: counter

secondary_port_hit

Description Per Addr-Port Hit

Type: number

Format: counter

secondary_port_kbit_rate_exceed

Description Per Addr-Port KiBit Rate Exceeded

Type: number

Format: counter

secondary_port_kbit_rate_exceed_pkt

Description Per Addr-Port KiBit Rate Exceeded Count

Type: number

Format: counter

secondary_port_pkt_rate_exceed

Description Per Addr-Port Packet Rate Exceeded

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Format: counter

small_window_excd

Description Small-Window Exceeded

Type: number

Format: counter

small_window_rcv

Description Small-Window Receive

Type: number

Format: counter

snat_fail

Description Source NAT Failure

Type: number

Format: counter

src_ack_auth_fail

Description Src ACK Retry Dropped

Type: number

Format: counter

src_ack_retry_blacklist

Description Src ACK Retry Timeout Blacklisted

Type: number

Format: counter

src_ack_retry_gap_drop

Description Src ACK Retry Retry-Gap Dropped

Type: number

Format: counter

src_ack_retry_init

Description Src ACK Retry Init

Type: number

Format: counter

src_ack_retry_reset

Description Src ACK Retry Timeout Reset

Type: number

Format: counter

src_ack_retry_rto_fail

Description Src ACK Retry RTO Dropped

Type: number

Format: counter

src_ack_retry_rto_pass

Description Src ACK Retry RTO Passed

Type: number

Format: counter

src_ack_retry_rto_progress

Description Src ACK Retry RTO Progress

Type: number

Format: counter

src_ack_retry_timeout

Description Src ACK Retry Timeout

Type: number

Format: counter

src_auth_drop

Description Src TCP Auth Dropped

Type: number

Format: counter

src_auth_drop_ack

Description Src TCP Auth Dropped: ACK

Type: number

Format: counter

src_auth_drop_ack_fail_auth

Description Src TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

src_auth_drop_ack_pass_auth

Description Src TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

src_auth_drop_ack_xmit

Description Src TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

src_auth_drop_rst

Description Src TCP Auth Dropped: RST

Type: number

Format: counter

src_auth_drop_rst_fail_auth

Description Src TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

src_auth_drop_rst_pass_auth

Description Src TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

src_auth_drop_rst_xmit

Description Src TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

src_auth_drop_syn

Description Src TCP Auth Dropped: SYN

Type: number

Format: counter

src_conn_ofo_rate_excd

Description Src TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

src_conn_pkt_rate_excd

Description Src TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

src_conn_rexmit_rate_excd

Description Src TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

src_conn_zwindow_rate_excd

Description Src TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

src_create_conn_non_syn_dropped

Description Src Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

src_dns_fqdn_label_len_exceed

Description Src FQDN Label Length Exceeded

Type: number

Format: counter

src_dns_malform

Description Src Malform Query

Type: number

Format: counter

src_dns_malform_drop

Description Src Malform Query Dropped

Type: number

Format: counter

src_drop

Description Src Packets Dropped

Type: number

Format: counter

src_filter1_match

Description Src Filter1 Match

Type: number

Format: counter

src_filter2_match

Description Src Filter2 Match

Type: number

Format: counter

src_filter3_match

Description Src Filter3 Match

Type: number

Format: counter

src_filter4_match

Description Src Filter4 Match

Type: number

Format: counter

src_filter5_match

Description Src Filter5 Match

Type: number

Format: counter

src_filter_action_blacklist

Description Src Filter Action Blacklist

Type: number

Format: counter

src_filter_action_default_pass

Description Src Filter Action Default Pass

Type: number

Format: counter

src_filter_action_drop

Description Src Filter Action Drop

Type: number

Format: counter

src_filter_action_whitelist

Description Src Filter Action WL

Type: number

Format: counter

src_filter_auth_fail

Description Src Filter Auth Failed

Type: number

Format: counter

src_filter_none_match

Description Src Filter No Match

Type: number

Format: counter

src_filter_total_not_match

Description Src Filter Not Matched on Pkt

Type: number

Format: counter

src_fqdn_label_count_exceed

Description Src FQDN Label Count Exceeded

Type: number

Format: counter

src_frag_drop

Description Src Fragmented Packets Dropped

Type: number

Format: counter

src_hw_drop

Description Src Hardware Packets Dropped

Type: number

Format: counter

src_hw_drop_inserted

Description Src Hardware Drop Rules Inserted

Type: number

Format: counter

src_hw_drop_removed

Description Src Hardware Drop Rules Removed

Type: number

Format: counter

src_learn_overflow

Description Source Dynamic Entry Overflow

Type: number

Format: counter

src_out_of_seq_excd

Description Src Out-Of-Seq Exceeded

Type: number

Format: counter

src_policy_drop

Description Src Policy Dropped

Type: number

Format: counter

src_query_type_any_drop

Description Src Query Type ANY Dropped

Type: number

Format: counter

src_rate_limit_type0

Description Src Request Rate 1 Exceeded

Type: number

Format: counter

src_rate_limit_type1

Description Src Request Rate 2 Exceeded

Type: number

Format: counter

src_rate_limit_type2

Description Src Request Rate 3 Exceeded

Type: number

Format: counter

src_rate_limit_type3

Description Src Request Rate 4 Exceeded

Type: number

Format: counter

src_rate_limit_type4

Description Src Request Rate 5 Exceeded

Type: number

Format: counter

src_retransmit_excd

Description Src Retransmit Exceeded

Type: number

Format: counter

src_rst_cookie_fail

Description Src RST Cookie Failed

Type: number

Format: counter

src_small_window_excd

Description Src Small-Window Exceeded

Type: number

Format: counter

src_syn_auth_fail

Description Src SYN Auth Failed

Type: number

Format: counter

src_syn_cookie_fail

Description Src SYN Cookie Failed

Type: number

Format: counter

src_syn_cookie_sent

Description Src SYN Cookie Sent

Type: number

Format: counter

src_syn_rate_exceed

Description Src TCP SYN Rate Exceeded

Type: number

Format: counter

src_syn_retry_blacklist

Description Src SYN Retry Timeout Blacklisted

Type: number

Format: counter

src_syn_retry_failed

Description Src SYN Retry Dropped

Type: number

Format: counter

src_syn_retry_gap_drop

Description Src SYN Retry-Gap Dropped

Type: number

Format: counter

src_syn_retry_init

Description Src SYN Retry Init

Type: number

Format: counter

src_syn_retry_reset

Description Src SYN Retry Timeout Reset

Type: number

Format: counter

src_syn_retry_rto_fail

Description Src SYN Retry RTO Dropped

Type: number

Format: counter

src_syn_retry_rto_pass

Description Src SYN Retry RTO Passed

Type: number

Format: counter

src_syn_retry_rto_progress

Description Src SYN Retry RTO Progress

Type: number

Format: counter

src_syn_retry_timeout

Description Src SYN Retry Timeout

Type: number

Format: counter

src_tcp_auth_rst

Description Src TCP Auth Reset

Type: number

Format: counter

src_unauth_drop

Description Src TCP Unauth Dropped

Type: number

Format: counter

src_well_known_port

Description Src TCP SrcPort Wellknown

Type: number

Format: counter

src_zero_window_excd

Description Src Zero-Window Exceeded

Type: number

Format: counter

src_zone_service_entry_aged

Description SrcZoneService Entry Aged

Type: number

Format: counter

src_zone_service_entry_hit

Description SrcZoneService Entry Hit

Type: number

Format: counter

src_zone_service_entry_learned

Description SrcZoneService Entry Learned

Type: number

Format: counter

syn_auth_fail

Description SYN Auth Failed

Type: number

Format: counter

syn_auth_pass

Description SYN Auth Passed

Type: number

Format: counter

syn_auth_rst_ack_drop

Description SYN Auth RST-ACK Dropped

Type: number

Format: counter

syn_cookie_fail

Description SYN Cookie Failed

Type: number

Format: counter

syn_cookie_sent

Description SYN Cookie Sent

Type: number

Format: counter

syn_drop

Description SYN Dropped

Type: number

Format: counter

syn_retry_blacklist

Description SYN Retry Timeout Blacklisted

Type: number

Format: counter

syn_retry_failed

Description SYN Retry Dropped

Type: number

Format: counter

syn_retry_gap_drop

Description SYN Retry-Gap Dropped

Type: number

Format: counter

syn_retry_init

Description SYN Retry Init

Type: number

Format: counter

syn_retry_pass

Description SYN Retry Passed

Type: number

Format: counter

syn_retry_reset

Description SYN Retry Timeout Reset

Type: number

Format: counter

syn_retry_rto_fail

Description SYN Retry RTO Dropped

Type: number

Format: counter

syn_retry_rto_pass

Description SYN Retry RTO Passed

Type: number

Format: counter

syn_retry_rto_progress

Description SYN Retry RTO Progress

Type: number

Format: counter

syn_retry_timeout

Description SYN Retry Timeout

Type: number

Format: counter

syn_tfo_rcv

Description SYN TFO Received

Type: number

Format: counter

synack_multiple_attempts_per_ip_detected

Description SYNACK Multiple Attempts Per IP Detected

Type: number

Format: counter

synack_reset_sent

Description SYNACK Reset Sent

Type: number

Format: counter

tcp_ack_data_drop

Description TCP ACK with Data Dropped

Type: number

Format: counter

tcp_ack_data_fwd

Description TCP ACK with Data Forward

Type: number

Format: counter

tcp_ack_data_rcvd

Description TCP ACK with Data Received

Type: number

Format: counter

tcp_ack_drop

Description TCP ACK Dropped

Type: number

Format: counter

tcp_ack_fwd

Description TCP ACK Forward

Type: number

Format: counter

tcp_ack_rcvd

Description TCP ACK Received

Type: number

Format: counter

tcp_auth_drop

Description TCP Auth Dropped

Type: number

Format: counter

tcp_auth_drop_ack

Description TCP Auth Dropped: ACK

Type: number

Format: counter

tcp_auth_drop_ack_fail_auth

Description TCP Auth Dropped: ACK Fail Auth

Type: number

Format: counter

tcp_auth_drop_ack_pass_auth

Description TCP Auth Dropped: ACK Pass Auth

Type: number

Format: counter

tcp_auth_drop_ack_xmit

Description TCP Auth Dropped: ACK Retransmit

Type: number

Format: counter

tcp_auth_drop_rst

Description TCP Auth Dropped: RST

Type: number

Format: counter

tcp_auth_drop_rst_fail_auth

Description TCP Auth Dropped: RST Fail Auth

