Default: 0

blade-gtp-info-ext-not-found

Description Enable automatic packet-capture for GTP-Info ext not found while freeing C-smp on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-rate-limit-entry-create-failu

Description Enable automatic packet-capture for GTP Rate Limit Entry Create Failure on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-rate-limit-smp-create-failure

Description Enable automatic packet-capture for GTP Rate Limit SMP Create Failure on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-rate-limit-t3-ctr-create-fail

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-smp-c-check-failed

Description Enable automatic packet-capture for GTP-C SMP check Failed on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-smp-dec-sess-count-check-fail

Description Enable automatic packet-capture for GTP-U session count is 0 in GTP-C SMP on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-smp-path-check-failed

Description Enable automatic packet-capture for GTP SMP PATH check Failed on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-smp-session-count-check-faile

Description Enable automatic packet-capture for GTP-U session count is not in range of 0-11 in GTP-C SMP on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-smp-sig-check-failed

Description Enable automatic packet-capture for GTP SMP signature check Failed on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-u-smp-check-failed

Description Enable automatic packet-capture for GTP U-SMP check Failed on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-gtp-u-smp-sig-check-failed

Description Enable automatic packet-capture for GTP-U SMP signature check Failed on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

blade-out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory on PU2

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

gtp-c-fail-conn-create-slow

Description Enable automatic packet-capture for GTP-C packet failed creating L4-session in slowpath

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-c-smp-sig-check-failed

Description Enable automatic packet-capture for GTP-C SMP signature check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-info-ext-not-found

Description Enable automatic packet-capture for GTP-Info ext not found while freeing C-smp

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-pathm-fail-conn-create-slow

Description Enable automatic packet-capture for GTP path packet failed while creating L4-session in slowpath

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-entry-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-smp-create-failure

Description Enable automatic packet-capture for GTP Rate Limit SMP Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-t3-ctr-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-c-check-failed

Description Enable automatic packet-capture for GTP-C SMP check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-dec-sess-count-check-failed

Description Enable automatic packet-capture for GTP-U session count is 0 in GTP-C SMP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-path-check-failed

Description Enable automatic packet-capture for GTP SMP PATH check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-sig-check-failed

Description Enable automatic packet-capture for GTP SMP signature check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-tunnel-rate-limit-entry-create-fail

Description Enable automatic packet-capture for GTP Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-fail-conn-create-slow

Description Enable automatic packet-capture for GTP-U packet failed while creating L4-session in slowpath

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-smp-check-failed

Description Enable automatic packet-capture for GTP U-SMP check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-smp-sig-check-failed

Description Enable automatic packet-capture for GTP SMP signature check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-rate-limit-entry-create-fa

Description Enable automatic packet-capture for GTP-U Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-c-check-failed

Description Enable automatic packet-capture for GTP-C SMP check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-dec-sess-count-check-failed

Description Enable automatic packet-capture for GTP-U session count is 0 in GTP-C SMP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-path-check-failed

Description Enable automatic packet-capture for GTP SMP PATH check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-smp-sig-check-failed

Description Enable automatic packet-capture for GTP SMP signature check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-tunnel-rate-limit-entry-create-fail

Description Enable automatic packet-capture for GTP Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-fail-conn-create-slow

Description Enable automatic packet-capture for GTP-U packet failed while creating L4-session in slowpath

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-smp-check-failed

Description Enable automatic packet-capture for GTP U-SMP check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-smp-sig-check-failed

Description Enable automatic packet-capture for GTP SMP signature check Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-rate-limit-entry-create-fa

Description Enable automatic packet-capture for GTP-U Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	Value
Type	*object*

bad_ip_flg

Description Enable automatic packet-capture for Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_frg_offset

Description Enable automatic packet-capture for Bad IP Fragment Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_hdrlen

Description Enable automatic packet-capture for Bad IP Header Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_payload_len

Description Enable automatic packet-capture for Bad IP Payload Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_ttl

Description Enable automatic packet-capture for Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_tcp_urg_offset

Description Enable automatic packet-capture for TCP Bad Urgent Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csum

Description Enable automatic packet-capture for Bad IP Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_frg

Description Enable automatic packet-capture for Empty Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_mic_frg

Description Enable automatic packet-capture for Micro Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frg

Description Enable automatic packet-capture for IPv4 Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gre_pptp_err

Description Enable automatic packet-capture for GRE PPTP Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_err

Description Enable automatic packet-capture for IP-over-IP Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_msmtch

Description Enable automatic packet-capture for IP-over-IP Tunnel Mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_ah

Description Enable automatic packet-capture for IPv6 Authentication Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_dest

Description Enable automatic packet-capture for IPv6 Destination Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_esp

Description Enable automatic packet-capture for IPv6 ESP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_frag

Description Enable automatic packet-capture for IPv6 Fragmentation Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_hbh

Description Enable automatic packet-capture for IPv6 Hop by Hop Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_malformed

Description Enable automatic packet-capture for IPv6 Malformed Extension Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_mobility

Description Enable automatic packet-capture for IPv6 Mobility Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_none

Description Enable automatic packet-capture for IPv6 No Next Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_other

Description Enable automatic packet-capture for IPv6 Unknown Extension Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_routing

Description Enable automatic packet-capture for IPv6 Routing Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land

Description Enable automatic packet-capture for Land Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_ip_payload

Description Enable automatic packet-capture for No IP Payload drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nvgre_err

Description Enable automatic packet-capture for GRE Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-rate

Specification	Value
Type	*object*

bad_ip_flg

Description Enable automatic packet-capture for Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_frg_offset

Description Enable automatic packet-capture for Bad IP Fragment Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_hdrlen

Description Enable automatic packet-capture for Bad IP Header Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_payload_len

Description Enable automatic packet-capture for Bad IP Payload Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_ttl

Description Enable automatic packet-capture for Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_tcp_urg_offset

Description Enable automatic packet-capture for TCP Bad Urgent Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csum

Description Enable automatic packet-capture for Bad IP Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

emp_frg

Description Enable automatic packet-capture for Empty Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_mic_frg

Description Enable automatic packet-capture for Micro Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frg

Description Enable automatic packet-capture for IPv4 Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gre_pptp_err

Description Enable automatic packet-capture for GRE PPTP Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_err

Description Enable automatic packet-capture for IP-over-IP Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_msmtch

Description Enable automatic packet-capture for IP-over-IP Tunnel Mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_ah

Description Enable automatic packet-capture for IPv6 Authentication Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_dest

Description Enable automatic packet-capture for IPv6 Destination Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_esp

Description Enable automatic packet-capture for IPv6 ESP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_frag

Description Enable automatic packet-capture for IPv6 Fragmentation Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_hbh

Description Enable automatic packet-capture for IPv6 Hop by Hop Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_malformed

Description Enable automatic packet-capture for IPv6 Malformed Extension Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_mobility

Description Enable automatic packet-capture for IPv6 Mobility Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_none

Description Enable automatic packet-capture for IPv6 No Next Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_other

Description Enable automatic packet-capture for IPv6 Unknown Extension Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_routing

Description Enable automatic packet-capture for IPv6 Routing Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land

Description Enable automatic packet-capture for Land Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_ip_payload

Description Enable automatic packet-capture for No IP Payload drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nvgre_err

Description Enable automatic packet-capture for GRE Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.150.179 visibility packet-capture global-templates template trigger-sys-obj-stats-change ip-anomaly-drop trigger-stats-inc

Configure stats to trigger packet capture on increment

trigger-stats-inc Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	trigger-stats-inc
Element URI	/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/ip-anomaly-drop/trigger-stats-inc
Element Attributes	trigger-stats-inc_attributes
Partition Visibility	shared
Schema	`trigger-stats-inc schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/ip-anomaly-drop/trigger-stats-inc

trigger-stats-inc attributes

```
POST /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/ip-anomaly-drop/trigger-stats-inc
Payload:
{
    "trigger-stats-inc": {
        "land": 1
    }
}
```

Get Object

GET

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/ip-anomaly-drop/trigger-stats-inc

trigger-stats-inc attributes

```
GET /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/ip-anomaly-drop/trigger-stats-inc

bad_ip_flg

Description Enable automatic packet-capture for Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_frg_offset

Description Enable automatic packet-capture for Bad IP Fragment Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_hdrlen

Description Enable automatic packet-capture for Bad IP Header Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_payload_len

Description Enable automatic packet-capture for Bad IP Payload Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_ttl

Description Enable automatic packet-capture for Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_tcp_urg_offset

Description Enable automatic packet-capture for TCP Bad Urgent Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csum

Description Enable automatic packet-capture for Bad IP Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_frg

Description Enable automatic packet-capture for Empty Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_mic_frg

Description Enable automatic packet-capture for Micro Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frg

Description Enable automatic packet-capture for IPv4 Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gre_pptp_err

Description Enable automatic packet-capture for GRE PPTP Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_err

Description Enable automatic packet-capture for IP-over-IP Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_msmtch

Description Enable automatic packet-capture for IP-over-IP Tunnel Mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_ah

Description Enable automatic packet-capture for IPv6 Authentication Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_dest

Description Enable automatic packet-capture for IPv6 Destination Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_esp

Description Enable automatic packet-capture for IPv6 ESP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_frag

Description Enable automatic packet-capture for IPv6 Fragmentation Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_hbh

Description Enable automatic packet-capture for IPv6 Hop by Hop Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_malformed

Description Enable automatic packet-capture for IPv6 Malformed Extension Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_mobility

Description Enable automatic packet-capture for IPv6 Mobility Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_none

Description Enable automatic packet-capture for IPv6 No Next Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_other

Description Enable automatic packet-capture for IPv6 Unknown Extension Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6_eh_routing

Description Enable automatic packet-capture for IPv6 Routing Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land

Description Enable automatic packet-capture for Land Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_ip_payload

Description Enable automatic packet-capture for No IP Payload drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nvgre_err

Description Enable automatic packet-capture for GRE Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-rate attributes

trigger-stats-rate attributes

client_fail

Description Enable automatic packet-capture for Number of client failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

client_select_fail

Description Enable automatic packet-capture for Fail to select client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dcmsg_error

Description Enable automatic packet-capture for Diameter cross cpu error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

invalid_avp

Description Enable automatic packet-capture for AVP value contains illegal chars

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mismatch_fwd_id

Description Enable automatic packet-capture for Diameter mismatch fwd session id

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mismatch_rev_id

Description Enable automatic packet-capture for Diameter mismatch rev session id

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_fwd_tuple

Description Enable automatic packet-capture for Diameter no fwd tuple matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_rev_tuple

Description Enable automatic packet-capture for Diameter no rev tuple matched

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for Number of no routes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_session_id

Description Enable automatic packet-capture for Diameter no session id avp

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reply_error_info_fail

Description Enable automatic packet-capture for Fail to reply error info to peer

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reply_unknown_session_id

Description Enable automatic packet-capture for Reply with unknown session ID error info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

retry_client_request_fail

Description Enable automatic packet-capture for Diameter retry client request fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_fail

Description Enable automatic packet-capture for Number of server failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Number of snat failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Number of server selection failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

unkwn_cmd_code

Description Enable automatic packet-capture for Diameter unkown cmd code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Type	*object*

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_connection_preface

Description Enable automatic packet-capture for Bad Connection Preface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_frame_type_for_stream_state

Description Enable automatic packet-capture for Bad frame type for stream state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cancel

Description Enable automatic packet-capture for cancel

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

closed_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in closed state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression_error

Description Enable automatic packet-capture for compression error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connect_error

Description Enable automatic packet-capture for connect error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

continuation_before_headers

Description Enable automatic packet-capture for CONTINUATION frame with no headers frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_no_stream

Description Enable automatic packet-capture for DATA Frame Rcvd on non-existent stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enhance_your_calm

Description Enable automatic packet-capture for enhance your calm error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_rcvd_total

Description Enable automatic packet-capture for Error Rcvd - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_cancel

Description Enable automatic packet-capture for Error Sent - CANCEL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_compression_err

Description Enable automatic packet-capture for Error Sent - COMPRESSION_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_connect_err

Description Enable automatic packet-capture for Error Sent - CONNECT_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_flow_control

Description Enable automatic packet-capture for Error Sent - FLOW_CONTROL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_frame_size_err

Description Enable automatic packet-capture for Error Sent - FRAME_SIZE_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_http11_required

Description Enable automatic packet-capture for Error Sent - HTTP_1_1_REQUIRED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_inadequate_security

Description Enable automatic packet-capture for Error Sent - INADEQUATE_SECURITY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_internal_err

Description Enable automatic packet-capture for Error Sent - INTERNAL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_proto_err

Description Enable automatic packet-capture for Error Sent - PROTOCOL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_refused_stream

Description Enable automatic packet-capture for Error Sent - REFUSED_STREAM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_setting_timeout

Description Enable automatic packet-capture for Error Sent - SETTINGS_TIMEOUT

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_stream_closed

Description Enable automatic packet-capture for Error Sent - STREAM_CLOSED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_total

Description Enable automatic packet-capture for Error Rent - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_your_calm

Description Enable automatic packet-capture for Error Sent - ENHANCE_YOUR_CALM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error_max_invalid_stream

Description Enable automatic packet-capture for Max Invalid Stream Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceeds_max_window_size_stream

Description Enable automatic packet-capture for Window Update with increment that results in exceeding max window

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

flow_control_error

Description Enable automatic packet-capture for Flow Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frame_size_error

Description Enable automatic packet-capture for Frame Size Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

half_closed_remote_state_unexpected_fra

Description Enable automatic packet-capture for Unexpected frame received in half closed remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_no_stream

Description Enable automatic packet-capture for header no stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_padlen_gt_frame_payload

Description Enable automatic packet-capture for Header padlen greater than frame payload size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_after_continuation

Description Enable automatic packet-capture for headers frame before CONTINUATION was complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_interleaved

Description Enable automatic packet-capture for headers interleaved on streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_1_1_required

Description Enable automatic packet-capture for HTTP1.1 Required

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

idle_state_unexpected_frame

Description Enable automatic packet-capture for Unxpected frame received in idle state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inadequate_security

Description Enable automatic packet-capture for inadequate security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_header_fail

Description Enable automatic packet-capture for Inflate Header Fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

internal_error

Description Enable automatic packet-capture for Internal Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_during_headers

Description Enable automatic packet-capture for frame before headers were complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_size

Description Enable automatic packet-capture for Invalid Frame Size Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_push_promise

Description Enable automatic packet-capture for unexpected PUSH_PROMISE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_setting_value

Description Enable automatic packet-capture for invalid setting-frame value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_stream_id

Description Enable automatic packet-capture for received invalid stream ID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_window_update

Description Enable automatic packet-capture for window-update value out of range

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol_error

Description Enable automatic packet-capture for Protocol Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refused_stream

Description Enable automatic packet-capture for Refused Stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_local_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved local state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_remote_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

settings_timeout

Description Enable automatic packet-capture for Settings Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

split_buff_fail

Description Enable automatic packet-capture for Splitting Buffer Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

streams_gt_max_concur_streams

Description Enable automatic packet-capture for Streams greater than max allowed concurrent streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trailers_no_end_stream

Description Enable automatic packet-capture for trailers not marked as end-of-stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

wrong_stream_state

Description Enable automatic packet-capture for Wrong Stream State

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zero_window_size_on_stream

Description Enable automatic packet-capture for Window Update with zero increment rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-rate

Specification	Value
Type	*object*

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_connection_preface

Description Enable automatic packet-capture for Bad Connection Preface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_frame_type_for_stream_state

Description Enable automatic packet-capture for Bad frame type for stream state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cancel

Description Enable automatic packet-capture for cancel

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

closed_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in closed state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression_error

Description Enable automatic packet-capture for compression error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connect_error

Description Enable automatic packet-capture for connect error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

continuation_before_headers

Description Enable automatic packet-capture for CONTINUATION frame with no headers frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_no_stream

Description Enable automatic packet-capture for DATA Frame Rcvd on non-existent stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

enhance_your_calm

Description Enable automatic packet-capture for enhance your calm error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_rcvd_total

Description Enable automatic packet-capture for Error Rcvd - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_cancel

Description Enable automatic packet-capture for Error Sent - CANCEL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_compression_err

Description Enable automatic packet-capture for Error Sent - COMPRESSION_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_connect_err

Description Enable automatic packet-capture for Error Sent - CONNECT_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_flow_control

Description Enable automatic packet-capture for Error Sent - FLOW_CONTROL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_frame_size_err

Description Enable automatic packet-capture for Error Sent - FRAME_SIZE_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_http11_required

Description Enable automatic packet-capture for Error Sent - HTTP_1_1_REQUIRED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_inadequate_security

Description Enable automatic packet-capture for Error Sent - INADEQUATE_SECURITY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_internal_err

Description Enable automatic packet-capture for Error Sent - INTERNAL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_proto_err

Description Enable automatic packet-capture for Error Sent - PROTOCOL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_refused_stream

Description Enable automatic packet-capture for Error Sent - REFUSED_STREAM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_setting_timeout

Description Enable automatic packet-capture for Error Sent - SETTINGS_TIMEOUT

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_stream_closed

Description Enable automatic packet-capture for Error Sent - STREAM_CLOSED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_total

Description Enable automatic packet-capture for Error Rent - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_your_calm

Description Enable automatic packet-capture for Error Sent - ENHANCE_YOUR_CALM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error_max_invalid_stream

Description Enable automatic packet-capture for Max Invalid Stream Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceeds_max_window_size_stream

Description Enable automatic packet-capture for Window Update with increment that results in exceeding max window

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

flow_control_error

Description Enable automatic packet-capture for Flow Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frame_size_error

Description Enable automatic packet-capture for Frame Size Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

half_closed_remote_state_unexpected_fra

Description Enable automatic packet-capture for Unexpected frame received in half closed remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_no_stream

Description Enable automatic packet-capture for header no stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_padlen_gt_frame_payload

Description Enable automatic packet-capture for Header padlen greater than frame payload size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_after_continuation

Description Enable automatic packet-capture for headers frame before CONTINUATION was complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_interleaved

Description Enable automatic packet-capture for headers interleaved on streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_1_1_required

Description Enable automatic packet-capture for HTTP1.1 Required

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

idle_state_unexpected_frame

Description Enable automatic packet-capture for Unxpected frame received in idle state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inadequate_security

Description Enable automatic packet-capture for inadequate security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_header_fail

Description Enable automatic packet-capture for Inflate Header Fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

internal_error

Description Enable automatic packet-capture for Internal Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_during_headers

Description Enable automatic packet-capture for frame before headers were complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_size

Description Enable automatic packet-capture for Invalid Frame Size Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_push_promise

Description Enable automatic packet-capture for unexpected PUSH_PROMISE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_setting_value

Description Enable automatic packet-capture for invalid setting-frame value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_stream_id

Description Enable automatic packet-capture for received invalid stream ID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_window_update

Description Enable automatic packet-capture for window-update value out of range

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol_error

Description Enable automatic packet-capture for Protocol Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refused_stream

Description Enable automatic packet-capture for Refused Stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_local_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved local state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_remote_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

settings_timeout

Description Enable automatic packet-capture for Settings Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

split_buff_fail

Description Enable automatic packet-capture for Splitting Buffer Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

streams_gt_max_concur_streams

Description Enable automatic packet-capture for Streams greater than max allowed concurrent streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

trailers_no_end_stream

Description Enable automatic packet-capture for trailers not marked as end-of-stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

wrong_stream_state

Description Enable automatic packet-capture for Wrong Stream State

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zero_window_size_on_stream

Description Enable automatic packet-capture for Window Update with zero increment rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.150.206 visibility packet-capture global-templates template trigger-sys-obj-stats-change slb-http2 trigger-stats-inc

Configure stats to trigger packet capture on increment

trigger-stats-inc Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	trigger-stats-inc
Element URI	/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-http2/trigger-stats-inc
Element Attributes	trigger-stats-inc_attributes
Partition Visibility	shared
Schema	`trigger-stats-inc schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-http2/trigger-stats-inc

trigger-stats-inc attributes

