enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-type

Description 'destination': Topk destination IP;

Type: string

Supported Values: destination

exceed-log-dep-cfg

Specification	Value
Type	*object*

exceed-log-enable

Description (Deprecated)Enable logging of limit exceed drop's

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-with-sflow-dep

Description Turn on sflow sample with log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.33.70 ddos dst entry capture-config

Specify packet capture-config

```

l4-type attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-syn-auth

Description Disable TCP SYN Authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-on-no-port-match

Description 'disable': disable; 'enable': enable;

Type: string

Supported Values: disable, enable

Default: enable

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *glid-exceed-action*

Type: Object

max-rexmit-syn-per-flow

Description Maximum number of re-transmit SYN per flow

Type: number

Range: 1-6

max-rexmit-syn-per-flow-exceed-action

Description 'drop': Drop the packet; 'black-list': Add the source IP into black list;

Type: string

Supported Values: drop, black-list

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/progression-tracking*

protocol

Description 'tcp': L4-Type TCP; 'udp': L4-Type UDP; 'icmp': L4-Type ICMP; 'other': L4-Type OTHER;

Type: string

Supported Values: tcp, udp, icmp, other

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn-auth

Description 'send-rst': Send RST to client upon client ACK; 'force-rst-by-ack': Force client RST via the use of ACK; 'force-rst-by-synack': Force client RST via the use of bad SYN|ACK; 'disable': Disable TCP SYN Authentication;

Type: string

Supported Values: send-rst, force-rst-by-ack, force-rst-by-synack, disable

Default: send-rst

syn-cookie

Description Enable SYN Cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-client

Description Send reset to client when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-reset-server

Description Send reset to server when rate exceeds or session ages out

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/l4-type/{protocol}/topk-sources*

Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *glid-exceed-action_stateless-encap-action-cfg*

Type: Object

glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-ind_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_bit_rate_current':

Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max

Type: number

Format: counter

ddet_ind_bit_rate_max

Description Bit Rate Max

Type: number

Format: counter

ddet_ind_bit_rate_min

Description Bit Rate Min

Type: number

Format: counter

ddet_ind_concurrent_conns_current

Description TCP/UDP Concurrent Sessions Current

Type: number

Format: counter

ddet_ind_concurrent_conns_max

Description TCP/UDP Concurrent Sessions Max

Type: number

Format: counter

ddet_ind_concurrent_conns_min

Description TCP/UDP Concurrent Sessions Min

Type: number

Format: counter

ddet_ind_conn_miss_rate_current

Description TCP Session Miss Rate Current

Type: number

Format: counter

ddet_ind_conn_miss_rate_max

Description TCP Session Miss Rate Max

Type: number

Format: counter

ddet_ind_conn_miss_rate_min

Description TCP Session Miss Rate Min

Type: number

Format: counter

ddet_ind_data_cpu_util_current

Description Data CPU Utilization Current

Type: number

Format: counter

ddet_ind_data_cpu_util_max

Description Data CPU Utilization Max

Type: number

Format: counter

ddet_ind_data_cpu_util_min

Description Data CPU Utilization Min

Type: number

Format: counter

ddet_ind_empty_ack_rate_current

Description TCP Empty ACK Rate Current

Type: number

Format: counter

ddet_ind_empty_ack_rate_max

Description TCP Empty ACK Rate Max

Type: number

Format: counter

ddet_ind_empty_ack_rate_min

Description TCP Empty ACK Rate Min

Type: number

Format: counter

ddet_ind_fin_rate_current

Description TCP FIN Rate Current

Type: number

Format: counter

ddet_ind_fin_rate_max

Description TCP FIN Rate Max

Type: number

Format: counter

ddet_ind_fin_rate_min

Description TCP FIN Rate Min

Type: number

Format: counter

ddet_ind_frag_rate_current

Description Frag Pkt Rate Current

Type: number

Format: counter

ddet_ind_frag_rate_max

Description Frag Pkt Rate Max

Type: number

Format: counter

ddet_ind_frag_rate_min

Description Frag Pkt Rate Min

Type: number

Format: counter

ddet_ind_inb_per_outb_current

Description Bytes-to / Bytes-from Current

Type: number

Format: counter

ddet_ind_inb_per_outb_max

Description Bytes-to / Bytes-from Max

Type: number

Format: counter

2.33.87 ddos dst entry port

DDOS Port & Protocol configuration

port Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-num, protocol*
Collection Name	*port-list*
Collection URI	/axapi/v3/ddos/dst/entry/{dst-entry-name}/port
Element Name	port
Element URI	/axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}
Element Attributes	port_attributes
Partition Visibility	shared
Statistics Data URI	/axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/stats
Operational Data URI	/axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/oper
Schema	`port schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port

port attributes

Create List

POST

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port

port attributes

Get Object

GET

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}

port attributes

Get List

GET

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port

port-list

Modify Object

POST

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}

port attributes

Replace Object

PUT

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}

port attributes

Replace List

PUT

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port

port-list

Delete Object

DELETE

/axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}

port attributes

port-list

port-list is **JSON List** of *port attributes*

port-list : [

{ *port attributes* },

{ *port attributes* },

...

]

port attributes

capture-config

Description: capture-config is a **JSON Block**. Please see below for *capture-config*

Type: Object

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detection-enable

Description Enable ddos detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-cache

Description DNS Cache Instance

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/dns-cache*

enable-top-k

Description Enable ddos top-k entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-exceed-action

Description: glid-exceed-action is a **JSON Block**. Please see below for *glid-exceed-action*

Type: Object

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 0-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow

Description: sflow is a **JSON Block**. Please see below for *sflow*

Type: Object

signature-extraction

Description: signature-extraction is a **JSON Block**. Please see below for *signature-extraction*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/signature-extraction*

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/port/{port-num}+{protocol}/topk-sources*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

signature-extraction

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

manual-mode

Description Enable manual mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

glid-exceed-action

Specification	Value
Type	*object*

stateless-encap-action-cfg

Description: stateless-encap-action-cfg is a **JSON Block**. Please see below for *glid-exceed-action_stateless-encap-action-cfg*

Type: Object

glid-exceed-action_stateless-encap-action-cfg

Specification	Value
Type	*object*

encap-template

Description Apply legacy encap template for encap action

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/template/encap*

stateless-encap-action

Description 'stateless-tunnel-encap': Encapsulate all packets; 'stateless-tunnel-encap-scrubbed': Encapsulate all packets and allow packets to go through other DDoS checks before sent (conn-limit exceeded packet can not be scrubbed, it will default to stateless-tunnel-encap);

Type: string

Supported Values: stateless-tunnel-encap, stateless-tunnel-encap-scrubbed

pattern-recognition-pu-details

polling

Description: polling is a **JSON Block**. Please see below for *sflow_polling*

Type: Object

sflow_polling

Specification	Value
Type	*object*

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *sflow_polling_sflow-tcp*

Type: Object

sflow_polling_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

2.33.123 ddos dst entry src-dst-pair-policy

Configure class-list

src-dst-pair-policy Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*src-based-policy-name*
Collection Name	*src-dst-pair-policy-list*
Collection URI	/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy
Element Name	src-dst-pair-policy
Element URI	/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}
Element Attributes	src-dst-pair-policy_attributes
Partition Visibility	shared
Schema	`src-dst-pair-policy schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy

src-dst-pair-policy attributes

Create List

POST

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy

src-dst-pair-policy attributes

Get Object

GET

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}

src-dst-pair-policy attributes

Get List

GET

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy

src-dst-pair-policy-list

Modify Object

POST

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}

src-dst-pair-policy attributes

Replace Object

PUT

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}

src-dst-pair-policy attributes

Replace List

PUT

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy

src-dst-pair-policy-list

Delete Object

DELETE

/axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}

src-dst-pair-policy attributes

src-dst-pair-policy-list

src-dst-pair-policy-list is **JSON List** of *src-dst-pair-policy attributes*

```
src-dst-pair-policy-list : [
        { src-dst-pair-policy attributes },
        { src-dst-pair-policy attributes },
        ...
    ]
```

src-dst-pair-policy attributes

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Src-based-policy name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

app-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/app-type-src-dst/{protocol}*

bypass

Description Always permit for the Source to bypass all feature & limit checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

exceed-log-cfg

Description: exceed-log-cfg is a **JSON Block**. Please see below for *policy-class-list-list_exceed-log-cfg*

Type: Object

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/l4-type-src-dst/{protocol}*

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry under class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

template

Description: template is a **JSON Block**. Please see below for *policy-class-list-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

policy-class-list-list_template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

policy-class-list-list_app-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

protocol

Description 'dns': dns; 'http': http; 'ssl-l4': ssl-l4; 'sip': sip;

Type: string

Supported Values: dns, http, ssl-l4, sip

template

Description: template is a **JSON Block**. Please see below for *policy-class-list-list_app-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

policy-class-list-list_app-type-src-dst-list_template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS SSL-L4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow

policy-class-list-list_l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *policy-class-list-list_l4-type-src-dst-list_template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

policy-class-list-list_l4-type-src-dst-list_template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

policy-class-list-list_class-list-overflow-policy-list

Specification	Value

l4-type-src-dst attributes

l4-type-src-dst-list

l4-type-src-dst-list is **JSON List** of *l4-type-src-dst attributes*

l4-type-src-dst-list : [

{ *l4-type-src-dst attributes* },

{ *l4-type-src-dst attributes* },

...

]

l4-type-src-dst attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

other

Description DDOS OTHER template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

tcp

Description DDOS TCP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

template-icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v4 and template-icmp-v6 are mutually exclusive

template-icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: template-icmp-v6 and template-icmp-v4 are mutually exclusive

udp

Description DDOS UDP template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-dst-pair-settings attributes

src-dst-pair-settings-list

src-dst-pair-settings-list is **JSON List** of *src-dst-pair-settings attributes*

src-dst-pair-settings-list : [

{ *src-dst-pair-settings attributes* },

{ *src-dst-pair-settings attributes* },

...

]

src-dst-pair-settings attributes

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

all-types

Description 'all-types': Settings for all types (default or class-list);

Type: string

Supported Values: all-types

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for DST entry or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-src-dst-list

Type: List

Reference Object: */axapi/v3/ddos/dst/entry/{dst-entry-name}/src-dst-pair-settings/{all-types}/l4-type-src-dst/{protocol}*

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

src-prefix-len

Description Specify src prefix length for IPv6 (default: not set)

Type: number

Range: 32-127

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-type-src-dst-list

Specification	Value
Type	*list*
Block object keys	

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic src-dst entry

Type: number

Range: 0-2147483647

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

]

src-port-range attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'udp': UDP Port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

template

Description: template is a **JSON Block**. Please see below for *template*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

2.33.136 ddos dst entry src-port-range oper

l4-type-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/l4-type/{protocol}*

log-enable

Description Enable logging of limit exceed drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable periodic log while event is continuing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/interface-ip/{addr}/port/{port-num}+{protocol}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 1-65535

protocol

Description 'tcp': tcp; 'udp': udp; 'http-probe': http port for interface health check;

Type: string

Supported Values: tcp, udp, http-probe

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto-list

Specification	Value
Type	*list*

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

l4-type-list_tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

l4-type-list_tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

l4-type-list_tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-type-list

Delete Object

DELETE

/axapi/v3/ddos/dst/interface-ip/{addr}/l4-type/{protocol}

l4-type attributes

l4-type-list

l4-type-list is **JSON List** of *l4-type attributes*