Type: number

Format: counter

tcp_auth_drop_rst_pass_auth

Description TCP Auth Dropped: RST Pass Auth

Type: number

Format: counter

tcp_auth_drop_rst_xmit

Description TCP Auth Dropped: RST Retransmit

Type: number

Format: counter

tcp_auth_drop_syn

Description TCP Auth Dropped: SYN

Type: number

Format: counter

tcp_auth_resp

Description TCP Auth Responded

Type: number

Format: counter

tcp_auth_rst

Description TCP Auth Reset

Type: number

Format: counter

tcp_cwr_drop

Description TCP CWR Dropped

Type: number

Format: counter

tcp_cwr_fwd

Description TCP CWR Forward

Type: number

Format: counter

tcp_cwr_rcvd

Description TCP CWR Received

Type: number

Format: counter

tcp_ece_drop

Description TCP ECE Dropped

Type: number

Format: counter

tcp_ece_fwd

Description TCP ECE Forward

Type: number

Format: counter

tcp_ece_rcvd

Description TCP ECE Received

Type: number

Format: counter

tcp_empty_ack_drop

Description TCP Empty ACK Dropped

Type: number

Format: counter

tcp_empty_ack_fwd

Description TCP Empty ACK Forward

Type: number

Format: counter

tcp_empty_ack_rcvd

Description TCP Empty ACK Received

Type: number

Format: counter

tcp_fin_ack_drop

Description TCP FIN ACK Dropped

Type: number

Format: counter

tcp_fin_ack_fwd

Description TCP FIN ACK Forward

Type: number

Format: counter

tcp_fin_ack_rcvd

Description TCP FIN ACK Received

Type: number

Format: counter

tcp_fin_drop

Description TCP FIN Dropped

Type: number

Format: counter

tcp_fin_fwd

Description TCP FIN Forward

Type: number

Format: counter

tcp_fin_psh_ack_drop

Description TCP FIN PSH ACK Drop

Type: number

Format: counter

tcp_fin_psh_ack_fwd

Description TCP FIN PSH ACK Forward

Type: number

Format: counter

tcp_fin_psh_ack_rcvd

Description TCP FIN PSH ACK Received

Type: number

Format: counter

tcp_fin_rcvd

Description TCP FIN Received

Type: number

Format: counter

tcp_psh_ack_drop

Description TCP PSH ACK Dropped

Type: number

Format: counter

tcp_psh_ack_fwd

Description TCP PSH ACK Forward

Type: number

Format: counter

tcp_psh_ack_rcvd

Description TCP PSH ACK Received

Type: number

Format: counter

tcp_psh_drop

Description TCP PSH Dropped

Type: number

Format: counter

tcp_psh_fwd

Description TCP PSH Forward

Type: number

Format: counter

tcp_psh_rcvd

Description TCP PSH Received

Type: number

Format: counter

tcp_req_incomplete

Description TCP Request Incomplete

Type: number

Format: counter

tcp_rexmit_syn_limit_bl

Description TCP SYN Retransmit Exceeded Blacklist

Type: number

Format: counter

tcp_rexmit_syn_limit_drop

Description TCP SYN Retransmit Exceeded Drop

Type: number

Format: counter

tcp_rst_ack_drop

Description TCP RST ACK Dropped

Type: number

Format: counter

tcp_rst_ack_fwd

Description TCP RST ACK Forward

Type: number

Format: counter

tcp_rst_ack_rcvd

Description TCP RST ACK Received

Type: number

Format: counter

tcp_rst_drop

Description TCP RST Dropped

Type: number

Format: counter

tcp_rst_fwd

Description TCP RST Forward

Type: number

Format: counter

tcp_rst_rcvd

Description TCP RST Received

Type: number

Format: counter

tcp_syn_ack_drop

Description TCP SYN ACK Dropped

Type: number

Format: counter

tcp_syn_ack_fwd

Description TCP SYN ACK Forward

Type: number

Format: counter

tcp_syn_ack_rcvd

Description TCP SYN ACK Received

Type: number

Format: counter

tcp_syn_fwd

Description SYN Forward

Type: number

Format: counter

tcp_syn_rcvd

Description TCP Inbound SYN Received

Type: number

Format: counter

tcp_urg_drop

Description TCP URG Dropped

Type: number

Format: counter

tcp_urg_fwd

Description TCP URG Forward

Type: number

Format: counter

tcp_urg_rcvd

Description TCP URG Received

Type: number

Format: counter

unauth_drop

Description TCP Unauth Dropped

Type: number

Format: counter

unauth_src_session_reset

Description Session Reset for Unauthenticated Src

Type: number

Format: counter

wellknown_sport_drop

Description TCP SrcPort Wellknown

Type: number

Format: counter

zero_window_excd

Description Zero-Window Exceeded

Type: number

Format: counter

2.33.52 ddos dns-udp-port stats

Statistics for the object dns-udp-port

dns-udp-port Specification

Parameter	Value
Type	*Collection*
Collection Name	*dns-udp-port-list*
Collection URI	/axapi/v3/ddos/dns-udp-port
Element Name	dns-udp-port
Element URI	/axapi/v3/ddos/dns-udp-port/stats
Element Attributes	dns-udp-port_attributes
Partition Visibility	None
Schema	`dns-udp-port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dns-udp-port

alias_forward_rate_exceed

Description ALIAS Forward Rate Exceed

Type: number

Format: counter

bl

Description Dst Blacklisted

Type: number

Format: counter

conn_prate_excd

Description UDP Conn Pkt Rate Exceeded

Type: number

Format: counter

dg_action_default

Description Domain Group Action Default

Type: number

Format: counter

dg_action_deny

Description Domain Group Action Deny

Type: number

Format: counter

dg_action_permit

Description Domain Group Action Permit

Type: number

Format: counter

dg_rate_exceed

Description Domain Group Domain Query Rate Exceeded

Type: number

Format: counter

dg_request_check_fail

Description Domain Group Request Check Fail

Type: number

Format: counter

dns_auth_drop

Description DNS Auth Dropped

Type: number

Format: counter

dns_auth_resp

Description DNS Auth Responded

Type: number

Format: counter

dns_malform

Description Malform Query

Type: number

Format: counter

dns_malform_drop

Description Malform Query Dropped

Type: number

Format: counter

dns_query_class_any

Description Query Class ANY

Type: number

Format: counter

dns_query_class_chaos

Description Query Class CHAOS

Type: number

Format: counter

dns_query_class_csnet

Description Query Class CSNET

Type: number

Format: counter

dns_query_class_hs

Description Query Class HESIOD

Type: number

Format: counter

dns_query_class_in

Description Query Class INTERNET

Type: number

Format: counter

Description Query Class NONE

Type: number

Format: counter

dns_query_class_whitelist_miss

Description Query Class Whitelist Miss

Type: number

Format: counter

dnssec_wildcard_forward_rate_exceed

Description DNSSEC Wildcard Forward Rate Exceed

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action Whitelist

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

force_tcp_auth

Description Auth Force-TCP

Type: number

Format: counter

force_tcp_auth_timeout

Description Auth Force-TCP With UDP Timeout

Type: number

Format: counter

fqdn_label_count_exceed

Description FQDN Label Count Exceeded

Type: number

Format: counter

fqdn_label_len_exceed

Description FQDN Label Length Exceeded

Type: number

Format: counter

fqdn_rate_by_label_count_check

Description FQDN Rate by Label Count Checked

Type: number

Format: counter

fqdn_rate_by_label_count_exceed

Description FQDN Rate by Label Count Exceeded

Type: number

Format: counter

fqdn_stage_2_rate_exceed

Description FQDN Rate Exceeded

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

is_nxdomain

Description NXDOMAIN Response

Type: number

Format: counter

non_query_opcode_pass_through

Description Non Query Opcode Pass Through

Type: number

Format: counter

ntp_monlist_req

Description NTP Monlist Request

Type: number

Format: counter

ntp_monlist_resp

Description NTP Monlist Response

Type: number

Format: counter

nxdomain_bl_drop

Description NXDOMAIN Response Blacklisted

Type: number

Format: counter

nxdomain_drop

Description NXDOMAIN Response Dropped

Type: number

Format: counter

nxdomain_rate_exceed

Description NXDOMAIN Response Rate Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

src_rate_limit_type4

Description Src Request Rate 5 Exceeded

Type: number

Format: counter

src_udp_auth

Description Src Auth UDP Init

Type: number

Format: counter

src_udp_auth_drop

Description Src UDP Auth Dropped

Type: number

Format: counter

src_udp_auth_fail

Description Src Auth UDP Failed

Type: number

Format: counter

src_udp_auth_timeout

Description Src UDP Retry Timeout

Type: number

Format: counter

src_udp_retry_gap_drop

Description Src UDP Retry-Gap Dropped

Type: number

Format: counter

src_udp_retry_init

Description Src UDP Retry Init

Type: number

Format: counter

src_udp_retry_pass

Description Src UDP Retry Passed

Type: number

Format: counter

src_well_known_port

Description Src UDP SrcPort Wellknown

Type: number

Format: counter

token_authentication_curr_salt_matched

Description Token Authentication Current Salt Matched

Type: number

Format: counter

token_authentication_invalid

Description Token Authentication Invalid Packets

Type: number

Format: counter

token_authentication_mismatched

Description Token Authentication Mismatched Packets

Type: number

Format: counter

token_authentication_prev_salt_matched

Description Token Authentication Previous Salt Matched

Type: number

Format: counter

token_authentication_session_created

Description Token Authentication Session Created

Type: number

Format: counter

token_authentication_session_created_fail

Description Token Authentication Session Created Fail

Type: number

Format: counter

udp_auth

Description Auth UDP Init

Type: number

Format: counter

udp_auth_drop

Description UDP Auth Dropped

Type: number

Format: counter

udp_auth_fail

Description Auth UDP Failed

Type: number

Format: counter

udp_auth_pass

Description Auth UDP Passed

Type: number

Format: counter

udp_auth_retry_fail

Description Auth UDP Retry Failed

Type: number

Format: counter

udp_auth_retry_gap_drop

Description Auth UDP Retry-Gap Dropped

Type: number

Format: counter

udp_retry_gap_drop

Description UDP Retry-Gap Dropped

Type: number

Format: counter

udp_retry_init

Description UDP Retry Init

Type: number

Format: counter

udp_retry_pass

Description UDP Retry Passed

Type: number

Format: counter

wellknown_sport_drop

Description UDP SrcPort Wellknown

Type: number

Format: counter

2.33.53 ddos dns-udp-zone-port stats

Statistics for the object dns-udp-zone-port

dns-udp-zone-port Specification

Parameter	Value
Type	*Collection*
Collection Name	*dns-udp-zone-port-list*
Collection URI	/axapi/v3/ddos/dns-udp-zone-port
Element Name	dns-udp-zone-port
Element URI	/axapi/v3/ddos/dns-udp-zone-port/stats
Element Attributes	dns-udp-zone-port_attributes
Partition Visibility	None
Schema	`dns-udp-zone-port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dns-udp-zone-port