```
POST /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/slb-http2/trigger-stats-inc
Payload:
{
    "trigger-stats-inc": {
        "protocol_error": 1
    }
}
```

Get Object

GET

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-http2/trigger-stats-inc

trigger-stats-inc attributes

```
GET /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/slb-http2/trigger-stats-inc

trigger-stats-inc attributes

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_connection_preface

Description Enable automatic packet-capture for Bad Connection Preface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_frame_type_for_stream_state

Description Enable automatic packet-capture for Bad frame type for stream state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cancel

Description Enable automatic packet-capture for cancel

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

closed_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in closed state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression_error

Description Enable automatic packet-capture for compression error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connect_error

Description Enable automatic packet-capture for connect error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

continuation_before_headers

Description Enable automatic packet-capture for CONTINUATION frame with no headers frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_no_stream

Description Enable automatic packet-capture for DATA Frame Rcvd on non-existent stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enhance_your_calm

Description Enable automatic packet-capture for enhance your calm error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_rcvd_total

Description Enable automatic packet-capture for Error Rcvd - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_cancel

Description Enable automatic packet-capture for Error Sent - CANCEL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_compression_err

Description Enable automatic packet-capture for Error Sent - COMPRESSION_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_connect_err

Description Enable automatic packet-capture for Error Sent - CONNECT_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_flow_control

Description Enable automatic packet-capture for Error Sent - FLOW_CONTROL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_frame_size_err

Description Enable automatic packet-capture for Error Sent - FRAME_SIZE_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_http11_required

Description Enable automatic packet-capture for Error Sent - HTTP_1_1_REQUIRED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_inadequate_security

Description Enable automatic packet-capture for Error Sent - INADEQUATE_SECURITY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_internal_err

Description Enable automatic packet-capture for Error Sent - INTERNAL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_proto_err

Description Enable automatic packet-capture for Error Sent - PROTOCOL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_refused_stream

Description Enable automatic packet-capture for Error Sent - REFUSED_STREAM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_setting_timeout

Description Enable automatic packet-capture for Error Sent - SETTINGS_TIMEOUT

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_stream_closed

Description Enable automatic packet-capture for Error Sent - STREAM_CLOSED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_total

Description Enable automatic packet-capture for Error Rent - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_your_calm

Description Enable automatic packet-capture for Error Sent - ENHANCE_YOUR_CALM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error_max_invalid_stream

Description Enable automatic packet-capture for Max Invalid Stream Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceeds_max_window_size_stream

Description Enable automatic packet-capture for Window Update with increment that results in exceeding max window

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

flow_control_error

Description Enable automatic packet-capture for Flow Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frame_size_error

Description Enable automatic packet-capture for Frame Size Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

half_closed_remote_state_unexpected_fra

Description Enable automatic packet-capture for Unexpected frame received in half closed remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_no_stream

Description Enable automatic packet-capture for header no stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_padlen_gt_frame_payload

Description Enable automatic packet-capture for Header padlen greater than frame payload size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_after_continuation

Description Enable automatic packet-capture for headers frame before CONTINUATION was complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_interleaved

Description Enable automatic packet-capture for headers interleaved on streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_1_1_required

Description Enable automatic packet-capture for HTTP1.1 Required

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

idle_state_unexpected_frame

Description Enable automatic packet-capture for Unxpected frame received in idle state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inadequate_security

Description Enable automatic packet-capture for inadequate security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_header_fail

Description Enable automatic packet-capture for Inflate Header Fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

internal_error

Description Enable automatic packet-capture for Internal Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_during_headers

Description Enable automatic packet-capture for frame before headers were complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_size

Description Enable automatic packet-capture for Invalid Frame Size Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_push_promise

Description Enable automatic packet-capture for unexpected PUSH_PROMISE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_setting_value

Description Enable automatic packet-capture for invalid setting-frame value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_stream_id

Description Enable automatic packet-capture for received invalid stream ID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_window_update

Description Enable automatic packet-capture for window-update value out of range

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol_error

Description Enable automatic packet-capture for Protocol Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refused_stream

Description Enable automatic packet-capture for Refused Stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_local_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved local state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_remote_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

settings_timeout

Description Enable automatic packet-capture for Settings Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

split_buff_fail

Description Enable automatic packet-capture for Splitting Buffer Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

streams_gt_max_concur_streams

Description Enable automatic packet-capture for Streams greater than max allowed concurrent streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trailers_no_end_stream

Description Enable automatic packet-capture for trailers not marked as end-of-stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

wrong_stream_state

Description Enable automatic packet-capture for Wrong Stream State

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zero_window_size_on_stream

Description Enable automatic packet-capture for Window Update with zero increment rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-rate attributes

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_connection_preface

Description Enable automatic packet-capture for Bad Connection Preface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_frame_type_for_stream_state

Description Enable automatic packet-capture for Bad frame type for stream state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cancel

Description Enable automatic packet-capture for cancel

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

closed_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in closed state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression_error

Description Enable automatic packet-capture for compression error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connect_error

Description Enable automatic packet-capture for connect error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

continuation_before_headers

Description Enable automatic packet-capture for CONTINUATION frame with no headers frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_no_stream

Description Enable automatic packet-capture for DATA Frame Rcvd on non-existent stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

enhance_your_calm

Description Enable automatic packet-capture for enhance your calm error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_rcvd_total

Description Enable automatic packet-capture for Error Rcvd - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_cancel

Description Enable automatic packet-capture for Error Sent - CANCEL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_compression_err

Description Enable automatic packet-capture for Error Sent - COMPRESSION_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_connect_err

Description Enable automatic packet-capture for Error Sent - CONNECT_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_flow_control

Description Enable automatic packet-capture for Error Sent - FLOW_CONTROL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_frame_size_err

Description Enable automatic packet-capture for Error Sent - FRAME_SIZE_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_http11_required

Description Enable automatic packet-capture for Error Sent - HTTP_1_1_REQUIRED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_inadequate_security

Description Enable automatic packet-capture for Error Sent - INADEQUATE_SECURITY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_internal_err

Description Enable automatic packet-capture for Error Sent - INTERNAL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_proto_err

Description Enable automatic packet-capture for Error Sent - PROTOCOL_ERROR

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_refused_stream

Description Enable automatic packet-capture for Error Sent - REFUSED_STREAM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_setting_timeout

Description Enable automatic packet-capture for Error Sent - SETTINGS_TIMEOUT

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_stream_closed

Description Enable automatic packet-capture for Error Sent - STREAM_CLOSED

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_total

Description Enable automatic packet-capture for Error Rent - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_sent_your_calm

Description Enable automatic packet-capture for Error Sent - ENHANCE_YOUR_CALM

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error_max_invalid_stream

Description Enable automatic packet-capture for Max Invalid Stream Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

exceeds_max_window_size_stream

Description Enable automatic packet-capture for Window Update with increment that results in exceeding max window

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

flow_control_error

Description Enable automatic packet-capture for Flow Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frame_size_error

Description Enable automatic packet-capture for Frame Size Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

half_closed_remote_state_unexpected_fra

Description Enable automatic packet-capture for Unexpected frame received in half closed remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_no_stream

Description Enable automatic packet-capture for header no stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_padlen_gt_frame_payload

Description Enable automatic packet-capture for Header padlen greater than frame payload size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_after_continuation

Description Enable automatic packet-capture for headers frame before CONTINUATION was complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

headers_interleaved

Description Enable automatic packet-capture for headers interleaved on streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_1_1_required

Description Enable automatic packet-capture for HTTP1.1 Required

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

idle_state_unexpected_frame

Description Enable automatic packet-capture for Unxpected frame received in idle state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inadequate_security

Description Enable automatic packet-capture for inadequate security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_header_fail

Description Enable automatic packet-capture for Inflate Header Fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

internal_error

Description Enable automatic packet-capture for Internal Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_during_headers

Description Enable automatic packet-capture for frame before headers were complete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_size

Description Enable automatic packet-capture for Invalid Frame Size Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_push_promise

Description Enable automatic packet-capture for unexpected PUSH_PROMISE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_setting_value

Description Enable automatic packet-capture for invalid setting-frame value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_stream_id

Description Enable automatic packet-capture for received invalid stream ID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_window_update

Description Enable automatic packet-capture for window-update value out of range

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol_error

Description Enable automatic packet-capture for Protocol Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refused_stream

Description Enable automatic packet-capture for Refused Stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_local_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved local state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved_remote_state_unexpected_frame

Description Enable automatic packet-capture for Unexpected frame received in reserved remote state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

settings_timeout

Description Enable automatic packet-capture for Settings Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

split_buff_fail

Description Enable automatic packet-capture for Splitting Buffer Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

streams_gt_max_concur_streams

Description Enable automatic packet-capture for Streams greater than max allowed concurrent streams

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

trailers_no_end_stream

Description Enable automatic packet-capture for trailers not marked as end-of-stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

wrong_stream_state

Description Enable automatic packet-capture for Wrong Stream State

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zero_window_size_on_stream

Description Enable automatic packet-capture for Window Update with zero increment rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Description Enable automatic packet-capture for App Server Conn Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

app_serv_conn_no_pcb_err

Description Enable automatic packet-capture for App Server Conn no ES PCB Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

chunk1_hdr_err

Description Enable automatic packet-capture for Chunk Hdr Err1 Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

chunk2_hdr_err

Description Enable automatic packet-capture for Chunk Hdr Err2 Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

chunk_bad_trail_err

Description Enable automatic packet-capture for Chunk Bad Trail Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encap_hdr_incomplete_err

Description Enable automatic packet-capture for Encap HDR Incomplete Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_resp_hdr_err

Description Enable automatic packet-capture for HTTP Resp Hdr Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_resp_line_parse_err

Description Enable automatic packet-capture for HTTP Response Line Parse Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_resp_line_read_err

Description Enable automatic packet-capture for HTTP Response Line Read Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icap_line_err

Description Enable automatic packet-capture for ICAP Line Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icap_ver_err

Description Enable automatic packet-capture for ICAP Ver Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_icap_resp_err

Description Enable automatic packet-capture for No ICAP Resp Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_payload_buff_err

Description Enable automatic packet-capture for No Payload Buff Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_payload_next_buff_err

Description Enable automatic packet-capture for No Payload In Next Buff Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_status_code_err

Description Enable automatic packet-capture for No Status Code Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prep_req_fail_err

Description Enable automatic packet-capture for Prepare ICAP req fail Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

req_hdr_incomplete_err

Description Enable automatic packet-capture for Req Hdr Incomplete Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

resp_hdr_err

Description Enable automatic packet-capture for Resp Hdr Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

resp_hdr_incomplete_err

Description Enable automatic packet-capture for Resp Hdr Incomplete Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

resp_line_parse_err

Description Enable automatic packet-capture for Resp Line Parse Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

resp_line_read_err

Description Enable automatic packet-capture for Resp Line Read Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

serv_sel_fail_err

Description Enable automatic packet-capture for Server Select Fail Err Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

start_icap_conn_fail_err

Description Enable automatic packet-capture for Start ICAP conn fail Stats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

unsupported_pbsz_value

Description Enable automatic packet-capture for Unsupported PBSZ

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported_prot_value

Description Enable automatic packet-capture for Unsupported PROT

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_icmp_error_process

Description Enable automatic packet-capture for Source NAT ICMP Process

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_icmp_no_match

Description Enable automatic packet-capture for Source NAT ICMP No Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_no_fwd_route

Description Enable automatic packet-capture for Source NAT no fwd route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_no_rev_route

Description Enable automatic packet-capture for Source NAT no rev route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_cps_exceed

Description Enable automatic packet-capture for SSL CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_tpt_exceed

Description Enable automatic packet-capture for SSL TPT exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svr_syn_handshake_fail

Description Enable automatic packet-capture for L4 server handshake fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrselfail

Description Enable automatic packet-capture for Server sel failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synattack

Description Enable automatic packet-capture for L4 SYN attack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiescheckfailed

Description Enable automatic packet-capture for TCP SYN cookie failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiessentfailed

Description Enable automatic packet-capture for TCP SYN cookie snt fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

bw_rate_limit_exceed

Description Enable automatic packet-capture for BW-Limit Exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

concurrent_conn_exceed

Description Enable automatic packet-capture for L3V Conn Limit Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_rate_limit_drop

Description Enable automatic packet-capture for Conn rate limit drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_rate_limit_reset

Description Enable automatic packet-capture for Conn rate limit resets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connlimit_drop

Description Enable automatic packet-capture for Conn Limit drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_policy_drop

Description Enable automatic packet-capture for DNS Policy Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

l4_cps_exceed

Description Enable automatic packet-capture for L4 CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l7_cps_exceed

Description Enable automatic packet-capture for L7 CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_cps_exceed

Description Enable automatic packet-capture for NAT CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_resourse_drop

Description Enable automatic packet-capture for No resource drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smart_nat_id_mismatch

Description Enable automatic packet-capture for Auto NAT id mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_icmp_error_process

Description Enable automatic packet-capture for Source NAT ICMP Process

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_icmp_no_match

Description Enable automatic packet-capture for Source NAT ICMP No Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_no_fwd_route

Description Enable automatic packet-capture for Source NAT no fwd route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_no_rev_route

Description Enable automatic packet-capture for Source NAT no rev route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_cps_exceed

Description Enable automatic packet-capture for SSL CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_tpt_exceed

Description Enable automatic packet-capture for SSL TPT exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svr_syn_handshake_fail

Description Enable automatic packet-capture for L4 server handshake fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrselfail

Description Enable automatic packet-capture for Server sel failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

synattack

Description Enable automatic packet-capture for L4 SYN attack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiescheckfailed

Description Enable automatic packet-capture for TCP SYN cookie failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiessentfailed

Description Enable automatic packet-capture for TCP SYN cookie snt fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

url_hash_fail

Description Enable automatic packet-capture for URL hash persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

cookie_invalid

Description Enable automatic packet-capture for Invalid persist cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie_not_found

Description Enable automatic packet-capture for Persist cookie not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie_persist_fail

Description Enable automatic packet-capture for Cookie persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cssl_sid_not_found

Description Enable automatic packet-capture for Client SSL SID not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cssl_sid_not_match

Description Enable automatic packet-capture for Client SSL SID not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_ip_fail

Description Enable automatic packet-capture for DST IP persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_ip_hash_fail

Description Enable automatic packet-capture for DST IP hash persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_ip_new_sess_cache_fail

Description Enable automatic packet-capture for DST IP new sess fail (c)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dst_ip_new_sess_sel_fail

Description Enable automatic packet-capture for DST IP new sess fail (s)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

hash_tbl_create_fail

Description Enable automatic packet-capture for Hash tbl create fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hash_tbl_rst_adddel

Description Enable automatic packet-capture for Hash tbl reset (add/del)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hash_tbl_rst_updown

Description Enable automatic packet-capture for Hash tbl reset (up/down)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hash_tbl_trylock_fail

Description Enable automatic packet-capture for Hash tbl lock fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_hash_fail

Description Enable automatic packet-capture for Header hash persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src_ip_fail

Description Enable automatic packet-capture for SRC IP persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src_ip_hash_fail

Description Enable automatic packet-capture for SRC IP hash persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src_ip_new_sess_cache_fail

Description Enable automatic packet-capture for SRC IP new sess fail (c)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src_ip_new_sess_sel_fail

Description Enable automatic packet-capture for SRC IP new sess fail (s)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_sid_persist_fail

Description Enable automatic packet-capture for SSL SID persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_sid_session_fail

Description Enable automatic packet-capture for Create SSL SID fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sssl_sid_not_found

Description Enable automatic packet-capture for Server SSL SID not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sssl_sid_not_match

Description Enable automatic packet-capture for Server SSL SID not match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

url_hash_fail

Description Enable automatic packet-capture for URL hash persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Enable automatic packet-capture for Get all headers fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insert_resonse_line_fail

Description Enable automatic packet-capture for Ins response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_extend_fail

Description Enable automatic packet-capture for Line extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_table_extend_fail

Description Enable automatic packet-capture for Table extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for Line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_proxy

Description Enable automatic packet-capture for No proxy error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_req_fail

Description Enable automatic packet-capture for Parse request failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_request_line_fail

Description Enable automatic packet-capture for Parse request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_resonse_line_fail

Description Enable automatic packet-capture for Parse response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read_request_line_fail

Description Enable automatic packet-capture for Read request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv_server_unknow_reply_code

Description Enable automatic packet-capture for Recv server unknown-code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove_resonse_line_fail

Description Enable automatic packet-capture for Del response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send_client_service_not_ready

Description Enable automatic packet-capture for Sent client serv-not-rdy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_STARTTLS_fail

Description Enable automatic packet-capture for Server side STARTTLS fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_select_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

too_many_headers

Description Enable automatic packet-capture for Too many headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate attributes

compress_ctx_alloc_fail

Description Enable automatic packet-capture for Compression context allocation fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ctx_alloc_fail

Description Enable automatic packet-capture for Context alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_cb_no_tuple

Description Enable automatic packet-capture for Data callback no tuple

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_no_stream

Description Enable automatic packet-capture for Data no stream found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_no_stream_goaway_close

Description Enable automatic packet-capture for Data no stream and no goaway and close session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_no_stream_no_goaway

Description Enable automatic packet-capture for Data no stream and no goaway

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decompress_fail

Description Enable automatic packet-capture for Decompress fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

est_cb_no_tuple

Description Enable automatic packet-capture for Est callback no tuple

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header_compress_fail

Description Enable automatic packet-capture for Header compress fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_conn_alloc_fail

Description Enable automatic packet-capture for HTTP connection allocation fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http_err_stream_closed

Description Enable automatic packet-capture for HTTP error stream already closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_frame_size

Description Enable automatic packet-capture for Invalid frame size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_version