```
l4-type-list : [
        { l4-type attributes },
        { l4-type attributes },
        ...
    ]
```

l4-type attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

protocol

Description 'tcp': tcp; 'udp': udp; 'icmp': icmp; 'other': other;

Type: string

Supported Values: tcp, udp, icmp, other

tunnel-decap

Description: tunnel-decap is a **JSON Block**. Please see below for *tunnel-decap*

Type: Object

tunnel-rate-limit

Description: tunnel-rate-limit is a **JSON Block**. Please see below for *tunnel-rate-limit*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tunnel-decap

Specification	Value
Type	*object*

gre-decap

Description Enable GRE Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-decap

Description Enable IP Tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-cfg

Type: List

tunnel-decap_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

tunnel-rate-limit

Specification	Value
Type	*object*

gre-rate-limit

Description Enable inner IP rate limiting on GRE traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-rate-limit

Description Enable inner IP rate limiting on IPinIP traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.33.143 ddos dst interface-ip port

Configure port for local interface IPs

port Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-num, protocol*
Collection Name	*port-list*
Collection URI	/axapi/v3/ddos/dst/interface-ip/{addr}/port
Element Name	port
Element URI	/axapi/v3/ddos/dst/interface-ip/{addr}/port/{port-num}+{protocol}
Element Attributes	port_attributes
Partition Visibility	shared
Schema	`port schema`

Operations Allowed:

Create Object

POST

DELETE

/axapi/v3/ddos/dst/interface-ip/{addr}/port/{port-num}+{protocol}

port attributes

port-list

port-list is **JSON List** of *port attributes*

```
port-list : [
        { port attributes },
        { port attributes },
        ...
    ]
```

port attributes

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-num

Description Port Number

Type: number

Range: 1-65535

protocol

Description 'tcp': tcp; 'udp': udp; 'http-probe': http port for interface health check;

Type: string

Supported Values: tcp, udp, http-probe

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.144 ddos dst interface-ipv6

Configure protections on local interface IPs

interface-ipv6 Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*addr*
Collection Name	*interface-ipv6-list*
Collection URI	/axapi/v3/ddos/dst/interface-ipv6
Element Name	interface-ipv6
Element URI	/axapi/v3/ddos/dst/interface-ipv6/{addr}
Element Attributes	interface-ipv6_attributes
Partition Visibility	shared
Schema	`interface-ipv6 schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/interface-ipv6

interface-ipv6 attributes

```
POST /axapi/v3/ddos/dst/interface-ipv6/
Payload:

zone-list

zone-list is **JSON List** of *zone attributes*

zone-list : [

{ *zone attributes* },

{ *zone attributes* },

...

]

zone attributes

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

advertised-enable

Description BGP advertised

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/capture-config/{name}*

collector

Type: List

continuous-learning

Description Continuous learning of detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

description

Description Description for this Destination Zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dest-nat-ip

Description Destination NAT IP address

Type: string

Format: ipv4-address

dest-nat-ipv6

Description Destination NAT IPv6 address

Type: string

Format: ipv6-address

detection

Description: detection is a **JSON Block**. Please see below for *detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection*

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Type: List

force-operational-mode

Description Force configure operational mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

hw-blacklist-blocking

Description: hw-blacklist-blocking is a **JSON Block**. Please see below for *hw-blacklist-blocking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking*

inbound-forward-dscp

Description To set dscp value for inbound packets (DSCP Value for the clear traffic marking)

Type: number

Range: 1-63

ip

Type: List

ip-proto

Description: ip-proto is a **JSON Block**. Please see below for *ip-proto*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto*

ipv6

Type: List

is-from-wizard

Description Is It Created from Onbox GUI Wizard

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-high-frequency

Description Enable High frequency logging for non-event logs per zone

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-restrictive

Description Non-restrictive mode ignores Zero Thresholds Indicators

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational-mode

Description 'idle': Idle mode; 'monitor': Monitor mode; 'learning': Learning mode;

Type: string

Supported Values: idle, monitor, learning

Default: idle

outbound-forward-dscp

Description To set dscp value for outbound

Type: number

Range: 1-63

outbound-policy

Description: outbound-policy is a **JSON Block**. Please see below for *outbound-policy*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/outbound-policy*

packet-anomaly-detection

Description: packet-anomaly-detection is a **JSON Block**. Please see below for *packet-anomaly-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/packet-anomaly-detection*

pattern-recognition-hw-filter-enable

Description to enable pattern recognition hardware filter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition-sensitivity

Description 'high': High sensitive pattern recognition; 'medium': Medium sensitive pattern recognition; 'low': Low sensitive pattern recognition;

Type: string

Supported Values: high, medium, low

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port

Description: port is a **JSON Block**. Please see below for *port*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port*

port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}*

rate-limit

Description Rate limit per second per zone(Default : 1 per second)

Type: number

Range: 1-1000

Default: 1

reporting-disabled

Description Disable Reporting

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sampling-enable

Type: List

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable sFlow counter polling packets, tcp-basic, tcp-stateful and http. WARNING: Zone level Sflow polling might induce heavy CP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-layer-4, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-layer-4

Description Enable sFlow Layer 4 counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the number of

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-layer-4 and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *sflow-tcp*

Type: Object

source-nat-pool

Description Configure source NAT

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-port

Description: src-port is a **JSON Block**. Please see below for *src-port*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port*

src-port-range-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}*

src-prefix-len

Description Specify src prefix length for IPv6 (default: not set)

Type: number

Range: 32-127

telemetry-enable

Description Enable from-l3-peer flag for the zone, thus all the ip entries in the zone will be dynamically created/deleted based on the BGP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-sensitivity

Description tune threshold ranges with levels LOW/MEDIUM/HIGH/OFF(default) or multiplier of threshold value (available options are LOW=5x/MEDIUM=3x/HIGH=1.5x/OFF=1x, or float value between 1.0-10.0)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Default: OFF

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/topk-destinations*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-gui

Description: web-gui is a **JSON Block**. Please see below for *web-gui*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui*

zone-migrate-to-opposite

Description Migrate zone to opposite PU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

zone-profile

Description Apply threshold profile

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/zone-profile*

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

outbound-policy

Specification	Value
Type	*object*

name

Description Specify name of the outbound policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/outbound-policy*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip

Specification	Value
Type	*list*
Block object keys	

expand-ip-subnet

Description Expand this subnet to individual IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expand-ip-subnet-mode

Description 'default': Default learning mechanism (Default: Dynamic); 'dynamic': Dynamic learning; 'static': Static learning;

Type: string

Supported Values: default, dynamic, static

Default: default

ip-addr

Description Specify IP address

Type: string

Format: ipv4-address

subnet-ip-addr

Description IP Subnet

Type: string

Format: ipv4-cidr

detection

Specification	Value
Type	*object*

notification

Description: notification is a **JSON Block**. Please see below for *detection_notification*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/notification*

outbound-detection

Description: outbound-detection is a **JSON Block**. Please see below for *detection_outbound-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection*

packet-anomaly-detection

Description: packet-anomaly-detection is a **JSON Block**. Please see below for *detection_packet-anomaly-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/packet-anomaly-detection*

service-discovery

Description: service-discovery is a **JSON Block**. Please see below for *detection_service-discovery*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/service-discovery*

settings

Description 'settings': settings;

Type: string

Supported Values: settings

toggle

Description 'enable': Enable detection; 'disable': Disable detection;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

victim-ip-detection

Description: victim-ip-detection is a **JSON Block**. Please see below for *detection_victim-ip-detection*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/victim-ip-detection*

detection_packet-anomaly-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/packet-anomaly-detection/indicator/{type}*

toggle

Description 'enable': Enable packet anomaly; 'disable': Disable packet anomaly;

Type: string

Supported Values: enable, disable

Default: enable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_packet-anomaly-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

threshold-num

Description Threshold for each indicator

Type: number

Range: 1-65535

Default: 100

type

Description 'port-zero-pkt-rate': Port Zero Packet Rate (default 100 packet per second);

Type: string

Supported Values: port-zero-pkt-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_victim-ip-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

histogram-toggle

Description 'histogram-enable': Enable histogram statistics of victim IP detection; 'histogram-disable': Disable histogram statistics of victim IP detection;

Type: string

Supported Values: histogram-enable, histogram-disable

Default: histogram-disable

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/victim-ip-detection/indicator/{type}*

toggle

Description 'enable': Enable victim IP detection; 'disable': Disable victim IP detection;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_victim-ip-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

ip-threshold-num

Description Threshold for IP

Type: number

Range: 1-2147483647

type

Description 'pkt-rate': rate of incoming packets; 'reverse-pkt-rate': rate of reverse coming packets; 'fwd-byte-rate': rate of incoming bytes; 'rev-byte-rate': rate of reverse coming bytes;

Type: string

Supported Values: pkt-rate, reverse-pkt-rate, fwd-byte-rate, rev-byte-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_notification

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

notification

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_notification_notification

Specification	Value
Type	*list*
Block object keys	

notification-template-name

Description Specify the notification template name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/notification-template*

detection_service-discovery

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

pkt-rate-threshold

Description packet rate threshold for discovery (default 10 packets per second)

Type: number

Range: 1-255

Default: 10

toggle

Description 'enable': Enable service discovery; 'disable': Disable service discovery;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_outbound-detection

Specification	Value
Type	*object*

configuration

Description 'configuration': configuration;

Type: string

Supported Values: configuration

discovery-method

Description 'asn': Autonomous Systems number; 'country': Country;

Type: string

Supported Values: asn, country

discovery-record

Description Maximum number of top locations

Type: number

Range: 1-100

Default: 10

enable-top-k

Type: List

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection/indicator/{type}*

toggle

Description 'enable': Enable outbound detection; 'disable': Disable outbound detection;

Type: string

Supported Values: enable, disable

Default: disable

topk-source-subnet

Description: topk-source-subnet is a **JSON Block**. Please see below for *detection_outbound-detection_topk-source-subnet*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/detection/outbound-detection/topk-source-subnet*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_outbound-detection_topk-source-subnet

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

detection_outbound-detection_enable-top-k

Specification	Value
Type	*list*
Block object keys	

topk-netmask

Description Subnet mask. The value should be less than or equal to the minimum zone subnet mask + 8 (IPv6 Subnet mask)

Type: number

Range: 1-128

Default: 128

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-type

Description 'source-subnet': Topk source subnet;

Type: string

Supported Values: source-subnet

detection_outbound-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

threshold-large-num

Description Threshold for each geo-location

Type: number

Range: 1-10995116277760

threshold-num

Description Threshold for each geo-location

Type: number

Range: 1-2147483647

threshold-str

Description Threshold for each geo-location (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, syn-rate, fin-rate, rst-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-anomaly-detection

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto

Specification	Value
Type	*object*

proto-name-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}*

proto-number-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}*

proto-tcp-udp-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}*

ip-proto_proto-number-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

esp-inspect

Description: esp-inspect is a **JSON Block**. Please see below for *ip-proto_proto-number-list_esp-inspect*