alias_forward_rate_exceed

Description ALIAS Forward Rate Exceed

Type: number

Format: counter

all_src_session_reset

Description Session Reset for All Src Upon Level Escalation

Type: number

Format: counter

bl

Description Dst Blacklisted

Type: number

Format: counter

clear_session_upon_deescalation

Description Clear Session Upon De-escalation to Level 0

Type: number

Format: counter

conn_prate_excd

Description UDP Conn Pkt Rate Exceeded

Type: number

Format: counter

current_es_level

Description Current Escalation Level

Type: number

Format: counter

dg_action_default

Description Domain Group Action Default

Type: number

Format: counter

dg_action_deny

Description Domain Group Action Deny

Type: number

Format: counter

dg_action_permit

Description Domain Group Action Permit

Type: number

Format: counter

dg_rate_exceed

Description Domain Group Domain Query Rate Exceeded

Type: number

Format: counter

dg_request_check_fail

Description Domain Group Request Check Fail

Type: number

Format: counter

dns_auth_drop

Description DNS Auth Dropped

Type: number

Format: counter

dns_auth_resp

Description DNS Auth Responded

Type: number

Format: counter

dns_malform

Description Malform Query

Type: number

Format: counter

dns_query_class_any

Description Query Class ANY

Type: number

Format: counter

dns_query_class_chaos

Description Query Class CHAOS

Type: number

Format: counter

dns_query_class_csnet

Description Query Class CSNET

Type: number

Format: counter

dns_query_class_hs

Description Query Class HESIOD

Type: number

Format: counter

dns_query_class_in

Description Query Class INTERNET

Type: number

Format: counter

dns_query_class_none

Description Query Class NONE

Type: number

Format: counter

dns_query_class_whitelist_miss

Description Query Class Whitelist Miss

Type: number

Format: counter

dnssec_wildcard_forward_rate_exceed

Description DNSSEC Wildcard Forward Rate Exceed

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

dst_hw_drop_inserted

Description Dst Hardware Drop Rules Inserted

Type: number

Format: counter

dst_hw_drop_removed

Description Dst Hardware Drop Rules Removed

Type: number

Format: counter

dst_udp_retry_timeout_blacklist

Description UDP Retry Timeout Blacklisted

Type: number

Format: counter

dynamic_count_warn

Description dynamic-entry-count warning send

Type: number

Format: counter

ew_inbound_port_byte_drop

Description East-West Inbound Bytes Dropped

Type: number

Format: counter

ew_inbound_port_byte_rcv

Description East-West Inbound Bytes Recevied

Type: number

Format: counter

ew_inbound_port_byte_sent

Description East-West Inbound Bytes Forwarded

Type: number

Format: counter

ew_inbound_port_drop

Description East-West Inbound Packets Dropped

Type: number

Format: counter

ew_inbound_port_rcv

Description East-West Inbound Packets Received

Type: number

Format: counter

ew_inbound_port_sent

Description East-West Inbound Packets Forwarded

Type: number

Format: counter

ew_outbound_port_byte_drop

Description East-West Outbound Bytes Forwarded

Type: number

Format: counter

ew_outbound_port_byte_rcv

Description East-West Outbound Bytes Recevied

Type: number

Format: counter

ew_outbound_port_byte_sent

Description East-West Outbound Bytes Dropped

Type: number

Format: counter

ew_outbound_port_drop

Description East-West Outbound Packets Dropped

Type: number

Format: counter

ew_outbound_port_rcv

Description East-West Outbound Packets Received

Type: number

Format: counter

ew_outbound_port_sent

Description East-West Outbound Packets Forwarded

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action Whitelist

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_total_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

force_tcp_auth

Description Auth Force-TCP

Type: number

Format: counter

force_tcp_auth_timeout

Description Auth Force-TCP With UDP Timeout

Type: number

Format: counter

fqdn_label_count_exceed

Description FQDN Label Count Exceeded

Type: number

Format: counter

fqdn_label_len_exceed

Description FQDN Label Length Exceeded

Type: number

Format: counter

fqdn_rate_by_label_count_check

Description FQDN Rate by Label Count Checked

Type: number

Format: counter

fqdn_rate_by_label_count_exceed

Description FQDN Rate by Label Count Exceeded

Type: number

Format: counter

fqdn_stage_2_rate_exceed

Description FQDN Rate Exceeded

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

ip_filtering_bl

Description IP Filtering Policy: Blacklisted

Type: number

Format: counter

ip_filtering_drop

Description IP Filtering Policy: Dropped

Type: number

Format: counter

is_nxdomain

Description NXDOMAIN Response

Type: number

Format: counter

malform_drop

Description Malform Query Dropped

Type: number

Format: counter

no_policy_class_list_match

Description No Policy Class-list Match

Type: number

Format: counter

no_route_drop

Description No Route Dropped

Type: number

Format: counter

non_query_opcode_pass_through

Description Non Query Opcode Pass Through

Type: number

Format: counter

ntp_monlist_req

Description NTP Monlist Request

Type: number

Format: counter

ntp_monlist_resp

Description NTP Monlist Response

Type: number

Format: counter

nxdomain_bl_drop

Description NXDOMAIN Response Blacklisted

Type: number

Format: counter

nxdomain_drop

Description NXDOMAIN Response Dropped

Type: number

Format: counter

nxdomain_rate_exceed

Description NXDOMAIN Response Rate Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match