Description Enable automatic packet-capture for Invalid version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request_header_alloc_fail

Description Enable automatic packet-capture for Request/Header allocation fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session_err

Description Enable automatic packet-capture for Session err

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stream_alloc_fail

Description Enable automatic packet-capture for Stream alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stream_err

Description Enable automatic packet-capture for Stream err

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stream_not_found

Description Enable automatic packet-capture for STREAM not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_err

Description Enable automatic packet-capture for TCP sock error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Default: 0

crl_uri_https

Description Enable automatic packet-capture for CRL URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_not_found

Description Enable automatic packet-capture for CRL URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_unsupported

Description Enable automatic packet-capture for CRL URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_cache_miss

Description Enable automatic packet-capture for OCSP cache miss

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_cache_status_revoked

Description Enable automatic packet-capture for OCSP cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_revoked

Description Enable automatic packet-capture for Certificate chain status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_unknown

Description Enable automatic packet-capture for Certificate chain status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_connection_error

Description Enable automatic packet-capture for OCSP connection error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_other_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_no_nonce

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_nonce_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_revoked

Description Enable automatic packet-capture for OCSP response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_unknown

Description Enable automatic packet-capture for OCSP response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_https

Description Enable automatic packet-capture for Log OCSP URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_not_found

Description Enable automatic packet-capture for OCSP URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_unsupported

Description Enable automatic packet-capture for OCSP URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

crl_cache_status_revoked

Description Enable automatic packet-capture for CRL cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_connection_error

Description Enable automatic packet-capture for CRL connection errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_other_error

Description Enable automatic packet-capture for CRL other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_response_status_revoked

Description Enable automatic packet-capture for CRL response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_response_status_unknown

Description Enable automatic packet-capture for CRL response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_https

Description Enable automatic packet-capture for CRL URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_not_found

Description Enable automatic packet-capture for CRL URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_unsupported

Description Enable automatic packet-capture for CRL URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

ocsp_cache_miss

Description Enable automatic packet-capture for OCSP cache miss

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_cache_status_revoked

Description Enable automatic packet-capture for OCSP cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_revoked

Description Enable automatic packet-capture for Certificate chain status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_unknown

Description Enable automatic packet-capture for Certificate chain status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_connection_error

Description Enable automatic packet-capture for OCSP connection error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_other_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_no_nonce

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_nonce_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_revoked

Description Enable automatic packet-capture for OCSP response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_unknown

Description Enable automatic packet-capture for OCSP response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_https

Description Enable automatic packet-capture for Log OCSP URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_not_found

Description Enable automatic packet-capture for OCSP URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_unsupported

Description Enable automatic packet-capture for OCSP URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Default: 0

bad-digest-length

Description Enable automatic packet-capture for bad digest length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dsa-signature

Description Enable automatic packet-capture for bad dsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecc-cert

Description Enable automatic packet-capture for bad ecc cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecdsa-sig

Description Enable automatic packet-capture for bad ecdsa sig

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecpoint

Description Enable automatic packet-capture for bad ecpoint

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-handshake-length

Description Enable automatic packet-capture for bad handshake length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-hello-request

Description Enable automatic packet-capture for bad hello request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-length

Description Enable automatic packet-capture for bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-mac-decode

Description Enable automatic packet-capture for bad mac decode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-message-type

Description Enable automatic packet-capture for bad message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-packet-length

Description Enable automatic packet-capture for bad packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-protocol-version-counter

Description Enable automatic packet-capture for bad protocol version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-response-argument

Description Enable automatic packet-capture for bad response argument

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-decrypt

Description Enable automatic packet-capture for bad rsa decrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-e-length

Description Enable automatic packet-capture for bad rsa e length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-encrypt

Description Enable automatic packet-capture for bad rsa encrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-modulus-length

Description Enable automatic packet-capture for bad rsa modulus length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-signature

Description Enable automatic packet-capture for bad rsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-signature

Description Enable automatic packet-capture for bad signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-filetype

Description Enable automatic packet-capture for bad ssl filetype

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-session-id-length

Description Enable automatic packet-capture for bad ssl session id length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-state

Description Enable automatic packet-capture for bad state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-write-retry

Description Enable automatic packet-capture for bad write retry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bio-not-set

Description Enable automatic packet-capture for bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

block-cipher-pad-is-wrong

Description Enable automatic packet-capture for block cipher pad is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bn-lib

Description Enable automatic packet-capture for bn lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-length-mismatch

Description Enable automatic packet-capture for ca dn length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-too-long

Description Enable automatic packet-capture for ca dn too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ccs-received-early

Description Enable automatic packet-capture for ccs received early

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cert-length-mismatch

Description Enable automatic packet-capture for cert length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

certificate-verify-failed

Description Enable automatic packet-capture for certificate verify failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-is-different

Description Enable automatic packet-capture for challenge is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-code-wrong-length

Description Enable automatic packet-capture for cipher code wrong length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-or-hash-unavailable

Description Enable automatic packet-capture for cipher or hash unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-table-src-error

Description Enable automatic packet-capture for cipher table src error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clienthello-tlsext

Description Enable automatic packet-capture for clienthello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compressed-length-too-long

Description Enable automatic packet-capture for compressed length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-failure

Description Enable automatic packet-capture for compression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-library-error

Description Enable automatic packet-capture for compression library error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-id-is-different

Description Enable automatic packet-capture for connection id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-type-not-set

Description Enable automatic packet-capture for connection type not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-mismatch

Description Enable automatic packet-capture for cookie mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-between-ccs-and-finished

Description Enable automatic packet-capture for data between ccs and finished

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-length-too-long

Description Enable automatic packet-capture for data length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed

Description Enable automatic packet-capture for decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed-or-bad-record-mac

Description Enable automatic packet-capture for decryption failed or bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dh-public-value-length-is-wrong

Description Enable automatic packet-capture for dh public value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

digest-check-failed

Description Enable automatic packet-capture for digest check failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encrypted-length-too-long

Description Enable automatic packet-capture for encrypted length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-generating-tmp-rsa-key

Description Enable automatic packet-capture for error generating tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-in-received-cipher-list

Description Enable automatic packet-capture for error in received cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

excessive-message-size

Description Enable automatic packet-capture for excessive message size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extra-data-in-message

Description Enable automatic packet-capture for extra data in message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

got-a-fin-before-a-ccs

Description Enable automatic packet-capture for got a fin before a ccs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-request

Description Enable automatic packet-capture for http request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

https-proxy-request

Description Enable automatic packet-capture for https proxy request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

illegal-padding

Description Enable automatic packet-capture for illegal padding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inappropriate-fallback

Description Enable automatic packet-capture for inappropriate fallback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-challenge-length

Description Enable automatic packet-capture for invalid challenge length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-command

Description Enable automatic packet-capture for invalid command

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-purpose

Description Enable automatic packet-capture for invalid purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-status-response

Description Enable automatic packet-capture for invalid status response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-trust

Description Enable automatic packet-capture for invalid trust

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-arg-too-long

Description Enable automatic packet-capture for key arg too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5

Description Enable automatic packet-capture for krb5

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-cc-principal

Description Enable automatic packet-capture for krb5 client cc principal

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-get-cred

Description Enable automatic packet-capture for krb5 client get cred

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-init

Description Enable automatic packet-capture for krb5 client init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-mk-req

Description Enable automatic packet-capture for krb5 client mk_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-bad-ticket

Description Enable automatic packet-capture for krb5 server bad ticket

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-init

Description Enable automatic packet-capture for krb5 server init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-rd-req

Description Enable automatic packet-capture for krb5 server rd_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-expired

Description Enable automatic packet-capture for krb5 server tkt expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-not-yet-valid

Description Enable automatic packet-capture for krb5 server tkt not yet valid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-skew

Description Enable automatic packet-capture for krb5 server tkt skew

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-mismatch

Description Enable automatic packet-capture for length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-too-short

Description Enable automatic packet-capture for length too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-bug

Description Enable automatic packet-capture for library bug

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-has-no-ciphers

Description Enable automatic packet-capture for library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mast-key-too-long

Description Enable automatic packet-capture for mast key too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-too-long

Description Enable automatic packet-capture for message too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-dsa-cert

Description Enable automatic packet-capture for missing dh dsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-key

Description Enable automatic packet-capture for missing dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-rsa-cert

Description Enable automatic packet-capture for missing dh rsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dsa-signing-cert

Description Enable automatic packet-capture for missing dsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-dh-key

Description Enable automatic packet-capture for missing export tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-rsa-key

Description Enable automatic packet-capture for missing export tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-certificate

Description Enable automatic packet-capture for missing rsa certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-encrypting-cert

Description Enable automatic packet-capture for missing rsa encrypting cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-signing-cert

Description Enable automatic packet-capture for missing rsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-dh-key

Description Enable automatic packet-capture for missing tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-key

Description Enable automatic packet-capture for missing tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-pkey

Description Enable automatic packet-capture for missing tmp rsa pkey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-verify-message

Description Enable automatic packet-capture for missing verify message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-sgc-restarts

Description Enable automatic packet-capture for multiple sgc restarts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-assigned

Description Enable automatic packet-capture for no certificate assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-returned

Description Enable automatic packet-capture for no certificate returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-set

Description Enable automatic packet-capture for no certificate set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-specified

Description Enable automatic packet-capture for no certificate specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificates-returned

Description Enable automatic packet-capture for no certificates returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-list

Description Enable automatic packet-capture for no cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-match

Description Enable automatic packet-capture for no cipher match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-available

Description Enable automatic packet-capture for no ciphers available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-passed

Description Enable automatic packet-capture for no ciphers passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-specified

Description Enable automatic packet-capture for no ciphers specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-client-cert-received

Description Enable automatic packet-capture for no client cert received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-compression-specified

Description Enable automatic packet-capture for no compression specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-method-specified

Description Enable automatic packet-capture for no method specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-private-key-assigned

Description Enable automatic packet-capture for no private key assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-privatekey

Description Enable automatic packet-capture for no privatekey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-protocols-available

Description Enable automatic packet-capture for no protocols available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-publickey

Description Enable automatic packet-capture for no publickey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-required-digest

Description Enable automatic packet-capture for no required digest

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-shared-cipher

Description Enable automatic packet-capture for no shared cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-verify-callback

Description Enable automatic packet-capture for no verify callback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-sslv2-initial-packet

Description Enable automatic packet-capture for non sslv2 initial packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-ctx

Description Enable automatic packet-capture for null ssl ctx

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-method-passed

Description Enable automatic packet-capture for null ssl method passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

old-session-cipher-not-returned

Description Enable automatic packet-capture for old session cipher not returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet-length-too-long

Description Enable automatic packet-capture for packet length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse-tlsext

Description Enable automatic packet-capture for parse tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

path-too-long

Description Enable automatic packet-capture for path too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-did-not-return-a-certificate

Description Enable automatic packet-capture for peer did not return a certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error

Description Enable automatic packet-capture for peer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-certificate

Description Enable automatic packet-capture for peer error certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-certificate

Description Enable automatic packet-capture for peer error no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-cipher

Description Enable automatic packet-capture for peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-unsupported-certificate-type

Description Enable automatic packet-capture for peer error unsupported certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pre-mac-length-too-long

Description Enable automatic packet-capture for pre mac length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

problems-mapping-cipher-functions

Description Enable automatic packet-capture for problems mapping cipher functions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol-is-shutdown

Description Enable automatic packet-capture for protocol is shutdown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-encrypt-error

Description Enable automatic packet-capture for public key encrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-is-not-rsa

Description Enable automatic packet-capture for public key is not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-not-rsa

Description Enable automatic packet-capture for public key not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-bio-not-set

Description Enable automatic packet-capture for read bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-wrong-packet-type

Description Enable automatic packet-capture for read wrong packet type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-length-mismatch

Description Enable automatic packet-capture for record length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-large

Description Enable automatic packet-capture for record too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-small

Description Enable automatic packet-capture for record too small

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

required-cipher-missing

Description Enable automatic packet-capture for required cipher missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-length-not-zero

Description Enable automatic packet-capture for reuse cert length not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-type-not-zero

Description Enable automatic packet-capture for reuse cert type not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cipher-list-not-zero

Description Enable automatic packet-capture for reuse cipher list not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scsv-received-when-renegotiating

Description Enable automatic packet-capture for scsv received when renegotiating

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

serverhello-tlsext

Description Enable automatic packet-capture for serverhello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-id-context-uninitialized

Description Enable automatic packet-capture for session id context uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

short-read

Description Enable automatic packet-capture for short read

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

signature-for-non-signing-certificate

Description Enable automatic packet-capture for signature for non signing certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-ctx-has-no-default-ssl-version

Description Enable automatic packet-capture for ssl ctx has no default ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-handshake-failure

Description Enable automatic packet-capture for ssl handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-library-has-no-ciphers

Description Enable automatic packet-capture for ssl library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-callback-failed

Description Enable automatic packet-capture for ssl session id callback failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-conflict

Description Enable automatic packet-capture for ssl session id conflict

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-context-too-long

Description Enable automatic packet-capture for ssl session id context too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-has-bad-length

Description Enable automatic packet-capture for ssl session id has bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-is-different

Description Enable automatic packet-capture for ssl session id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl2-connection-id-too-long

Description Enable automatic packet-capture for ssl2 connection id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl23-doing-session-id-reuse

Description Enable automatic packet-capture for ssl23 doing session id reuse

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername

Description Enable automatic packet-capture for ssl3 ext invalid servername

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername-type

Description Enable automatic packet-capture for ssl3 ext invalid servername type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-long

Description Enable automatic packet-capture for ssl3 session id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-short

Description Enable automatic packet-capture for ssl3 session id too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-certificate

Description Enable automatic packet-capture for sslv3 alert bad certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-record-mac

Description Enable automatic packet-capture for sslv3 alert bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-expired

Description Enable automatic packet-capture for sslv3 alert certificate expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-revoked

Description Enable automatic packet-capture for sslv3 alert certificate revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-unknown

Description Enable automatic packet-capture for sslv3 alert certificate unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-decompression-failure

Description Enable automatic packet-capture for sslv3 alert decompression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-handshake-failure

Description Enable automatic packet-capture for sslv3 alert handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-illegal-parameter

Description Enable automatic packet-capture for sslv3 alert illegal parameter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-no-certificate

Description Enable automatic packet-capture for sslv3 alert no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-cert

Description Enable automatic packet-capture for sslv3 alert peer error cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cert

Description Enable automatic packet-capture for sslv3 alert peer error no cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cipher

Description Enable automatic packet-capture for sslv3 alert peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-unsupp-cert-type

Description Enable automatic packet-capture for sslv3 alert peer error unsupp cert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unexpected-msg

Description Enable automatic packet-capture for sslv3 alert unexpected msg

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unknown-remote-err-type

Description Enable automatic packet-capture for sslv3 alert unknown remote err type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unspported-cert

Description Enable automatic packet-capture for sslv3 alert unspported cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-client-cert-req-with-anon-cipher

Description Enable automatic packet-capture for tls client cert req with anon cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-invalid-ecpointformat-list

Description Enable automatic packet-capture for tls invalid ecpointformat list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-peer-did-not-respond-with-cert-list

Description Enable automatic packet-capture for tls peer did not respond with cert list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-rsa-encrypted-value-length-is-wrong

Description Enable automatic packet-capture for tls rsa encrypted value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-access-denied

Description Enable automatic packet-capture for tlsv1 alert access denied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decode-error

Description Enable automatic packet-capture for tlsv1 alert decode error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decrypt-error

Description Enable automatic packet-capture for tlsv1 alert decrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decryption-failed

Description Enable automatic packet-capture for tlsv1 alert decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-export-restriction

Description Enable automatic packet-capture for tlsv1 alert export restriction

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-insufficient-security

Description Enable automatic packet-capture for tlsv1 alert insufficient security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-internal-error

Description Enable automatic packet-capture for tlsv1 alert internal error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-no-renegotiation

Description Enable automatic packet-capture for tlsv1 alert no renegotiation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-protocol-version

Description Enable automatic packet-capture for tlsv1 alert protocol version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-record-overflow

Description Enable automatic packet-capture for tlsv1 alert record overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-unknown-ca

Description Enable automatic packet-capture for tlsv1 alert unknown ca

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-user-cancelled

Description Enable automatic packet-capture for tlsv1 alert user cancelled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tried-to-use-unsupported-cipher

Description Enable automatic packet-capture for tried to use unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-decode-dh-certs

Description Enable automatic packet-capture for unable to decode dh certs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-extract-public-key

Description Enable automatic packet-capture for unable to extract public key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-dh-parameters

Description Enable automatic packet-capture for unable to find dh parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-public-key-parameters

Description Enable automatic packet-capture for unable to find public key parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-ssl-method

Description Enable automatic packet-capture for unable to find ssl method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl2-md5-routines

Description Enable automatic packet-capture for unable to load ssl2 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-md5-routines

Description Enable automatic packet-capture for unable to load ssl3 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-sha1-routines

Description Enable automatic packet-capture for unable to load ssl3 sha1 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-message

Description Enable automatic packet-capture for unexpected message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-record

Description Enable automatic packet-capture for unexpected record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uninitialized

Description Enable automatic packet-capture for uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-alert-type

Description Enable automatic packet-capture for unknown alert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-certificate-type

Description Enable automatic packet-capture for unknown certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-returned

Description Enable automatic packet-capture for unknown cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-type

Description Enable automatic packet-capture for unknown cipher type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-key-exchange-type

Description Enable automatic packet-capture for unknown key exchange type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-pkey-type

Description Enable automatic packet-capture for unknown pkey type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-protocol

Description Enable automatic packet-capture for unknown protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-remote-error-type

Description Enable automatic packet-capture for unknown remote error type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-ssl-version

Description Enable automatic packet-capture for unknown ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-state

Description Enable automatic packet-capture for unknown state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-cipher

Description Enable automatic packet-capture for unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-compression-algorithm

Description Enable automatic packet-capture for unsupported compression algorithm

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-digest-type

Description Enable automatic packet-capture for unsupported digest type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-elliptic-curve

Description Enable automatic packet-capture for unsupported elliptic curve

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-option

Description Enable automatic packet-capture for unsupported option

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-protocol

Description Enable automatic packet-capture for unsupported protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-ssl-version

Description Enable automatic packet-capture for unsupported ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-status-type

Description Enable automatic packet-capture for unsupported status type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

write-bio-not-set

Description Enable automatic packet-capture for write bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-cipher-returned

Description Enable automatic packet-capture for wrong cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-counter-of-key-bits

Description Enable automatic packet-capture for wrong counter of key bits

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-message-type

Description Enable automatic packet-capture for wrong message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-length