Type: Object

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *ip-proto_proto-number-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *ip-proto_proto-number-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *ip-proto_proto-number-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *ip-proto_proto-number-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/progression-tracking*

protocol-num

Description Protocol Number

Type: number

Range: 0-255

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *ip-proto_proto-number-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *ip-proto_proto-number-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-number-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-number-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-number-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

ip-proto_proto-number-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto_proto-number-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

ip-proto_proto-number-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-number-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

ip-proto_proto-number-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto_proto-number-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

ip-proto_proto-number-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-number-list_manual-mode-list_zone-template*

Type: Object

ip-proto_proto-number-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto_proto-number-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid, glid, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

ip-proto_proto-number-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 1 characters

ip-proto_proto-name-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for ip-proto icmp-v4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *ip-proto_proto-name-list_glid-cfg*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *ip-proto_proto-name-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *ip-proto_proto-name-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/progression-tracking*

protocol

Description 'icmp-v4': ip-proto icmp-v4; 'icmp-v6': ip-proto icmp-v6; 'other': ip-proto other; 'gre': ip-proto gre; 'ipv4-encap': ip-proto IPv4 Encapsulation; 'ipv6-encap': ip-proto IPv6 Encapsulation;

Type: string

Supported Values: icmp-v4, icmp-v6, other, gre, ipv4-encap, ipv6-encap

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *ip-proto_proto-name-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *ip-proto_proto-name-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-sources*

tunnel-decap

Description Enable tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-rate-limit

Description Enable DDOS-protection on tunnel traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-name-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

ip-proto_proto-name-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

ip-proto_proto-name-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-name-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

ip-proto_proto-name-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

ip-proto_proto-name-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-name-list_manual-mode-list_zone-template*

Type: Object

ip-proto_proto-name-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, icmp-v4, icmp-v6, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v4 and class-list-glid are mutually exclusive

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v6 and class-list-glid are mutually exclusive

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *ip-proto_proto-name-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

ip-proto_proto-name-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-name-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-tcp-udp-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *ip-proto_proto-tcp-udp-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *ip-proto_proto-tcp-udp-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}/ip-filtering-policy-statistics*

protocol

Description 'tcp': ip-proto tcp; 'udp': ip-proto udp;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ip-proto_proto-tcp-udp-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

ip-proto_proto-tcp-udp-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *port-range-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified under zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *port-range-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *port-range-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *port-range-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *port-range-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-range-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/port-ind*

port-range-end

Description Port-Range End Port Number

Type: number

Range: 1-65535

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *port-range-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *port-range-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *port-range-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *port-range-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *port-range-list_virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts*

port-range-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload, default 0

Type: number

Range: 0-1500

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port-range-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

port-range-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port-range-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port-range-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port-range-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

port-range-list_level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port-range-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

port-range-list_virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enables creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}*

port-range-list_virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *port-range-list_virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port-range-list_virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

port-range-list_virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

port-range-list_virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port-range-list_virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

port-range-list_virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port-range-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port-range-list_manual-mode-list_zone-template*

Type: Object

port-range-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port-range-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port-range-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

port-range-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

port-range-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold,

ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

port-range-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

port-range-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

port-range-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

collector

Specification	Value
Type	*list*
Block object keys	

sflow-name

Description Name of configured custom sFlow collector

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/sflow/collector/custom*

topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

capture-config-list

Specification	Value
Type	*list*
Block object keys	

mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/capture-config*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Specification	Value
Type	*object*

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

hw-blacklist-blocking

Specification	Value
Type	*object*

dst-enable

Description Enable Dst side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port

Specification	Value
Type	*object*

zone-service-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}*

zone-service-other-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}*

port_zone-service-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *port_zone-service-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *port_zone-service-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *port_zone-service-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *port_zone-service-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *port_zone-service-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port_zone-service-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *port_zone-service-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *port_zone-service-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *port_zone-service-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *port_zone-service-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *port_zone-service-list_virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts*

port_zone-service-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload

Type: number

Range: 0-1500

Default: 0

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

port_zone-service-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port_zone-service-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

start-signature-extraction

Description Start signature extraction from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

port_zone-service-list_level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

port_zone-service-list_virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enable creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}*

port_zone-service-list_virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *port_zone-service-list_virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (AC type Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

servername-no-sni

Description Match when there is no SNI extension found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-list_virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

port_zone-service-list_virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

port_zone-service-list_virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-list_virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

port_zone-service-list_virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-list_manual-mode-list_zone-template*

Type: Object

port_zone-service-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

port_zone-service-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

port_zone-service-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

port_zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for this zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *port_zone-service-other-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *port_zone-service-other-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *port_zone-service-other-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *port_zone-service-other-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port_zone-service-other-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/port-ind*

port-other

Description 'other': other;

Type: string

Supported Values: other

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *port_zone-service-other-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/progression-tracking*

protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-tcp-basic, sflow-tcp-stateful, and sflow-ip-filtering-policy are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *port_zone-service-other-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *port_zone-service-other-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *port_zone-service-other-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-other-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-other-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-other-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

port_zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-other-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

port_zone-service-other-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-other-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

port_zone-service-other-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-other-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

port_zone-service-other-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *port_zone-service-other-list_manual-mode-list_zone-template*

Type: Object

port_zone-service-other-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port_zone-service-other-list_src-based-policy-list

port_zone-service-other-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

port_zone-service-other-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-other-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

port_zone-service-other-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ipv6

Specification	Value
Type	*list*
Block object keys	

expand-ipv6-subnet

Description Expand this subnet to individual IPv6 address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expand-ipv6-subnet-mode

Description 'default': Default learning mechanism (Default: Dynamic); 'dynamic': Dynamic learning; 'static': Static learning;

Type: string

Supported Values: default, dynamic, static

Default: default

ip6-addr

Description Specify IPv6 address

Type: string

Format: ipv6-address

subnet-ipv6-addr

Description IPV6 Subnet

Type: string

Format: ipv6-address-plen

src-port-range-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description: capture-config is a **JSON Block**. Please see below for *src-port-range-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *src-port-range-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/level/{level-num}*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *src-port-range-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/port-ind*

protocol

Description 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-port-range-list_zone-template*

Type: Object

src-port-range-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-port-range-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

src-port-range-list_zone-template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-port-range-list_port-ind

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-range-list_level-list

Specification	Value
Type	*list*
Block object keys	

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1;

Type: string

Supported Values: 0, 1

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-port-range-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

type

Description 'pkt-rate': rate of incoming packets; 'bit-rate': rate of incoming bits;

Type: string

Supported Values: pkt-rate, bit-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-2147483647

sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total nu

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling. WARNING: Zone level Sflow polling might induce heavy CPU load depending on the total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

src-port

Specification	Value
Type	*object*

zone-src-port-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}*

zone-src-port-other-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port-other/{port-other}+{protocol}*

src-port_zone-src-port-list

Specification	Value
Type	*list*
Block object keys	

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *src-port_zone-src-port-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/level/{level-num}*

outbound-src-tracking

Description 'enable': enable; 'disable': disable;

Type: string

Supported Values: enable, disable

Default: disable

port-ind

Description: port-ind is a **JSON Block**. Please see below for *src-port_zone-src-port-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/port-ind*

port-num

Description Source Port Number

Type: number

Range: 1-65535

protocol

Description 'dns-udp': DNS-UDP Port; 'dns-tcp': DNS-TCP Port; 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: dns-udp, dns-tcp, udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-port_zone-src-port-list_zone-template*

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-gui_protection_port

Specification	Value
Type	*object*

zone-service-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui/protection/port/zone-service/{port-num}+{protocol}*

zone-service-other-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui/protection/port/zone-service-other/{port-other}+{protocol}*

web-gui_protection_port_zone-service-list

Specification	Value
Type	*list*
Block object keys	

pbe

Description Peak Bandwidth Expected

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

port-num

Description Port Number

Type: number

Range: 1-65535

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-gui_protection_port_zone-service-other-list

Specification	Value
Type	*list*
Block object keys	

pbe

Description Peak Bandwidth Expected

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

port-other

Description 'other': other;

Type: string

Supported Values: other

protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-gui_protection_ip-proto

Specification	Value
Type	*object*

proto-name-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/web-gui/protection/ip-proto/proto-name/{protocol}*

web-gui_protection_ip-proto_proto-name-list

Specification	Value
Type	*list*
Block object keys	

pbe

Description Peak Bandwidth Expected

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

protocol

Description 'icmp-v4': ip-proto icmp-v4; 'icmp-v6': ip-proto icmp-v6;

Type: string

Supported Values: icmp-v4, icmp-v6

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-gui_learning

Specification	Value
Type	*object*

duration

Description '1minute': 1 minute; '6hour': 6 hours; '12hour': 12 hours; '24hour': 24 hours; '7day': 7 days;

Type: string

Supported Values: 1minute, 6hour, 12hour, 24hour, 7day

Default: 6hour

starting-time

Description Configure learning starting time

Type: string

Maximum Length: 13 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description Subnet mask. The value should be less than or equal to the minimum zone subnet mask + 8 (IPv6 Subnet mask)

Type: number

Range: 1-128

Default: 128

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-type

Description 'source-subnet': Topk source subnet;

Type: string

Supported Values: source-subnet

outbound-detection_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

threshold-large-num

Description Threshold for each geo-location

Type: number

Range: 1-10995116277760

threshold-num

Description Threshold for each geo-location

Type: number

Range: 1-2147483647

threshold-str

Description Threshold for each geo-location (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, syn-rate, fin-rate, rst-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio

user-tag

Description Customized tag

Description Threshold for each geo-location (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, syn-rate, fin-rate, rst-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

current

Description

Type: string

threshold

Description

Type: string

2.33.164 ddos dst zone hw-blacklist-blocking

Hardware blacklist blocking over threshold

hw-blacklist-blocking Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	hw-blacklist-blocking
Element URI	/axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking
Element Attributes	hw-blacklist-blocking_attributes
Partition Visibility	shared
Schema	`hw-blacklist-blocking schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking

hw-blacklist-blocking attributes

```
POST /axapi/v3/ddos/dst/zone/a/hw-blacklist-blocking
Payload:
{
    "hw-blacklist-blocking": {
        "dst-enable": 1
    }
}
```

Get Object

GET

/axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking

hw-blacklist-blocking attributes

Modify Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking

hw-blacklist-blocking attributes

Replace Object

PUT

/axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking

hw-blacklist-blocking attributes

Delete Object

DELETE

/axapi/v3/ddos/dst/zone/{zone-name}/hw-blacklist-blocking

hw-blacklist-blocking attributes

hw-blacklist-blocking attributes

dst-enable

Description Enable Dst side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-enable

Description Enable Src side hardware blocking

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.165 ddos dst zone ip-proto

DDOS IP protocol configuration

ip-proto Specification

Parameter	Value
Type	*Intermediate Resource*
Element Name	ip-proto
Element URI	/axapi/v3/ddos/dst/zone/{zone-name}/ip-proto
Element Attributes	ip-proto_attributes
Partition Visibility	shared
Schema	`ip-proto schema`