Type: number

Format: counter

pattern_filter3_match

Description Extracted Filter3 Match

Type: number

Format: counter

pattern_filter4_match

Description Extracted Filter4 Match

Type: number

Format: counter

pattern_filter5_match

Description Extracted Filter5 Match

Type: number

Format: counter

pattern_filter_drop

Description Extracted Filter Drop

Type: number

Format: counter

pattern_not_found

Description Pattern Recognition: Pattern Not Found

Type: number

Format: counter

pattern_recognition_generic_error

Description Pattern Recognition: Exceptions

Type: number

Format: counter

pattern_recognition_pattern_changed

Description Pattern Recognition: Pattern Change Detected

Type: number

Format: counter

pattern_recognition_proceeded

Description Pattern Recognition: Engine Started

Type: number

Format: counter

pattern_recognition_sampling_started

Description Pattern Recognition: Sampling Started

Type: number

Format: counter

payload_too_big

Description UDP Payload Too Large

Type: number

Format: counter

payload_too_small

Description UDP Payload Too Small

Type: number

Format: counter

port_bytes

Description Inbound Bytes Received

Type: number

Format: counter

port_bytes_drop

Description Inbound Bytes Dropped

Type: number

Format: counter

port_bytes_sent

Description Inbound Bytes Forwarded

Type: number

Format: counter

port_conn_limm_exceed

Description Conn Limit Exceeded

Type: number

Format: counter

port_conn_rate_exceed

Description Conn Rate Exceeded

Type: number

Format: counter

port_drop

Description Inbound Packets Dropped

Type: number

Format: counter

port_kbit_rate_exceed

Description KiBit Rate Exceeded

Type: number

Format: counter

port_kbit_rate_exceed_pkt

Description KiBit Rate Exceeded Count

Type: number

Format: counter

port_pkt_rate_exceed

Description Packet Rate Exceeded

Type: number

Format: counter

port_pkt_sent

Description Inbound Packets Forwarded

Type: number

Format: counter

port_rcvd

Description Inbound Packets Received

Type: number

Format: counter

port_src_bl

Description Src Blacklisted

Type: number

Format: counter

port_src_escalation

Description Src Escalation

Type: number

Format: counter

query_forward_rate_exceed

Description Query Foward Rate Exceed

Type: number

Format: counter

query_type_a

Description Query Type A

Type: number

Format: counter

query_type_aaaa

Description Query Type AAAA

Type: number

Format: counter

query_type_any

Description Query Type ANY

Type: number

Format: counter

query_type_any_drop

Description Query Type ANY Dropped

Type: number

Format: counter

query_type_cname

Description Query Type CNAME

Type: number

Format: counter

query_type_mx

Description Query Type MX

Type: number

Format: counter

rate_limit_type3

Description Dst Request Rate 4 Exceeded

Type: number

Format: counter

rate_limit_type4

Description Dst Request Rate 5 Exceeded

Type: number

Format: counter

req_retrans

Description Request Retransmit

Type: number

Format: counter

req_sent

Description DNS Requests Forwarded

Type: number

Format: counter

req_size_exceed

Description Request Size Exceeded

Type: number

Format: counter

rrsig_expire_drop

Description RRSIG Expire: Drop

Type: number

Format: counter

rrtype_drop

Description Record Type Dropped

Type: number

Format: counter

same_sport_dport_drop

Description Same Source and Destination Port Drop

Type: number

Format: counter

secondary_port_conn_limm_exceed

Description Per Addr-Port Conn Limit Exceeded

Type: number

Format: counter

secondary_port_conn_rate_exceed

Description Per Addr-Port Conn Rate Exceeded

Type: number

Format: counter

secondary_port_hit

Description Per Addr-Port Hit

Type: number

Format: counter

secondary_port_kbit_rate_exceed

Description Per Addr-Port KiBit Rate Exceeded

Type: number

Format: counter

secondary_port_kbit_rate_exceed_pkt

Description Per Addr-Port KiBit Rate Exceeded Count

Type: number

Format: counter

secondary_port_pkt_rate_exceed

Description Per Addr-Port Packet Rate Exceeded

Type: number

Format: counter

sess_aged

Description Sessions Aged Out

Type: number

Format: counter

sess_create

Description Session Create

Type: number

Format: counter

sess_create_inbound

Description Inbound Sessions Created

Type: number

Format: counter

sess_create_outbound

Description Outbound Sessions Created

Type: number

Format: counter

sflow_external_packets_sent

Description Sflow External Packets Sent

Type: number

Format: counter

sflow_external_samples_packed

Description Sflow External Samples Packed

Type: number

Format: counter

sflow_internal_packets_sent

Description Sflow Internal Packets Sent

Type: number

Format: counter

sflow_internal_samples_packed

Description Sflow Internal Samples Packed

Type: number

Description Src UDP Payload Too Small

Type: number

Format: counter

src_query_type_any_drop

Description Src Query Type ANY Dropped

Type: number

Format: counter

src_rate_limit_type0

Description Src Request Rate 1 Exceeded

Type: number

Format: counter

src_rate_limit_type1

Description Src Request Rate 2 Exceeded

Type: number

Format: counter

src_rate_limit_type2

Description Src Request Rate 3 Exceeded

Type: number

Format: counter

src_rate_limit_type3

Description Src Request Rate 4 Exceeded

Type: number

Format: counter

src_rate_limit_type4

Description Src Request Rate 5 Exceeded

Type: number

Format: counter

src_udp_auth_drop

Description Src UDP Auth Dropped

Type: number

Format: counter

src_udp_auth_fail

Description Src Auth UDP Failed

Type: number

Format: counter

src_udp_auth_init

Description Src Auth UDP Init

Type: number

Format: counter

src_udp_auth_timeout

Description Src UDP Retry Timeout

Type: number

Format: counter

src_udp_retry_gap_drop

Description Src UDP Retry-Gap Dropped

Type: number

Format: counter

src_udp_retry_init

Description Src UDP Retry Init

Type: number

Format: counter

src_udp_retry_pass

Description Src UDP Retry Passed

Type: number

Format: counter

src_well_known_port

Description Src UDP SrcPort Wellknown

Type: number

Format: counter

src_zone_service_entry_aged

Description SrcZoneService Entry Aged

Type: number

Format: counter

src_zone_service_entry_hit

Description SrcZoneService Entry Hit

Type: number

Format: counter

src_zone_service_entry_learned

Description SrcZoneService Entry Learned

Type: number

Format: counter

token_authentication_curr_salt_matched

Description Token Authentication Current Salt Matched

Type: number

Format: counter

token_authentication_invalid

Description Token Authentication Invalid Packets

Type: number

Format: counter

token_authentication_mismatched

Description Token Authentication Mismatched Packets

Type: number

Format: counter

token_authentication_prev_salt_matched

Description Token Authentication Previous Salt Matched

Type: number

Format: counter

token_authentication_session_created

Description Token Authentication Session Created

Type: number

Format: counter

token_authentication_session_created_fail

Description Token Authentication Session Created Fail

Type: number

Format: counter

udp_auth_drop

Description UDP Auth Dropped

Type: number

Format: counter

udp_auth_fail

Description Auth UDP Failed

Type: number

Format: counter

udp_auth_init

Description Auth UDP Init

Type: number

Format: counter

udp_auth_pass

Description Auth UDP Passed

Type: number

Format: counter

udp_auth_retry_fail

Description Auth UDP Retry Failed

Type: number

Format: counter

udp_auth_retry_gap_drop

Description Auth UDP Retry-Gap Dropped

Type: number

Format: counter

udp_retry_gap_drop

Description UDP Retry-Gap Dropped

Type: number

Format: counter

udp_retry_init

Description UDP Retry Init

Type: number

Format: counter

udp_retry_pass

Description UDP Retry Passed

Type: number

Format: counter

unauth_src_session_reset

Description Session Reset for Unauthenticated Src

Type: number

Format: counter

wellknown_sport_drop

Description UDP SrcPort Wellknown

Type: number

Format: counter

zone_src_udp_retry_timeout_blacklist

Description Src UDP Retry Timeout Blacklisted

Type: number

Format: counter

2.33.54 ddos dst

Create dest-ip limit entry

dst Specification

Parameter	Value
Type	*Intermediate Resource*
Element Name	dst
Element URI	/axapi/v3/ddos/dst
Element Attributes	dst_attributes
Partition Visibility	shared
Schema	`dst schema`

Operations Allowed:

Get Object

GET

/axapi/v3/ddos/dst

Reference Object: */axapi/v3/ddos/dst/interface-ipv6/{addr}*

zone-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}*

interface-ip-list

Specification	Value
Type	*list*
Block object keys	

addr

Description IP address of interface

Type: string

Format: ipv4-address

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/l4-type/{protocol}*

log-enable

Description Enable logging of limit exceed drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/port/{port-num}+{protocol}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ip-list_port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 1-65535

protocol

Description 'tcp': tcp; 'udp': udp; 'http-probe': http port for interface health check;

Type: string

Supported Values: tcp, udp, http-probe

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ip-list_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description IP protocol number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ip-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *interface-ip-list_l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *interface-ip-list_l4-type-list_tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ip-list_l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

interface-ip-list_l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

interface-ip-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 5-1023

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-address-type

Description ‘ip’: ip; ‘ipv6’: ipv6;

Type: string

Supported Values: ip, ipv6

deny

Description Blacklist and Drop all incoming packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *default-list_exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *default-list_exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic dst entry

Type: number

Range: 0-2147483647

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/port/{port-num}+{protocol}*

src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/src-port/{port-num}+{protocol}*

template

Description: template is a **JSON Block**. Please see below for *default-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-tcp': dns-tcp; 'dns-udp': dns-udp; 'http': http; 'tcp': tcp; 'udp': udp; 'ssl-l4': ssl-l4; 'sip-udp': sip-udp; 'sip-tcp': sip-tcp;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

template

Description: template is a **JSON Block**. Please see below for *default-list_port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_port-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

default-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

default-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-syn-auth

Description Disable TCP SYN Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow. Exceed action set to Drop

Type: number

Range: 1-6

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *default-list_l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *default-list_l4-type-list_tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-list_l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

default-list_l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

default-list_src-port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'udp': udp; 'tcp': tcp;

Type: string

Supported Values: udp, tcp

template

Description: template is a **JSON Block**. Please see below for *default-list_src-port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_src-port-list_template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

default-list_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Protocol Number

Type: number

Range: 0-255

template

Description: template is a **JSON Block**. Please see below for *default-list_ip-proto-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

default-list_ip-proto-list_template

Specification	Value
Type	*object*

other

Description DDOS other template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

default-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

with-sflow-sample

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-list_exceed-log-dep-cfg

Specification	Value
Type	*object*

exceed-log-enable

Description (Deprecated)Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow-dep

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entries-resource-usage

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ipv6-list

Specification	Value
Type	*list*
Block object keys	

addr

Description IPv6 address of interface

Type: string

Format: ipv6-address

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ipv6/{addr}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ipv6/{addr}/l4-type/{protocol}*

log-enable

Description Enable logging of limit exceed drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ipv6/{addr}/port/{port-num}+{protocol}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ipv6-list_port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 1-65535

protocol

Description 'tcp': tcp; 'udp': udp; 'http-probe': http port for interface health check;

Type: string

Supported Values: tcp, udp, http-probe

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ipv6-list_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description IP protocol number

Type: number

Range: 0-255

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-ipv6-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *interface-ipv6-list_l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *interface-ipv6-list_l4-type-list_tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Maximum Length: 1 characters

interface-ipv6-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list

Specification	Value
Type	*list*
Block object keys	

advertised-enable

Description BGP advertised

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blackhole-on-glid-exceed

Description Blackhole destination entry for X minutes upon glid limit exceeded

Type: number

Range: 1-30

capture-config-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/capture-config/{name}*

description

Description Description for this Destination Entry

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dest-nat-ip

Description Destination NAT IP address

Type: string

Format: ipv4-address

dest-nat-ipv6

Description Destination NAT IPv6 address

Type: string

Format: ipv6-address

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-src-dst-default

Description Drop if no match with src-based-policy class-list, and default is not configured

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-entry-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/dynamic-entry-overflow-policy/{dummy-name}*

enable-top-k

Type: List

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *entry-list_exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *entry-list_exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *entry-list_glid-exceed-action*

Type: Object

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *entry-list_hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/hw-blacklist-blocking*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-addr

Description

Type: string

Format: ipv4-address

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/ip-proto/{port-num}*

ipv6-addr

Description

Type: string

Format: ipv6-address

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational-mode

Description 'protection': Protection mode; 'bypass': Bypass mode;

Type: string

Supported Values: protection, bypass

Default: protection

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

pattern-recognition-hw-filter-enable

Description to enable pattern recognition hardware filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition-sensitivity

Description 'high': High sensitive pattern recognition; 'medium': Medium sensitive pattern recognition; 'low': Low sensitive pattern recognition;

Type: string

Supported Values: high, medium, low

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}*

port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}*

reporting-disabled

Description Disable Reporting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *entry-list_sflow*

Type: Object

source-nat-pool

Description Configure source NAT

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-dst-pair

Description: src-dst-pair is a **JSON Block**. Please see below for *entry-list_src-dst-pair*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair*

src-dst-pair-class-list-list

Type: List

src-dst-pair-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}*

src-dst-pair-settings-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-settings/{all-types}*

src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-port/{port-num}+{protocol}*

src-port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}*

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

template

Description: template is a **JSON Block**. Please see below for *entry-list_template*

Type: Object

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *entry-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/topk-destinations*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *entry-list_port-list_capture-config*

Type: Object

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cache

Description DNS Cache Instance

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/dns-cache*

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *entry-list_port-list_glid-exceed-action*

Type: Object

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *entry-list_port-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *entry-list_port-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *entry-list_port-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 0-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *entry-list_port-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *entry-list_port-list_sflow*

Type: Object

signature-extraction

Description: signature-extraction is a **JSON Block**. Please see below for *entry-list_port-list_signature-extraction*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/signature-extraction*

template

Description: template is a **JSON Block**. Please see below for *entry-list_port-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *entry-list_port-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/topk-sources*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-list_signature-extraction

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

manual-mode

Description Enable manual mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_port-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *entry-list_port-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

entry-list_port-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

entry-list_port-list_pattern-recognition-pu-details

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_dynamic-entry-overflow-policy-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_port-range-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *entry-list_port-range-list_capture-config*

Type: Object

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *entry-list_port-range-list_glid-exceed-action*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *entry-list_port-range-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *entry-list_port-range-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *entry-list_port-range-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/port-ind*

port-range-end

Description Port-Range End Port Number

Type: number

Range: 1-65535

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *entry-list_port-range-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *entry-list_port-range-list_sflow*

Type: Object

template

Description: template is a **JSON Block**. Please see below for *entry-list_port-range-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *entry-list_port-range-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-sources*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-range-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-range-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_port-range-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *entry-list_port-range-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

entry-list_port-range-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

entry-list_port-range-list_pattern-recognition-pu-details

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-range-list_port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-range-list_port-ind_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max':

TCP Small Window ACK Rate Max; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max

entry-list_port-range-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-range-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_port-range-list_sflow

Specification	Value
Type	*object*

polling

Description: polling is a **JSON Block**. Please see below for *entry-list_port-range-list_sflow_polling*

Type: Object

entry-list_port-range-list_sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *entry-list_port-range-list_sflow_polling_sflow-tcp*

Type: Object

entry-list_port-range-list_sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_hw-blacklist-blocking

Specification	Value
Type	*object*

dst-enable

Description Enable Dst side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-class-list-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/app-type-src-dst/{protocol}*

cid-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/cid/{cid-num}*

class-list-name

Description Class-list name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *entry-list_src-dst-pair-class-list-list_exceed-log-cfg*

Type: Object

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/l4-type-src-dst/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-class-list-list_cid-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-cid-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/cid/{cid-num}/app-type-src-dst-cid/{protocol}*

cid-num

Description Class-list id

Type: number

Range: 1-32

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *entry-list_src-dst-pair-class-list-list_cid-list_exceed-log-cfg*

Type: Object

l4-type-src-dst-cid-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/cid/{cid-num}/l4-type-src-dst-cid/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-class-list-list_cid-list_app-type-src-dst-cid-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair-class-list-list_cid-list_app-type-src-dst-cid-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-class-list-list_cid-list_app-type-src-dst-cid-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-class-list-list_cid-list_l4-type-src-dst-cid-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair-class-list-list_cid-list_l4-type-src-dst-cid-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-class-list-list_cid-list_l4-type-src-dst-cid-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-class-list-list_cid-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_src-dst-pair-class-list-list_app-type-src-dst-list

Specification	Value
Type	*list*

Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *entry-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

entry-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

entry-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-syn-auth

Description Disable TCP SYN Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *entry-list_l4-type-list_glid-exceed-action*

Type: Object

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow

Type: number

Range: 1-6

max-rexmit-syn-per-flow-exceed-action

Description 'drop': Drop the packet; 'black-list': Add the source IP into black list;