Description Enable automatic packet-capture for wrong signature length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-size

Description Enable automatic packet-capture for wrong signature size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-ssl-version

Description Enable automatic packet-capture for wrong ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-version-counter

Description Enable automatic packet-capture for wrong version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-lib

Description Enable automatic packet-capture for x509 lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-verification-setup-problems

Description Enable automatic packet-capture for x509 verification setup problems

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-rate

Specification	Value
Type	*object*

app-data-in-handshake

Description Enable automatic packet-capture for app data in handshake

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

attempt-to-reuse-sess-in-diff-context

Description Enable automatic packet-capture for attempt to reuse sess in diff context

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-alert-record

Description Enable automatic packet-capture for bad alert record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-authentication-type

Description Enable automatic packet-capture for bad authentication type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-change-cipher-spec

Description Enable automatic packet-capture for bad change cipher spec

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-checksum

Description Enable automatic packet-capture for bad checksum

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-data-returned-by-callback

Description Enable automatic packet-capture for bad data returned by callback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-decompression

Description Enable automatic packet-capture for bad decompression

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-g-length

Description Enable automatic packet-capture for bad dh g length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-p-length

Description Enable automatic packet-capture for bad dh p length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-pub-key-length

Description Enable automatic packet-capture for bad dh pub key length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-digest-length

Description Enable automatic packet-capture for bad digest length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dsa-signature

Description Enable automatic packet-capture for bad dsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecc-cert

Description Enable automatic packet-capture for bad ecc cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecdsa-sig

Description Enable automatic packet-capture for bad ecdsa sig

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecpoint

Description Enable automatic packet-capture for bad ecpoint

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-handshake-length

Description Enable automatic packet-capture for bad handshake length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-hello-request

Description Enable automatic packet-capture for bad hello request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-length

Description Enable automatic packet-capture for bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-mac-decode

Description Enable automatic packet-capture for bad mac decode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-message-type

Description Enable automatic packet-capture for bad message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-packet-length

Description Enable automatic packet-capture for bad packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-protocol-version-counter

Description Enable automatic packet-capture for bad protocol version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-response-argument

Description Enable automatic packet-capture for bad response argument

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-decrypt

Description Enable automatic packet-capture for bad rsa decrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-e-length

Description Enable automatic packet-capture for bad rsa e length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-encrypt

Description Enable automatic packet-capture for bad rsa encrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-modulus-length

Description Enable automatic packet-capture for bad rsa modulus length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-signature

Description Enable automatic packet-capture for bad rsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-signature

Description Enable automatic packet-capture for bad signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-filetype

Description Enable automatic packet-capture for bad ssl filetype

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-session-id-length

Description Enable automatic packet-capture for bad ssl session id length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-state

Description Enable automatic packet-capture for bad state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-write-retry

Description Enable automatic packet-capture for bad write retry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bio-not-set

Description Enable automatic packet-capture for bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

block-cipher-pad-is-wrong

Description Enable automatic packet-capture for block cipher pad is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bn-lib

Description Enable automatic packet-capture for bn lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-length-mismatch

Description Enable automatic packet-capture for ca dn length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-too-long

Description Enable automatic packet-capture for ca dn too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ccs-received-early

Description Enable automatic packet-capture for ccs received early

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cert-length-mismatch

Description Enable automatic packet-capture for cert length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

certificate-verify-failed

Description Enable automatic packet-capture for certificate verify failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-is-different

Description Enable automatic packet-capture for challenge is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-code-wrong-length

Description Enable automatic packet-capture for cipher code wrong length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-or-hash-unavailable

Description Enable automatic packet-capture for cipher or hash unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-table-src-error

Description Enable automatic packet-capture for cipher table src error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clienthello-tlsext

Description Enable automatic packet-capture for clienthello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compressed-length-too-long

Description Enable automatic packet-capture for compressed length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-failure

Description Enable automatic packet-capture for compression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-library-error

Description Enable automatic packet-capture for compression library error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-id-is-different

Description Enable automatic packet-capture for connection id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-type-not-set

Description Enable automatic packet-capture for connection type not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-mismatch

Description Enable automatic packet-capture for cookie mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-between-ccs-and-finished

Description Enable automatic packet-capture for data between ccs and finished

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-length-too-long

Description Enable automatic packet-capture for data length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed

Description Enable automatic packet-capture for decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed-or-bad-record-mac

Description Enable automatic packet-capture for decryption failed or bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dh-public-value-length-is-wrong

Description Enable automatic packet-capture for dh public value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

digest-check-failed

Description Enable automatic packet-capture for digest check failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

encrypted-length-too-long

Description Enable automatic packet-capture for encrypted length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-generating-tmp-rsa-key

Description Enable automatic packet-capture for error generating tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-in-received-cipher-list

Description Enable automatic packet-capture for error in received cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

excessive-message-size

Description Enable automatic packet-capture for excessive message size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extra-data-in-message

Description Enable automatic packet-capture for extra data in message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

got-a-fin-before-a-ccs

Description Enable automatic packet-capture for got a fin before a ccs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-request

Description Enable automatic packet-capture for http request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

https-proxy-request

Description Enable automatic packet-capture for https proxy request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

illegal-padding

Description Enable automatic packet-capture for illegal padding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inappropriate-fallback

Description Enable automatic packet-capture for inappropriate fallback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-challenge-length

Description Enable automatic packet-capture for invalid challenge length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-command

Description Enable automatic packet-capture for invalid command

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-purpose

Description Enable automatic packet-capture for invalid purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-status-response

Description Enable automatic packet-capture for invalid status response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-trust

Description Enable automatic packet-capture for invalid trust

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-arg-too-long

Description Enable automatic packet-capture for key arg too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5

Description Enable automatic packet-capture for krb5

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-cc-principal

Description Enable automatic packet-capture for krb5 client cc principal

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-get-cred

Description Enable automatic packet-capture for krb5 client get cred

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-init

Description Enable automatic packet-capture for krb5 client init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-mk-req

Description Enable automatic packet-capture for krb5 client mk_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-bad-ticket

Description Enable automatic packet-capture for krb5 server bad ticket

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-init

Description Enable automatic packet-capture for krb5 server init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-rd-req

Description Enable automatic packet-capture for krb5 server rd_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-expired

Description Enable automatic packet-capture for krb5 server tkt expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-not-yet-valid

Description Enable automatic packet-capture for krb5 server tkt not yet valid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-skew

Description Enable automatic packet-capture for krb5 server tkt skew

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-mismatch

Description Enable automatic packet-capture for length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-too-short

Description Enable automatic packet-capture for length too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-bug

Description Enable automatic packet-capture for library bug

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-has-no-ciphers

Description Enable automatic packet-capture for library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mast-key-too-long

Description Enable automatic packet-capture for mast key too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-too-long

Description Enable automatic packet-capture for message too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-dsa-cert

Description Enable automatic packet-capture for missing dh dsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-key

Description Enable automatic packet-capture for missing dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-rsa-cert

Description Enable automatic packet-capture for missing dh rsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dsa-signing-cert

Description Enable automatic packet-capture for missing dsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-dh-key

Description Enable automatic packet-capture for missing export tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-rsa-key

Description Enable automatic packet-capture for missing export tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-certificate

Description Enable automatic packet-capture for missing rsa certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-encrypting-cert

Description Enable automatic packet-capture for missing rsa encrypting cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-signing-cert

Description Enable automatic packet-capture for missing rsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-dh-key

Description Enable automatic packet-capture for missing tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-key

Description Enable automatic packet-capture for missing tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-pkey

Description Enable automatic packet-capture for missing tmp rsa pkey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-verify-message

Description Enable automatic packet-capture for missing verify message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-sgc-restarts

Description Enable automatic packet-capture for multiple sgc restarts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-assigned

Description Enable automatic packet-capture for no certificate assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-returned

Description Enable automatic packet-capture for no certificate returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-set

Description Enable automatic packet-capture for no certificate set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-specified

Description Enable automatic packet-capture for no certificate specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificates-returned

Description Enable automatic packet-capture for no certificates returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-list

Description Enable automatic packet-capture for no cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-match

Description Enable automatic packet-capture for no cipher match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-available

Description Enable automatic packet-capture for no ciphers available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-passed

Description Enable automatic packet-capture for no ciphers passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-specified

Description Enable automatic packet-capture for no ciphers specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-client-cert-received

Description Enable automatic packet-capture for no client cert received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-compression-specified

Description Enable automatic packet-capture for no compression specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-method-specified

Description Enable automatic packet-capture for no method specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-private-key-assigned

Description Enable automatic packet-capture for no private key assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-privatekey

Description Enable automatic packet-capture for no privatekey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-protocols-available

Description Enable automatic packet-capture for no protocols available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-publickey

Description Enable automatic packet-capture for no publickey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-required-digest

Description Enable automatic packet-capture for no required digest

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-shared-cipher

Description Enable automatic packet-capture for no shared cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-verify-callback

Description Enable automatic packet-capture for no verify callback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-sslv2-initial-packet

Description Enable automatic packet-capture for non sslv2 initial packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-ctx

Description Enable automatic packet-capture for null ssl ctx

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-method-passed

Description Enable automatic packet-capture for null ssl method passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

old-session-cipher-not-returned

Description Enable automatic packet-capture for old session cipher not returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet-length-too-long

Description Enable automatic packet-capture for packet length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse-tlsext

Description Enable automatic packet-capture for parse tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

path-too-long

Description Enable automatic packet-capture for path too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-did-not-return-a-certificate

Description Enable automatic packet-capture for peer did not return a certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error

Description Enable automatic packet-capture for peer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-certificate

Description Enable automatic packet-capture for peer error certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-certificate

Description Enable automatic packet-capture for peer error no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-cipher

Description Enable automatic packet-capture for peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-unsupported-certificate-type

Description Enable automatic packet-capture for peer error unsupported certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pre-mac-length-too-long

Description Enable automatic packet-capture for pre mac length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

problems-mapping-cipher-functions

Description Enable automatic packet-capture for problems mapping cipher functions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol-is-shutdown

Description Enable automatic packet-capture for protocol is shutdown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-encrypt-error

Description Enable automatic packet-capture for public key encrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-is-not-rsa

Description Enable automatic packet-capture for public key is not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-not-rsa

Description Enable automatic packet-capture for public key not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-bio-not-set

Description Enable automatic packet-capture for read bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-wrong-packet-type

Description Enable automatic packet-capture for read wrong packet type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-length-mismatch

Description Enable automatic packet-capture for record length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-large

Description Enable automatic packet-capture for record too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-small

Description Enable automatic packet-capture for record too small

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

required-cipher-missing

Description Enable automatic packet-capture for required cipher missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-length-not-zero

Description Enable automatic packet-capture for reuse cert length not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-type-not-zero

Description Enable automatic packet-capture for reuse cert type not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cipher-list-not-zero

Description Enable automatic packet-capture for reuse cipher list not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scsv-received-when-renegotiating

Description Enable automatic packet-capture for scsv received when renegotiating

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

serverhello-tlsext

Description Enable automatic packet-capture for serverhello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-id-context-uninitialized

Description Enable automatic packet-capture for session id context uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

short-read

Description Enable automatic packet-capture for short read

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

signature-for-non-signing-certificate

Description Enable automatic packet-capture for signature for non signing certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-ctx-has-no-default-ssl-version

Description Enable automatic packet-capture for ssl ctx has no default ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-handshake-failure

Description Enable automatic packet-capture for ssl handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-library-has-no-ciphers

Description Enable automatic packet-capture for ssl library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-callback-failed

Description Enable automatic packet-capture for ssl session id callback failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-conflict

Description Enable automatic packet-capture for ssl session id conflict

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-context-too-long

Description Enable automatic packet-capture for ssl session id context too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-has-bad-length

Description Enable automatic packet-capture for ssl session id has bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-is-different

Description Enable automatic packet-capture for ssl session id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl2-connection-id-too-long

Description Enable automatic packet-capture for ssl2 connection id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl23-doing-session-id-reuse

Description Enable automatic packet-capture for ssl23 doing session id reuse

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername

Description Enable automatic packet-capture for ssl3 ext invalid servername

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername-type

Description Enable automatic packet-capture for ssl3 ext invalid servername type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-long

Description Enable automatic packet-capture for ssl3 session id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-short

Description Enable automatic packet-capture for ssl3 session id too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-certificate

Description Enable automatic packet-capture for sslv3 alert bad certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-record-mac

Description Enable automatic packet-capture for sslv3 alert bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-expired

Description Enable automatic packet-capture for sslv3 alert certificate expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-revoked

Description Enable automatic packet-capture for sslv3 alert certificate revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-unknown

Description Enable automatic packet-capture for sslv3 alert certificate unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-decompression-failure

Description Enable automatic packet-capture for sslv3 alert decompression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-handshake-failure

Description Enable automatic packet-capture for sslv3 alert handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-illegal-parameter

Description Enable automatic packet-capture for sslv3 alert illegal parameter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-no-certificate

Description Enable automatic packet-capture for sslv3 alert no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-cert

Description Enable automatic packet-capture for sslv3 alert peer error cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cert

Description Enable automatic packet-capture for sslv3 alert peer error no cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cipher

Description Enable automatic packet-capture for sslv3 alert peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-unsupp-cert-type

Description Enable automatic packet-capture for sslv3 alert peer error unsupp cert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unexpected-msg

Description Enable automatic packet-capture for sslv3 alert unexpected msg

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unknown-remote-err-type

Description Enable automatic packet-capture for sslv3 alert unknown remote err type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unspported-cert

Description Enable automatic packet-capture for sslv3 alert unspported cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

tls-client-cert-req-with-anon-cipher

Description Enable automatic packet-capture for tls client cert req with anon cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-invalid-ecpointformat-list

Description Enable automatic packet-capture for tls invalid ecpointformat list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-peer-did-not-respond-with-cert-list

Description Enable automatic packet-capture for tls peer did not respond with cert list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-rsa-encrypted-value-length-is-wrong

Description Enable automatic packet-capture for tls rsa encrypted value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-access-denied

Description Enable automatic packet-capture for tlsv1 alert access denied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decode-error

Description Enable automatic packet-capture for tlsv1 alert decode error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decrypt-error

Description Enable automatic packet-capture for tlsv1 alert decrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decryption-failed

Description Enable automatic packet-capture for tlsv1 alert decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-export-restriction

Description Enable automatic packet-capture for tlsv1 alert export restriction

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-insufficient-security

Description Enable automatic packet-capture for tlsv1 alert insufficient security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-internal-error

Description Enable automatic packet-capture for tlsv1 alert internal error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-no-renegotiation

Description Enable automatic packet-capture for tlsv1 alert no renegotiation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-protocol-version

Description Enable automatic packet-capture for tlsv1 alert protocol version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-record-overflow

Description Enable automatic packet-capture for tlsv1 alert record overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-unknown-ca

Description Enable automatic packet-capture for tlsv1 alert unknown ca

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-user-cancelled

Description Enable automatic packet-capture for tlsv1 alert user cancelled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tried-to-use-unsupported-cipher

Description Enable automatic packet-capture for tried to use unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-decode-dh-certs

Description Enable automatic packet-capture for unable to decode dh certs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-extract-public-key

Description Enable automatic packet-capture for unable to extract public key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-dh-parameters

Description Enable automatic packet-capture for unable to find dh parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-public-key-parameters

Description Enable automatic packet-capture for unable to find public key parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-ssl-method

Description Enable automatic packet-capture for unable to find ssl method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl2-md5-routines

Description Enable automatic packet-capture for unable to load ssl2 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-md5-routines

Description Enable automatic packet-capture for unable to load ssl3 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-sha1-routines

Description Enable automatic packet-capture for unable to load ssl3 sha1 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-message

Description Enable automatic packet-capture for unexpected message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-record

Description Enable automatic packet-capture for unexpected record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uninitialized

Description Enable automatic packet-capture for uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-alert-type

Description Enable automatic packet-capture for unknown alert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-certificate-type

Description Enable automatic packet-capture for unknown certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-returned

Description Enable automatic packet-capture for unknown cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-type

Description Enable automatic packet-capture for unknown cipher type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-key-exchange-type

Description Enable automatic packet-capture for unknown key exchange type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-pkey-type

Description Enable automatic packet-capture for unknown pkey type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-protocol

Description Enable automatic packet-capture for unknown protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-remote-error-type

Description Enable automatic packet-capture for unknown remote error type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-ssl-version

Description Enable automatic packet-capture for unknown ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-state

Description Enable automatic packet-capture for unknown state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-cipher

Description Enable automatic packet-capture for unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-compression-algorithm

Description Enable automatic packet-capture for unsupported compression algorithm

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-digest-type

Description Enable automatic packet-capture for unsupported digest type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-elliptic-curve

Description Enable automatic packet-capture for unsupported elliptic curve

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-option

Description Enable automatic packet-capture for unsupported option

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-protocol

Description Enable automatic packet-capture for unsupported protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-ssl-version

Description Enable automatic packet-capture for unsupported ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-status-type

Description Enable automatic packet-capture for unsupported status type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

write-bio-not-set

Description Enable automatic packet-capture for write bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-cipher-returned

Description Enable automatic packet-capture for wrong cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-counter-of-key-bits

Description Enable automatic packet-capture for wrong counter of key bits

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-message-type

Description Enable automatic packet-capture for wrong message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-length

Description Enable automatic packet-capture for wrong signature length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-size

Description Enable automatic packet-capture for wrong signature size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-ssl-version

Description Enable automatic packet-capture for wrong ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-version-counter

Description Enable automatic packet-capture for wrong version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-lib

Description Enable automatic packet-capture for x509 lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-verification-setup-problems

Description Enable automatic packet-capture for x509 verification setup problems

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.150.275 visibility packet-capture global-templates template trigger-sys-obj-stats-change slb-ssl-error trigger-stats-inc

Configure stats to trigger packet capture on increment

trigger-stats-inc Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	trigger-stats-inc
Element URI	/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-inc
Element Attributes	trigger-stats-inc_attributes
Partition Visibility	shared
Schema	`trigger-stats-inc schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-inc

trigger-stats-inc attributes

```
POST /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/slb-ssl-error/trigger-stats-inc
Payload:
{
    "trigger-stats-inc": {
        "app-data-in-handshake": 1
    }
}
```

app-data-in-handshake

Description Enable automatic packet-capture for app data in handshake

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

attempt-to-reuse-sess-in-diff-context

Description Enable automatic packet-capture for attempt to reuse sess in diff context

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-alert-record

Description Enable automatic packet-capture for bad alert record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-authentication-type

Description Enable automatic packet-capture for bad authentication type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-change-cipher-spec