Operations Allowed:

Get Object

GET

/axapi/v3/ddos/dst/zone/{zone-name}/ip-proto

ip-proto_attributes

ip-proto attributes

proto-name-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}*

proto-number-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}*

proto-tcp-udp-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}*

proto-number-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

esp-inspect

Description: esp-inspect is a **JSON Block**. Please see below for *proto-number-list_esp-inspect*

Type: Object

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *proto-number-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *proto-number-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *proto-number-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *proto-number-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/progression-tracking*

protocol-num

Description Protocol Number

Type: number

Range: 0-255

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *proto-number-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *proto-number-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-number-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-number-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-number-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

proto-number-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

proto-number-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

proto-number-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-number-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

proto-number-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

proto-number-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

proto-number-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-number-list_manual-mode-list_zone-template*

Type: Object

proto-number-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

proto-number-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid, glid, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-number-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

proto-number-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_rate_adaptive_threshold': Pkt Rate Adaptive Threshold; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_pkt_drop_rate_adaptive_threshold': Pkt Drop Rate Adaptive Threshold; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_syn_rate_adaptive_threshold': TCP SYN Rate Adaptive Threshold; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_fin_rate_adaptive_threshold': TCP FIN Rate Adaptive Threshold; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_rst_rate_adaptive_threshold': TCP RST Rate Adaptive Threshold; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_small_window_ack_rate_adaptive_threshold': TCP

Small Window ACK Rate Adaptive Threshold; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_empty_ack_rate_adaptive_threshold': TCP Empty ACK Rate Adaptive Threshold; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_small_payload_rate_adaptive_threshold': TCP Small Payload Rate Adaptive Threshold; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_pkt_drop_ratio_adaptive_threshold': Pkt Drop / Pkt Rcvd Adaptive Threshold; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_inb_per_outb_adaptive_threshold': Bytes-to / Bytes-from Adaptive Threshold; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_syn_per_fin_rate_adaptive_threshold': TCP SYN Rate / FIN Rate Adaptive Threshold; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_conn_miss_rate_adaptive_threshold': TCP Session Miss Rate Adaptive Threshold; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_concurrent_conns_adaptive_threshold': TCP/UDP Concurrent Sessions Adaptive Threshold; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_data_cpu_util_adaptive_threshold': Data CPU Utilization Adaptive Threshold; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_outside_intf_util_adaptive_threshold': Outside Interface Utilization Adaptive Threshold; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_frag_rate_adaptive_threshold': Frag Pkt Rate Adaptive Threshold; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max; 'ddet_ind_bit_rate_adaptive_threshold': Bit Rate Adaptive Threshold;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current,

ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

proto-number-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-number-list_esp-inspect

Specification	Value
Type	*object*

auth-algorithm

Description 'AUTH_NULL': No Integrity Check Value; 'HMAC-SHA-1-96': 96 bit Auth Algo; 'HMAC-SHA-256-96': 96 bit Auth Algo; 'HMAC-SHA-256-128': 128 bit Auth Algo; 'HMAC-SHA-384-192': 192 bit Auth Algo; 'HMAC-SHA-512-256': 256 bit Auth Algo; 'HMAC-MD5-96': 96 bit Auth Algo; 'MAC-RIPEMD-160-96': 96 bit Auth Algo;

Type: string

Supported Values: AUTH_NULL, HMAC-SHA-1-96, HMAC-SHA-256-96, HMAC-SHA-256-128, HMAC-SHA-384-192, HMAC-SHA-512-256, HMAC-MD5-96, MAC-RIPEMD-160-96

encrypt-algorithm

Description 'NULL': Null Encryption Algorithm;

Type: string

Supported Values: NULL

mode

Description 'transport': Transport mode;

Type: string

Supported Values: transport

proto-number-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-number-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-name-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for ip-proto icmp-v4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *proto-name-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *proto-name-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/ip-filtering-policy-statistics*

key-cfg

Type: List

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *proto-name-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *proto-name-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/progression-tracking*

protocol

Description 'icmp-v4': ip-proto icmp-v4; 'icmp-v6': ip-proto icmp-v6; 'other': ip-proto other; 'gre': ip-proto gre; 'ipv4-encap': ip-proto IPv4 Encapsulation; 'ipv6-encap': ip-proto IPv6 Encapsulation;

Type: string

Supported Values: icmp-v4, icmp-v6, other, gre, ipv4-encap, ipv6-encap

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *proto-name-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *proto-name-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-sources*

tunnel-decap

Description Enable tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-rate-limit

Description Enable DDOS-protection on tunnel traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-name-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-name-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-name-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

proto-name-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

proto-name-list_key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

proto-name-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

proto-name-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-name-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

proto-name-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

proto-name-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

proto-name-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, icmp-v4, icmp-v6, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-name-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

proto-name-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

proto-name-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v4 and class-list-glid are mutually exclusive

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v6 and class-list-glid are mutually exclusive

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

proto-name-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *proto-name-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

proto-name-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

proto-name-list_port-ind

Specification	Value

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_rate_adaptive_threshold': Pkt Rate Adaptive Threshold; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_pkt_drop_rate_adaptive_threshold': Pkt Drop Rate Adaptive Threshold; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_syn_rate_adaptive_threshold': TCP SYN Rate Adaptive Threshold; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_fin_rate_adaptive_threshold': TCP FIN Rate Adaptive Threshold; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_rst_rate_adaptive_threshold': TCP RST Rate Adaptive Threshold; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_small_window_ack_rate_adaptive_threshold': TCP Small Window ACK Rate Adaptive Threshold; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_empty_ack_rate_adaptive_threshold': TCP Empty ACK Rate

Adaptive Threshold; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_small_payload_rate_adaptive_threshold': TCP Small Payload Rate Adaptive Threshold; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current; 'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_pkt_drop_ratio_adaptive_threshold': Pkt Drop / Pkt Rcvd Adaptive Threshold; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_inb_per_outb_adaptive_threshold': Bytes-to / Bytes-from Adaptive Threshold; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_syn_per_fin_rate_adaptive_threshold': TCP SYN Rate / FIN Rate Adaptive Threshold; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_conn_miss_rate_adaptive_threshold': TCP Session Miss Rate Adaptive Threshold; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_concurrent_conns_adaptive_threshold': TCP/UDP Concurrent Sessions Adaptive Threshold; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_data_cpu_util_adaptive_threshold': Data CPU Utilization Adaptive Threshold; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_outside_intf_util_adaptive_threshold': Outside Interface Utilization Adaptive Threshold; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_frag_rate_adaptive_threshold': Frag Pkt Rate Adaptive Threshold; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max; 'ddet_ind_bit_rate_adaptive_threshold': Bit Rate Adaptive Threshold;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current,

ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

proto-name-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-name-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-name-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-tcp-udp-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *proto-tcp-udp-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *proto-tcp-udp-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-tcp-udp/{protocol}/ip-filtering-policy-statistics*

protocol

Description 'tcp': ip-proto tcp; 'udp': ip-proto udp;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proto-tcp-udp-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

proto-tcp-udp-list_ip-filtering-policy-statistics

Specification	Value

Delete Object

DELETE

/axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}

proto-name attributes

proto-name-list

proto-name-list is **JSON List** of *proto-name attributes*

```
proto-name-list : [
        { proto-name attributes },
        { proto-name attributes },
        ...
    ]
```

proto-name attributes

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for ip-proto icmp-v4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/ip-filtering-policy-statistics*

key-cfg

Type: List

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/port-ind*

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/progression-tracking*

protocol

Description 'icmp-v4': ip-proto icmp-v4; 'icmp-v6': ip-proto icmp-v6; 'other': ip-proto other; 'gre': ip-proto gre; 'ipv4-encap': ip-proto IPv4 Encapsulation; 'ipv6-encap': ip-proto IPv6 Encapsulation;

Type: string

Supported Values: icmp-v4, icmp-v6, other, gre, ipv4-encap, ipv6-encap

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}*

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/topk-sources*

tunnel-decap

Description Enable tunnel decapsulation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tunnel-rate-limit

Description Enable DDOS-protection on tunnel traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

key-cfg

Specification	Value
Type	*list*
Block object keys	

key

Description Only decapsulate GRE packet with this key (Hexadecimal 0x0-0xFFFFFFFF,decimal 0-4294967295)

Type: string

Maximum Length: 10 characters

Maximum Length: 1 characters

glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *manual-mode-list_zone-template*

Type: Object

manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, icmp-v4, icmp-v6, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v4 and class-list-glid are mutually exclusive

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: icmp-v6 and class-list-glid are mutually exclusive

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

level-list

level-list is **JSON List** of *level attributes*

level-list : [

{ *level attributes* },

{ *level attributes* },

...

]

level attributes

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-name/{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v4

Description DDOS icmp-v4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

icmp-v6

Description DDOS icmp-v6 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

proto-number attributes

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deny

Description Blacklist and Drop all incoming packets for this ip-proto

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-frag-pkt

Description Drop fragmented packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

esp-inspect

Description: esp-inspect is a **JSON Block**. Please see below for *esp-inspect*

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'frag-rate': rate of incoming fragmented packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, frag-rate, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

manual-mode-list

Specification	Value
Type	*list*
Block object keys	

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *manual-mode-list_zone-template*

Type: Object

manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid, glid, and ip-proto are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/ip-proto/proto-number/{protocol-num}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

ip-proto

Description DDOS ip-proto template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ip-proto and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value

Operational Status for the object zone

zone Specification

Parameter	Value
Type	*Collection*
Collection Name	*zone-list*
Collection URI	/axapi/v3/ddos/dst/zone/{zone-name}
Element Name	zone
Element URI	/axapi/v3/ddos/dst/zone/{zone-name}/oper
Element Attributes	zone_attributes
Partition Visibility	None
Schema	`zone schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}

zone attributes

Create List

POST

/axapi/v3/ddos/dst/zone/{zone-name}

zone attributes

Get Object

GET

/axapi/v3/ddos/dst/zone/{zone-name}/oper

zone attributes

Get List

GET

/axapi/v3/ddos/dst/zone/{zone-name}

zone-list

Modify Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}/oper

zone attributes

Replace Object

PUT

/axapi/v3/ddos/dst/zone/{zone-name}/oper

zone attributes

Replace List

PUT

/axapi/v3/ddos/dst/zone/{zone-name}

zone-list

Delete Object

DELETE

/axapi/v3/ddos/dst/zone/{zone-name}/oper

zone attributes

zone-list

zone-list is **JSON List** of *zone attributes*

```
zone-list : [
        { zone attributes },
        { zone attributes },
        ...
    ]
```

zone attributes

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *zone-service-list_capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-service-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-service-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *zone-service-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *zone-service-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-service-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-service-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *zone-service-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-service-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *zone-service-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *zone-service-list_virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts*

zone-service-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload

Type: number

Range: 0-1500

Default: 0

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

zone-service-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-service-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

start-signature-extraction

Description Start signature extraction from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-service-list_level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-service-list_virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enable creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}*

zone-service-list_virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-service-list_virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (AC type Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

servername-no-sni

Description Match when there is no SNI extension found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-list_virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

zone-service-list_virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

zone-service-list_virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-list_virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

zone-service-list_virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-list_manual-mode-list_zone-template*