Type: string

Supported Values: drop, black-list

port-ind

Description: port-ind is a **JSON Block**. Please see below for *entry-list_l4-type-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *entry-list_l4-type-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/progression-tracking*

protocol

Description 'tcp': L4-Type TCP; 'udp': L4-Type UDP; 'icmp': L4-Type ICMP; 'other': L4-Type OTHER;

Type: string

Supported Values: tcp, udp, icmp, other

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *entry-list_l4-type-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *entry-list_l4-type-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/topk-sources*

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *entry-list_l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *entry-list_l4-type-list_tunnel-rate-limit*

Type: Object

undefined-port-hit-statistics

Description: undefined-port-hit-statistics is a **JSON Block**. Please see below for *entry-list_l4-type-list_undefined-port-hit-statistics*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_l4-type-list_undefined-port-hit-statistics

Specification	Value
Type	*object*

reset-interval

Description Configure port scanning counter reset interval (minutes), Default 60 mins

Type: number

Range: 1-64000

Default: 60

undefined-port-hit-statistics

Description Enable port scanning statistics

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_l4-type-list_template

Specification	Value
Type	*object*

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

entry-list_l4-type-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *entry-list_l4-type-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

entry-list_l4-type-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

entry-list_l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

entry-list_l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

entry-list_l4-type-list_port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_l4-type-list_port-ind_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session

Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max

entry-list_l4-type-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_l4-type-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-settings-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

all-types

Description 'all-types': Settings for all types (default or class-list);

Type: string

Supported Values: all-types

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for DST entry or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-settings/{all-types}/l4-type-src-dst/{protocol}*

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

src-prefix-len

Description Specify src prefix length for IPv6 (default: not set)

Type: number

Range: 32-127

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-settings-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-port-range-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'udp': UDP Port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-port-range-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-port-range-list_template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

esp-inspect

Description: esp-inspect is a **JSON Block**. Please see below for *entry-list_ip-proto-list_esp-inspect*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *entry-list_ip-proto-list_glid-exceed-action*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

port-num

Description Protocol Number

Type: number

Range: 0-255

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

template

Description: template is a **JSON Block**. Please see below for *entry-list_ip-proto-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_ip-proto-list_esp-inspect

Specification	Value
Type	*object*

auth-algorithm

Description 'AUTH_NULL': No Integrity Check Value; 'HMAC-SHA-1-96': 96 bit Auth Algo; 'HMAC-SHA-256-96': 96 bit Auth Algo; 'HMAC-SHA-256-128': 128 bit Auth Algo; 'HMAC-SHA-384-192': 192 bit Auth Algo; 'HMAC-SHA-512-256': 256 bit Auth Algo; 'HMAC-MD5-96': 96 bit Auth Algo; 'MAC-RIPEMD-160-96': 96 bit Auth Algo;

Type: string

Supported Values: AUTH_NULL, HMAC-SHA-1-96, HMAC-SHA-256-96, HMAC-SHA-256-128, HMAC-SHA-384-192, HMAC-SHA-512-256, HMAC-MD5-96, MAC-RIPEMD-160-96

encrypt-algorithm

Description 'NULL': Null Encryption Algorithm;

Type: string

Supported Values: NULL

mode

Description 'transport': Transport mode;

Type: string

Supported Values: transport

entry-list_ip-proto-list_template

Specification	Value
Type	*object*

other

Description DDOS other template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_ip-proto-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *entry-list_ip-proto-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

entry-list_ip-proto-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

entry-list_src-port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

outbound-src-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-udp': DNS-UDP Port; 'dns-tcp': DNS-TCP Port; 'udp': UDP Port; 'tcp': TCP Port;

Type: string

Supported Values: dns-udp, dns-tcp, udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-port-list_template

Specification	Value
Type	*object*

src-dns

Description DDOS dns src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-high-frequency

Description Enable High frequency logging for non-event logs per entry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rate-limit

Description Rate limit per second per entry(Default : 1 per second)

Type: number

Range: 1-1000

Default: 1

entry-list_sflow

Specification	Value
Type	*object*

collector

Type: List

polling

Description: polling is a **JSON Block**. Please see below for *entry-list_sflow_polling*

Type: Object

entry-list_sflow_collector

Specification	Value
Type	*list*
Block object keys	

sflow-name

Description Name of configured custom sFlow collector

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/sflow/collector/custom*

entry-list_sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-layer-4

Description Enable sFlow Layer 4 counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total num

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the tota

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *entry-list_sflow_polling_sflow-tcp*

Type: Object

sflow-undef-port-hit-stats

Description Enable sFlow undefined-port-hit-statistics polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-undef-port-hit-stats-brief

Description Enable sFlow undefined-port-hit-statistics polling in brief mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total n

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the tota

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_src-dst-pair

Specification	Value
Type	*object*

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair/app-type-src-dst/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default

Description Configure default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *entry-list_src-dst-pair_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair/l4-type-src-dst/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair_template*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_src-dst-pair_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_src-dst-pair_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair_l4-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair_l4-type-src-dst-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_src-dst-pair_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

entry-list_src-dst-pair-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Src-based-policy name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/app-type-src-dst/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *entry-list_src-dst-pair-policy-list_policy-class-list-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-src-dst-list

Type: List

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry under class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair-policy-list_policy-class-list-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-policy-list_policy-class-list-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

entry-list_src-dst-pair-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow

entry-list_src-dst-pair-policy-list_policy-class-list-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *entry-list_src-dst-pair-policy-list_policy-class-list-list_l4-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Supported Values: dst_hw_drop_rule_insert, dst_hw_drop_rule_remove, src_hw_drop_rule_insert, src_hw_drop_rule_remove, prog_first_req_time_exceed, prog_req_resp_time_exceed, prog_request_len_exceed, prog_response_len_exceed, prog_resp_pkt_rate_exceed, prog_resp_req_time_exceed, entry_sync_message_received, entry_sync_message_sent, prog_conn_sent_exceed, prog_conn_rcvd_exceed, prog_conn_time_exceed, prog_conn_rcvd_sent_ratio_exceed, prog_win_sent_exceed, prog_win_rcvd_exceed, prog_win_rcvd_sent_ratio_exceed, prog_exceed_drop, prog_exceed_bl, prog_conn_exceed_drop, prog_conn_exceed_bl, prog_win_exceed_drop, prog_win_exceed_bl, dst_exceed_action_drop, src_hw_drop, dst_tcp_auth_rst, dst_src_learn_overflow, tcp_fwd_sent, udp_fwd_sent, prog_query_exceed, prog_think_exceed, prog_conn_samples, prog_req_samples, prog_win_samples, prog_conn_samples_processed, prog_req_samples_processed, prog_win_samples_processed, tcp_invalid_synack

entry-list_enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-type

Description 'destination': Topk destination IP;

Type: string

Supported Values: destination

entry-list_exceed-log-dep-cfg

Specification	Value
Type	*object*

exceed-log-enable

Description (Deprecated)Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow-dep

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

default-address-type

Description 'ip': ip; 'ipv6': ipv6;

Type: string

Supported Values: ip, ipv6

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port/{port-num}+{protocol}*

src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/src-port/{port-num}+{protocol}*

template

Description: template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-tcp': dns-tcp; 'dns-udp': dns-udp; 'http': http; 'tcp': tcp; 'udp': udp; 'ssl-l4': ssl-l4; 'sip-udp': sip-udp; 'sip-tcp': sip-tcp;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

template

Description: template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_port-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Protocol Number

Type: number

Range: 0-255

template

Description: template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_ip-proto-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_ip-proto-list_template

Specification	Value
Type	*object*

other

Description DDOS other template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

with-sflow-sample

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-overflow-policy-list_exceed-log-dep-cfg

Specification	Value
Type	*object*

exceed-log-enable

Description (Deprecated)Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow-dep

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-overflow-policy-list_src-port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'udp': udp; 'tcp': tcp;

Type: string

Supported Values: udp, tcp

template

Description: template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_src-port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_src-port-list_template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow. Exceed action set to Drop

Type: number

Range: 1-6

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_l4-type-list_tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-overflow-policy-list_l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

dynamic-entry-overflow-policy-list_l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

dynamic-entry

Specification	Value
Type	*object*

all-entries

Description: all-entries is a **JSON Block**. Please see below for *dynamic-entry_all-entries*

Type: Object

Reference Object: */axapi/v3/ddos/dst/dynamic-entry/all-entries*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list

Specification	Value
Type	*list*
Block object keys	

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

advertised-enable

Description BGP advertised

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/capture-config/{name}*

collector

Type: List

continuous-learning

Description Continuous learning of detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

description

Description Description for this Destination Zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dest-nat-ip

Description Destination NAT IP address

Type: string

Format: ipv4-address

dest-nat-ipv6

Description Destination NAT IPv6 address

Type: string

Format: ipv6-address

detection

Description: detection is a **JSON Block**. Please see below for *zone-list_detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection*

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Type: List

force-operational-mode

Description Force configure operational mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *zone-list_hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip

Type: List

ip-proto

Description: ip-proto is a **JSON Block**. Please see below for *zone-list_ip-proto*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto*

ipv6

Type: List

is-from-wizard

Description Is It Created from Onbox GUI Wizard

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-high-frequency

Description Enable High frequency logging for non-event logs per zone

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-restrictive

Description Non-restrictive mode ignores Zero Thresholds Indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational-mode

Description 'idle': Idle mode; 'monitor': Monitor mode; 'learning': Learning mode;

Type: string

Supported Values: idle, monitor, learning

Default: idle

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

outbound-policy

Description: outbound-policy is a **JSON Block**. Please see below for *zone-list_outbound-policy*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/outbound-policy*

packet-anomaly-detection

Description: packet-anomaly-detection is a **JSON Block**. Please see below for *zone-list_packet-anomaly-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/packet-anomaly-detection*

pattern-recognition-hw-filter-enable

Description to enable pattern recognition hardware filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition-sensitivity

Description 'high': High sensitive pattern recognition; 'medium': Medium sensitive pattern recognition; 'low': Low sensitive pattern recognition;

Type: string

Supported Values: high, medium, low

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port

Description: port is a **JSON Block**. Please see below for *zone-list_port*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port*

port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}*

rate-limit

Description Rate limit per second per zone(Default : 1 per second)

Type: number

Range: 1-1000

Default: 1

reporting-disabled

Description Disable Reporting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable sFlow counter polling packets, tcp-basic, tcp-stateful and http. WARNING: Zone level Sflow polling might induce heavy CP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-layer-4, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-layer-4

Description Enable sFlow Layer 4 counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the number of

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-layer-4 and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *zone-list_sflow-tcp*

Type: Object

source-nat-pool

Description Configure source NAT

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-port

Description: src-port is a **JSON Block**. Please see below for *zone-list_src-port*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port*

src-port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}*

src-prefix-len

Description Specify src prefix length for IPv6 (default: not set)

Type: number

Range: 32-127

telemetry-enable

Description Enable from-l3-peer flag for the zone, thus all the ip entries in the zone will be dynamically created/deleted based on the BGP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-sensitivity