Description Enable automatic packet-capture for bad change cipher spec

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-checksum

Description Enable automatic packet-capture for bad checksum

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-data-returned-by-callback

Description Enable automatic packet-capture for bad data returned by callback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-decompression

Description Enable automatic packet-capture for bad decompression

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-g-length

Description Enable automatic packet-capture for bad dh g length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-p-length

Description Enable automatic packet-capture for bad dh p length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-pub-key-length

Description Enable automatic packet-capture for bad dh pub key length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-digest-length

Description Enable automatic packet-capture for bad digest length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dsa-signature

Description Enable automatic packet-capture for bad dsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecc-cert

Description Enable automatic packet-capture for bad ecc cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecdsa-sig

Description Enable automatic packet-capture for bad ecdsa sig

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecpoint

Description Enable automatic packet-capture for bad ecpoint

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-handshake-length

Description Enable automatic packet-capture for bad handshake length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-hello-request

Description Enable automatic packet-capture for bad hello request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-length

Description Enable automatic packet-capture for bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-mac-decode

Description Enable automatic packet-capture for bad mac decode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-message-type

Description Enable automatic packet-capture for bad message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-packet-length

Description Enable automatic packet-capture for bad packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-protocol-version-counter

Description Enable automatic packet-capture for bad protocol version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-response-argument

Description Enable automatic packet-capture for bad response argument

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-decrypt

Description Enable automatic packet-capture for bad rsa decrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-e-length

Description Enable automatic packet-capture for bad rsa e length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-encrypt

Description Enable automatic packet-capture for bad rsa encrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-modulus-length

Description Enable automatic packet-capture for bad rsa modulus length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-signature

Description Enable automatic packet-capture for bad rsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-signature

Description Enable automatic packet-capture for bad signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-filetype

Description Enable automatic packet-capture for bad ssl filetype

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-session-id-length

Description Enable automatic packet-capture for bad ssl session id length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-state

Description Enable automatic packet-capture for bad state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-write-retry

Description Enable automatic packet-capture for bad write retry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bio-not-set

Description Enable automatic packet-capture for bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

block-cipher-pad-is-wrong

Description Enable automatic packet-capture for block cipher pad is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bn-lib

Description Enable automatic packet-capture for bn lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-length-mismatch

Description Enable automatic packet-capture for ca dn length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-too-long

Description Enable automatic packet-capture for ca dn too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ccs-received-early

Description Enable automatic packet-capture for ccs received early

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cert-length-mismatch

Description Enable automatic packet-capture for cert length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

certificate-verify-failed

Description Enable automatic packet-capture for certificate verify failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-is-different

Description Enable automatic packet-capture for challenge is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-code-wrong-length

Description Enable automatic packet-capture for cipher code wrong length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-or-hash-unavailable

Description Enable automatic packet-capture for cipher or hash unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-table-src-error

Description Enable automatic packet-capture for cipher table src error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clienthello-tlsext

Description Enable automatic packet-capture for clienthello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compressed-length-too-long

Description Enable automatic packet-capture for compressed length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-failure

Description Enable automatic packet-capture for compression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-library-error

Description Enable automatic packet-capture for compression library error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-id-is-different

Description Enable automatic packet-capture for connection id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-type-not-set

Description Enable automatic packet-capture for connection type not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-mismatch

Description Enable automatic packet-capture for cookie mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-between-ccs-and-finished

Description Enable automatic packet-capture for data between ccs and finished

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-length-too-long

Description Enable automatic packet-capture for data length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed

Description Enable automatic packet-capture for decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed-or-bad-record-mac

Description Enable automatic packet-capture for decryption failed or bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dh-public-value-length-is-wrong

Description Enable automatic packet-capture for dh public value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

digest-check-failed

Description Enable automatic packet-capture for digest check failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encrypted-length-too-long

Description Enable automatic packet-capture for encrypted length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-generating-tmp-rsa-key

Description Enable automatic packet-capture for error generating tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-in-received-cipher-list

Description Enable automatic packet-capture for error in received cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

excessive-message-size

Description Enable automatic packet-capture for excessive message size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extra-data-in-message

Description Enable automatic packet-capture for extra data in message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

got-a-fin-before-a-ccs

Description Enable automatic packet-capture for got a fin before a ccs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-request

Description Enable automatic packet-capture for http request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

https-proxy-request

Description Enable automatic packet-capture for https proxy request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

illegal-padding

Description Enable automatic packet-capture for illegal padding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inappropriate-fallback

Description Enable automatic packet-capture for inappropriate fallback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-challenge-length

Description Enable automatic packet-capture for invalid challenge length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-command

Description Enable automatic packet-capture for invalid command

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-purpose

Description Enable automatic packet-capture for invalid purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-status-response

Description Enable automatic packet-capture for invalid status response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-trust

Description Enable automatic packet-capture for invalid trust

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-arg-too-long

Description Enable automatic packet-capture for key arg too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5

Description Enable automatic packet-capture for krb5

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-cc-principal

Description Enable automatic packet-capture for krb5 client cc principal

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-get-cred

Description Enable automatic packet-capture for krb5 client get cred

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-init

Description Enable automatic packet-capture for krb5 client init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-mk-req

Description Enable automatic packet-capture for krb5 client mk_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-bad-ticket

Description Enable automatic packet-capture for krb5 server bad ticket

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-init

Description Enable automatic packet-capture for krb5 server init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-rd-req

Description Enable automatic packet-capture for krb5 server rd_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-expired

Description Enable automatic packet-capture for krb5 server tkt expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-not-yet-valid

Description Enable automatic packet-capture for krb5 server tkt not yet valid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-skew

Description Enable automatic packet-capture for krb5 server tkt skew

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-mismatch

Description Enable automatic packet-capture for length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-too-short

Description Enable automatic packet-capture for length too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-bug

Description Enable automatic packet-capture for library bug

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-has-no-ciphers

Description Enable automatic packet-capture for library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mast-key-too-long

Description Enable automatic packet-capture for mast key too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-too-long

Description Enable automatic packet-capture for message too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-dsa-cert

Description Enable automatic packet-capture for missing dh dsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-key

Description Enable automatic packet-capture for missing dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-rsa-cert

Description Enable automatic packet-capture for missing dh rsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dsa-signing-cert

Description Enable automatic packet-capture for missing dsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-dh-key

Description Enable automatic packet-capture for missing export tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-rsa-key

Description Enable automatic packet-capture for missing export tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-certificate

Description Enable automatic packet-capture for missing rsa certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-encrypting-cert

Description Enable automatic packet-capture for missing rsa encrypting cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-signing-cert

Description Enable automatic packet-capture for missing rsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-dh-key

Description Enable automatic packet-capture for missing tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-key

Description Enable automatic packet-capture for missing tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-pkey

Description Enable automatic packet-capture for missing tmp rsa pkey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-verify-message

Description Enable automatic packet-capture for missing verify message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-sgc-restarts

Description Enable automatic packet-capture for multiple sgc restarts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-assigned

Description Enable automatic packet-capture for no certificate assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-returned

Description Enable automatic packet-capture for no certificate returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-set

Description Enable automatic packet-capture for no certificate set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-specified

Description Enable automatic packet-capture for no certificate specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificates-returned

Description Enable automatic packet-capture for no certificates returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-list

Description Enable automatic packet-capture for no cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-match

Description Enable automatic packet-capture for no cipher match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-available

Description Enable automatic packet-capture for no ciphers available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-passed

Description Enable automatic packet-capture for no ciphers passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-specified

Description Enable automatic packet-capture for no ciphers specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-client-cert-received

Description Enable automatic packet-capture for no client cert received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-compression-specified

Description Enable automatic packet-capture for no compression specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-method-specified

Description Enable automatic packet-capture for no method specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-private-key-assigned

Description Enable automatic packet-capture for no private key assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-privatekey

Description Enable automatic packet-capture for no privatekey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-protocols-available

Description Enable automatic packet-capture for no protocols available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-publickey

Description Enable automatic packet-capture for no publickey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-required-digest

Description Enable automatic packet-capture for no required digest

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-shared-cipher

Description Enable automatic packet-capture for no shared cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-verify-callback

Description Enable automatic packet-capture for no verify callback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-sslv2-initial-packet

Description Enable automatic packet-capture for non sslv2 initial packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-ctx

Description Enable automatic packet-capture for null ssl ctx

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-method-passed

Description Enable automatic packet-capture for null ssl method passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

old-session-cipher-not-returned

Description Enable automatic packet-capture for old session cipher not returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet-length-too-long

Description Enable automatic packet-capture for packet length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse-tlsext

Description Enable automatic packet-capture for parse tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

path-too-long

Description Enable automatic packet-capture for path too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-did-not-return-a-certificate

Description Enable automatic packet-capture for peer did not return a certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error

Description Enable automatic packet-capture for peer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-certificate

Description Enable automatic packet-capture for peer error certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-certificate

Description Enable automatic packet-capture for peer error no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-cipher

Description Enable automatic packet-capture for peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-unsupported-certificate-type

Description Enable automatic packet-capture for peer error unsupported certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pre-mac-length-too-long

Description Enable automatic packet-capture for pre mac length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

problems-mapping-cipher-functions

Description Enable automatic packet-capture for problems mapping cipher functions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol-is-shutdown

Description Enable automatic packet-capture for protocol is shutdown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-encrypt-error

Description Enable automatic packet-capture for public key encrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-is-not-rsa

Description Enable automatic packet-capture for public key is not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-not-rsa

Description Enable automatic packet-capture for public key not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-bio-not-set

Description Enable automatic packet-capture for read bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-wrong-packet-type

Description Enable automatic packet-capture for read wrong packet type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-length-mismatch

Description Enable automatic packet-capture for record length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-large

Description Enable automatic packet-capture for record too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-small

Description Enable automatic packet-capture for record too small

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

required-cipher-missing

Description Enable automatic packet-capture for required cipher missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-length-not-zero

Description Enable automatic packet-capture for reuse cert length not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-type-not-zero

Description Enable automatic packet-capture for reuse cert type not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cipher-list-not-zero

Description Enable automatic packet-capture for reuse cipher list not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scsv-received-when-renegotiating

Description Enable automatic packet-capture for scsv received when renegotiating

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

serverhello-tlsext

Description Enable automatic packet-capture for serverhello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-id-context-uninitialized

Description Enable automatic packet-capture for session id context uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

short-read

Description Enable automatic packet-capture for short read

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

signature-for-non-signing-certificate

Description Enable automatic packet-capture for signature for non signing certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-ctx-has-no-default-ssl-version

Description Enable automatic packet-capture for ssl ctx has no default ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-handshake-failure

Description Enable automatic packet-capture for ssl handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-library-has-no-ciphers

Description Enable automatic packet-capture for ssl library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-callback-failed

Description Enable automatic packet-capture for ssl session id callback failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-conflict

Description Enable automatic packet-capture for ssl session id conflict

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-context-too-long

Description Enable automatic packet-capture for ssl session id context too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-has-bad-length

Description Enable automatic packet-capture for ssl session id has bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-is-different

Description Enable automatic packet-capture for ssl session id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl2-connection-id-too-long

Description Enable automatic packet-capture for ssl2 connection id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl23-doing-session-id-reuse

Description Enable automatic packet-capture for ssl23 doing session id reuse

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername

Description Enable automatic packet-capture for ssl3 ext invalid servername

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername-type

Description Enable automatic packet-capture for ssl3 ext invalid servername type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-long

Description Enable automatic packet-capture for ssl3 session id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-short

Description Enable automatic packet-capture for ssl3 session id too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-certificate

Description Enable automatic packet-capture for sslv3 alert bad certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-record-mac

Description Enable automatic packet-capture for sslv3 alert bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-expired

Description Enable automatic packet-capture for sslv3 alert certificate expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-revoked

Description Enable automatic packet-capture for sslv3 alert certificate revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-unknown

Description Enable automatic packet-capture for sslv3 alert certificate unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-decompression-failure

Description Enable automatic packet-capture for sslv3 alert decompression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-handshake-failure

Description Enable automatic packet-capture for sslv3 alert handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-illegal-parameter

Description Enable automatic packet-capture for sslv3 alert illegal parameter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-no-certificate

Description Enable automatic packet-capture for sslv3 alert no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-cert

Description Enable automatic packet-capture for sslv3 alert peer error cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cert

Description Enable automatic packet-capture for sslv3 alert peer error no cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cipher

Description Enable automatic packet-capture for sslv3 alert peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-unsupp-cert-type

Description Enable automatic packet-capture for sslv3 alert peer error unsupp cert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unexpected-msg

Description Enable automatic packet-capture for sslv3 alert unexpected msg

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unknown-remote-err-type

Description Enable automatic packet-capture for sslv3 alert unknown remote err type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unspported-cert

Description Enable automatic packet-capture for sslv3 alert unspported cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-client-cert-req-with-anon-cipher

Description Enable automatic packet-capture for tls client cert req with anon cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-invalid-ecpointformat-list

Description Enable automatic packet-capture for tls invalid ecpointformat list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-peer-did-not-respond-with-cert-list

Description Enable automatic packet-capture for tls peer did not respond with cert list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-rsa-encrypted-value-length-is-wrong

Description Enable automatic packet-capture for tls rsa encrypted value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-access-denied

Description Enable automatic packet-capture for tlsv1 alert access denied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decode-error

Description Enable automatic packet-capture for tlsv1 alert decode error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decrypt-error

Description Enable automatic packet-capture for tlsv1 alert decrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decryption-failed

Description Enable automatic packet-capture for tlsv1 alert decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-export-restriction

Description Enable automatic packet-capture for tlsv1 alert export restriction

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-insufficient-security

Description Enable automatic packet-capture for tlsv1 alert insufficient security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-internal-error

Description Enable automatic packet-capture for tlsv1 alert internal error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-no-renegotiation

Description Enable automatic packet-capture for tlsv1 alert no renegotiation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-protocol-version

Description Enable automatic packet-capture for tlsv1 alert protocol version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-record-overflow

Description Enable automatic packet-capture for tlsv1 alert record overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-unknown-ca

Description Enable automatic packet-capture for tlsv1 alert unknown ca

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-user-cancelled

Description Enable automatic packet-capture for tlsv1 alert user cancelled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tried-to-use-unsupported-cipher

Description Enable automatic packet-capture for tried to use unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-decode-dh-certs

Description Enable automatic packet-capture for unable to decode dh certs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-extract-public-key

Description Enable automatic packet-capture for unable to extract public key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-dh-parameters

Description Enable automatic packet-capture for unable to find dh parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-public-key-parameters

Description Enable automatic packet-capture for unable to find public key parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-ssl-method

Description Enable automatic packet-capture for unable to find ssl method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl2-md5-routines

Description Enable automatic packet-capture for unable to load ssl2 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-md5-routines

Description Enable automatic packet-capture for unable to load ssl3 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-sha1-routines

Description Enable automatic packet-capture for unable to load ssl3 sha1 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-message

Description Enable automatic packet-capture for unexpected message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-record

Description Enable automatic packet-capture for unexpected record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uninitialized

Description Enable automatic packet-capture for uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-alert-type

Description Enable automatic packet-capture for unknown alert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-certificate-type

Description Enable automatic packet-capture for unknown certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-returned

Description Enable automatic packet-capture for unknown cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-type

Description Enable automatic packet-capture for unknown cipher type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-key-exchange-type

Description Enable automatic packet-capture for unknown key exchange type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-pkey-type

Description Enable automatic packet-capture for unknown pkey type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-protocol

Description Enable automatic packet-capture for unknown protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-remote-error-type

Description Enable automatic packet-capture for unknown remote error type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-ssl-version

Description Enable automatic packet-capture for unknown ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-state

Description Enable automatic packet-capture for unknown state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-cipher

Description Enable automatic packet-capture for unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-compression-algorithm

Description Enable automatic packet-capture for unsupported compression algorithm

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-digest-type

Description Enable automatic packet-capture for unsupported digest type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-elliptic-curve

Description Enable automatic packet-capture for unsupported elliptic curve

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-option

Description Enable automatic packet-capture for unsupported option

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-protocol

Description Enable automatic packet-capture for unsupported protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-ssl-version

Description Enable automatic packet-capture for unsupported ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-status-type

Description Enable automatic packet-capture for unsupported status type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

write-bio-not-set

Description Enable automatic packet-capture for write bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-cipher-returned

Description Enable automatic packet-capture for wrong cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-counter-of-key-bits

Description Enable automatic packet-capture for wrong counter of key bits

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-message-type

Description Enable automatic packet-capture for wrong message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-length

Description Enable automatic packet-capture for wrong signature length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-size

Description Enable automatic packet-capture for wrong signature size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-ssl-version

Description Enable automatic packet-capture for wrong ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-version-counter

Description Enable automatic packet-capture for wrong version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-lib

Description Enable automatic packet-capture for x509 lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-verification-setup-problems

Description Enable automatic packet-capture for x509 verification setup problems

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.150.276 visibility packet-capture global-templates template trigger-sys-obj-stats-change slb-ssl-error trigger-stats-rate

Configure stats to trigger packet capture on increment rate

trigger-stats-rate Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	trigger-stats-rate
Element URI	/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-rate
Element Attributes	trigger-stats-rate_attributes
Partition Visibility	shared
Schema	`trigger-stats-rate schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-rate

trigger-stats-rate attributes

```
POST /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/slb-ssl-error/trigger-stats-rate
Payload:
{
    "trigger-stats-rate": {
        "threshold-exceeded-by": 0
    }
}
```

Get Object

GET

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-rate

trigger-stats-rate attributes

Modify Object

POST

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-rate

trigger-stats-rate attributes

Replace Object

PUT

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-rate

trigger-stats-rate attributes

Delete Object

DELETE

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-error/trigger-stats-rate

trigger-stats-rate attributes

trigger-stats-rate attributes

app-data-in-handshake

Description Enable automatic packet-capture for app data in handshake

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

attempt-to-reuse-sess-in-diff-context

Description Enable automatic packet-capture for attempt to reuse sess in diff context

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-alert-record

Description Enable automatic packet-capture for bad alert record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-authentication-type

Description Enable automatic packet-capture for bad authentication type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-change-cipher-spec

Description Enable automatic packet-capture for bad change cipher spec

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-checksum

Description Enable automatic packet-capture for bad checksum

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-data-returned-by-callback

Description Enable automatic packet-capture for bad data returned by callback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-decompression

Description Enable automatic packet-capture for bad decompression

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-g-length

Description Enable automatic packet-capture for bad dh g length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-p-length

Description Enable automatic packet-capture for bad dh p length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dh-pub-key-length

Description Enable automatic packet-capture for bad dh pub key length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-digest-length

Description Enable automatic packet-capture for bad digest length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-dsa-signature