Type: Object

zone-service-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-list_src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-list_src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

zone-service-list_src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

zone-service-list_src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

zone-service-list_src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-list_pattern-recognition-pu-details

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-list_port-ind

Specification	Value
Type	*object*

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-list_port-ind_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'ip-proto-type': IP Protocol Type; 'ddet_ind_pkt_rate_current': Pkt Rate Current; 'ddet_ind_pkt_rate_min': Pkt Rate Min; 'ddet_ind_pkt_rate_max': Pkt Rate Max; 'ddet_ind_pkt_rate_adaptive_threshold': Pkt Rate Adaptive Threshold; 'ddet_ind_pkt_drop_rate_current': Pkt Drop Rate Current; 'ddet_ind_pkt_drop_rate_min': Pkt Drop Rate Min; 'ddet_ind_pkt_drop_rate_max': Pkt Drop Rate Max; 'ddet_ind_pkt_drop_rate_adaptive_threshold': Pkt Drop Rate Adaptive Threshold; 'ddet_ind_syn_rate_current': TCP SYN Rate Current; 'ddet_ind_syn_rate_min': TCP SYN Rate Min; 'ddet_ind_syn_rate_max': TCP SYN Rate Max; 'ddet_ind_syn_rate_adaptive_threshold': TCP SYN Rate Adaptive Threshold; 'ddet_ind_fin_rate_current': TCP FIN Rate Current; 'ddet_ind_fin_rate_min': TCP FIN Rate Min; 'ddet_ind_fin_rate_max': TCP FIN Rate Max; 'ddet_ind_fin_rate_adaptive_threshold': TCP FIN Rate Adaptive Threshold; 'ddet_ind_rst_rate_current': TCP RST Rate Current; 'ddet_ind_rst_rate_min': TCP RST Rate Min; 'ddet_ind_rst_rate_max': TCP RST Rate Max; 'ddet_ind_rst_rate_adaptive_threshold': TCP RST Rate Adaptive Threshold; 'ddet_ind_small_window_ack_rate_current': TCP Small Window ACK Rate Current; 'ddet_ind_small_window_ack_rate_min': TCP Small Window ACK Rate Min; 'ddet_ind_small_window_ack_rate_max': TCP Small Window ACK Rate Max; 'ddet_ind_small_window_ack_rate_adaptive_threshold': TCP Small Window ACK Rate Adaptive Threshold; 'ddet_ind_empty_ack_rate_current': TCP Empty ACK Rate Current; 'ddet_ind_empty_ack_rate_min': TCP Empty ACK Rate Min; 'ddet_ind_empty_ack_rate_max': TCP Empty ACK Rate Max; 'ddet_ind_empty_ack_rate_adaptive_threshold': TCP Empty ACK Rate Adaptive Threshold; 'ddet_ind_small_payload_rate_current': TCP Small Payload Rate Current; 'ddet_ind_small_payload_rate_min': TCP Small Payload Rate Min; 'ddet_ind_small_payload_rate_max': TCP Small Payload Rate Max; 'ddet_ind_small_payload_rate_adaptive_threshold': TCP Small Payload Rate Adaptive Threshold; 'ddet_ind_pkt_drop_ratio_current': Pkt Drop / Pkt Rcvd Current;

'ddet_ind_pkt_drop_ratio_min': Pkt Drop / Pkt Rcvd Min; 'ddet_ind_pkt_drop_ratio_max': Pkt Drop / Pkt Rcvd Max; 'ddet_ind_pkt_drop_ratio_adaptive_threshold': Pkt Drop / Pkt Rcvd Adaptive Threshold; 'ddet_ind_inb_per_outb_current': Bytes-to / Bytes-from Current; 'ddet_ind_inb_per_outb_min': Bytes-to / Bytes-from Min; 'ddet_ind_inb_per_outb_max': Bytes-to / Bytes-from Max; 'ddet_ind_inb_per_outb_adaptive_threshold': Bytes-to / Bytes-from Adaptive Threshold; 'ddet_ind_syn_per_fin_rate_current': TCP SYN Rate / FIN Rate Current; 'ddet_ind_syn_per_fin_rate_min': TCP SYN Rate / FIN Rate Min; 'ddet_ind_syn_per_fin_rate_max': TCP SYN Rate / FIN Rate Max; 'ddet_ind_syn_per_fin_rate_adaptive_threshold': TCP SYN Rate / FIN Rate Adaptive Threshold; 'ddet_ind_conn_miss_rate_current': TCP Session Miss Rate Current; 'ddet_ind_conn_miss_rate_min': TCP Session Miss Rate Min; 'ddet_ind_conn_miss_rate_max': TCP Session Miss Rate Max; 'ddet_ind_conn_miss_rate_adaptive_threshold': TCP Session Miss Rate Adaptive Threshold; 'ddet_ind_concurrent_conns_current': TCP/UDP Concurrent Sessions Current; 'ddet_ind_concurrent_conns_min': TCP/UDP Concurrent Sessions Min; 'ddet_ind_concurrent_conns_max': TCP/UDP Concurrent Sessions Max; 'ddet_ind_concurrent_conns_adaptive_threshold': TCP/UDP Concurrent Sessions Adaptive Threshold; 'ddet_ind_data_cpu_util_current': Data CPU Utilization Current; 'ddet_ind_data_cpu_util_min': Data CPU Utilization Min; 'ddet_ind_data_cpu_util_max': Data CPU Utilization Max; 'ddet_ind_data_cpu_util_adaptive_threshold': Data CPU Utilization Adaptive Threshold; 'ddet_ind_outside_intf_util_current': Outside Interface Utilization Current; 'ddet_ind_outside_intf_util_min': Outside Interface Utilization Min; 'ddet_ind_outside_intf_util_max': Outside Interface Utilization Max; 'ddet_ind_outside_intf_util_adaptive_threshold': Outside Interface Utilization Adaptive Threshold; 'ddet_ind_frag_rate_current': Frag Pkt Rate Current; 'ddet_ind_frag_rate_min': Frag Pkt Rate Min; 'ddet_ind_frag_rate_max': Frag Pkt Rate Max; 'ddet_ind_frag_rate_adaptive_threshold': Frag Pkt Rate Adaptive Threshold; 'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max; 'ddet_ind_bit_rate_adaptive_threshold': Bit Rate Adaptive Threshold;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold,

ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

zone-service-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

zone-service-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-list_capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-service-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-other-list

Specification	Value
Type	*list*
Block object keys	

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for this zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *zone-service-other-list_glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *zone-service-other-list_ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *zone-service-other-list_pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *zone-service-other-list_pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *zone-service-other-list_port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/port-ind*

port-other

Description 'other': other;

Type: string

Supported Values: other

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *zone-service-other-list_progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/progression-tracking*

protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-tcp-basic, sflow-tcp-stateful, and sflow-ip-filtering-policy are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *zone-service-other-list_sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *zone-service-other-list_topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *zone-service-other-list_topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-other-list_pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-other-list_progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-other-list_dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template*

Type: Object

zone-service-other-list_dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-other-list_glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

zone-service-other-list_level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-other-list_level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-service-other-list_level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-other-list_level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-service-other-list_manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-service-other-list_manual-mode-list_zone-template*

Type: Object

zone-service-other-list_manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

zone-service-other-list_src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

'ddet_ind_bit_rate_current': Bit Rate Current; 'ddet_ind_bit_rate_min': Bit Rate Min; 'ddet_ind_bit_rate_max': Bit Rate Max; 'ddet_ind_bit_rate_adaptive_threshold': Bit Rate Adaptive Threshold;

Type: string

Supported Values: all, ip-proto-type, ddet_ind_pkt_rate_current, ddet_ind_pkt_rate_min, ddet_ind_pkt_rate_max, ddet_ind_pkt_rate_adaptive_threshold, ddet_ind_pkt_drop_rate_current, ddet_ind_pkt_drop_rate_min, ddet_ind_pkt_drop_rate_max, ddet_ind_pkt_drop_rate_adaptive_threshold, ddet_ind_syn_rate_current, ddet_ind_syn_rate_min, ddet_ind_syn_rate_max, ddet_ind_syn_rate_adaptive_threshold, ddet_ind_fin_rate_current, ddet_ind_fin_rate_min, ddet_ind_fin_rate_max, ddet_ind_fin_rate_adaptive_threshold, ddet_ind_rst_rate_current, ddet_ind_rst_rate_min, ddet_ind_rst_rate_max, ddet_ind_rst_rate_adaptive_threshold, ddet_ind_small_window_ack_rate_current, ddet_ind_small_window_ack_rate_min, ddet_ind_small_window_ack_rate_max, ddet_ind_small_window_ack_rate_adaptive_threshold, ddet_ind_empty_ack_rate_current, ddet_ind_empty_ack_rate_min, ddet_ind_empty_ack_rate_max, ddet_ind_empty_ack_rate_adaptive_threshold, ddet_ind_small_payload_rate_current, ddet_ind_small_payload_rate_min, ddet_ind_small_payload_rate_max, ddet_ind_small_payload_rate_adaptive_threshold, ddet_ind_pkt_drop_ratio_current, ddet_ind_pkt_drop_ratio_min, ddet_ind_pkt_drop_ratio_max, ddet_ind_pkt_drop_ratio_adaptive_threshold, ddet_ind_inb_per_outb_current, ddet_ind_inb_per_outb_min, ddet_ind_inb_per_outb_max, ddet_ind_inb_per_outb_adaptive_threshold, ddet_ind_syn_per_fin_rate_current, ddet_ind_syn_per_fin_rate_min, ddet_ind_syn_per_fin_rate_max, ddet_ind_syn_per_fin_rate_adaptive_threshold, ddet_ind_conn_miss_rate_current, ddet_ind_conn_miss_rate_min, ddet_ind_conn_miss_rate_max, ddet_ind_conn_miss_rate_adaptive_threshold, ddet_ind_concurrent_conns_current, ddet_ind_concurrent_conns_min, ddet_ind_concurrent_conns_max, ddet_ind_concurrent_conns_adaptive_threshold, ddet_ind_data_cpu_util_current, ddet_ind_data_cpu_util_min, ddet_ind_data_cpu_util_max, ddet_ind_data_cpu_util_adaptive_threshold, ddet_ind_outside_intf_util_current, ddet_ind_outside_intf_util_min, ddet_ind_outside_intf_util_max, ddet_ind_outside_intf_util_adaptive_threshold, ddet_ind_frag_rate_current, ddet_ind_frag_rate_min, ddet_ind_frag_rate_max, ddet_ind_frag_rate_adaptive_threshold, ddet_ind_bit_rate_current, ddet_ind_bit_rate_min, ddet_ind_bit_rate_max, ddet_ind_bit_rate_adaptive_threshold, ddet_ind_total_szp_current, ddet_ind_total_szp_min, ddet_ind_total_szp_max, ddet_ind_total_szp_adaptive_threshold, ddet_ind_syn_ack_rate_current, ddet_ind_syn_ack_rate_min, ddet_ind_syn_ack_rate_max, ddet_ind_syn_ack_rate_adaptive_threshold

zone-service-other-list_sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

zone-service-other-list_topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-other-list_topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-service-other-list_ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.220 ddos dst zone port-range