Description tune threshold range (default OFF)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Default: OFF

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/topk-destinations*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-gui

Description: web-gui is a **JSON Block**. Please see below for *zone-list_web-gui*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui*

zone-migrate-to-opposite

Description Migrate zone to opposite PU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

zone-profile

Description Apply threshold profile

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-profile*

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_zone-template*

Type: Object

zone-list_outbound-policy

Specification	Value
Type	*object*

name

Description Specify name of the outbound policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/outbound-policy*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip

Specification	Value
Type	*list*
Block object keys	

expand-ip-subnet

Description Expand this subnet to individual IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expand-ip-subnet-mode

Description 'default': Default learning mechanism (Default: Dynamic); 'dynamic': Dynamic learning; 'static': Static learning;

Type: string

Supported Values: default, dynamic, static

Default: default

ip-addr

Description Specify IP address

Type: string

Format: ipv4-address

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

zone-list_detection

Specification	Value
Type	*object*

notification

Description: notification is a **JSON Block**. Please see below for *zone-list_detection_notification*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/notification*

outbound-detection

Description: outbound-detection is a **JSON Block**. Please see below for *zone-list_detection_outbound-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection*

packet-anomaly-detection

Description: packet-anomaly-detection is a **JSON Block**. Please see below for *zone-list_detection_packet-anomaly-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/packet-anomaly-detection*

service-discovery

Description: service-discovery is a **JSON Block**. Please see below for *zone-list_detection_service-discovery*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/service-discovery*

settings

Description 'settings': settings;

Type: string

Supported Values: settings

toggle

Description 'enable': Enable detection; 'disable': Disable detection;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

victim-ip-detection

Description: victim-ip-detection is a **JSON Block**. Please see below for *zone-list_detection_victim-ip-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/victim-ip-detection*

zone-list_detection_packet-anomaly-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/packet-anomaly-detection/indicator/{type}*

toggle

Description 'enable': Enable packet anomaly; 'disable': Disable packet anomaly;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_packet-anomaly-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

threshold-num

Description Threshold for each indicator

Type: number

Range: 1-65535

Default: 100

type

Description 'port-zero-pkt-rate': Port Zero Packet Rate (default 100 packet per second);

Type: string

Supported Values: port-zero-pkt-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_victim-ip-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

histogram-toggle

Description 'histogram-enable': Enable histogram statistics of victim IP detection; 'histogram-disable': Disable histogram statistics of victim IP detection;

Type: string

Supported Values: histogram-enable, histogram-disable

Default: histogram-disable

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/victim-ip-detection/indicator/{type}*

toggle

Description 'enable': Enable victim IP detection; 'disable': Disable victim IP detection;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_victim-ip-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

ip-threshold-num

Description Threshold for IP

Type: number

Range: 1-2147483647

type

Description 'pkt-rate': rate of incoming packets; 'reverse-pkt-rate': rate of reverse coming packets; 'fwd-byte-rate': rate of incoming bytes; 'rev-byte-rate': rate of reverse coming bytes;

Type: string

Supported Values: pkt-rate, reverse-pkt-rate, fwd-byte-rate, rev-byte-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_notification

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

notification

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_notification_notification

Specification	Value
Type	*list*
Block object keys	

notification-template-name

Description Specify the notification template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/notification-template*

zone-list_detection_service-discovery

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

pkt-rate-threshold

Description packet rate threshold for discovery (default 10 packets per second)

Type: number

Range: 1-255

Default: 10

toggle

Description 'enable': Enable service discovery; 'disable': Disable service discovery;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_outbound-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

discovery-method

Description 'asn': Autonomous Systems number; 'country': Country;

Type: string

Supported Values: asn, country

discovery-record

Description Maximum number of top locations

Type: number

Range: 1-100

Default: 10

enable-top-k

Type: List

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection/indicator/{type}*

toggle

Description 'enable': Enable outbound detection; 'disable': Disable outbound detection;

Type: string

Supported Values: enable, disable

Default: disable

topk-source-subnet

Description: topk-source-subnet is a **JSON Block**. Please see below for *zone-list_detection_outbound-detection_topk-source-subnet*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection/topk-source-subnet*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_outbound-detection_topk-source-subnet

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_detection_outbound-detection_enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-netmask

Description Subnet mask. The value should be less than or equal to the minimum zone subnet mask + 8 (IPv6 Subnet mask)

Type: number

Range: 1-128

Default: 128

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-type

Description 'source-subnet': Topk source subnet;

Type: string

Supported Values: source-subnet

zone-list_detection_outbound-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

threshold-large-num

Description Threshold for each geo-location

Type: number

Range: 1-10995116277760

threshold-num

Description Threshold for each geo-location

Type: number

Range: 1-2147483647

threshold-str

Description Threshold for each geo-location (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, syn-rate, fin-rate, rst-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_packet-anomaly-detection

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto

Specification	Value
Type	*object*

proto-name-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}*

proto-number-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}*

proto-tcp-udp-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}*

zone-list_ip-proto_proto-number-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

esp-inspect

Description: esp-inspect is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_esp-inspect*

Type: Object

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/progression-tracking*

protocol-num

Description Protocol Number

Type: number

Range: 0-255

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

zone-list_ip-proto_proto-number-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-list_ip-proto_proto-number-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_ip-proto_proto-number-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_ip-proto_proto-number-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_manual-mode-list_zone-template*

Type: Object

zone-list_ip-proto_proto-number-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid, glid, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current,

ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

zone-list_ip-proto_proto-number-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_esp-inspect

Specification	Value
Type	*object*

auth-algorithm

Description 'AUTH_NULL': No Integrity Check Value; 'HMAC-SHA-1-96': 96 bit Auth Algo; 'HMAC-SHA-256-96': 96 bit Auth Algo; 'HMAC-SHA-256-128': 128 bit Auth Algo; 'HMAC-SHA-384-192': 192 bit Auth Algo; 'HMAC-SHA-512-256': 256 bit Auth Algo; 'HMAC-MD5-96': 96 bit Auth Algo; 'MAC-RIPEMD-160-96': 96 bit Auth Algo;

Type: string

Supported Values: AUTH_NULL, HMAC-SHA-1-96, HMAC-SHA-256-96, HMAC-SHA-256-128, HMAC-SHA-384-192, HMAC-SHA-512-256, HMAC-MD5-96, MAC-RIPEMD-160-96

encrypt-algorithm

Description 'NULL': Null Encryption Algorithm;

Type: string

Supported Values: NULL

mode

Description 'transport': Transport mode;

Type: string

Supported Values: transport

zone-list_ip-proto_proto-number-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-number-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for ip-proto icmp-v4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/ip-filtering-policy-statistics*

key-cfg

Type: List

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/progression-tracking*

protocol

Description 'icmp-v4': ip-proto icmp-v4; 'icmp-v6': ip-proto icmp-v6; 'other': ip-proto other; 'gre': ip-proto gre; 'ipv4-encap': ip-proto IPv4 Encapsulation; 'ipv6-encap': ip-proto IPv6 Encapsulation;

Type: string

Supported Values: icmp-v4, icmp-v6, other, gre, ipv4-encap, ipv6-encap

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-sources*

tunnel-decap

Description Enable tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-rate-limit

Description Enable DDOS-protection on tunnel traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

zone-list_ip-proto_proto-name-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-list_ip-proto_proto-name-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

zone-list_ip-proto_proto-name-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_ip-proto_proto-name-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_manual-mode-list_zone-template*

Type: Object

zone-list_ip-proto_proto-name-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, icmp-v4, icmp-v6, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v4 and class-list-glid are mutually exclusive

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v6 and class-list-glid are mutually exclusive

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Maximum Length: 1 characters

zone-list_ip-proto_proto-name-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-tcp-udp-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-tcp-udp-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-list_ip-proto_proto-tcp-udp-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}/ip-filtering-policy-statistics*

protocol

Description 'tcp': ip-proto tcp; 'udp': ip-proto udp;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_ip-proto_proto-tcp-udp-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-list_ip-proto_proto-tcp-udp-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port-range-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *zone-list_port-range-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified under zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_port-range-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-list_port-range-list_ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *zone-list_port-range-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *zone-list_port-range-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_port-range-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/port-ind*

port-range-end

Description Port-Range End Port Number

Type: number

Range: 1-65535

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-list_port-range-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *zone-list_port-range-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-list_port-range-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *zone-list_port-range-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *zone-list_port-range-list_virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts*

zone-list_port-range-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload, default 0

Type: number

Range: 0-1500

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port-range-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port-range-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port-range-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

zone-list_port-range-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port-range-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port-range-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-list_port-range-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port-range-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_port-range-list_level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port-range-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_port-range-list_virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enables creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}*

zone-list_port-range-list_virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_port-range-list_virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port-range-list_virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

zone-list_port-range-list_virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

zone-list_port-range-list_virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port-range-list_virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

zone-list_port-range-list_virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port-range-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port-range-list_manual-mode-list_zone-template*

Type: Object

zone-list_port-range-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port-range-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port-range-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

zone-list_port-range-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

zone-list_port-range-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

zone-list_port-range-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port-range-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

zone-list_port-range-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port-range-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

zone-list_port-range-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-list_port-range-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_collector

Specification	Value
Type	*list*
Block object keys	

sflow-name

Description Name of configured custom sFlow collector

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/sflow/collector/custom*

zone-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_capture-config-list

Specification	Value
Type	*list*
Block object keys	

mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_zone-template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-list_hw-blacklist-blocking

Specification	Value
Type	*object*

dst-enable

Description Enable Dst side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port

Specification	Value
Type	*object*

zone-service-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}*

zone-service-other-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}*

zone-list_port_zone-service-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts*

zone-list_port_zone-service-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload

Type: number

Range: 0-1500

Default: 0

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

zone-list_port_zone-service-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-list_port_zone-service-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

start-signature-extraction

Description Start signature extraction from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_port_zone-service-list_level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_port_zone-service-list_virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enable creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}*

zone-list_port_zone-service-list_virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (AC type Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

servername-no-sni

Description Match when there is no SNI extension found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

zone-list_port_zone-service-list_virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

zone-list_port_zone-service-list_virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

zone-list_port_zone-service-list_virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_manual-mode-list_zone-template*

Type: Object

zone-list_port_zone-service-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

zone-list_port_zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_rate_adaptive_threshold': Pkt Rate Adaptive Threshold; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_pkt_drop_rate_adaptive_threshold': Pkt Drop Rate Adaptive Threshold; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_syn_rate_adaptive_threshold': TCP SYN Rate Adaptive Threshold; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_fin_rate_adaptive_threshold': TCP FIN Rate Adaptive Threshold; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_rst_rate_adaptive_threshold': TCP RST Rate Adaptive Threshold; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_small_window_ack_rate_adaptive_threshold': TCP Small Window ACK Rate Adaptive Threshold; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_empty_ack_rate_adaptive_threshold': TCP Empty ACK Rate Adaptive Threshold; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_small_payload_rate_adaptive_threshold': TCP Small Payload Rate Adaptive Threshold; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_pkt_drop_ratio_adaptive_threshold': Pkt Drop / Pkt Rcvd Adaptive Threshold; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_inb_per_outb_adaptive_threshold': Bytes-to / Bytes-from Adaptive Threshold; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_syn_per_fin_rate_adaptive_threshold': TCP SYN Rate / FIN Rate Adaptive Threshold; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_conn_miss_rate_adaptive_threshold': TCP Session Miss Rate Adaptive Threshold; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_concurrent_conns_adaptive_threshold': TCP/UDP Concurrent Sessions Adaptive Threshold; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current;