Description Enable automatic packet-capture for bad dsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecc-cert

Description Enable automatic packet-capture for bad ecc cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecdsa-sig

Description Enable automatic packet-capture for bad ecdsa sig

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ecpoint

Description Enable automatic packet-capture for bad ecpoint

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-handshake-length

Description Enable automatic packet-capture for bad handshake length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-hello-request

Description Enable automatic packet-capture for bad hello request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-length

Description Enable automatic packet-capture for bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-mac-decode

Description Enable automatic packet-capture for bad mac decode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-message-type

Description Enable automatic packet-capture for bad message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-packet-length

Description Enable automatic packet-capture for bad packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-protocol-version-counter

Description Enable automatic packet-capture for bad protocol version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-response-argument

Description Enable automatic packet-capture for bad response argument

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-decrypt

Description Enable automatic packet-capture for bad rsa decrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-e-length

Description Enable automatic packet-capture for bad rsa e length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-encrypt

Description Enable automatic packet-capture for bad rsa encrypt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-modulus-length

Description Enable automatic packet-capture for bad rsa modulus length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-rsa-signature

Description Enable automatic packet-capture for bad rsa signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-signature

Description Enable automatic packet-capture for bad signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-filetype

Description Enable automatic packet-capture for bad ssl filetype

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ssl-session-id-length

Description Enable automatic packet-capture for bad ssl session id length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-state

Description Enable automatic packet-capture for bad state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-write-retry

Description Enable automatic packet-capture for bad write retry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bio-not-set

Description Enable automatic packet-capture for bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

block-cipher-pad-is-wrong

Description Enable automatic packet-capture for block cipher pad is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bn-lib

Description Enable automatic packet-capture for bn lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-length-mismatch

Description Enable automatic packet-capture for ca dn length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ca-dn-too-long

Description Enable automatic packet-capture for ca dn too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ccs-received-early

Description Enable automatic packet-capture for ccs received early

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cert-length-mismatch

Description Enable automatic packet-capture for cert length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

certificate-verify-failed

Description Enable automatic packet-capture for certificate verify failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-is-different

Description Enable automatic packet-capture for challenge is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-code-wrong-length

Description Enable automatic packet-capture for cipher code wrong length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-or-hash-unavailable

Description Enable automatic packet-capture for cipher or hash unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cipher-table-src-error

Description Enable automatic packet-capture for cipher table src error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clienthello-tlsext

Description Enable automatic packet-capture for clienthello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compressed-length-too-long

Description Enable automatic packet-capture for compressed length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-failure

Description Enable automatic packet-capture for compression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression-library-error

Description Enable automatic packet-capture for compression library error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-id-is-different

Description Enable automatic packet-capture for connection id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connection-type-not-set

Description Enable automatic packet-capture for connection type not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-mismatch

Description Enable automatic packet-capture for cookie mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-between-ccs-and-finished

Description Enable automatic packet-capture for data between ccs and finished

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data-length-too-long

Description Enable automatic packet-capture for data length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed

Description Enable automatic packet-capture for decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decryption-failed-or-bad-record-mac

Description Enable automatic packet-capture for decryption failed or bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dh-public-value-length-is-wrong

Description Enable automatic packet-capture for dh public value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

digest-check-failed

Description Enable automatic packet-capture for digest check failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

encrypted-length-too-long

Description Enable automatic packet-capture for encrypted length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-generating-tmp-rsa-key

Description Enable automatic packet-capture for error generating tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-in-received-cipher-list

Description Enable automatic packet-capture for error in received cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

excessive-message-size

Description Enable automatic packet-capture for excessive message size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extra-data-in-message

Description Enable automatic packet-capture for extra data in message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

got-a-fin-before-a-ccs

Description Enable automatic packet-capture for got a fin before a ccs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-request

Description Enable automatic packet-capture for http request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

https-proxy-request

Description Enable automatic packet-capture for https proxy request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

illegal-padding

Description Enable automatic packet-capture for illegal padding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inappropriate-fallback

Description Enable automatic packet-capture for inappropriate fallback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-challenge-length

Description Enable automatic packet-capture for invalid challenge length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-command

Description Enable automatic packet-capture for invalid command

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-purpose

Description Enable automatic packet-capture for invalid purpose

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-status-response

Description Enable automatic packet-capture for invalid status response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-trust

Description Enable automatic packet-capture for invalid trust

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key-arg-too-long

Description Enable automatic packet-capture for key arg too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5

Description Enable automatic packet-capture for krb5

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-cc-principal

Description Enable automatic packet-capture for krb5 client cc principal

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-get-cred

Description Enable automatic packet-capture for krb5 client get cred

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-init

Description Enable automatic packet-capture for krb5 client init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-client-mk-req

Description Enable automatic packet-capture for krb5 client mk_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-bad-ticket

Description Enable automatic packet-capture for krb5 server bad ticket

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-init

Description Enable automatic packet-capture for krb5 server init

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-rd-req

Description Enable automatic packet-capture for krb5 server rd_req

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-expired

Description Enable automatic packet-capture for krb5 server tkt expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-not-yet-valid

Description Enable automatic packet-capture for krb5 server tkt not yet valid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

krb5-server-tkt-skew

Description Enable automatic packet-capture for krb5 server tkt skew

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-mismatch

Description Enable automatic packet-capture for length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

length-too-short

Description Enable automatic packet-capture for length too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-bug

Description Enable automatic packet-capture for library bug

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

library-has-no-ciphers

Description Enable automatic packet-capture for library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mast-key-too-long

Description Enable automatic packet-capture for mast key too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-too-long

Description Enable automatic packet-capture for message too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-dsa-cert

Description Enable automatic packet-capture for missing dh dsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-key

Description Enable automatic packet-capture for missing dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dh-rsa-cert

Description Enable automatic packet-capture for missing dh rsa cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-dsa-signing-cert

Description Enable automatic packet-capture for missing dsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-dh-key

Description Enable automatic packet-capture for missing export tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-export-tmp-rsa-key

Description Enable automatic packet-capture for missing export tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-certificate

Description Enable automatic packet-capture for missing rsa certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-encrypting-cert

Description Enable automatic packet-capture for missing rsa encrypting cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-rsa-signing-cert

Description Enable automatic packet-capture for missing rsa signing cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-dh-key

Description Enable automatic packet-capture for missing tmp dh key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-key

Description Enable automatic packet-capture for missing tmp rsa key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-tmp-rsa-pkey

Description Enable automatic packet-capture for missing tmp rsa pkey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-verify-message

Description Enable automatic packet-capture for missing verify message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-sgc-restarts

Description Enable automatic packet-capture for multiple sgc restarts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-assigned

Description Enable automatic packet-capture for no certificate assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-returned

Description Enable automatic packet-capture for no certificate returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-set

Description Enable automatic packet-capture for no certificate set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificate-specified

Description Enable automatic packet-capture for no certificate specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-certificates-returned

Description Enable automatic packet-capture for no certificates returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-list

Description Enable automatic packet-capture for no cipher list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-cipher-match

Description Enable automatic packet-capture for no cipher match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-available

Description Enable automatic packet-capture for no ciphers available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-passed

Description Enable automatic packet-capture for no ciphers passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ciphers-specified

Description Enable automatic packet-capture for no ciphers specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-client-cert-received

Description Enable automatic packet-capture for no client cert received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-compression-specified

Description Enable automatic packet-capture for no compression specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-method-specified

Description Enable automatic packet-capture for no method specified

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-private-key-assigned

Description Enable automatic packet-capture for no private key assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-privatekey

Description Enable automatic packet-capture for no privatekey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-protocols-available

Description Enable automatic packet-capture for no protocols available

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-publickey

Description Enable automatic packet-capture for no publickey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-required-digest

Description Enable automatic packet-capture for no required digest

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-shared-cipher

Description Enable automatic packet-capture for no shared cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-verify-callback

Description Enable automatic packet-capture for no verify callback

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-sslv2-initial-packet

Description Enable automatic packet-capture for non sslv2 initial packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-ctx

Description Enable automatic packet-capture for null ssl ctx

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

null-ssl-method-passed

Description Enable automatic packet-capture for null ssl method passed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

old-session-cipher-not-returned

Description Enable automatic packet-capture for old session cipher not returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet-length-too-long

Description Enable automatic packet-capture for packet length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse-tlsext

Description Enable automatic packet-capture for parse tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

path-too-long

Description Enable automatic packet-capture for path too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-did-not-return-a-certificate

Description Enable automatic packet-capture for peer did not return a certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error

Description Enable automatic packet-capture for peer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-certificate

Description Enable automatic packet-capture for peer error certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-certificate

Description Enable automatic packet-capture for peer error no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-no-cipher

Description Enable automatic packet-capture for peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-error-unsupported-certificate-type

Description Enable automatic packet-capture for peer error unsupported certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pre-mac-length-too-long

Description Enable automatic packet-capture for pre mac length too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

problems-mapping-cipher-functions

Description Enable automatic packet-capture for problems mapping cipher functions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol-is-shutdown

Description Enable automatic packet-capture for protocol is shutdown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-encrypt-error

Description Enable automatic packet-capture for public key encrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-is-not-rsa

Description Enable automatic packet-capture for public key is not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

public-key-not-rsa

Description Enable automatic packet-capture for public key not rsa

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-bio-not-set

Description Enable automatic packet-capture for read bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read-wrong-packet-type

Description Enable automatic packet-capture for read wrong packet type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-length-mismatch

Description Enable automatic packet-capture for record length mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-large

Description Enable automatic packet-capture for record too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

record-too-small

Description Enable automatic packet-capture for record too small

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

required-cipher-missing

Description Enable automatic packet-capture for required cipher missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-length-not-zero

Description Enable automatic packet-capture for reuse cert length not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cert-type-not-zero

Description Enable automatic packet-capture for reuse cert type not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reuse-cipher-list-not-zero

Description Enable automatic packet-capture for reuse cipher list not zero

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

scsv-received-when-renegotiating

Description Enable automatic packet-capture for scsv received when renegotiating

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

serverhello-tlsext

Description Enable automatic packet-capture for serverhello tlsext

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-id-context-uninitialized

Description Enable automatic packet-capture for session id context uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

short-read

Description Enable automatic packet-capture for short read

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

signature-for-non-signing-certificate

Description Enable automatic packet-capture for signature for non signing certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-ctx-has-no-default-ssl-version

Description Enable automatic packet-capture for ssl ctx has no default ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-handshake-failure

Description Enable automatic packet-capture for ssl handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-library-has-no-ciphers

Description Enable automatic packet-capture for ssl library has no ciphers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-callback-failed

Description Enable automatic packet-capture for ssl session id callback failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-conflict

Description Enable automatic packet-capture for ssl session id conflict

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-context-too-long

Description Enable automatic packet-capture for ssl session id context too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-has-bad-length

Description Enable automatic packet-capture for ssl session id has bad length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-id-is-different

Description Enable automatic packet-capture for ssl session id is different

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl2-connection-id-too-long

Description Enable automatic packet-capture for ssl2 connection id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl23-doing-session-id-reuse

Description Enable automatic packet-capture for ssl23 doing session id reuse

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername

Description Enable automatic packet-capture for ssl3 ext invalid servername

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-ext-invalid-servername-type

Description Enable automatic packet-capture for ssl3 ext invalid servername type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-long

Description Enable automatic packet-capture for ssl3 session id too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl3-session-id-too-short

Description Enable automatic packet-capture for ssl3 session id too short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-certificate

Description Enable automatic packet-capture for sslv3 alert bad certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-bad-record-mac

Description Enable automatic packet-capture for sslv3 alert bad record mac

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-expired

Description Enable automatic packet-capture for sslv3 alert certificate expired

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-revoked

Description Enable automatic packet-capture for sslv3 alert certificate revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-certificate-unknown

Description Enable automatic packet-capture for sslv3 alert certificate unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-decompression-failure

Description Enable automatic packet-capture for sslv3 alert decompression failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-handshake-failure

Description Enable automatic packet-capture for sslv3 alert handshake failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-illegal-parameter

Description Enable automatic packet-capture for sslv3 alert illegal parameter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-no-certificate

Description Enable automatic packet-capture for sslv3 alert no certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-cert

Description Enable automatic packet-capture for sslv3 alert peer error cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cert

Description Enable automatic packet-capture for sslv3 alert peer error no cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-no-cipher

Description Enable automatic packet-capture for sslv3 alert peer error no cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-peer-error-unsupp-cert-type

Description Enable automatic packet-capture for sslv3 alert peer error unsupp cert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unexpected-msg

Description Enable automatic packet-capture for sslv3 alert unexpected msg

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unknown-remote-err-type

Description Enable automatic packet-capture for sslv3 alert unknown remote err type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sslv3-alert-unspported-cert

Description Enable automatic packet-capture for sslv3 alert unspported cert

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

tls-client-cert-req-with-anon-cipher

Description Enable automatic packet-capture for tls client cert req with anon cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-invalid-ecpointformat-list

Description Enable automatic packet-capture for tls invalid ecpointformat list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-peer-did-not-respond-with-cert-list

Description Enable automatic packet-capture for tls peer did not respond with cert list

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tls-rsa-encrypted-value-length-is-wrong

Description Enable automatic packet-capture for tls rsa encrypted value length is wrong

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-access-denied

Description Enable automatic packet-capture for tlsv1 alert access denied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decode-error

Description Enable automatic packet-capture for tlsv1 alert decode error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decrypt-error

Description Enable automatic packet-capture for tlsv1 alert decrypt error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-decryption-failed

Description Enable automatic packet-capture for tlsv1 alert decryption failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-export-restriction

Description Enable automatic packet-capture for tlsv1 alert export restriction

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-insufficient-security

Description Enable automatic packet-capture for tlsv1 alert insufficient security

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-internal-error

Description Enable automatic packet-capture for tlsv1 alert internal error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-no-renegotiation

Description Enable automatic packet-capture for tlsv1 alert no renegotiation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-protocol-version

Description Enable automatic packet-capture for tlsv1 alert protocol version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-record-overflow

Description Enable automatic packet-capture for tlsv1 alert record overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-unknown-ca

Description Enable automatic packet-capture for tlsv1 alert unknown ca

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tlsv1-alert-user-cancelled

Description Enable automatic packet-capture for tlsv1 alert user cancelled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tried-to-use-unsupported-cipher

Description Enable automatic packet-capture for tried to use unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-decode-dh-certs

Description Enable automatic packet-capture for unable to decode dh certs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-extract-public-key

Description Enable automatic packet-capture for unable to extract public key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-dh-parameters

Description Enable automatic packet-capture for unable to find dh parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-public-key-parameters

Description Enable automatic packet-capture for unable to find public key parameters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-find-ssl-method

Description Enable automatic packet-capture for unable to find ssl method

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl2-md5-routines

Description Enable automatic packet-capture for unable to load ssl2 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-md5-routines

Description Enable automatic packet-capture for unable to load ssl3 md5 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unable-to-load-ssl3-sha1-routines

Description Enable automatic packet-capture for unable to load ssl3 sha1 routines

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-message

Description Enable automatic packet-capture for unexpected message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unexpected-record

Description Enable automatic packet-capture for unexpected record

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uninitialized

Description Enable automatic packet-capture for uninitialized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-alert-type

Description Enable automatic packet-capture for unknown alert type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-certificate-type

Description Enable automatic packet-capture for unknown certificate type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-returned

Description Enable automatic packet-capture for unknown cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-cipher-type

Description Enable automatic packet-capture for unknown cipher type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-key-exchange-type

Description Enable automatic packet-capture for unknown key exchange type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-pkey-type

Description Enable automatic packet-capture for unknown pkey type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-protocol

Description Enable automatic packet-capture for unknown protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-remote-error-type

Description Enable automatic packet-capture for unknown remote error type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-ssl-version

Description Enable automatic packet-capture for unknown ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown-state

Description Enable automatic packet-capture for unknown state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-cipher

Description Enable automatic packet-capture for unsupported cipher

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-compression-algorithm

Description Enable automatic packet-capture for unsupported compression algorithm

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-digest-type

Description Enable automatic packet-capture for unsupported digest type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-elliptic-curve

Description Enable automatic packet-capture for unsupported elliptic curve

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-option

Description Enable automatic packet-capture for unsupported option

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-protocol

Description Enable automatic packet-capture for unsupported protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-ssl-version

Description Enable automatic packet-capture for unsupported ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-status-type

Description Enable automatic packet-capture for unsupported status type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

write-bio-not-set

Description Enable automatic packet-capture for write bio not set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-cipher-returned

Description Enable automatic packet-capture for wrong cipher returned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-counter-of-key-bits

Description Enable automatic packet-capture for wrong counter of key bits

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-message-type

Description Enable automatic packet-capture for wrong message type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-length

Description Enable automatic packet-capture for wrong signature length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-signature-size

Description Enable automatic packet-capture for wrong signature size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-ssl-version

Description Enable automatic packet-capture for wrong ssl version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wrong-version-counter

Description Enable automatic packet-capture for wrong version counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-lib

Description Enable automatic packet-capture for x509 lib

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

x509-verification-setup-problems

Description Enable automatic packet-capture for x509 verification setup problems

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.150.277 visibility packet-capture global-templates template trigger-sys-obj-stats-change slb-ssl-forward-proxy

Configure triggers for slb.ssl-forward-proxy object

slb-ssl-forward-proxy Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	slb-ssl-forward-proxy
Element URI	/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-forward-proxy
Element Attributes	slb-ssl-forward-proxy_attributes
Partition Visibility	shared
Schema	`slb-ssl-forward-proxy schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-forward-proxy

slb-ssl-forward-proxy attributes

```
POST /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/slb-ssl-forward-proxy
Payload:
{
    "slb-ssl-forward-proxy": {
        "trigger-stats-inc": {
            "failed-in-ssl-handshakes": 1
        }
    }
}
```

Get Object

GET

/axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-forward-proxy

slb-ssl-forward-proxy attributes

```
GET /axapi/v3/visibility/packet-capture/global-templates/template/a/trigger-sys-obj-
↪stats-change/slb-ssl-forward-proxy
Reponse:
```

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

so_pkts_l2redirect_dest_mac_zero_drop

Description Enable automatic packet-capture for Destination MAC Address zero Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_frag_vlan_retrieval_

Description Enable automatic packet-capture for L2 redirect pkt frag vlan not retrieved

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_interface_not_up

Description Enable automatic packet-capture for L2redirect Intf is not UP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_invalid_redirect_inf

Description Enable automatic packet-capture for Redirect Table Error due to invalid redirect info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_loop_detect_drop

Description Enable automatic packet-capture for L2 redirect pkt loop detected and dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_port_retrieval_error

Description Enable automatic packet-capture for L2 redirect pkt port not retrieved