DDOS Port-Range & Protocol configuration

port-range Specification

Parameter	Value
Type	*Collection*
Object Key(s)	*port-range-start, port-range-end, protocol*
Collection Name	*port-range-list*
Collection URI	/axapi/v3/ddos/dst/zone/{zone-name}/port-range
Element Name	port-range
Element URI	/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}
Element Attributes	port-range_attributes
Partition Visibility	shared
Statistics Data URI	/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/stats
Operational Data URI	/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/oper
Schema	`port-range schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}/port-range

port-range attributes

Create List

POST

/axapi/v3/ddos/dst/zone/{zone-name}/port-range

port-range attributes

Get Object

GET

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}

port-range attributes

Get List

GET

/axapi/v3/ddos/dst/zone/{zone-name}/port-range

port-range-list

Modify Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}

port-range attributes

Replace Object

PUT

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}

port-range attributes

Replace List

PUT

/axapi/v3/ddos/dst/zone/{zone-name}/port-range

port-range-list

Delete Object

DELETE

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}

port-range attributes

port-range-list

port-range-list is **JSON List** of *port-range attributes*

```
port-range-list : [
        { port-range attributes },
        { port-range attributes },
        ...
    ]
```

port-range attributes

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

capture-config

Description: capture-config is a **JSON Block**. Please see below for *capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified under zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/port-ind*

port-range-end

Description Port-Range End Port Number

Type: number

Range: 1-65535

port-range-start

Description Port-Range Start Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts*

pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload, default 0

Type: number

Range: 0-1500

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-filtering-policy-statistics

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enables creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}*

virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *manual-mode-list_zone-template*

Type: Object

manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

Type: Object

src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

pattern-recognition-pu-details

sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

topk-destinations

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.221 ddos dst zone port-range dynamic-entry-overflow-policy

Configure overflow policy

pattern-recognition attributes

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload, default 0

Type: number

Range: 0-1500

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.33.246 ddos dst zone port-range virtualhosts

Configure virtualhost based mitigation for SSL services

virtualhosts Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	virtualhosts
Element URI	/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts
Element Attributes	virtualhosts_attributes
Partition Visibility	shared
Schema	`virtualhosts schema`

Operations Allowed:

Create Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts

virtualhosts attributes

Get Object

GET

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts

virtualhosts attributes

Modify Object

POST

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts

virtualhosts attributes

Replace Object

PUT

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts

virtualhosts attributes

Delete Object

DELETE

/axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts

virtualhosts attributes

virtualhosts attributes

source-tracking-all

Description enables creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}*

virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port-range/{port-range-start}+{port-range-end}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *virtualhost-list_level-list_zone-template*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for zone-port or class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/port-ind*

port-num

Description Port Number

Type: number

Range: 1-65535

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/progression-tracking*

protocol

Description 'dns-tcp': DNS-TCP Port; 'dns-udp': DNS-UDP Port; 'http': HTTP Port; 'tcp': TCP Port; 'udp': UDP Port; 'ssl-l4': SSL-L4 Port; 'sip-udp': SIP-UDP Port; 'sip-tcp': SIP-TCP Port; 'quic': QUIC Port;

Type: string

Supported Values: dns-tcp, dns-udp, http, tcp, udp, ssl-l4, sip-udp, sip-tcp, quic

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-ip-filtering-policy, sflow-tcp-basic, sflow-tcp-stateful, and sflow-http are mutually exclusive

sflow-http

Description Enable sFlow HTTP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-http and sflow-common are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtualhosts

Description: virtualhosts is a **JSON Block**. Please see below for *virtualhosts*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts*

pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

app-payload-offset

Description Set offset of the payload

Type: number

Range: 0-1500

Default: 0

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

start-signature-extraction

Description Start signature extraction from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

level-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

virtualhosts

Specification	Value
Type	*object*

source-tracking-all

Description enable creation of source entries for all virtualhosts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhosts-config

Description 'configuration': configure virtualhost based mitigation for ssl services;

Type: string

Supported Values: configuration

virtualhost-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}*

virtualhosts_virtualhost-list

Specification	Value
Type	*list*
Block object keys	

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *virtualhosts_virtualhost-list_glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (AC type Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match any SNI extension

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

servername-no-sni

Description Match when there is no SNI extension found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

virtualhosts_virtualhost-list_servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

virtualhosts_virtualhost-list_glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

virtualhosts_virtualhost-list_level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *virtualhosts_virtualhost-list_level-list_zone-template*

Type: Object

virtualhosts_virtualhost-list_level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *manual-mode-list_zone-template*

Type: Object

manual-mode-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, quic, dns, http, ssl-l4, sip, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: dns and class-list-glid are mutually exclusive

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: http and class-list-glid are mutually exclusive

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: quic and class-list-glid are mutually exclusive

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: sip and class-list-glid are mutually exclusive

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: ssl-l4 and class-list-glid are mutually exclusive

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value

level attributes

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

start-signature-extraction

Description Start signature extraction from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

indicator-list

Specification	Value
Type	*list*

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

zone-service-other-list

Delete Object

DELETE

/axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}

zone-service-other attributes

zone-service-other-list

zone-service-other-list is **JSON List** of *zone-service-other attributes*

zone-service-other-list : [

{ *zone-service-other attributes* },

{ *zone-service-other attributes* },

...

]

zone-service-other attributes

age

Description Idle age for ip entry

Type: number

Range: 2-1023

Default: 5

apply-policy-on-overflow

Description Enable this flag to apply overflow policy when dynamic entry count overflows

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

dynamic-entry-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/dynamic-entry-overflow-policy/{dummy-name}*

enable-class-list-overflow

Description Apply class-list overflow policy upon exceeding dynamic entry count specified for this zone port or each class-list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k

Description Enable ddos top-k source IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-top-k-destination

Description Enable ddos top-k destination IP detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

faster-de-escalation

Description De-escalate faster in standalone mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *glid-cfg*

Type: Object

ip-filtering-policy

Description Configure IP Filter

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/ip-filtering-policy*

ip-filtering-policy-statistics

Description: ip-filtering-policy-statistics is a **JSON Block**. Please see below for *ip-filtering-policy-statistics*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/ip-filtering-policy-statistics*

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}*

manual-mode-enable

Description Toggle manual mode to use fix templates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

manual-mode-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/manual-mode/{config}*

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry

Type: number

Range: 0-2147483647

outbound-only

Description Only allow outbound traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pattern-recognition

Description: pattern-recognition is a **JSON Block**. Please see below for *pattern-recognition*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition*

pattern-recognition-pu-details

Description: pattern-recognition-pu-details is a **JSON Block**. Please see below for *pattern-recognition-pu-details*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/pattern-recognition-pu-details*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/port-ind*

port-other

Description 'other': other;

Type: string

Supported Values: other

progression-tracking

Description: progression-tracking is a **JSON Block**. Please see below for *progression-tracking*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/progression-tracking*

protocol

Description 'tcp': TCP Port; 'udp': UDP Port;

Type: string

Supported Values: tcp, udp

same-source-dest-port-drop

Description Drop packet with same Source Port and Dest Port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

sflow-common

Description Enable all sFlow polling options under this zone port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-common,sflow-packets, sflow-tcp-basic, sflow-tcp-stateful, and sflow-ip-filtering-policy are mutually exclusive

sflow-ip-filtering-policy

Description Enable sFlow IP filtering policy per port per rule counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-ip-filtering-policy and sflow-common are mutually exclusive

sflow-packets

Description Enable sFlow packet-level counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-packets and sflow-common are mutually exclusive

sflow-tcp

Description: sflow-tcp is a **JSON Block**. Please see below for *sflow-tcp*

Type: Object

src-based-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}*

stateful

Description Enable stateful tracking of sessions (Default is stateless)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

topk-destinations

Description: topk-destinations is a **JSON Block**. Please see below for *topk-destinations*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-destinations*

topk-dst-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-dst-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-num-records

Description Maximum number of records to show in topk

Type: number

Range: 1-100

Default: 20

topk-sort-key

Description 'avg': window average; 'max-peak': max peak;

Type: string

Supported Values: avg, max-peak

Default: avg

topk-sources

Description: topk-sources is a **JSON Block**. Please see below for *topk-sources*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/topk-sources*

unlimited-dynamic-entry-count

Description No limit for maximum dynamic src entry count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

pattern-recognition

Specification	Value
Type	*object*

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

progression-tracking

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dynamic-entry-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *dynamic-entry-overflow-policy-list_zone-template*

Type: Object

dynamic-entry-overflow-policy-list_zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

glid-cfg

Specification	Value
Type	*object*

action-list

Description Configure action-list to take

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: action-list and glid-action are mutually exclusive

Reference Object: */axapi/v3/ddos/action-list*

glid

Description Global limit ID for the whole zone

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default if default-action-list is not configured); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

Mutual Exclusion: glid-action and action-list are mutually exclusive

per-addr-glid

Description Global limit ID per address

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

level-list

Specification	Value
Type	*list*
Block object keys	

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

start-pattern-recognition

Description Start pattern recognition from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-escalation-score

Description Zone activation score of this level

Type: number

Range: 1-1000000

zone-template

Description: zone-template is a **JSON Block**. Please see below for *level-list_zone-template*

Type: Object

zone-violation-actions

Description Violation actions apply due to zone escalate from this level

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

level-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

data-packet-size

Description Expected minimal data size

Type: number

Range: 1-1500

score

Description Score corresponding to the indicator

Type: number

Range: 1-1000000

src-threshold-large-num

Description Indicator per-src threshold

Type: number

Range: 1-10995116277760

src-threshold-num

Description Indicator per-src threshold

Type: number

Range: 1-2147483647

src-threshold-str

Description Indicator per-src threshold (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

src-violation-actions

Description Violation actions to use when this src indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

tcp-window-size

Description Expected minimal window size

Type: number

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

manual-mode-list

Specification	Value
Type	*list*
Block object keys	

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *manual-mode-list_zone-template*

Type: Object

manual-mode-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-based-policy-list

Specification	Value
Type	*list*
Block object keys	

policy-class-list-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}*

src-based-policy-name

Description Specify name of the policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-based-policy-list_policy-class-list-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

class-list-glid

Description Global limit ID (class-list based)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: class-list-glid,glid, tcp, and udp are mutually exclusive

Reference Object: */axapi/v3/glid*

class-list-name

Description Class-list name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-overflow-policy-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/src-based-policy/{src-based-policy-name}/policy-class-list/{class-list-name}/class-list-overflow-policy/{dummy-name}*

dynamic-entry-count-warn-threshold

Description Set threshold percentage of "max-src-dst-entry" for generating warning logs. Including start and end.