‘ddet_ind_data_cpu_util_min’: Data CPU Utilization Min; ‘ddet_ind_data_cpu_util_max’: Data CPU Utilization Max; ‘ddet_ind_data_cpu_util_adaptive_threshold’: Data CPU Utilization Adaptive Threshold; ‘ddet_ind_outside_intf_util_current’: Outside Interface Utilization Current; ‘ddet_ind_outside_intf_util_min’: Outside Interface Utilization Min; ‘ddet_ind_outside_intf_util_max’: Outside Interface Utilization Max; ‘ddet_ind_outside_intf_util_adaptive_threshold’: Outside Interface Utilization Adaptive Threshold; ‘ddet_ind_frag_rate_current’: Frag Pkt Rate Current; ‘ddet_ind_frag_rate_min’: Frag Pkt Rate Min; ‘ddet_ind_frag_rate_max’: Frag Pkt Rate Max; ‘ddet_ind_frag_rate_adaptive_threshold’: Frag Pkt Rate Adaptive Threshold; ‘ddet_ind_bit_rate_current’: Bit Rate Current; ‘ddet_ind_bit_rate_min’: Bit Rate Min; ‘ddet_ind_bit_rate_max’: Bit Rate Max; ‘ddet_ind_bit_rate_adaptive_threshold’: Bit Rate Adaptive Threshold;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

zone-list_port_zone-service-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

zone-list_port_zone-service-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for this zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/port-ind*

port-other

Description 'other': other;

Type: string

Supported Values: other

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/progression-tracking*

protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-tcp-basic, sflow-tcp-stateful, and sflow-ip-filtering-policy are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

zone-list_port_zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-list_port_zone-service-other-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_port_zone-service-other-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-list_port_zone-service-other-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_manual-mode-list_zone-template*

Type: Object

zone-list_port_zone-service-other-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_port_zone-service-other-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

zone-list_port_zone-service-other-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

zone-list_port_zone-service-other-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_port_zone-service-other-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Specification	Value
Type	*list*
Block object keys	

expand-ipv6-subnet

Description Expand this subnet to individual IPv6 address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expand-ipv6-subnet-mode

Description 'default': Default learning mechanism (Default: Dynamic); 'dynamic': Dynamic learning; 'static': Static learning;

Type: string

Supported Values: default, dynamic, static

Default: default

ip6-addr

Description Specify IPv6 address

Type: string

Format: ipv6-address

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

zone-list_src-port-range-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *zone-list_src-port-range-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_src-port-range-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/level/{level-num}*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_src-port-range-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/port-ind*

protocol

Description 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_src-port-range-list_zone-template*

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-list_src-port-range-list_port-ind

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_src-port-range-list_level-list

Specification	Value
Type	*list*
Block object keys	

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1;

Type: string

Supported Values: 0, 1

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_src-port-range-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

type

Description 'pkt-rate': rate of incoming packets; 'bit-rate': rate of incoming bits;

Type: string

Supported Values: pkt-rate, bit-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-2147483647

zone-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total nu

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

zone-list_src-port

Specification	Value
Type	*object*

zone-src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}*

zone-src-port-other-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port-other/{port-other}+{protocol}*

zone-list_src-port_zone-src-port-list

Specification	Value
Type	*list*
Block object keys	

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_src-port_zone-src-port-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/level/{level-num}*

outbound-src-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_src-port_zone-src-port-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/port-ind*

port-num

Description Source Port Number

Type: number

Range: 1-65535

protocol

Description 'dns-udp': DNS-UDP Port; 'dns-tcp': DNS-TCP Port; 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: dns-udp, dns-tcp, udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-list_src-port_zone-src-port-list_zone-template*

Type: Object

zone-list_src-port_zone-src-port-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

zone-list_src-port_zone-src-port-list_zone-template

Specification	Value
Type	*object*

src-dns

Description DDOS dns src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-list_src-port_zone-src-port-list_port-ind

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_src-port_zone-src-port-list_level-list

Specification	Value
Type	*list*
Block object keys	

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1;

Type: string

Supported Values: 0, 1

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_src-port_zone-src-port-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

type

Description 'pkt-rate': rate of incoming packets; 'bit-rate': rate of incoming bits;

Type: string

Supported Values: pkt-rate, bit-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold of the entire zone for the src-port

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold of the entire zone for the src-port

Type: number

Range: 1-2147483647

zone-list_src-port_zone-src-port-other-list

Specification	Value
Type	*list*
Block object keys	

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-list_src-port_zone-src-port-other-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port-other/{port-other}+{protocol}/level/{level-num}*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-list_src-port_zone-src-port-other-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port-other/{port-other}+{protocol}/port-ind*

port-other

Description 'other': other;

Type: string

Supported Values: other

protocol

Description 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Threshold of the entire zone for the src-port

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold of the entire zone for the src-port

Type: number

Range: 1-2147483647

zone-list_web-gui

Specification	Value
Type	*object*

activated-after-learning

Description Activate it after learning

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-time

Description Configure create time

Type: string

Maximum Length: 13 characters

Maximum Length: 1 characters

learning

Description: learning is a **JSON Block**. Please see below for *zone-list_web-gui_learning*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui/learning*

modify-time

Description Configure modify time

Type: string

Maximum Length: 13 characters

Maximum Length: 1 characters

protection

Description: protection is a **JSON Block**. Please see below for *zone-list_web-gui_protection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui/protection*

sensitivity

Description '5': Low; '3': Medium; '1.5': High;

Type: string

Supported Values: 5, 3, 1.5

Default: 3

status

Description 'newly': newly; 'learning': learning; 'learned': learned; 'activated': activated;

Type: string

Supported Values: newly, learning, learned, activated

Default: newly

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-list_web-gui_protection

Specification	Value
Type	*object*

ip-proto

Description: ip-proto is a **JSON Block**. Please see below for *zone-list_web-gui_protection_ip-proto*

default-list

default-list is **JSON List** of *default attributes*

default-list : [

{ *default attributes* },

{ *default attributes* },

...

]

default attributes

age

Description Idle age for ip entry

Type: number

Range: 5-1023

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-address-type

Description 'ip': ip; 'ipv6': ipv6;

Type: string

Supported Values: ip, ipv6

deny

Description Blacklist and Drop all incoming packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/ip-proto/{port-num}*

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic dst entry

Type: number

Range: 0-2147483647

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/port/{port-num}+{protocol}*

src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/default/{default-address-type}/src-port/{port-num}+{protocol}*

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-tcp': dns-tcp; 'dns-udp': dns-udp; 'http': http; 'tcp': tcp; 'udp': udp; 'ssl-l4': ssl-l4; 'sip-udp': sip-udp; 'sip-tcp': sip-tcp;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

template

Description: template is a **JSON Block**. Please see below for *port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-syn-auth

Description Disable TCP SYN Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow. Exceed action set to Drop

Type: number

Range: 1-6

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *l4-type-list_tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

src-port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'udp': udp; 'tcp': tcp;

Type: string

Supported Values: udp, tcp

template

Description: template is a **JSON Block**. Please see below for *src-port-list_template*

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-list_template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Protocol Number

Type: number

Range: 0-255

template

Description: template is a **JSON Block**. Please see below for *ip-proto-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 1 characters

ip-proto-list_template

Specification	Value
Type	*object*

other

Description DDOS other template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

with-sflow-sample

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-dep-cfg

Specification	Value
Type	*object*

exceed-log-enable

Description (Deprecated)Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow-dep

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow. Exceed action set to Drop

Type: number

Range: 1-6

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *l4-type-list_tunnel-decap*

2.33.66 ddos dst dynamic-entry-overflow-policy l4-type

DDOS L4 type

l4-type Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*protocol*
Collection Name	*l4-type-list*
Collection URI	/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type
Element Name	l4-type
Element URI	/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type/{protocol}
Element Attributes	l4-type_attributes
Partition Visibility	shared
Schema	`l4-type schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type

l4-type attributes

Create List

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type

l4-type attributes

Get Object

GET

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type/{protocol}

l4-type attributes

Get List

GET

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type

l4-type-list

Modify Object

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type/{protocol}

l4-type attributes

Replace Object

PUT

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type/{protocol}

l4-type attributes

Replace List

PUT

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type

l4-type-list

Delete Object

DELETE

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/l4-type/{protocol}

l4-type attributes

l4-type-list

l4-type-list is **JSON List** of *l4-type attributes*

```
l4-type-list : [
        { l4-type attributes },
        { l4-type attributes },
        ...
    ]
```

l4-type attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow. Exceed action set to Drop

Type: number

Range: 1-6

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

2.33.67 ddos dst dynamic-entry-overflow-policy port

DDOS Port & Protocol configuration

port Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-num, protocol*
Collection Name	*port-list*
Collection URI	/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port
Element Name	port
Element URI	/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port/{port-num}+{protocol}
Element Attributes	port_attributes
Partition Visibility	shared
Schema	`port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port

port attributes

Create List

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port

port attributes

Get Object

GET

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port/{port-num}+{protocol}

port attributes

Get List

GET

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port

port-list

Modify Object

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port/{port-num}+{protocol}

port attributes

Replace Object

PUT

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port/{port-num}+{protocol}

port attributes

Replace List

PUT

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port

port-list

Delete Object

DELETE

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/port/{port-num}+{protocol}

port attributes

port-list

port-list is **JSON List** of *port attributes*

```
port-list : [
        { port attributes },
        { port attributes },
        ...
    ]
```

port attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-tcp': dns-tcp; 'dns-udp': dns-udp; 'http': http; 'tcp': tcp; 'udp': udp; 'ssl-l4': ssl-l4; 'sip-udp': sip-udp; 'sip-tcp': sip-tcp;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

2.33.68 ddos dst dynamic-entry-overflow-policy src-port

DDOS Source Port & Protocol configuration

src-port Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-num, protocol*
Collection Name	*src-port-list*
Collection URI	/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/src-port
Element Name	src-port
Element URI	/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/src-port/{port-num}+{protocol}
Element Attributes	src-port_attributes
Partition Visibility	shared
Schema	`src-port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/src-port

src-port attributes

Create List

POST

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/src-port

DELETE

/axapi/v3/ddos/dst/dynamic-entry-overflow-policy/{default-address-type}/src-port/{port-num}+{protocol}

src-port attributes

src-port-list

src-port-list is **JSON List** of *src-port attributes*

```
src-port-list : [
        { src-port attributes },
        { src-port attributes },
        ...
    ]
```

src-port attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'udp': udp; 'tcp': tcp;

Type: string

Supported Values: udp, tcp

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

2.33.69 ddos dst entry

Configure IP/IPv6 static entry

entry Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*dst-entry-name*
Collection Name	*entry-list*
Collection URI	/axapi/v3/ddos/dst/entry

```

entry-list

entry-list is **JSON List** of *entry attributes*

entry-list : [

{ *entry attributes* },

{ *entry attributes* },

...

]

entry attributes

advertised-enable

Description BGP advertised

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blackhole-on-glid-exceed

Description Blackhole destination entry for X minutes upon glid limit exceeded

Type: number

Range: 1-30

capture-config-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/capture-config/{name}*

description

Description Description for this Destination Entry

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dest-nat-ip

Description Destination NAT IP address

Type: string

Format: ipv4-address

dest-nat-ipv6

Description Destination NAT IPv6 address

Type: string

Format: ipv6-address

drop-disable

Description Disable certain drops during packet processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-disable-fwd-immediate

Description Immediately forward L4 drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-src-dst-default

Description Drop if no match with src-based-policy class-list, and default is not configured

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst-entry-name

Description

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/dynamic-entry-overflow-policy/{dummy-name}*

enable-top-k

Type: List

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *exceed-log-cfg*

Type: Object

exceed-log-dep-cfg

Description: exceed-log-dep-cfg is a **JSON Block**. Please see below for *exceed-log-dep-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *glid-exceed-action*

Type: Object

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/hw-blacklist-blocking*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip-addr

Description

Type: string

Format: ipv4-address

ip-proto-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/ip-proto/{port-num}*

ipv6-addr

Description

Type: string

Format: ipv6-address

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational-mode

Description 'protection': Protection mode; 'bypass': Bypass mode;

Type: string

Supported Values: protection, bypass

Default: protection

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

pattern-recognition-hw-filter-enable

Description to enable pattern recognition hardware filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition-sensitivity

Description 'high': High sensitive pattern recognition; 'medium': Medium sensitive pattern recognition; 'low': Low sensitive pattern recognition;

Type: string

Supported Values: high, medium, low

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}*

port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port-range/{port-range-start}+{port-range-end}+{protocol}*

reporting-disabled

Description Disable Reporting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *sflow*

Type: Object

source-nat-pool

Description Configure source NAT

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-dst-pair

Description: src-dst-pair is a **JSON Block**. Please see below for *src-dst-pair*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair*

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/topk-destinations*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *port-list_capture-config*

Type: Object

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cache

Description DNS Cache Instance

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/dns-cache*

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *port-list_glid-exceed-action*

Type: Object

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *port-list_pattern-recognition*

Type: Object

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *port-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 0-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *port-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *port-list_sflow*

Type: Object

signature-extraction

Description: signature-extraction is a **JSON Block**. Please see below for *port-list_signature-extraction*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/signature-extraction*

template

Description: template is a **JSON Block**. Please see below for *port-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *port-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/topk-sources*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-list_signature-extraction

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

manual-mode

Description Enable manual mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

polling

Description: polling is a **JSON Block**. Please see below for *port-list_sflow_polling*

Type: Object

port-list_sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *port-list_sflow_polling_sflow-tcp*

Type: Object

port-list_sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

capture-config-list

Specification	Value
Type	*list*
Block object keys	

mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-range-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *port-range-list_capture-config*

Type: Object

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

Pkt Drop Rate Max; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_concurrent_conns_current,

ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max

port-range-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list_sflow

Specification	Value
Type	*object*

polling

Description: polling is a **JSON Block**. Please see below for *port-range-list_sflow_polling*

Type: Object

port-range-list_sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *port-range-list_sflow_polling_sflow-tcp*

Type: Object

port-range-list_sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

hw-blacklist-blocking

Specification	Value
Type	*object*

dst-enable

Description Enable Dst side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/app-type-src-dst/{protocol}*

cid-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/cid/{cid-num}*

class-list-name

Description Class-list name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *src-dst-pair-class-list-list_exceed-log-cfg*

Type: Object

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/l4-type-src-dst/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_cid-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-cid-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/cid/{cid-num}/app-type-src-dst-cid/{protocol}*

cid-num

Description Class-list id

Type: number

Range: 1-32

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *src-dst-pair-class-list-list_cid-list_exceed-log-cfg*

Type: Object

l4-type-src-dst-cid-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-class-list/{class-list-name}/cid/{cid-num}/l4-type-src-dst-cid/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_cid-list_app-type-src-dst-cid-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair-class-list-list_cid-list_app-type-src-dst-cid-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_cid-list_app-type-src-dst-cid-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_cid-list_l4-type-src-dst-cid-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair-class-list-list_cid-list_l4-type-src-dst-cid-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_cid-list_l4-type-src-dst-cid-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_cid-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dst-pair-class-list-list_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair-class-list-list_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair-class-list-list_l4-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_l4-type-src-dst-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-class-list-list_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *glid-exceed-action_stateless-encap-action-cfg*

Type: Object

glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

l4-type-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-syn-auth

Description Disable TCP SYN Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *l4-type-list_glid-exceed-action*

Type: Object

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow

Type: number

Range: 1-6

max-rexmit-syn-per-flow-exceed-action

Description 'drop': Drop the packet; 'black-list': Add the source IP into black list;

Type: string

Supported Values: drop, black-list

port-ind

Description: port-ind is a **JSON Block**. Please see below for *l4-type-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *l4-type-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/progression-tracking*

protocol

Description 'tcp': L4-Type TCP; 'udp': L4-Type UDP; 'icmp': L4-Type ICMP; 'other': L4-Type OTHER;

Type: string

Supported Values: tcp, udp, icmp, other

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *l4-type-list_template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *l4-type-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/topk-sources*

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *l4-type-list_tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *l4-type-list_tunnel-rate-limit*

Type: Object

undefined-port-hit-statistics

Description: undefined-port-hit-statistics is a **JSON Block**. Please see below for *l4-type-list_undefined-port-hit-statistics*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-type-list_undefined-port-hit-statistics

Specification	Value
Type	*object*

reset-interval

Description Configure port scanning counter reset interval (minutes), Default 60 mins

Type: number

Range: 1-64000

Default: 60

undefined-port-hit-statistics

Description Enable port scanning statistics

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-list_template

Specification	Value
Type	*object*

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

l4-type-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *l4-type-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

l4-type-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

l4-type-list_port-ind

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_bit_rate_current':

Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max

l4-type-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-settings-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

all-types

Description 'all-types': Settings for all types (default or class-list);

Type: string

Supported Values: all-types

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for DST entry or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-settings/{all-types}/l4-type-src-dst/{protocol}*

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

src-prefix-len

Description Specify src prefix length for IPv6 (default: not set)

Type: number

Range: 32-127

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-settings-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-range-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'udp': UDP Port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

template

Description: template is a **JSON Block**. Please see below for *src-port-range-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-range-list_template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ip-proto-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

esp-inspect

Description: esp-inspect is a **JSON Block**. Please see below for *ip-proto-list_esp-inspect*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *ip-proto-list_glid-exceed-action*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

port-num

Description Protocol Number

Type: number

Range: 0-255

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

template

Description: template is a **JSON Block**. Please see below for *ip-proto-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto-list_esp-inspect

Specification	Value
Type	*object*

auth-algorithm

Description 'AUTH_NULL': No Integrity Check Value; 'HMAC-SHA-1-96': 96 bit Auth Algo; 'HMAC-SHA-256-96': 96 bit Auth Algo; 'HMAC-SHA-256-128': 128 bit Auth Algo; 'HMAC-SHA-384-192': 192 bit Auth Algo; 'HMAC-SHA-512-256': 256 bit Auth Algo; 'HMAC-MD5-96': 96 bit Auth Algo; 'MAC-RIPEMD-160-96': 96 bit Auth Algo;

Type: string

Supported Values: AUTH_NULL, HMAC-SHA-1-96, HMAC-SHA-256-96, HMAC-SHA-256-128, HMAC-SHA-384-192, HMAC-SHA-512-256, HMAC-MD5-96, MAC-RIPEMD-160-96

encrypt-algorithm

Description 'NULL': Null Encryption Algorithm;

Type: string

Supported Values: NULL

mode

Description 'transport': Transport mode;

Type: string

Supported Values: transport

ip-proto-list_template

Specification	Value
Type	*object*

other

Description DDOS other template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ip-proto-list_glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *ip-proto-list_glid-exceed-action_stateless-encap-action-cfg*

Type: Object

ip-proto-list_glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

src-port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

outbound-src-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

port-num

Description Port Number

Type: number

Range: 0-65535

protocol

Description 'dns-udp': DNS-UDP Port; 'dns-tcp': DNS-TCP Port; 'udp': UDP Port; 'tcp': TCP Port;

Type: string

Supported Values: dns-udp, dns-tcp, udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

template

Description: template is a **JSON Block**. Please see below for *src-port-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-list_template

Specification	Value
Type	*object*

src-dns

Description DDOS dns src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-high-frequency

Description Enable High frequency logging for non-event logs per entry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rate-limit

Description Rate limit per second per entry(Default : 1 per second)

Type: number

Range: 1-1000

Default: 1

sflow

Specification	Value
Type	*object*

collector

Type: List

polling

Description: polling is a **JSON Block**. Please see below for *sflow_polling*

Type: Object

sflow_collector

Specification	Value
Type	*list*
Block object keys	

sflow-name

Description Name of configured custom sFlow collector

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/sflow/collector/custom*

sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-layer-4

Description Enable sFlow Layer 4 counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total num

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the tota

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *sflow_polling_sflow-tcp*

Type: Object

sflow-undef-port-hit-stats

Description Enable sFlow undefined-port-hit-statistics polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-undef-port-hit-stats-brief

Description Enable sFlow undefined-port-hit-statistics polling in brief mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the total n

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling. WARNING: Entry level Sflow polling might induce heavy CPU load depending on the tota

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-dst-pair

Specification	Value
Type	*object*

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair/app-type-src-dst/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default

Description Configure default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *src-dst-pair_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair/l4-type-src-dst/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair_template*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair_l4-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair_exceed-log-cfg

Specification	Value
Type	*object*

log-enable

Description Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-policy-list_policy-class-list-list_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow

src-dst-pair-policy-list_policy-class-list-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair-policy-list_policy-class-list-list_l4-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-policy-list_policy-class-list-list_l4-type-src-dst-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-overflow-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}/app-type-src-dst-overflow/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dummy-name

Description 'configuration': Configure src dst dynamic entry count overflow policy for class-list;

Type: string

Supported Values: configuration

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *src-dst-pair-policy-list_policy-class-list-list_class-list-overflow-policy-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-src-dst-overflow-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}/l4-type-src-dst-overflow/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *src-dst-pair-policy-list_policy-class-list-list_class-list-overflow-policy-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-dst-pair-policy-list_policy-class-list-list_class-list-overflow-policy-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters