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_tx_frag_vlan_add_fai

Description Enable automatic packet-capture for L2 redirect tx pkt failed to add vlan

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_vlan_retrieval_error

Description Enable automatic packet-capture for L2 redirect pkt vlan not retrieved

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_chassis_dest_mac_er

Description Enable automatic packet-capture for L3 Redirect RX multi-slot Destination MAC Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_error_drop

Description Enable automatic packet-capture for L3 Redirect encap error drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_fragmentation_error

Description Enable automatic packet-capture for L3 redirect encap Fragmentation error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_inner_mac_zero_drop

Description Enable automatic packet-capture for L3 Redirect inner mac zero drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_invalid_dev_dir

Description Enable automatic packet-capture for L3 Redirect Invalid Device direction during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_error

Description Enable automatic packet-capture for L3 Redirect Table error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_no_entry_foun

Description Enable automatic packet-capture for L3 redirect Table no redirect entry found error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_release_fail

Description Enable automatic packet-capture for Total SLB NAT release failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_reserve_fail

Description Enable automatic packet-capture for Total SLB NAT reserve failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Default: 0

tx-drop

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

w-link-down-drop

Description Enable automatic packet-capture for Total worker core link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-ring-drop

Description Enable automatic packet-capture for Total worker core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-tx-que-drop

Description Enable automatic packet-capture for Total worker core queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-rate

Specification	Value
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

err-pkt-drop

Description Enable automatic packet-capture for Total error packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-ring-drop

Description Enable automatic packet-capture for Total IO core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-rx-que-drop

Description Enable automatic packet-capture for Total IO core Rx queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-tx-que-drop

Description Enable automatic packet-capture for Total IO core TX queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-drop

Description Enable automatic packet-capture for Total packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-lnk-down-drop

Description Enable automatic packet-capture for Total packets link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-align-err

Description Enable automatic packet-capture for Total RX packet align error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-crc-err

Description Enable automatic packet-capture for Total RX packet CRC error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-csum-offload-err

Description Enable automatic packet-capture for Total Rx packet check-sum offload error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-err

Description Enable automatic packet-capture for Total RX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-frame-err

Description Enable automatic packet-capture for Total RX packet frame error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-len-err

Description Enable automatic packet-capture for Total RX packet length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-long-len-err

Description Enable automatic packet-capture for Total RX packet long length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-miss-err

Description Enable automatic packet-capture for Total RX packet miss error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-no-buff-err

Description Enable automatic packet-capture for Total RX packet no buffer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-over-err

Description Enable automatic packet-capture for Total RX packet over error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-short-len-err

Description Enable automatic packet-capture for Total RX packet short length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

tx-abort-err

Description Enable automatic packet-capture for Total TX packet abort error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-carrier-err

Description Enable automatic packet-capture for Total TX packert carrier error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-drop

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

w-link-down-drop

Description Enable automatic packet-capture for Total worker core link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-ring-drop

Description Enable automatic packet-capture for Total worker core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-tx-que-drop

Description Enable automatic packet-capture for Total worker core queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-chksum-drop

Description Enable automatic packet-capture for Total Bad IP csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-flags-drop

Description Enable automatic packet-capture for Total Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-frag-offset

Description Enable automatic packet-capture for Total Bad IP frag off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-hdr-len

Description Enable automatic packet-capture for Total Bad IP hdr len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-payload-len

Description Enable automatic packet-capture for Total Bad IP PL len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-ttl-drop

Description Enable automatic packet-capture for Total Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

empty-frag-drop

Description Enable automatic packet-capture for Total Empty frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fcs-drop

Description Enable automatic packet-capture for Total FCS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hrx-drop

Description Enable automatic packet-capture for Total HRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-pod-drop

Description Enable automatic packet-capture for Total ICMP POD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-frag

Description Enable automatic packet-capture for Total IP frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-opt-drop

Description Enable automatic packet-capture for Total IPv4 opt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land-drop

Description Enable automatic packet-capture for Total LAND Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mic-frag-drop

Description Enable automatic packet-capture for Total Micro frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mrx-drop

Description Enable automatic packet-capture for Total MRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ip-payload-drop

Description Enable automatic packet-capture for Total No IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

oversize-ip-payload

Description Enable automatic packet-capture for Total Oversize IP PL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-ip-hdr

Description Enable automatic packet-capture for Total Runt IP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-tcpudp-hdr

Description Enable automatic packet-capture for Total Runt TCPUDP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

siz-drop

Description Enable automatic packet-capture for Total Size Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-chksum

Description Enable automatic packet-capture for Total TCP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-ip-len

Description Enable automatic packet-capture for Total TCP Bad IP Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-urg-offet

Description Enable automatic packet-capture for Total TCP bad urg off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-fin-sin

Description Enable automatic packet-capture for Total TCP SYN&FIN Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-frag-hdr

Description Enable automatic packet-capture for Total TCP frag header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-flags

Description Enable automatic packet-capture for Total TCP null flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-scan

Description Enable automatic packet-capture for Total TCP null scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-short-hdr

Description Enable automatic packet-capture for Total TCP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-syn-frag

Description Enable automatic packet-capture for Total TCP SYN frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-port-lb

Description Enable automatic packet-capture for Total UDP port LB Drop

Type: boolean

Supported Values: true, false, 1, 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Description Enable automatic packet-capture for Total ICMP POD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-frag

Description Enable automatic packet-capture for Total IP frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-opt-drop

Description Enable automatic packet-capture for Total IPv4 opt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land-drop

Description Enable automatic packet-capture for Total LAND Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mic-frag-drop

Description Enable automatic packet-capture for Total Micro frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mrx-drop

Description Enable automatic packet-capture for Total MRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ip-payload-drop

Description Enable automatic packet-capture for Total No IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

oversize-ip-payload

Description Enable automatic packet-capture for Total Oversize IP PL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-ip-hdr

Description Enable automatic packet-capture for Total Runt IP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-tcpudp-hdr

Description Enable automatic packet-capture for Total Runt TCPUDP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

siz-drop

Description Enable automatic packet-capture for Total Size Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-chksum

Description Enable automatic packet-capture for Total TCP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-ip-len

Description Enable automatic packet-capture for Total TCP Bad IP Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-urg-offet

Description Enable automatic packet-capture for Total TCP bad urg off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-fin-sin

Description Enable automatic packet-capture for Total TCP SYN&FIN Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-frag-hdr

Description Enable automatic packet-capture for Total TCP frag header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-flags

Description Enable automatic packet-capture for Total TCP null flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-scan

Description Enable automatic packet-capture for Total TCP null scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-short-hdr

Description Enable automatic packet-capture for Total TCP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-syn-frag

Description Enable automatic packet-capture for Total TCP SYN frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-port-lb

Description Enable automatic packet-capture for Total UDP port LB Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-short-hdr

Description Enable automatic packet-capture for Total UDP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

bad-ip-chksum-drop

Description Enable automatic packet-capture for Total Bad IP csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-flags-drop

Description Enable automatic packet-capture for Total Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-frag-offset

Description Enable automatic packet-capture for Total Bad IP frag off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-hdr-len

Description Enable automatic packet-capture for Total Bad IP hdr len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-payload-len

Description Enable automatic packet-capture for Total Bad IP PL len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-ttl-drop

Description Enable automatic packet-capture for Total Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

empty-frag-drop

Description Enable automatic packet-capture for Total Empty frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fcs-drop

Description Enable automatic packet-capture for Total FCS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

other_error

Description Enable automatic packet-capture for Other Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

timeout_error

Description Enable automatic packet-capture for Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

aam-auth-service-group-tmpl-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Supported Values: true, false, 1, 0

Default: 0

parse_request_line_fail

Description Enable automatic packet-capture for Parse request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_resonse_line_fail

Description Enable automatic packet-capture for Parse response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read_request_line_fail

Description Enable automatic packet-capture for Read request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv_server_unknow_reply_code

Description Enable automatic packet-capture for Recv server unknown-code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove_resonse_line_fail

Description Enable automatic packet-capture for Del response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send_client_service_not_ready

Description Enable automatic packet-capture for Sent client serv-not-rdy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_STARTTLS_fail

Description Enable automatic packet-capture for Server side STARTTLS fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_select_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

too_many_headers

Description Enable automatic packet-capture for Too many headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

smtp-vport-tmpl-list_trigger-stats-rate

Specification	Value
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

forward_req_data_fail

Description Enable automatic packet-capture for Forward REQ data failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

forward_req_fail

Description Enable automatic packet-capture for Forward request failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get_all_headers_fail

Description Enable automatic packet-capture for Get all headers fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insert_resonse_line_fail

Description Enable automatic packet-capture for Ins response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_extend_fail

Description Enable automatic packet-capture for Line extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_table_extend_fail

Description Enable automatic packet-capture for Table extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for Line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_proxy

Description Enable automatic packet-capture for No proxy error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_req_fail

Description Enable automatic packet-capture for Parse request failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_request_line_fail

Description Enable automatic packet-capture for Parse request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_resonse_line_fail

Description Enable automatic packet-capture for Parse response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read_request_line_fail

Description Enable automatic packet-capture for Read request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv_server_unknow_reply_code

Description Enable automatic packet-capture for Recv server unknown-code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove_resonse_line_fail

Description Enable automatic packet-capture for Del response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send_client_service_not_ready

Description Enable automatic packet-capture for Sent client serv-not-rdy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_STARTTLS_fail

Description Enable automatic packet-capture for Server side STARTTLS fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_select_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

too_many_headers

Description Enable automatic packet-capture for Too many headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

netflow-monitor-tmpl-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

trigger-stats-inc

Specification	Value
Type	*object*

drop

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Specification	Value
Type	*object*

custom-deny-reset-event-fw4-records-sen

Description Enable automatic packet-capture for Custom FW4 Deny/Reset Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-deny-reset-event-fw6-records-sen

Description Enable automatic packet-capture for Custom FW6 Deny/Reset Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-iddos-entry-created-records-s

Description Enable automatic packet-capture for Custom FW iDDoS Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-iddos-entry-deleted-records-s

Description Enable automatic packet-capture for Custom FW iDDoS Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-sesn-limit-exceeded-records-s

Description Enable automatic packet-capture for Custom FW Session Limit Exceeded Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-c-tunnel-event-records-sent-

Description Enable automatic packet-capture for Custom GTP C Tunnel Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-deny-event-records-sent-fail

Description Enable automatic packet-capture for Custom GTP Deny Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-info-event-records-sent-fail

Description Enable automatic packet-capture for Custom GTP Info Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-u-tunnel-event-records-sent-

Description Enable automatic packet-capture for Custom GTP U Tunnel Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l3-entry-created-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L3 Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l3-entry-deleted-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L3 Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-created-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-deleted-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-creation

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-deletion

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-creation-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-deletion-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-creation-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-deletion-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-creation-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-deletion-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-creation-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-deletion-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-creation-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-deletion-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-creation-recor

Description Enable automatic packet-capture for Custom FW4 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-deletion-recor

Description Enable automatic packet-capture for Custom FW4 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-creation-recor

Description Enable automatic packet-capture for Custom FW6 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-deletion-recor

Description Enable automatic packet-capture for Custom FW6 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dslite-records-sent-failure

Description Enable automatic packet-capture for Dslite Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat44-records-sent-failure

Description Enable automatic packet-capture for NAT44 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat64-records-sent-failure

Description Enable automatic packet-capture for NAT64 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-ext-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Ext Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-dslite-records-sent-failu

Description Enable automatic packet-capture for Port Batching Dslite Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat44-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat64-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-dslite-records-sent-fa

Description Enable automatic packet-capture for Port Batching V2 Dslite Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat44-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat64-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-dslite-records-sent-failur

Description Enable automatic packet-capture for Port Mapping Dslite Event Records failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat44-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat44 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat64-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat64 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-dslite-records-sent-failu

Description Enable automatic packet-capture for Dslite Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw4-records-sent-failure

Description Enable automatic packet-capture for FW4 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw6-records-sent-failure

Description Enable automatic packet-capture for FW6 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat44-records-sent-failur

Description Enable automatic packet-capture for Nat44 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat64-records-sent-failur

Description Enable automatic packet-capture for Nat64 Session Event Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Default: 0

custom-session-event-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dslite-records-sent-failure

Description Enable automatic packet-capture for Dslite Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

nat44-records-sent-failure

Description Enable automatic packet-capture for NAT44 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat64-records-sent-failure

Description Enable automatic packet-capture for NAT64 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-ext-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Ext Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-dslite-records-sent-failu

Description Enable automatic packet-capture for Port Batching Dslite Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat44-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat64-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-dslite-records-sent-fa

Description Enable automatic packet-capture for Port Batching V2 Dslite Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat44-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat64-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-dslite-records-sent-failur

Description Enable automatic packet-capture for Port Mapping Dslite Event Records failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat44-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat44 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat64-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat64 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-dslite-records-sent-failu

Description Enable automatic packet-capture for Dslite Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw4-records-sent-failure

Description Enable automatic packet-capture for FW4 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw6-records-sent-failure

Description Enable automatic packet-capture for FW6 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat44-records-sent-failur

Description Enable automatic packet-capture for Nat44 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat64-records-sent-failur

Description Enable automatic packet-capture for Nat64 Session Event Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

fw-service-group-tmpl-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Specification	Value
Type	*object*

bad_sequence

Description Enable automatic packet-capture for Bad Sequence

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cl_est_err

Description Enable automatic packet-capture for Client EST state erro

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insert_tuple_fail

Description Enable automatic packet-capture for Serv Sel insert tuple fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_start_line

Description Enable automatic packet-capture for invalid start line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ser_connecting_err

Description Enable automatic packet-capture for Serv CTNG state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_response_err

Description Enable automatic packet-capture for Serv RESP state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported_command

Description Enable automatic packet-capture for Unsupported cmd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

aam-auth-captcha-inst-tmpl-list_trigger-stats-inc

Specification	Value
Type	*object*

attr-fail

Description Enable automatic packet-capture for Total Attibute Check Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

json-fail

Description Enable automatic packet-capture for Total Failure JSON Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

other-error

Description Enable automatic packet-capture for Total Other Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse-fail

Description Enable automatic packet-capture for Total JSON Response Parse Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout-error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

aam-auth-captcha-inst-tmpl-list_trigger-stats-rate

Specification	Value
Type	*object*

attr-fail

Description Enable automatic packet-capture for Total Attibute Check Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

json-fail

Description Enable automatic packet-capture for Total Failure JSON Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

other-error

Description Enable automatic packet-capture for Total Other Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse-fail

Description Enable automatic packet-capture for Total JSON Response Parse Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

timeout-error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

interface-tunnel-tmpl-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

slb-vport-tmpl-list_trigger-stats-severity

Specification	Value
Type	*object*

drop

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

slb-vport-tmpl-list_trigger-stats-inc

Specification	Value
Type	*object*

compression_miss_no_client

Description Enable automatic packet-capture for Compression miss no client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression_miss_template_exclusion

Description Enable automatic packet-capture for Compression miss template exclusion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_bad_fqdn

Description Enable automatic packet-capture for DNS Response-Rate-Limiting Bad FQDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_nx_exceed

Description Enable automatic packet-capture for DNS Response-Rate-Limiting NX Responses Exceed Limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_total_dropped

Description Enable automatic packet-capture for DNS Response-Rate-Limiting Total Responses Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

es_total_failure_actions

Description Enable automatic packet-capture for Total failure actions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

loc_deny

Description Enable automatic packet-capture for Geo-location Deny count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_mf_dns_pkts

Description Enable automatic packet-capture for Total MF DNS packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

slb-vport-tmpl-list_trigger-stats-rate

Specification	Value
Type	*object*

compression_miss_no_client

Description Enable automatic packet-capture for Compression miss no client

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

compression_miss_template_exclusion

Description Enable automatic packet-capture for Compression miss template exclusion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_bad_fqdn

Description Enable automatic packet-capture for DNS Response-Rate-Limiting Bad FQDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_nx_exceed

Description Enable automatic packet-capture for DNS Response-Rate-Limiting NX Responses Exceed Limit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_total_dropped

Description Enable automatic packet-capture for DNS Response-Rate-Limiting Total Responses Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

es_total_failure_actions

Description Enable automatic packet-capture for Total failure actions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

loc_deny

Description Enable automatic packet-capture for Geo-location Deny count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

total_mf_dns_pkts

Description Enable automatic packet-capture for Total MF DNS packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cgnv6-map-trans-domain-tmpl-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Maximum Length: 64 characters

Maximum Length: 1 characters

cgnv6-map-trans-domain-tmpl-list_trigger-stats-inc

Specification	Value
Type	*object*

inbound_addr_port_validation_failed

Description Enable automatic packet-capture for Inbound IPv4 Destination Address Port Validation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_dest_unreachable

Description Enable automatic packet-capture for Inbound IPv6 Destination Address Unreachable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_rev_lookup_failed

Description Enable automatic packet-capture for Inbound IPv4 Reverse Route Lookup Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interface_not_configured

Description Enable automatic packet-capture for Interfaces not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_addr_validation_failed

Description Enable automatic packet-capture for Outbound IPv6 Source Address Validation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_dest_unreachable

Description Enable automatic packet-capture for Outbound IPv4 Destination Address Unreachable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_rev_lookup_failed

Description Enable automatic packet-capture for Outbound IPv6 Reverse Route Lookup Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet_mtu_exceeded

Description Enable automatic packet-capture for Packet Exceeded MTU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

templ-gtp-plcy-tmpl-list_trigger-stats-rate

Specification	Value
Type	*object*

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rule-set-rule-tmpl-list_trigger-stats-rate

Specification	Value
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

syn-cookie-verification-failed

Description Enable automatic packet-capture for SYN cookie verification failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cgnv6-encap-domain-tmpl-list

Specification	Value
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Reference Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *cgnv6-encap-domain-tmpl-list_trigger-stats-inc*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cgnv6-encap-domain-tmpl-list_trigger-stats-severity

Specification	Value
Type	*object*

drop

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cgnv6-encap-domain-tmpl-list_trigger-stats-inc

Specification	Value
Type	*object*

inbound_addr_port_validation_failed

Description Enable automatic packet-capture for Inbound IPv4 Destination Address Port Validation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_dest_unreachable

Description Enable automatic packet-capture for Inbound IPv6 Destination Address Unreachable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_rev_lookup_failed

Description Enable automatic packet-capture for Inbound IPv4 Reverse Route Lookup Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interface_not_configured

Description Enable automatic packet-capture for Interfaces not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_addr_validation_failed

Description Enable automatic packet-capture for Outbound IPv6 Source Address Validation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_dest_unreachable

Description Enable automatic packet-capture for Outbound IPv4 Destination Address Unreachable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_rev_lookup_failed

Description Enable automatic packet-capture for Outbound IPv6 Reverse Route Lookup Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet_mtu_exceeded