Type: number

Range: 1-100

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: glid and class-list-glid are mutually exclusive

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

max-dynamic-entry-count

Description Maximum count for dynamic source zone service entry allowed for this class-list

Type: number

Range: 0-2147483647

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_zone-template*

Type: Object

src-based-policy-list_policy-class-list-list_zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: tcp and class-list-glid are mutually exclusive

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: udp and class-list-glid are mutually exclusive

src-based-policy-list_policy-class-list-list_sampling-enable

Specification	Value
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packet_received': Packets Received; 'packet_dropped': Packets Dropped; 'entry_learned': Entry Learned; 'entry_count_overflow': Entry Count Overflow;

Type: string

Supported Values: all, packet_received, packet_dropped, entry_learned, entry_count_overflow, exceed_drop_pkt_rate_clist, exceed_drop_conn_rate_clist, exceed_drop_conn_limit_clist, exceed_drop_kbit_rate_clist, exceed_drop_kbit_rate_clist_pkt, exceed_drop_frag_rate_clist

src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list

Specification	Value
Type	*list*
Block object keys	

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *src-based-policy-list_policy-class-list-list_class-list-overflow-policy-list_zone-template*

sflow-tcp

Specification	Value
Type	*object*

sflow-tcp-basic

Description Enable sFlow basic TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-basic and sflow-common are mutually exclusive

sflow-tcp-stateful

Description Enable sFlow stateful TCP counter polling

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: sflow-tcp-stateful and sflow-common are mutually exclusive

topk-sources

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

topk-destinations

dynamic-entry-overflow-policy attributes

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

```

level attributes

apply-extracted-filters

Description Apply extracted filters from this level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear-sources-upon-deescalation

Description Clear sources upon de-escalation from level 1 to 0 or manual to 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1; '2': Policy level 2; '3': Policy level 3; '4': Policy level 4;

Type: string

Supported Values: 0, 1, 2, 3, 4

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

src-escalation-score

Description Source activation score of this level

Type: number

Range: 1-1000000

src-violation-actions

Description Violation actions apply due to source escalate from this level

Range: 1-500

type

Description 'pkt-rate': rate of incoming packets; 'pkt-drop-rate': rate of packets got dropped; 'bit-rate': rate of incoming bits; 'pkt-drop-ratio': ratio of incoming packet rate divided by the rate of dropping packets; 'bytes-to-bytes-from-ratio': ratio of incoming packet rate divided by the rate of outgoing packets; 'concurrent-conns': number of concurrent connections; 'conn-miss-rate': rate of incoming packets for which no previously established connection exists; 'syn-rate': rate on incoming SYN packets; 'fin-rate': rate on incoming FIN packets; 'rst-rate': rate of incoming RST packets; 'small-window-ack-rate': rate of small window advertisement; 'empty-ack-rate': rate of incoming packets which have no payload; 'small-payload-rate': rate of short payload packet; 'syn-fin-ratio': ratio of incoming SYN packet rate divided by the rate of incoming FIN packets; 'cpu-utilization': average data CPU utilization; 'interface-utilization': outside interface utilization;

Type: string

Supported Values: pkt-rate, pkt-drop-rate, bit-rate, pkt-drop-ratio, bytes-to-bytes-from-ratio, concurrent-conns, conn-miss-rate, syn-rate, fin-rate, rst-rate, syn-ack-rate, small-window-ack-rate, empty-ack-rate, small-payload-rate, syn-fin-ratio, cpu-utilization, interface-utilization, learnt-sources

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold for the entire zone

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold for the entire zone

Type: number

Range: 1-2147483647

zone-threshold-str

Description Threshold for the entire zone (Non-zero floating point)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

zone-violation-actions

Description Violation actions to use when this zone indicator threshold reaches

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/violation-actions*

2.33.264 ddos dst zone port zone-service-other manual-mode

Enter manual-mode configuration

manual-mode Specification

Parameter	Value

/axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service-other/{port-other}+{protocol}/manual-mode/{config}

manual-mode attributes

manual-mode-list

manual-mode-list is **JSON List** of *manual-mode attributes*

```
manual-mode-list : [
        { manual-mode attributes },
        { manual-mode attributes },
        ...
    ]
```

manual-mode attributes

close-sessions-for-all-sources

Description Close session for all sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

close-sessions-for-unauth-sources

Description Close session for unauthenticated sources

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

config

Description 'configuration': Manual-mode configuration;

Type: string

Supported Values: configuration

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

zone-template

Specification	Value
Type	*object*

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

pattern-recognition attributes

algorithm

Description 'heuristic': heuristic algorithm;

Type: string

Supported Values: heuristic

capture-traffic

Description 'all': Capture all packets; 'dropped': Capture dropped packets (default);

Type: string

Supported Values: all, dropped

filter-inactive-threshold

Description Extracted filter inactive threshold

Type: number

Range: 5-255

filter-threshold

Description Extracted filter threshold

Type: number

Range: 0-100

mode

Description 'capture-never-expire': War-time capture without rate exceeding and never expires; 'manual': Manual mode;

Type: string

Supported Values: capture-never-expire, manual

sensitivity

Description 'high': High Sensitivity; 'medium': Medium Sensitivity; 'low': Low Sensitivity;

Type: string

Supported Values: high, medium, low

triggered-by

Description 'zone-escalation': Zone escalation trigger pattern recognition; 'packet-rate-exceeds': Packet rate limit exceeds trigger pattern recognition (default);

Type: string

Supported Values: zone-escalation, packet-rate-exceeds

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

class-list-overflow-policy-list is **JSON List** of *class-list-overflow-policy attributes*

class-list-overflow-policy-list : [

{ *class-list-overflow-policy attributes* },

{ *class-list-overflow-policy attributes* },

...

]

class-list-overflow-policy attributes

action

Description 'bypass': Always permit for the Source to bypass all feature & limit checks; 'deny': Blacklist incoming packets for service;

Type: string

Supported Values: bypass, deny

dummy-name

Description 'configuration': Configure overflow policy for class-list;

Type: string

Supported Values: configuration

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

log-enable

Description Enable logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

log-periodic

Description Enable log periodic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

zone-template

Specification	Value
Type	*object*

dns

Description DDOS dns template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

encap

Description DDOS encap template (IPv6-over-IPv4 / IPv4-over-IPv6 are not supported.)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

http

Description DDOS http template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

logging

Description DDOS logging template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

quic

Description DDOS quic template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sip

Description DDOS sip template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

udp

Description DDOS udp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

2.33.296 ddos dst zone port zone-service src-based-policy policy-class-list oper

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/port/zone-service/{port-num}+{protocol}/virtualhosts/virtualhost/{vhost}/level/{level-num}*

servername

Type: List

servername-list

Description Class List to match servername (AC type Class List Name)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername-match-any

Description Match when there is no SNI or other servernames are not matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

servername-no-sni

Description Match when there is no SNI extension found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

source-tracking

Description 'follow': enable creation of source entries when source-tracking-all is enabled (default); 'enable': enable creation of source entries on this virtualhost; 'disable': disable creation of source entries on this virtualhost;

Type: string

Supported Values: follow, enable, disable

Default: follow

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vhost

Description name for virtualhost

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

servername

Specification	Value
Type	*list*
Block object keys	

host-match-string

Description SNI String

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

match-type

Description 'contains': match servername extension when contains this string; 'ends-with': match servername extension when ends with this string; 'equals': match servername extension when equals this string; 'starts-with': match servername extension when starts with this string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

level-list

Specification	Value
Type	*list*
Block object keys	

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'blacklist-src': Blacklist-src for glid exceed; 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, blacklist-src, ignore

level-num

Description '0': Default policy level;

Type: string

Supported Values: 0

src-default-glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *level-list_zone-template*

Type: Object

level-list_zone-template

Specification	Value
Type	*object*

ssl-l4

Description DDOS ssl-l4 template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tcp

Description DDOS tcp template

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

src-port-range attributes

src-port-range-list

src-port-range-list is **JSON List** of *src-port-range attributes*

```
src-port-range-list : [
        { src-port-range attributes },
        { src-port-range attributes },
        ...
    ]
```

src-port-range attributes

capture-config

Description: capture-config is a **JSON Block**. Please see below for *capture-config*

Type: Object

default-action-list

Description Configure default-action-list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/ddos/action-list*

deny

Description Blacklist and Drop all incoming packets for protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

glid-cfg

Description: glid-cfg is a **JSON Block**. Please see below for *glid-cfg*

Type: Object

level-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/level/{level-num}*

port-ind

Description: port-ind is a **JSON Block**. Please see below for *port-ind*

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/port-ind*

protocol

Description 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

src-port-range-end

Description Src Port-Range End Port Number

Type: number

Range: 2-65535

src-port-range-start

Description Src Port-Range Start Port Number

Type: number

Range: 1-65535

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

capture-config

Specification	Value
Type	*object*

capture-config-mode

Description 'drop': Apply capture-config to dropped packets; 'forward': Apply capture-config to forwarded packets; 'all': Apply capture-config to both dropped and forwarded packets;

Type: string

Supported Values: drop, forward, all

capture-config-name

Description Capture-config name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

zone-template

Specification	Value
Type	*object*

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

port-ind

Specification	Value
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

level-list

Specification	Value
Type	*list*
Block object keys	

indicator-list

Type: List

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port-range/{src-port-range-start}+{src-port-range-end}+{protocol}/level/{level-num}/indicator/{type}*

level-num

Description '0': Default policy level; '1': Policy level 1;

Type: string

Supported Values: 0, 1

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

level-list_indicator-list

Specification	Value
Type	*list*
Block object keys	

type

Description 'pkt-rate': rate of incoming packets; 'bit-rate': rate of incoming bits;

Type: string

Supported Values: pkt-rate, bit-rate

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-threshold-large-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-10995116277760

zone-threshold-num

Description Threshold of the entire zone for the port-range

Type: number

Range: 1-2147483647

Type: Object

Reference Object: */axapi/v3/ddos/dst/zone/{zone-name}/src-port/zone-src-port/{port-num}+{protocol}/port-ind*

port-num

Description Source Port Number

Type: number

Range: 1-65535

protocol

Description 'dns-udp': DNS-UDP Port; 'dns-tcp': DNS-TCP Port; 'udp': UDP port; 'tcp': TCP Port;

Type: string

Supported Values: dns-udp, dns-tcp, udp, tcp

set-counter-base-val

Description Set T2 counter value of current context to specified value

Type: number

Range: 1-4294967295

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zone-template

Description: zone-template is a **JSON Block**. Please see below for *zone-template*

Type: Object

glid-cfg

Specification	Value
Type	*object*

glid

Description Global limit ID

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/glid*

glid-action

Description 'drop': Drop packets for glid exceed (Default); 'ignore': Do nothing for glid exceed;

Type: string

Supported Values: drop, ignore

zone-template

Specification	Value
Type	*object*

src-dns

Description DDOS dns src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-tcp

Description DDOS tcp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

src-udp

Description DDOS udp src template

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

port-ind

Specification	Value
Type	*object*

uuid

Description uuid of the object

ack_auth_fail

Description ACK Retry Dropped

Type: number

Format: counter

ack_retry_blacklist

Description ACK Retry Timeout Blacklisted

Type: number

Format: counter

ack_retry_gap_drop

Description ACK Retry Retry-Gap Dropped

Type: number

Format: counter

ack_retry_init

Description ACK Retry Init

Type: number

Format: counter

ack_retry_pass

Description ACK Retry Passed

Type: number

Format: counter

ack_retry_reset

Description ACK Retry Timeout Reset

Type: number

Format: counter

ack_retry_rto_fail

Description ACK Retry RTO Dropped

Type: number

Format: counter

ack_retry_rto_pass

Description ACK Retry RTO Passed

Type: number

Format: counter

ack_retry_rto_progress

Description ACK Retry RTO Progress

Type: number

Format: counter

ack_retry_timeout

Description ACK Retry Timeout

Type: number

Format: counter

bl

Description Dst Blacklisted

Type: number

Format: counter

challenge_failed

Description Challenge Failed

Type: number

Format: counter

chunk_bad

Description Bad Payload Chunk

Type: number

Format: counter

chunk_sz_1k

Description Payload Chunk Size Less Than or Equal to 1K

Type: number

Format: counter

chunk_sz_2k

Description Payload Chunk Size Less Than or Equal to 2K

Type: number

Format: counter

chunk_sz_4k

Description Payload Chunk Size Less Than or Equal to 4K

Type: number

Format: counter

chunk_sz_512

Description Payload Chunk Size Less Than or Equal to 512

Type: number

Format: counter

chunk_sz_gt_4k

Description Payload Chunk Size Larger Than 4K

Type: number

Format: counter

client_rst

Description Client TCP RST Received

Type: number

Format: counter

conn_close

Description Connections Closed

Type: number

Format: counter

conn_close_half_open

Description Half Open Connections Closed

Type: number

Format: counter

conn_close_w_fin

Description FIN Connections Closed

Type: number

Format: counter

conn_close_w_idle

Description Idle Connections Closed

Type: number

Format: counter

conn_close_w_rst

Description RST Connections Closed

Type: number

Format: counter

conn_create_from_ack

Description Connections Created From ACK

Type: number

Format: counter

conn_create_from_syn

Description Connections Created From SYN

Type: number

Format: counter

conn_create_from_synack

Description Connections Created From SYNACK

Type: number

Format: counter

conn_ofo_rate_excd

Description TCP Conn Out-Of-Seq Rate Exceeded

Type: number

Format: counter

conn_prate_excd

Description TCP Conn Pkt Rate Exceeded

Type: number

Format: counter

conn_rexmit_rate_excd

Description TCP Conn Retransmit Rate Exceeded

Type: number

Format: counter

conn_zwindow_rate_excd

Description TCP Conn Zero-Window Rate Exceeded

Type: number

Format: counter

content_length_too_long

Description Malform Content Length Too Long

Type: number

Format: counter

create_conn_non_syn_dropped

Description Create Conn with non-SYN Packets Dropped

Type: number

Format: counter

dst_hw_drop

Description Dst Hardware Packets Dropped

Type: number

Format: counter

dst_post_rate_exceed

Description Dst Post Rate Exceeded

Type: number

Format: counter

dst_req_rate_exceed

Description Dst Request Rate Exceeded

Type: number

Format: counter

dst_resp_rate_exceed

Description Dst Response Rate Exceeded

Type: number

Format: counter

er_condition

Description Error Condition

Type: number

Format: counter

exceed_action_drop

Description Exceed Action: Dropped

Type: number

Format: counter

exceed_action_tunnel

Description Exceed Action: Tunnel

Type: number

Format: counter

exceed_drop_brate_src

Description Src KiBit Rate Exceeded

Type: number

Format: counter

exceed_drop_brate_src_pkt

Description Src KiBit Rate Exceeded Count

Type: number

Format: counter

exceed_drop_climit_src

Description Src Conn Limit Exceeded

Type: number

Format: counter

exceed_drop_crate_src

Description Src Conn Rate Exceeded

Type: number

Format: counter

exceed_drop_prate_src

Description Src Pkt Rate Exceeded

Type: number

Format: counter

fail_alloc

Description Alloc Failed

Type: number

Format: counter

fail_alloc_hdr

Description Alloc Header Failed

Type: number

Format: counter

fail_get_line

Description Get Line Failed

Type: number

Format: counter

filter10_drop

Description Filter10 Match Dropped

Type: number

Format: counter

filter10_match

Description Filter10 Match

Type: number

Format: counter

filter1_drop

Description Filter1 Match Dropped

Type: number

Format: counter

filter1_match

Description Filter1 Match

Type: number

Format: counter

filter2_drop

Description Filter2 Match Dropped

Type: number

Format: counter

filter2_match

Description Filter2 Match

Type: number

Format: counter

filter3_drop

Description Filter3 Match Dropped

Type: number

Format: counter

filter3_match

Description Filter3 Match

Type: number

Format: counter

filter4_drop

Description Filter4 Match Dropped

Type: number

Format: counter

filter4_match

Description Filter4 Match

Type: number

Format: counter

filter5_drop

Description Filter5 Match Dropped

Type: number

Format: counter

filter5_match

Description Filter5 Match

Type: number

Format: counter

filter6_drop

Description Filter6 Match Dropped

Type: number

Format: counter

filter6_match

Description Filter6 Match

Type: number

Format: counter

filter7_drop

Description Filter7 Match Dropped

Type: number

Format: counter

filter7_match

Description Filter7 Match

Type: number

Format: counter

filter8_drop

Description Filter8 Match Dropped

Type: number

Format: counter

filter8_match

Description Filter8 Match

Type: number

Format: counter

filter9_drop

Description Filter9 Match Dropped

Type: number

Format: counter

filter9_match

Description Filter9 Match

Type: number

Format: counter

filter_action_blacklist

Description Filter Action Blacklist

Type: number

Format: counter

filter_action_default_pass

Description Filter Action Default Pass

Type: number

Format: counter

filter_action_drop

Description Filter Action Drop

Type: number

Format: counter

filter_action_whitelist

Description Filter Action Whitelist

Type: number

Format: counter

filter_auth_fail

Description Filter Auth Failed

Type: number

Format: counter

filter_match

Description Filter Total Match

Type: number

Format: counter

filter_none_match

Description Filter No Match

Type: number

Format: counter

filter_not_match

Description Filter Not Matched on Pkt

Type: number

Format: counter

frag_drop

Description Fragmented Packets Dropped

Type: number

Format: counter

frag_rcvd

Description Fragmented Packets Received

Type: number

Format: counter

frag_timeout

Description Fragmented Packets Timeout

Type: number

Format: counter

header_name_too_long

Description Header Name Too Long

Type: number

Format: counter

header_processing_incomplete

Description Header Process Incomplete

Type: number

Format: counter

header_processing_time_0

Description Header Process Time Less Than 1s

Type: number

Format: counter

header_processing_time_1

Description Header Process Time Less Than 10s

Type: number

Format: counter

header_processing_time_2

Description Header Process Time Less Than 30S

Type: number

Format: counter

header_processing_time_3

Description Header Process Time Larger Than or Equal to 30s

Type: number

Format: counter

http_auth_drop

Description HTTP Auth Dropped

Type: number

Format: counter

http_auth_resp

Description HTTP Auth Responded

Type: number

Format: counter

hybrid_auth_auth_no_match

Description SYN Auth Hybrid Auth No Match Drop

Type: number

Format: counter

hybrid_auth_auth_no_match_ack_rcv

Description SYN Auth Hybrid Auth No Match Drop: ACK Received

Type: number

Format: counter

hybrid_auth_auth_no_match_rst_rcv

Description SYN Auth Hybrid Auth No Match Drop: RST Received

Type: number

Format: counter

hybrid_auth_entry_aged_out

Description SYN Auth Hybrid Entry Aged Out

Type: number

Format: counter

hybrid_auth_filter_full

Description SYN Auth Hybrid Filter Full

Type: number

Format: counter

hybrid_auth_invalid_fail

Description SYN Auth Hybrid Invalid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_invalid_pass

Description SYN Auth Hybrid Invalid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_invalid_sa_sent

Description SYN Auth Hybrid Invalid SYNACK Sent

Type: number

Format: counter

hybrid_auth_lookup_fail

Description SYN Auth Hybrid Lookup Fail

Type: number

Format: counter

hybrid_auth_method_change

Description SYN Auth Hybrid Method Change

Type: number

Format: counter

hybrid_auth_unknown_fail

Description SYN Auth Hybrid Unknown Auth Fail

Type: number

Format: counter

hybrid_auth_unknown_pass

Description SYN Auth Hybrid Unknown Auth Pass

Type: number

Format: counter

hybrid_auth_valid_fail

Description SYN Auth Hybrid Valid SYNACK Auth Fail

Type: number

Format: counter

hybrid_auth_valid_pass

Description SYN Auth Hybrid Valid SYNACK Auth Pass

Type: number

Format: counter

hybrid_auth_valid_sa_sent

Description SYN Auth Hybrid Valid SYNACK Sent

Type: number

Format: counter

idle_timeout

Description Idle Timeout

Type: number

Format: counter

invalid_hdr_name

Description HTTP Header Name Invalid

Type: number

Format: counter

invalid_hdr_val

Description HTTP Header Value Invalid

Type: number

Format: counter

invalid_header

Description HTTP Header Invalid

Type: number

Format: counter

js_challenge_failed

Description Challenge Javascript Failed

Type: number

Format: counter

js_challenge_sent

Description Challenge Javascript Sent

Type: number

Format: counter

less_than_mss_exceed

Description Min Payload Size Fail Exceeded

Type: number

Format: counter

line_too_long

Description Line Too Long

Type: number

Format: counter

negative_req_remain

Description Negative Request Remain

Type: number

Format: counter

negative_resp_remain

Description Negative Response Remain

Type: number

Format: counter

new_syn

Description TCP SYN

Type: number

Format: counter

ofo_queue_sz_exceed

Description Out-Of-Order Queue Exceeded

Type: number

Format: counter

ofo_timer_expired

Description Out-Of-Order Timeout

Type: number

Format: counter

out_of_seq_excd

Description Out-Of-Seq Exceeded

Type: number

Format: counter

outbound_port_bytes

Description Outbound Bytes Received

Type: number

Format: counter

outbound_port_bytes_drop

Description Outbound Bytes Dropped

Type: number

Format: counter

outbound_port_bytes_sent

Description Outbound Bytes Forwarded

Type: number

Format: counter

outbound_port_drop

Description Outbound Packets Dropped

Type: number

Format: counter

outbound_port_pkt_sent

Description Outbound Packets Forwarded

Type: number

Format: counter

outbound_port_rcvd

Description Outbound Packets Received

Type: number

Format: counter

parse_bad_chunk

Description Malform Bad Chunk

Type: number

Format: counter

parse_header_name_too_long

Description Malform Header Name Too Long

Type: number

Format: counter

parse_line_too_long

Description Malform Line Too Long

Type: number

Format: counter

parse_req_line_invalid_method

Description Malform Request Line Invalid Method

Type: number

Format: counter

parse_req_line_too_long

Description Malform Request Line Too Long

Type: number

Format: counter

parse_req_line_too_small

Description Malform Request Line Too Small

Type: number

Format: counter

parse_too_many_headers

Description Malform Too Many Headers

Type: number

Format: counter

parsereq_fail

Description Parse Request Failed

Type: number

Format: counter

partial_header

Description Partial Header

Type: number

Format: counter

pattern_filter1_match

Description Extracted Filter1 Match

Type: number

Format: counter

pattern_filter2_match

Description Extracted Filter2 Match