Description Enable automatic packet-capture for Packet Exceeded MTU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

trigger-stats-rate

Specification	Value
Type	*object*

bad-req

Description Enable automatic packet-capture for Bad Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

forbidden

Description Enable automatic packet-capture for Forbidden

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-creds

Description Enable automatic packet-capture for No Credential

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

not-found

Description Enable automatic packet-capture for Not Found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server-error

Description Enable automatic packet-capture for Internal Server Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

unauth

Description Enable automatic packet-capture for Unauthorized

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unavailable

Description Enable automatic packet-capture for Service Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Description: trigger-stats-severity is a **JSON Block**. Please see below for *trigger-stats-severity*

Type: Object

Reference Object: */axapi/v3/visibility/packet-capture/object-templates/cgnv6-dns64-vs-port-tmpl/{name}/trigger-stats-severity*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-severity

Specification	Value
Type	*object*

drop

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-inc

Specification	Value
Type	*object*

es_total_failure_actions

Description Enable automatic packet-capture for Total failure actions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

es_total_failure_actions

Description Enable automatic packet-capture for Total failure actions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

inbound_addr_port_validation_failed

Description Enable automatic packet-capture for Inbound IPv4 Destination Address Port Validation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_dest_unreachable

Description Enable automatic packet-capture for Inbound IPv6 Destination Address Unreachable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_rev_lookup_failed

Description Enable automatic packet-capture for Inbound IPv4 Reverse Route Lookup Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interface_not_configured

Description Enable automatic packet-capture for Interfaces not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_addr_validation_failed

Description Enable automatic packet-capture for Outbound IPv6 Source Address Validation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_dest_unreachable

Description Enable automatic packet-capture for Outbound IPv4 Destination Address Unreachable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

outbound_rev_lookup_failed

Description Enable automatic packet-capture for Outbound IPv6 Reverse Route Lookup Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet_mtu_exceeded

Description Enable automatic packet-capture for Packet Exceeded MTU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

dns_filter_class_any_drop

Description Enable automatic packet-capture for counters DNS Filter Class ANY Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_chaos_drop

Description Enable automatic packet-capture for counters DNS Filter Class CHAOS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_hesiod_drop

Description Enable automatic packet-capture for counters DNS Filter Class HESIOD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_internet_drop

Description Enable automatic packet-capture for counters DNS Filter Class INTERNET Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_none_drop

Description Enable automatic packet-capture for counters DNS Filter Class NONE Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_others_drop

Description Enable automatic packet-capture for counters DNS Filter Class OTHER Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_tld_drop

Description Enable automatic packet-capture for counters Total DNS Filter TLD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_a_drop

Description Enable automatic packet-capture for counters DNS Filter Type A Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_aaaa_drop

Description Enable automatic packet-capture for counters DNS Filter Type AAAA Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_any_drop

Description Enable automatic packet-capture for counters DNS Filter Type Any Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_cname_drop

Description Enable automatic packet-capture for counters DNS Filter Type CNAME Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_mx_drop

Description Enable automatic packet-capture for counters DNS Filter Type MX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ns_drop

Description Enable automatic packet-capture for counters DNS Filter Type NS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_others_drop

Description Enable automatic packet-capture for counters DNS Filter Type OTHERS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ptr_drop

Description Enable automatic packet-capture for counters DNS Filter Type PTR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_soa_drop

Description Enable automatic packet-capture for counters DNS Filter Type SOA Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_srv_drop

Description Enable automatic packet-capture for counters DNS Filter Type SRV Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_txt_drop

Description Enable automatic packet-capture for counters DNS Filter Type TXT Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_rpz_action_drop

Description Enable automatic packet-capture for DNS RPZ Action Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_bad_fqdn

Description Enable automatic packet-capture for DNS Response-Rate-Limiting Bad FQDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_total_dropped

Description Enable automatic packet-capture for dns rrl drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gslb_query_bad

Description Enable automatic packet-capture for gslb query bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gslb_response_bad

Description Enable automatic packet-capture for gslb response bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rcode_notimpl_receive

Description Enable automatic packet-capture for response rcode type error receive

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rcode_notimpl_response

Description Enable automatic packet-capture for rcode type error response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_class_drop

Description Enable automatic packet-capture for counters Total DNS Filter Class Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_type_drop

Description Enable automatic packet-capture for counters Total DNS Filter Type Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_filter_drop

Description Enable automatic packet-capture for query filter drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_max_query_len_drop

Description Enable automatic packet-capture for query too long drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

dns_filter_type_any_drop

Description Enable automatic packet-capture for counters DNS Filter Type Any Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_cname_drop

Description Enable automatic packet-capture for counters DNS Filter Type CNAME Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_mx_drop

Description Enable automatic packet-capture for counters DNS Filter Type MX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ns_drop

Description Enable automatic packet-capture for counters DNS Filter Type NS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_others_drop

Description Enable automatic packet-capture for counters DNS Filter Type OTHERS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ptr_drop

Description Enable automatic packet-capture for counters DNS Filter Type PTR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_soa_drop

Description Enable automatic packet-capture for counters DNS Filter Type SOA Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_srv_drop

Description Enable automatic packet-capture for counters DNS Filter Type SRV Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_txt_drop

Description Enable automatic packet-capture for counters DNS Filter Type TXT Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_rpz_action_drop

Description Enable automatic packet-capture for DNS RPZ Action Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_bad_fqdn

Description Enable automatic packet-capture for DNS Response-Rate-Limiting Bad FQDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_total_dropped

Description Enable automatic packet-capture for dns rrl drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

gslb_query_bad

Description Enable automatic packet-capture for gslb query bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gslb_response_bad

Description Enable automatic packet-capture for gslb response bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rcode_notimpl_receive

Description Enable automatic packet-capture for response rcode type error receive

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rcode_notimpl_response

Description Enable automatic packet-capture for rcode type error response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

total_dns_filter_class_drop

Description Enable automatic packet-capture for counters Total DNS Filter Class Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_type_drop

Description Enable automatic packet-capture for counters Total DNS Filter Type Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_filter_drop

Description Enable automatic packet-capture for query filter drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_max_query_len_drop

Description Enable automatic packet-capture for query too long drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ser_connecting_err

Description Enable automatic packet-capture for Serv CTNG state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_response_err

Description Enable automatic packet-capture for Serv RESP state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_create_fail

Description Enable automatic packet-capture for smp create fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported_pbsz_value

Description Enable automatic packet-capture for Unsupported PBSZ

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported_prot_value

Description Enable automatic packet-capture for Unsupported PROT

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

auth_unsupported

Description Enable automatic packet-capture for Unsupported auth

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_sequence

Description Enable automatic packet-capture for Bad Sequence

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_find_epsv

Description Enable automatic packet-capture for cant find epsv

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_find_pasv

Description Enable automatic packet-capture for cant find pasv

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cl_est_err

Description Enable automatic packet-capture for Client EST state erro

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cl_request_err

Description Enable automatic packet-capture for Client RQ state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_send_fail

Description Enable automatic packet-capture for data send fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_server_conn_fail

Description Enable automatic packet-capture for data svr conn fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

insert_tuple_fail

Description Enable automatic packet-capture for Serv Sel insert tuple fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_start_line

Description Enable automatic packet-capture for invalid start line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ser_connecting_err

Description Enable automatic packet-capture for Serv CTNG state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_response_err

Description Enable automatic packet-capture for Serv RESP state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_create_fail

Description Enable automatic packet-capture for smp create fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

unsupported_pbsz_value

Description Enable automatic packet-capture for Unsupported PBSZ

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported_prot_value

Description Enable automatic packet-capture for Unsupported PROT

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Maximum Length: 1 characters

trigger-stats-inc

Specification	Value
Type	*object*

num-rx-err-pkts

Description Enable automatic packet-capture for received error packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

num-tx-err-pkts

Description Enable automatic packet-capture for sent error packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

num-rx-err-pkts

Description Enable automatic packet-capture for received error packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

num-tx-err-pkts

Description Enable automatic packet-capture for sent error packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.150.413 visibility packet-capture object-templates interface-tunnel-tmpl trigger-stats-inc

Configure stats to triggers packet capture on increment

trigger-stats-inc Specification

Parameter	Value

nat44-records-sent-failure

Description Enable automatic packet-capture for NAT44 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat64-records-sent-failure

Description Enable automatic packet-capture for NAT64 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-ext-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Ext Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-dslite-records-sent-failu

Description Enable automatic packet-capture for Port Batching Dslite Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat44-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat64-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-dslite-records-sent-fa

Description Enable automatic packet-capture for Port Batching V2 Dslite Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat44-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat64-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-dslite-records-sent-failur

Description Enable automatic packet-capture for Port Mapping Dslite Event Records failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat44-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat44 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat64-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat64 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-dslite-records-sent-failu

Description Enable automatic packet-capture for Dslite Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw4-records-sent-failure

Description Enable automatic packet-capture for FW4 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw6-records-sent-failure

Description Enable automatic packet-capture for FW6 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat44-records-sent-failur

Description Enable automatic packet-capture for Nat44 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat64-records-sent-failur

Description Enable automatic packet-capture for Nat64 Session Event Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

custom-deny-reset-event-fw4-records-sen

Description Enable automatic packet-capture for Custom FW4 Deny/Reset Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-deny-reset-event-fw6-records-sen

Description Enable automatic packet-capture for Custom FW6 Deny/Reset Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-iddos-entry-created-records-s

Description Enable automatic packet-capture for Custom FW iDDoS Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-iddos-entry-deleted-records-s

Description Enable automatic packet-capture for Custom FW iDDoS Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-sesn-limit-exceeded-records-s

Description Enable automatic packet-capture for Custom FW Session Limit Exceeded Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-c-tunnel-event-records-sent-

Description Enable automatic packet-capture for Custom GTP C Tunnel Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-deny-event-records-sent-fail

Description Enable automatic packet-capture for Custom GTP Deny Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-info-event-records-sent-fail

Description Enable automatic packet-capture for Custom GTP Info Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-u-tunnel-event-records-sent-

Description Enable automatic packet-capture for Custom GTP U Tunnel Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l3-entry-created-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L3 Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l3-entry-deleted-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L3 Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-created-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-deleted-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-creation

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-deletion

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-creation-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-deletion-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-creation-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-deletion-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-creation-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-deletion-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-creation-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-deletion-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-creation-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-deletion-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-creation-recor

Description Enable automatic packet-capture for Custom FW4 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-deletion-recor

Description Enable automatic packet-capture for Custom FW4 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-creation-recor

Description Enable automatic packet-capture for Custom FW6 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-deletion-recor

Description Enable automatic packet-capture for Custom FW6 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dslite-records-sent-failure

Description Enable automatic packet-capture for Dslite Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

nat44-records-sent-failure

Description Enable automatic packet-capture for NAT44 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat64-records-sent-failure

Description Enable automatic packet-capture for NAT64 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-ext-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Ext Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-dslite-records-sent-failu

Description Enable automatic packet-capture for Port Batching Dslite Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat44-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat64-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-dslite-records-sent-fa

Description Enable automatic packet-capture for Port Batching V2 Dslite Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat44-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat64-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-dslite-records-sent-failur

Description Enable automatic packet-capture for Port Mapping Dslite Event Records failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat44-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat44 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat64-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat64 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-dslite-records-sent-failu

Description Enable automatic packet-capture for Dslite Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw4-records-sent-failure

Description Enable automatic packet-capture for FW4 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw6-records-sent-failure

Description Enable automatic packet-capture for FW6 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat44-records-sent-failur

Description Enable automatic packet-capture for Nat44 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat64-records-sent-failur

Description Enable automatic packet-capture for Nat64 Session Event Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.150.417 visibility packet-capture object-templates netflow-monitor-tmpl trigger-stats-inc

Configure stats to triggers packet capture on increment

trigger-stats-inc Specification

Parameter	Value
Type	*Configuration Resource*
Element Name	trigger-stats-inc
Element URI	/axapi/v3/visibility/packet-capture/object-templates/netflow-monitor-tmpl/{name}/trigger-stats-inc
Element Attributes	trigger-stats-inc_attributes
Partition Visibility	shared
Schema	`trigger-stats-inc schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/packet-capture/object-templates/netflow-monitor-tmpl/{name}/trigger-stats-inc

custom-deny-reset-event-fw4-records-sen

Description Enable automatic packet-capture for Custom FW4 Deny/Reset Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-deny-reset-event-fw6-records-sen

Description Enable automatic packet-capture for Custom FW6 Deny/Reset Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-iddos-entry-created-records-s

Description Enable automatic packet-capture for Custom FW iDDoS Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-iddos-entry-deleted-records-s

Description Enable automatic packet-capture for Custom FW iDDoS Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-fw-sesn-limit-exceeded-records-s

Description Enable automatic packet-capture for Custom FW Session Limit Exceeded Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-c-tunnel-event-records-sent-

Description Enable automatic packet-capture for Custom GTP C Tunnel Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-deny-event-records-sent-fail

Description Enable automatic packet-capture for Custom GTP Deny Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-info-event-records-sent-fail

Description Enable automatic packet-capture for Custom GTP Info Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-gtp-u-tunnel-event-records-sent-

Description Enable automatic packet-capture for Custom GTP U Tunnel Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l3-entry-created-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L3 Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l3-entry-deleted-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L3 Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-created-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-deleted-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-creation

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-deletion

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-creation-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-deletion-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-creation-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-deletion-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-creation-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-deletion-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-creation-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-deletion-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-creation-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-deletion-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-creation-recor

Description Enable automatic packet-capture for Custom FW4 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-deletion-recor

Description Enable automatic packet-capture for Custom FW4 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-creation-recor

Description Enable automatic packet-capture for Custom FW6 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-deletion-recor

Description Enable automatic packet-capture for Custom FW6 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dslite-records-sent-failure

Description Enable automatic packet-capture for Dslite Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat44-records-sent-failure

Description Enable automatic packet-capture for NAT44 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat64-records-sent-failure

Description Enable automatic packet-capture for NAT64 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-ext-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Ext Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-dslite-records-sent-failu

Description Enable automatic packet-capture for Port Batching Dslite Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat44-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat64-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-dslite-records-sent-fa

Description Enable automatic packet-capture for Port Batching V2 Dslite Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat44-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat64-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-dslite-records-sent-failur

Description Enable automatic packet-capture for Port Mapping Dslite Event Records failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat44-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat44 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat64-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat64 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-dslite-records-sent-failu

Description Enable automatic packet-capture for Dslite Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw4-records-sent-failure

Description Enable automatic packet-capture for FW4 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw6-records-sent-failure

Description Enable automatic packet-capture for FW6 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat44-records-sent-failur

Description Enable automatic packet-capture for Nat44 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat64-records-sent-failur

Description Enable automatic packet-capture for Nat64 Session Event Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-created-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Created Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-nat-iddos-l4-entry-deleted-recor

Description Enable automatic packet-capture for Custom NAT iDDoS L4 Entry Deleted Records Sent Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Port Batch Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-creation

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-dslite-deletion

Description Enable automatic packet-capture for Custom Dslite Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-creation-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat44-deletion-

Description Enable automatic packet-capture for Custom Nat44 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-creation-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-batching-v2-nat64-deletion-

Description Enable automatic packet-capture for Custom Nat64 Port Batch V2 Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-creation-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-dslite-deletion-rec

Description Enable automatic packet-capture for Custom Dslite Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-creation-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat44-deletion-reco

Description Enable automatic packet-capture for Custom Nat44 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-creation-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-port-mapping-nat64-deletion-reco

Description Enable automatic packet-capture for Custom Nat64 Port Map Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-creation-re

Description Enable automatic packet-capture for Custom Dslite Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-dslite-deletion-re

Description Enable automatic packet-capture for Custom Dslite Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-creation-recor

Description Enable automatic packet-capture for Custom FW4 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw4-deletion-recor

Description Enable automatic packet-capture for Custom FW4 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-creation-recor

Description Enable automatic packet-capture for Custom FW6 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-fw6-deletion-recor

Description Enable automatic packet-capture for Custom FW6 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-creation-rec

Description Enable automatic packet-capture for Custom Nat44 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat44-deletion-rec

Description Enable automatic packet-capture for Custom Nat44 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-creation-rec

Description Enable automatic packet-capture for Custom Nat64 Session Creation Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

custom-session-event-nat64-deletion-rec

Description Enable automatic packet-capture for Custom Nat64 Session Deletion Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dslite-records-sent-failure

Description Enable automatic packet-capture for Dslite Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

nat44-records-sent-failure

Description Enable automatic packet-capture for NAT44 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat64-records-sent-failure

Description Enable automatic packet-capture for NAT64 Flow Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-ext-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Ext Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

netflow-v5-records-sent-failure

Description Enable automatic packet-capture for Netflow v5 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-dslite-records-sent-failu

Description Enable automatic packet-capture for Port Batching Dslite Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat44-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-nat64-records-sent-failur

Description Enable automatic packet-capture for Port Batching Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-dslite-records-sent-fa

Description Enable automatic packet-capture for Port Batching V2 Dslite Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat44-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat44 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-batching-v2-nat64-records-sent-fai

Description Enable automatic packet-capture for Port Batching V2 Nat64 Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-dslite-records-sent-failur

Description Enable automatic packet-capture for Port Mapping Dslite Event Records failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat44-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat44 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-mapping-nat64-records-sent-failure

Description Enable automatic packet-capture for Port Mapping Nat64 Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-dslite-records-sent-failu

Description Enable automatic packet-capture for Dslite Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw4-records-sent-failure

Description Enable automatic packet-capture for FW4 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-fw6-records-sent-failure

Description Enable automatic packet-capture for FW6 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat44-records-sent-failur

Description Enable automatic packet-capture for Nat44 Session Event Records Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-event-nat64-records-sent-failur

Description Enable automatic packet-capture for Nat64 Session Event Records Falied

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Default: 0

invalid_start_line

Description Enable automatic packet-capture for invalid start line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ser_connecting_err

Description Enable automatic packet-capture for Serv CTNG state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_response_err

Description Enable automatic packet-capture for Serv RESP state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported_command

Description Enable automatic packet-capture for Unsupported cmd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

bad_sequence

Description Enable automatic packet-capture for Bad Sequence

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cl_est_err

Description Enable automatic packet-capture for Client EST state erro

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

insert_tuple_fail

Description Enable automatic packet-capture for Serv Sel insert tuple fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_start_line

Description Enable automatic packet-capture for invalid start line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ser_connecting_err

Description Enable automatic packet-capture for Serv CTNG state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_response_err

Description Enable automatic packet-capture for Serv RESP state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

unsupported_command

Description Enable automatic packet-capture for Unsupported cmd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-severity

Specification	Value
Type	*object*

drop

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-inc

Specification	Value
Type	*object*

syn-cookie-verification-failed

Description Enable automatic packet-capture for SYN cookie verification failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	Value
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

syn-cookie-verification-failed

Description Enable automatic packet-capture for SYN cookie verification failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters
